In the strenuous life of modern Japan, it is not uncommon for young women to take lessons in the etiquet of tea drinking, according to an authority in the Washington Post. All Japanese women want to master the tea ceremonial and the art of flower arrangement.

The tea ceremony is unique in Japan. Once a secular pastime—it was originally introduced from China by Buddhist monks of the Zen sect—it has come to be a cult of esthetic entertainment. And no matter how westernized a Japaneses woman may become, she still enjoys taking part in the tea ceremony—one of the most impressive traditional remnants in Japan."

In this connection the etiquet of the tea ceremony provides that certain subjects are taboo while it is being carried out. The party isn't supposed to talk about money, or politics or religion but may discuss philosophy and traditions.

Use of Word "Blizzard"

The word "blizzard" in connection with snowstorms first was used in Iowa, according to Sir William Craigie, editor of a dictionary of American slang. He said the word originally was used as descriptive of a sudden, sharp blow, a shot from a gun or a verbal tongue-lashing. "In April, 1871," he writes, "an Estherville, Iowa, editor used the word to describe a heavy, blinding snowstorm which blotted the landscape from view." Craigie said neighboring editors picked up the word, and then during the severe winter of 1880-1881, blizzard was cemented into the language in connection with snowstorms.

Sassafras Long in Use

Sassafras has a definite connection with New England's early history, according to Prof. William L. Doran at Massachusetts State college. It was probably the first plant product to be exported from New England. The sassafras was believed to have medicinal value and to be "a plant of sovereign virtue." The tree was discovered by Bartholomew Gosnold, an English sailor, in 1602 on Cuttyhunk island, the westernmost of the Elizabeth Islands. The tree sold for three shillings a pound in England, so he shipped several back. The native sassafras is a highly ornamental tree. It is not commonly planted, however, and it is injured by severe winters but is hardy at points near the sea.

Origin of Name "White House"

The name "White House" is supposed to have been given the Capitol after it was painted white to efface the blackened walls, the result of its partial destruction by the British in 1814. There is some controversy about this, however, one claim being that it was so named because Martha Custis was owner of "White House" when she and Washington first met. It was first popularly known as the President's House, but by the year 1828 the nickname "White House" had come to be widely used.

Legendary Power of Lough Neagh

According to an Irish tale, Lough Neagh fishermen have petrified legs, and when they want to sharpen their razors, they merely turn up their trousers and use their shins as hones. No child visits Ireland without firmly planting a stick in Lough Neagh and vowing to return in future years, when, like the legs of the fishermen, it will have turned to stone.

Paris Has Flea Market

In addition to its bird market, horse market, diamond market and dog market, Paris has several flea markets. These were so named because their main sales were originally old clothes and rags, but they are jumble sales. A tour of the markets is still considered one of the tourist thrills in Paris.

A Real Saving

FOR READERS OF THIS PAPER

FRIENDS! We are combining our newspaper with these two great magazine offers, so that you can realize a remarkable cash saving on this year's reading. Either offer permits a choice of top-notch magazines with our paper, and, regardless of your selection, you will say it's a bargain.

YOU GET THIS NEWSPAPER FOR 1 FULL YEAR

Watch the list of highway motor accidents go up after the new speed laws go into force. It is hoped that the people who are responsible for increasing the speed laws will not be the first to suffer.

Mr. and Mrs. Ross Kitchener and son were presented with nice gifts by neighbours, previous to leaving Grahamsville, Sixth Line East, for their new home in Woodbridge.

The men's club of St. Nicholas church, Lakeview, were entertained last Thursday night at the home of Mr. and Mrs. C. G. Partridge, Port Credit.

Table No. 18, Dixie, Order of the Knights of the Round Table, held their first annual banquet in Bethesda United Church, on April 6th. The guest speaker of the evening was Prof. E. A. Corbett. Leslie Pallett, Jr., presided. Other speakers were: Harry Michie, Rev. G. F. Banks, Lindsay Death, and W. E. Gordon. Entertainment was provided by Lloyd Leaver, Miss R. Emberson and Miss V. Gowan.

Edgar Dauphin will represent Burlington High School and Miss Mary Reid, Milton High School, at the Coronation.

Mrs. Robert Orr, Hornby, visited with Bolton friends last week.

According to The Enterprise, Bolton will not go on Daylight Saving Time this year. They certainly are behind all other towns in the Toronto district.

Streetsville Veterans held another successful dance last Friday night in their Hall, when a goodly number was present. Ed. Lowden's orchestra furnished the music.

The Open Column

The chain letter racket has started in Peel again. The women-folk are at it now, using tea towels instead of dimes.

The county agricultural society is having publicity trouble. Directors wish the papers would lay off until a new agreement is reached with Miss Craig.

Brampton's main drag is gradually brightening up. Several new store fronts have been added in the past two months.

But the traffic tangle is still the same, Saturday night! What they need is a subway for through traffic.

And it will be worse, when the boxla season begins. No cars are to be parked in Rosalea.

The county will fight the removal of gates from Clarkson crossing. Engineer N. L. Powell appears before the Railway Board this month.

Easter parade note: Women's clothing becoming higher and fewer again.

Junior Institute project: How to make a clothes-closet with four orange crates. Senior farmers' project: How to fill the clothes-closet.

Editor of local contemporary will say, soon, "Time to take them off." Thanks, we don't wear them.

County Clerk Dave Wilson seems to be the only person in Peel who knows who owes for schools.

Clarkson again. Province wants a 54 foot bite off north side of Middle Road, but is marking time. Houses would have to be moved, at plenty of expense.

Georgetown Citizens Band needs $2,000 this year. New uniforms to buy since the band left the Lorne Rifles Regiment.

Brampton Citizens' Band will be in much the same spot.

Nothing more to be heard about the improvement of Port Credit harbor.

Brampton papers are thumbing noses at each other about J. S. Beck and Hon. Duncan Marshall. We are not amused.

War-whoops resound in Brampton. The Chinguacousy Indian Council has a charter.

NOTES

Mr. Fred Brown, of Clarkson, and Miss Phyllis Dullfin of Toronto, were married recently in Toronto.

Mrs. Fanny Milburn passed away at Cooksville last week at the age of 80. She was a native of Blanford, in Oxford County, and came to Cooksville 15 years ago. She is survived by two sons and two daughters. The funeral took place to Innerkip.

Mr. and Mrs. C. J. Boegel have moved from Cooksville to Lorne Park.

Mrs. J. Woodill of Cooksville has gone to a Toronto hospital for treatment.

Frank McLeod of Bolton was fined a total of $33.75 for having a hen pheasant in his possession. Pretty dear hen!

S. E. Bryan, Toronto, was fined $27.75 on a reckless driving charge. His car collided with that of Geo. Gear, on Sligo Hill, No. 10 Highway, Caledon.

Community Club Have Big Night

On Friday night, April 9th, 1937, for a half mile, cars were parked closely together in front of the Orange hall, Streetsville. It was the night of the annual euchre and dance given by the North Trafalgar Community Club. These entertainments always draw a large crowd, for they are always of the very best. And the proceeds are used to help a sad and weary traveller pulling hard against the tide. And they sure thank the good people of Streetsville who join with them in this good work. Some of them present that night were: Mr. and Mrs. Bunt, Mr. and Mrs. Bruce, Mrs. Lindsay, Mrs. Greig, Miss Edna Stephens, Mr. and Mrs. Farrell, Mrs. D. McCaughterty and son Will, Mrs. Longworth and daughter Margaret, Misses Alice and Joy Dudley, Mr. Lee, Mr. and Mrs. Ramsay, Mr. and Mrs. Jordan, Miss Mary Crozier, Mrs. D. Ross, Mr. and Mrs. Will Dudley, Mr. and Mrs. Shepard and daughter Ruby.

All the available space on the spacious ball room floor was taken up with 24 tables of euchre, where 96 enjoyed progressive euchre until eleven o'clock. And about an equal number of people sat on the benches along the walls, and discussed the events of the past, present, and dipped into the future as far as the human eye can see. At eleven thirty adjournment was made to the upstairs restaurant room, where the club ladies, who have catered so often to the human needs, had just what everyone with the most whimsical appetite found, victuals in abundance to suit their taste.

While lunch was being served the ballroom was prepared for dancing. Before dancing started, Mrs. Will Leslie, the president of the club, presented the prizes to the winners. Ladies, first, Mrs. Cliff May; second, Miss Ruby Shephard. Gents, first, Norman Rutledge; second, Maurice Williamson. Then a beautiful quilt was hung up where all could see and admire. The president said, the patchwork had been done by Mrs. Cliff and the quilting by club members. Then over three hundred contestants' names for this valuable prize was put in a bag, and the lucky name drawn was O. Henry. Then the local orchestra, Mrs. Cliff May and Will Leslie, assisted by Miss Mary Crozier, provided music for the dancing. And anyone that couldn't dance to that music on that floor I would venture to say they can't dance at all. Then Billy Simmons, an old time floor manager, got into the old singsong. All to the centre and all grand chain, then promenade back to your place again. Right and left and gents watch out, don't swing your lady till her shoes wear out. Promenade all and doe se doe, then ladies to the centre and gents don't go. Then Jim Urquhart took a turn at the calling off. Jim is a Scotchman and is not of a poetical turn like Billy but he kept excellent time to the music. Then memory wandered back to the old-time house parties when Pete Shea, Will Campbell, Charlie McGregor, Johnston Rodgers were the popular floor managers when all these old-time dances were popular. Circassian Circle, First Set of Quadrilles, Lancers. Then the long dances with the ladies on one side and gents on the other. These two were very popular, Pattanellie and the opera reel. Then would come the Scotch reel, the Highland Fling and the clog step-dancing, and, oh boy, couldn't the Rodger boys clog. They sure could! Cliff May says he has been playing hockey all winter with the boys and baseball all last summer and they thought they had a whale of a time. Now he says if the old house parties would only come back that would be all the enjoyment he would want.

The old house, the dear old house,
With our mother and our dad,
And oh! what pleasant memories now
Of the happy times we had.

We sometimes were rebellious then
And thought them strict and cross,
It is always better in our homes
When the old folks are the boss.

This club is doing their very best,
Bringing back old scenes once more
And in their homes their social nights
Are like the times in days of yore

And now we all rejoice to see
What these social nights are worth,
They are making all their homes once more
Like a little heaven on earth.

The club held a social night at the home of Mr. H. Campbell on Monday, April 12th, where the club members and friends had a most enjoyable time.

SANDY.

LET US SMILE

The burly truck driver leaned out of his cab and soundly abused the young man in the stalled car. The girl stood it as long as she could.

Girl (protesting) — Jack, surely you're going to say something to that surly lout.

Jack—You bet I am. Just wait until I get the car started.

Mrs Augusta McCollum

Listening to the world through her radio, Mrs. Augusta McCollum is but little discouraged that she cannot take a more active part in life.

Celebrating her 86th birthday in the room to which she has been confined by a heart ailment for the past dozen years, she is well versed in the affairs of the present day, and finds some little cause for alarm in the spread of strikes.

"These strikes are terrible," she said yesterday. "There are so many people out of work that you would think people would be glad of employment when they had it. I always worked until I couldn't work any longer, and my children are real workers. I don't know what they would do if they had to be idle."

Mrs. McCollum gained a rather grim acquaintance with toil when she and her husband moved to Manitoba and farmed for 11 years in a new, almost unopened country. Her husband was the first assessor, the first magistrate of the district near Oak River and Rapid City in the prairie province. Her heart was none too strong at that time, but she carried on the duties of a farm wife without complaining.

Born Near Streetsville

Born at Alpha Mills, a hamlet between Meadowvale and Streetsville, on the Credit River, which has since disappeared, she was Augusta Grennan, daughter of Hubert and Matilda Grennan. Her parents died when she was still a child and she was brought up by an uncle, Charles Folwell.

She was one of many young ladies of Streetsville who worked for the erection of the present United Church and her memories run back to the days of the older Methodist Church on Maiden Lane in Streetsville. She often visited the Presbyterian Church, and there was the best of feeling between the Methodist and Presbyterian congregations until the Presbyterians decided to install an organ in their church. This act not only made the Methodists a trifle jealous, but also introduced a schism in the ranks of the Presbyterians, many of whom believed it to be profane to "worship the Lord with machinery," she stated.

"You do feel the cold, I can tell you that," said Mrs. McCollum, when she was asked if it were true that although the cold was more intense during the prairie winters inhabitants of the district did not feel the severe temperatures so keenly. She suffered greatly from the cold, and after eleven years in Manitoba she moved, with her husband and family, back to Aurora, Ontario. Later, they took up residence in Brampton, where she has been living for the past 32 years.

Charles E. McCollum, who died eleven years ago, was for a number of years deputy sheriff of Peel County. They were members of St. Paul's Church until his death and the poor condition of her health prevented her from attending services. Mrs. McCollum has not lost sight of her religious faith, however, for she derives a great deal of comfort from radio reception of church broadcasts.

The last of her parental family, Mrs. McCollum has two sons, Charles of Montreal and Russell in Essex County, and three daughters, Mrs. M. Davis, Oshawa; Miss Annie and Miss Mabel McCollum at home. There are also seven grandchildren and two great-grandchildren.

District News

The new postage stamps bearing the portrait of King George VI are now on sale in Streetsville.

Lorne Park Girl Guides will hold a pancake supper on April 23rd.

Peel County Music Festival will commence in Clarke Memorial Hall, Port Credit, Wednesday, April 21st. 1100 entries have been received.

Mr. Gordon Graydon, M.P., for Peel, will have a new flag placed on top of Port Credit post office soon as the old Union Jack is pretty well shot.

Wednesday, May 12, Coronation Day, has been proclaimed as a public holiday by the Dominion Government. No doubt it will be observed as a holiday throughout the Dominion.

Dr. J. C. Alexander, veterinary surgeon, passed away at his home in Mono Road, North Peel, on April 7th, aged 88. He was a native of Chinguacousy, a member of the United church, a Conservative, a Mason and Orangeman.

The license for your radio expired on April 1st. But it will not be an April Fool joke if you neglect to renew it.

Mr. and Mrs. Garnet McGill and son, Port Credit, visited with his parents, Mr. and Mrs. Henry McGill, Erindale, last week.

Mrs. Canon, of Port Credit, leaves for England at the end of April.

We are always glad to receive personal items for our "Personal" column.

District News

There was a large audience present at St. Andrew's Presbyterian Church, Streetsville, last Sunday night, to hear the choir of Morningside Presbyterian Church, Toronto, render the sacred cantata, Maunder's "Olivet to Calvary." The choir consisted of 25 voices and the cantata was exceptionally well rendered. Those present were delighted with the music and all will be pleased to have another chance to hear this splendid organization. The pastor, Rev. J. Y. Fraser, conducted the service and introduced the choir and its leader.

No. 193 was the number which won the lucky number prize at the Eastern Star at home on April 2nd, and Mrs. Harry Wolfe was the lucky winner.

Peel Chapter, No. 96, Order Eastern Star, Streetsville, will hold election of officers for the ensuing year, at the regular meeting Monday night, April 19th. All members are requested to be present.

Streetsville Masons will celebrate the diamond jubilee of the institution of the lodge, on May 4th, when the Grand Master, M.W. Bro. A. J. Anderson, and many other notable masons wil be present.

Jeanie Gordon L.O.B.A. celebrated the 15th anniversary of their birthday one night last week. A pleasant part of the evenin~ was the presentation of Past Matron's Jewels to Sisters Rutledge, Campbell and Adamson.

Mr. Elmer Waite has an Oxford ewe which gave birth to four lambs recently, and another one with three lambs—all doing well. This is considered to be an unusual occurrence.

Mrs. Fanny Merrick passed away at Brampton on April 10th, in her 85th year. Interred at Brampton.

Emerson Centennial Featherston died in Toronto on April 9th. He was a son of the late Emerson Featherston of Trafalgar. Interment took place in Prospect Cemetery.

Albert Maas passed away in Toronto on April 10th, and the funeral took place to Mount Pleasant cemetery on Tuesday. He is survived by his wife, formerly Ethel De Nure, two brothers, Fred, Streetsville, and Wallace, Toronto, and a sister, Mrs. Walter Bailey, of Streetsville. Deceased was a Presbyterian. He formerly lived at the old home on the Town Line, Trafalgar, near Streetsville.

Mr. Geo. Bibby and family and Mr. and Mrs. King Hollingshead have moved into the house lately vacated by Mr. C. Bounette, who moved to Toronto recently.

At the annual meeting of Clarkson Dixie Fruit Growers' Association the following officers were elected: President, H. A. Pattinson; vice-president W. H. Speck; secretary-treasurer, H. Pinchin; directors, F. J. Watson, Charles E. Watson, M. H. Watson, Robert Pickett, Donald Pallett, H. Stewart, C. G. Speck, G. D. Pattinson, T. Lyons and W. M. Fletcher.

PERSONALS

Mr. W. C. Andrew made a business trip to Windsor and Detroit over the week-end.

Mrs. Harris of Grimsby is visiting with her sister, Mrs. A. E. Graydon.

Mr. Hunter Arnott, Streetsville, attended a meeting of Peel County Jersey Club, at Caledon Mountain House Lodge recently and was one of the winners in the euchre contest.

Mr. Ken McIlwrick is able to be around again after a short sickness.

Margaret Gail, infant daughter of Mr. and Mrs. Morley Funston, Hamilton, was christened in St. Andrew's Presbyterian Church, here, on Sunday morning by Rev. J. Y. Fraser.

Miss Mary Fraser, R.R. 3, Streetsville, was operated on for appendicitis at a Toronto hospital last Saturday.

Mr. and Mrs. Harry Rayfield visited friends in Toronto over Sunday.

Mrs. D. A. Hewgill has been visiting her sister, Mrs. James Mitchell, Weston, for several days.

Mr. and Mrs. H. G. S. Jeffrys, Weston and son, visited with Mrs. Hicks and Miss Hicks on Sunday.

Love Huntress

By H. GLYNN-WARD

Claudia Townsend meets Dick Whalen at a hockey game in Seattle one night. Her interest in Dick infuriates Wallace Bornell, rich young lumberman, who wants to marry her. To get Dick out of the way, Wallace offers him a job in one of his lumber camps in British Columbia. Claudia, meanwhile, persuades her father to give Dick a job in his office. To settle the matter, she and her father go to Victoria for a few days. Claudia wires Dick on Friday to tell him that the job is his. When the telegram comes, however, Bornell manages to intercept it. Hurt by Claudia's evident failure to keep her promise Dick accepts Wallace's offer and leaves immediately for the lumber camp at Burns Lake. There he is put on as scaler.

CHAPTER IV.

Dick found that he had plenty to do, following up every fallen tree that was to be carted, reckoning up its length and girth. He was in and out of the office with his figures.

The office walls were covered with maps and blue prints of timber limits, and Dick soon came to know the lie of the country and the holdings of the Bornell Company well.

In camp he soon realized that he was none too popular. The men resented him as being a cut above themselves. They looked on him with distrust, ready for a chance to quarrel.

The chance came one night at supper. The men had declared they were tired of pumpkin pie, and had adjured Ching Lo to have no more of it. On this particular night, there was only pumpkin pie.

They shouted for the cook and swore at him.

"Velly solly, punkin pie only one," whimpered Ching Lo. "Dlied apple pie all gone, aplicot all gone!"

"That's no excuse, you lazy devil!" shouted the men.

One man took up a pie and hurled it at the frightened Chinaman. The men laughed and rose to their feet, signal for a mob.

Ching Lo was cut off from the kitchen door, and he flattened himself into a corner. In another moment he would have been mobbed, but Dick Whalen was too quick for them.

He was on his feet and round the table in a flash. He caught up a chair and leaped in front of Ching Lo, ready for them.

"Back to your seats, you bullies!" he cried.

Then a real clamor rose. They would have come at him, forty to one, but the o r door opened suddenly, and Manager Braddock appeared.

At sight of him the men slunk back to their seats, the cook slipped away, and Dick put down his chair. So the incident passed. But from then on Dick Whalen was left severely alone.

A week or so after the cookhouse incident, Dick tripped in the woods one day, his snowshoe coming in contact with something protruding from under the snow. He found that he had stumbled against a survey post that the frost had loosened in the earth. He drove it in again with the flat of his axe, idly noting the figures on it as he did so.

"W ½ Lot 30," he read. Dick Whalen had an accurate mind and an excellent memory. He committed the figures to memory and repeated them during the afternoon. They puzzled him. He knew the technical description of these timber limits. This part of the country was charted by the section, and as far as he could remember the Bornell holdings read East of Lot 25!

Later on he found himself alone in the camp office, and he made a careful examination of the maps of the Bornell timber limits. He was right—they did not extend beyond Lot 25! All the timber rights of this land they were working now belonged to another company!

Dick stood in front of the map, shocked with the realization that the Bornells were operating on another company's land, stealing timber!

At that moment the overseer put his head in at the door.

"Don't you want your supper? Whistle sounded long ago!"

"Look here, Jenkins—" Dick said, and showed him the map and what he had found out. "Have the Bornells a concession on this land?"

The overseer looked at the map, then back at Dick with a side smile.

"So long's I get my pay this don't concern me—nor you neither!" he said. "If you take my tip you'll leave things alone."

"That's all very well, but I like to know the rights and wrongs of the work I'm engaged in," was Dick's reply.

"Very well, very well, you tell it to the boss when he comes home." Jenkins went off to the cookhouse.

Dick followed slowly. He would certainly speak to Braddock about it, and perhaps write to Wallace Bornell.

Braddock returned late, but the overseer sat up for him and the two were closetted in the office in close conversation for a long time.

At breakfast time Dick asked the night-watchman, a local man, if he knew who owned the timber limits to the east of them.

"Some rich guy bought 'em to hold till the market's right," was the answer. "Hear he's in South America."

Braddock was unusually affable when Dick went into his office. After the routine work, Dick broached the subject of the limits.

Braddock surveyed Dick with a smile.

"Accusing us o' stealing are you?"

"Of course not. I thought there must be some mistake. I'm not accusing anyone of anything."

"Looks like it to me, Mister Whalen! You think you're powerful clever, because you see figures on a survey post that trips you up, don't you?"

Dick started. He had not mentioned that incident to Braddock. The overseer must have told him that. So they had talked this over!

"I'm only asking for a simple explanation of this, Mr. Braddock!" Dick said. "I'd like to be sure that Wallace Bornell knows of it."

Braddock changed his tactics. He got up and examined the maps on the wall with his back to Dick for a minute. When he turned, he was smiling pleasantly, his eyes cunning.

"Sure, young feller, there's no mistake here. I was only feeling you out to see how much you know about your work! Yes, Mr. Wallace Bornell has a concession to operate on this land, all right. Now be off on those slick snowshoes of yours."

Dick shut the door behind him and slid away across the lake. He felt sure that Braddock had been lying. The question was—whether Wallace Bornell was a party to the theft of all this blue spruce, or whether Braddock was feathering his own nest.

It was a serious question, and Dick was not the man to leave it unsolved.

That afternoon Braddock left on a rush journey to Seattle. Before he left he said to Dick casually:

"I'll be away for about ten days, Whalen, and I'll ask Mr. Wallace to give me a letter for you to say he's not stealing anything!"

Dick saw through this attempt to throw sand in his eyes, but he just nodded and wished the other a successful trip.

That afternoon Claudia's image danced before him even more vividly than usual. In the evening after supper he sat on the edge of his bunk and wrote to her, a carefully formal letter, telling of his whereabouts, and saying that he had been disappointed at not hearing from her.

(To be Continued.)

"The church is a human institution, fashioned to help man in his relations to God and to his fellow man."

— John D. Rockfeller, Jr..

Don't gamble with Weak Yeast!

BAKE WITH ROYAL
—always full strength

Each cake of Royal is protected by an air-tight wrapper

REALLY delicious bread demands an absolutely pure yeast—one that's full strength and pure. Otherwise, you run the risk of spoiled dough — heavy gray texture, a sourish taste and smell.

You can always be sure of Royal Yeast. Every cake comes sealed in an air-tight wrapper — secure against contamination, its full leavening power assured. And Royal is the *only* dry yeast that has this special protection.

7 out of 8 Canadian housewives today insist on Royal when they bake with a dry yeast. They know it is reliable. For fifty years Royal has stood for highest quality.

Be sure to ask for Royal when you buy dry yeast. Don't risk baking failure with weak inferior yeasts.

Send for FREE Booklet

To get uniform results in bread-baking, *it is important to keep the sponge at an even temperature.* The "Royal Yeast Bake Book" gives instructions for the care of dough. Send coupon for *free* copy of the book, giving 23 tested recipes for tempting breads, coffee cakes, buns and rolls.

Crocheted "Luxury" At Budget Cost Is Laura Wheeler's Filet Spread!

CROCHETED SQUARE PATTERN 1420

Your bedroom will be the "show room" of your home, once you've crocheted this handsome spread that's a joy to behold! Companion filet squares of delicate rose design (in a simple "repeat" pattern that's easily learned), combine together to form it. Or make a scarf or table cloth. It's inexpensive and smart in string! Pattern 1420 contains directions and charts for making the 10 inch squares shown and joining them to make a variety of articles; illustrations of them and of all stitches used; material requirements.

Send 20 cents in coin for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 Adelaide St. W., Toronto. Write plainly PATTERN NUMBER, your NAME and ADDRESS.

Woman's World

By Mair M. Morgan

A Time-Saving Dessert

Now that spring is practically "in the bag" let's have springtime on the family table. However, spring fever makes everyone a little restless and no one wants to spend too much time in the kitchen preparing foods. There are so many other things to do in the spring, gardens to care for long walks to hunt for pussywillows and homes to re-decorate that it seems a shame to spend much time over the stove. A quick-setting jelly is the answer to many of your dessert problems and is such a time-saver that you will have hours longer to spend on other interests. Quick-setting jelly desserts just melt in your mouth and the rapidity with which they disappear is all the proof you need that they are timely and poular desserts, no matter what season you serve them.

Though nature is lavish with her colors in the spring, green is predominant and so a green jelly dessert is very appropriate for this particular time of year. Lime is a popular flavour and the perfect shade and when garnished with apricots, you have a dessert that comes up to all the requirements — flavoursome, good-looking and above all — time-saving.

Apricot and Lime Dessert

1 package of quicksetting lime jelly; 1 pint hot water; Halves canned apricots; Cream cheese balls.

Dissolve jelly in hot water. Turn in to mold. Chill until firm. Unmold. Garnish with apricot halves and cream cheese balls. Serve with toasted crackers. For salad, serve with mayonnaise. Serves 4.

RECIPES FROM BOTTLES

Dishes prepared from foods contained in glass bottles or jars should be particularly appealing. In many cases these are home-made dainties—made from one of grandmother's old recipes. In all cases you are sure the food is in perfect condition — for it may be viewed through the sides of its sparkling and transparent glass container. Take the following for example! What could be better?

Shrimp with Mushrooms

2 cups cooked shrimp; ½ cup of mushrooms; Juice of ½ lemon; 2 teaspoons tomato sauce; ½ cup stock; few bread crumbs.

Fry shrimps in plenty of butter. Add remaining ingredients, season with salt, pepper and grated nutmeg. Then Sprinkle with parsley. Serve on plain or toasted bread.

Crab Meat in Aspic

2 tablespoons gelatin; ¼ cup cold stock; 1 cup hot stock; ½ cup chili sauce; 2 tablespoons lemon juice; 2 shopped pickles; 1 lb. crab meat; 1 cup celery, diced; Salt; 2 drops of tabasco sauce.

Soak gelatin in cold stock. Add hot stock, stir until dissolved. Cool slightly, add chili and tabasco sauce, lemon juice, and salt to taste. Cool until the mixture begins to thicken. Add chopped pickles, celery, and crab meat. Place in individual molds and set in ice-box to harden. Serve garnished with lettuce, watercress or nasturtium leaves. Bouillon cubes may be substituted for stock.

Spiced Pot Roast

Empty sliced pot roast into skillet, heat thoroughly. Remove meat from skillet. To the hot meat juice in the skillet add:

1 tablespoons lard; 1 small onion chopped fine; 4 bay leaves; ⅛ cup vinegar; 3 tablespoons sugar; 4 whole cloves.

Thicken with three tablespoons of flour rubbed smooth in ⅛ cup cold water. Place meat back in this mixture — heat thoroughly. Serve piping hot.

"How far can individual freedom march with communal welfare? On its solution depends the future of civilization."

—F. Yeats Brown.

"There is no intrinsic vice in wealth: the devil is in our greed."

—Sir Rabindranath Tagore.

"The navy, like the air force, believes the best form of defense is a bold offensive."

—Sir Samuel Hoare.

"We rearm on sea, in the sky and on land because it is our imperious duty in face of the armaments of others."

— Benito Mussolini.

Would Engage Unemployment To Repair Schools

Suggestion Made in House of Commons As Relief Measure

OTTAWA. — Improvement of rur- Church (Cons., Toronto-Broadview), lief measure was urged in the House of Commons this week by Dr. J. J. McCann (Lib., Renfrew South) as the 1937 relief bill was considered in committee of the whole.

Many rural schools were in a dilapidated condition, said Dr. McCann, and local authorities had no money to improve them. If the government would appropriate a sum of money for rural school rehabilitation it would provide much employment throughout the country and also improve the accommodation for the children.

Scattering employment throughout the country in this way would ease the tension of the cities and check the drift of unemployed from the country to the urban centres where they were becoming a serious burden on the taxpayers.

The bill authorizing agreements with provinces for gratis-in-aid of direct relief and relief works received second reading without debate but ran into a long discussion in committee.

Labor Minister Rogers promised to consider the position of large municipalities when agreements were made with the provinces in answering questions from T. L. reinforce police organizations to

Dr. McCann urged the government to initiate a five-year plan, spending $1,000,000 a year on the reconstruction of rural schools. He also recommended a continued program of road building to open up the northern mining areas.

C.C.F. Leader J. S. Woodsworth agreed the suggested program for reconstruction of rural schols was a good one but he was not satisfied with the system being followed of passing the burden along from federal to provincial to municipal governments.

Mr. Woodsworth feared a continuation of present policies would lead to unrest and he asked why the government did not take steps to avoid trouble now rather than to build up reinforced police organizations to redress anticipated evils that could be prevented.

WILD LIFE AT THE SOO

Stick around the Soo for a while and you are bound to meet moose, deer, bears, wolves, porcupines, partridge and other unusual visitors, including Michigan and Ontario editors.

Notwithstanding special legislation to encourage the rural population of Denmark to remain in the rural districts, the movement to the urban districts has continued, the percentage of the total population engaged in agriculture having dropped gradually in the 50 years (1880-1930) from 51 ot 31.

VOICE of the PRESS

CANADA
THE EMPIRE
THE WORLD
AT LARGE

CANADA

200 Are Bachelors

Beverley Baxter reports his discovery that out of 615 members of the British House of Commons approximately 200 are bachelors. Odd that voices from among the latter should express most concern about Britain's falling birth rate. Mr. Baxter isn't a bachelor, but he, too, looks into the future with some misgivings as to what may happen to a depopulated Empire whose vast territories are the envy of races which threaten to overflow their present boundaries. Canada' with but eleven millions scattered over its gigantic area, might be well advised to take rather a live interest in the subject. —Maclean's Magazine.

Took Messenger's Word

A telegram was being delivered by a local telegraph office messenger boy and as the door was opened to him he handed the telegram to the one who had answered his knock, and shoving his book out said nonchalantly, "Just put your John Henry here, please." Arriving back at the telegraph office, he looked at his book and found, written in a scrawling hand "John Henry." The recipient of the "wire" had taken the mesesenger boy at his word.—Goderich Star.

Floral Tributes

Several weekly journals of Ontario are discussing the question as to whether it is advisable or otherwise to publish the names of individuals contributing floral offerings on the death of a friend. Some say yea, others say nay Once upon a time in this Province it was an almost universal practice to publish both the names of individuals and of organizations. Then Professor Goldwin Smith, himself a newspaper man at times, pointed out that the practice but tended to invite more and more of such offerings, many of them contributed solely for the sake of publicity, and not a few of them the contributions of friends none too well able to afford the expense. And in thus referring to floral tributes he mentioned wedding presents coming from individuals. Publication of these also he regarded as simply a bid for a large number. A man whose opinions carried weight with nearly everybody, except in matters of trade, a large number of newspapers began to pursue a different course in respect of obituaries and reports of weddings. As to flowers, would they not be moree fitting in sick rooms in cut form than in evidence as wreaths after the patients have closed their eyes in death, and see not, neither appreciate an aroma?—Renfrew Mercury.

The Blushing Bride

The demure young bride, her face a mask of winsome innocence, slowly walked down the aisle, clinging to the arm of her father. As she reached the platform before the altar, her dainty foot brushed a potted flower, upsetting it. She looked at the dirt gravely, then raised her large child-like eyes to the sedate face of the old minister and said, "That's a hell of a place to put a lily."—Edmonton Journal.

Letting Them Go

What has become of the schemes to get the unemployed together for mutual help in small matters, for organizing entertainment for themselves among themselves, for encouraging them to develop hobbies and so to take their minds off their condition? There are certain things with which those on relief have to put up; they can hardly be provided with funds to enable them to give presents; but there are other things like notepaper and a few stamps that private charity might take upon itself to supply. — Saint John Telegraph Journal.

Speed and Safety

The relation of speed to safety is entirely dependent upon conditions. In a narrow street with parked cars, the motorist who drives at thirty-miles an hour ought to be in the insane asylum. And the Legislature which permits it ought to keep him company. The sad fact is that too many motorists, once the legal limit is stepped up to thirty miles in cities, will think that this date is permissible under any circumstances. They will drive at thirty or a little more and consider that they are driving at what the Legislature has declared to be a safe rate of speed. — Toronto Telegram.

Incredible But Possible

The idea of a nation whose farms produce nearly 3,000,000,000 bushels of grain a year and support 178,000,000 head of edible live stock, not to mention poultry, fruit and dairy products, going hungry in thirty-five years' time calls for a lot of imagination. But, fanciful as it may seem to the man in the street, it is nothing less real than the possible consequence of soil erosion in the United States.—Toronto Globe and Mail.

Problem of Cheese

When butter is shipped to Britain it has to compete with producers in Australia, New Zealand, and also Denmark, which makes marketing very difficult. On the other hand, apparently, Canadian cheese is not subjected to this keen competition.

Hence it would appear to be the part of wisdom, with increasing milk production in Canada, to build up the export trade in cheese. The United States, under the reciprocity pact, is prepared to purchase large quantities of Canadian cheese, and the British market is ready to absorb a greater supply.

The problem for the cheese-maker is to solve the matter of prices paid to the farmer, so that he will get a fair share of the price paid by the consumer. — Brantford Expositor.

It Can Be Banished

In spite of the marked progress during recent years as a result of immunization campaigns, we cannot say that diphtheria has been really conquered in Canada as long as the disease claims 160 lives in three months, as the latest report of Bureau of Statistics indicates. But the means of complete conquest lies readily at hand if only individuals and communities will use it.—Brockville Recorder and Times.

Dafoe's "Pay

The income of the Dionne quintuplets to date is said to over half a million dollars. Dr. Dafoe, who piloted them into the world and has constantly cared for them ever since, has received about $4,000 for his services. The advertising agents must have got a bigger commission than that. — Stratford Beachon-Herald.

THE EMPIRE

Duke of Windsor's Arms

Arms for the Duke of Windsor have been recorded at the Heralds College in virtue of a Royal Warrant.

The Duke's Arms are those which he bore as King differenced with a label of three points argent, on the central point of which is an Imperial Crown proper. The Crest and Supporters have similar labels, and the Coronet is that of a Sovereign's son, which is different, in that it has no arch, from the Coronet which the Duke had as Prince of Wales.

This is the first time that Arms have been granted for a former Sovereign, and in virtue of that the Imperial Crown is used for the first time as a distinction on a label of difference.—London Times.

Fill The Bread Bin

What's the good of a watch-dog on the doorstep if there's no food in the larder? Mr. Lloyd George indicts the Government for what he calls their neglect of the weakest front of all—the food front. We have fewer men on the soil, fewer acres under the plough, than in 1914. At the same time we are far more vulnerable to attack upon our ports and harbours. Mr. Lloyd George had charge of Britain when this nation had less than three weeks' supply in its bread bins. He deserves a hearing when he advises "Grow more food at home."—London Daily Express.

Rule, Britannia!

One in the eye for the Dismal Jimmies who are always telling us just how badly beaten we are going to be in the next war. Sir Samuel Hoare, First Lord of the Admiralty, reassures the nation about the supremacy of the Fleet. He puts paid to the old story that air attack will smash the Navy. The plain man will be pleased at this plain speaking. It is an agreeable experience to hear a Cabinet Minister inspiring hope by the means of common sense.—Sunday Chronicle.

There are three types of agricultural labourers in Chile. The "inquilinos," or resident farm hands, receive roughly from 5 to 20 cents a day with food (bread and beans sufficient for two meals-, shelter, the use of one or two acrese for his own food and feed requirements, an ox, horse, or mule, and sometimes a cow. The second type of farm labourer is thte "peon-voluntario" or "afureino" itinerant harvesters who are paid 31 to 41 cents per day during harvest time. The third type is the "ganan" who is employed only on temporary jobs at from two to 25 cents per day, with two meals and a crude shelter.

The aggregate value of all field crops in Canada in 1936 is now estimated at $599,421,400 as compared with $511,872,000 in 1935.

Doctors Favor Goose Grease

Grandma's Cold Remedies Upheld; Rum "Cure" Called Harmful

SEATTLE — Grandmother's mustard plasters, hot foot baths and the goose grease rubs go marching on but grandpa's cold remedy — a pint of whiskey — drew frowns here today at a regional meeting of the American College of Surgeons.

They insisted that the best prescription is to go to bed and stay there.

"Old remedies for colds haven't been greatly improved," Dr. Perry G. Goldsmith of Toronto, Ontario told the group.

He said grandma's hot beef tea may have been evil tasting, but it was sound medicine.

Other physicians backed him up too with recommendations for mustard plasters and goose grease rubs.

Dr. Wilson Johnston of Portland, Oregon, said Dr. Goldsmith's grandmother's cures were excellent, but that grandpa's whiskey cure was harmful.

"Liquor tends to produce an acid condition in the blood stream which already has too high an acid content," he said.

Horse Shortage

Higher Prices Will Prevail As Result Says University of Saskatchewan Head

SASKATOON.—The serious shortage of horses which has obtained in Saskatchewan for several years was not reflected in the low bidding at the Regina Winter Fair, when some horses went unsold and a number of animals went at from $20 to $25 per head. These low prices are only a temporary feature of the farm power situation, according to Dr. William Allen, farm management department, University of Saskatchewan. Dr. Allen said that a real shortage of horses will continue in Saskatchewan for several years and higher prices will prevail. The low prices at Regina were attributed to factors outside the province.

The horse population of Canada in June 1936 was 920,000, a reduction of 12,000 from the previous year. While tractor sales have been increasing the numbers sold still have not been enough to take care of depreciation of tractors already on farms.

sued by the farm management de-

In the annual "Farm Outlook," issued by the farm management department of Saskatchewan University, it was predicted that the price of horses would continue to increase faster than prices of most other commodities It was predicted that the peak in the cycle of purchasing power would probably be reached about 1940.

The extent to which farms in Saskatchewann have become mechanized in recent years is illustrated by a joke which is going the rounds now. A farmer was found looking intently at a billboard advertising a Lady Godiva show in the city. Said he: "By gosh, I think I'll go. I haven't seen a horse for a long time!"

News In Review

Reveals Weeds in Seeds

TORONTO — An instrument for the detection of weed seed in lots of sowing seeds, through which enlarged stereoscopic views are made by photographing them through the lens of a microscope, has been perfected by Dr. D. H. Hamly, working in the Seed Laboratory of the Department of Botany, University of Toronto, it is announced.

University officials, who revealed the development, claimed that the instrument should go very far in ridding the country of weeds which find their way into the soil because of inability to detect them in the sowing seed. Extensive work has been carried out to prove the adequacy of the instrument, the principle of which is the stereoscopic view, a popular adjunct of the "parlors" of forty years ago.

50 Mile Stretch

NEW LISKEARD — A stretch of surfaced road approximately 50 miles long and extending from Latchford to Englehart, may be available for traffic before snow flies again next winter, if plans for highway work in the Temiskaming district are carried out during the summer months.

Students Protect Their Reputation

WINNIPEG — The spring fancies of male students on the Fort Garry campus of the University of Manitoba don't lightly turn to thoughts of love.

When co-eds invaded the men's dormitory the men retaliated by turning on fire hoses and heaving the girls, fully clothed, into the swimming pool.

Telegraph Poles Stolen

KING — Convicted of stealing of eighty fine cedar trees from a swamp on the Brodley farm in King Township, William Simpson, 63, of Holt, was given three months in jail when arrainged in York County Police Court. The trees, which were said to be suited for telegraph or hydro poles, had been cut into posts, and the accused claimed he had received permission to take them. This was denied in court.

Relief To Be Discontinued

WHITBY — After May 1, all municipal relief will be discontinued in Whitby, it was decided by the Town Council. At present there are twenty-nine families on the relief rolls, and it is anticipated that employment will be available for the bread-winners by the date set. Falling in line with Toronto and Oshawa, the town will go on Daylight Saving Time on Sunday, April 25th.

Graf Zepplin Brings Insects

WASHINGTON, — Insect pests and plant diseases are now riding the air liners of the world.

These threats to farm crops, Henry Wallace, United States Secretary of Agriculture, said in a farm-hour broadcast, have been increased by "airplane travel between countries."

He said Federal plant inspectors found twenty species of insects on the plant material upon the Graf Zepplin on one of its stops in the United States. Six of the insect species "were not known in this country," he said.

Home Loans Total 5,441

OTTAWA, — In its first four months of operations, 5,441 loans aggregating $2,091,158 have been made to property owners under the Home Improvement Plan, Finance Minister Dunning announced. The plan went into operation the middle of November.

In the two weeks ended March 15, loans numbered 697 and totalled $284,202.

The four months' total was divided among Provinces as follows. Prince Edward Island, $18,588; Nova Scotia, $189,520; New Brunswick, $101,487; Quebec, $486,090; Ontario, $729,299; Manitoba, $78,271; Saskatchewan, $44,764; Alberta, $196,542; and British Columbia, $246,593.

Sit-Downers Leave Plant

EDMONTON, — Three hundred sit-down strikers evacuated the Swift-Canadian plant here on Tuesday to picket the building. Strikers responded to a personal appeal by company executives and left the plant after occupying it all night.

Police made no effort to interfere as the sit-downers joined women and other union members in picket lines around the building. The women strikers evacuated the plant.

"The strike definitely will go on," a member of the nine-men strike committee said. "The management has refused to recognize our union and we will continue to strike until our requests are granted."

Ask Pay Cut Restored

WINNIPEG — Full restoration of a 13 per cent pay reduction will be asked from the Winnipeg Electric Company when the 1937 labor agreement comes up for ratification, officials of the treet Railwaymen's Unit of the One Big Union said. About 1,000 company employees are O.B.U. members.

Flood Damage

NORTH BAY — Scores of homes were damaged by flood waters here when the Chippewa Creek surged over its banks and flooded large areas of residential districts.

The central and eastern sections of the city were hardest hit, with many basements flooded and with the waters reaching main floors in some of the homes.

A gang of 55 workmen worked from early morning until late at night to attempt to relieve the situation. Food was trucked into several marooned homes and one family was rescued out of a house by firemen.

At least two schools, St. Rita's and St. Vincent's, suspended classes for the day as water filled the basements and cut off pedestrians traffic to and from the buildings. School attendance throughout the city suffered a marked decrease.

Swollen waters wrought havoc with roads in all directions from North Bay. The road to Callander and the Dafoe nursery was in particularly bad shape although Dr. Allan Roy Dafoe managed to make his daily visit to the Dionne quintuplets. Several tourists' cars were stalled in the mud. There was no danger of the Dafoe hospital being marooned, however.

Egg Price Up

Reports from Quebec City show that, since the city adopted the principle that only grade A eggs may be sold on the public market, the price has increased five cents per dozen.

No 1937 General Election Declares Premier Hepburn

Two of Three By-Elections, However, Premier Announces on Return from Florida

TORONTO. — Back this week from a ten-day holiday in Miami, Premier Hepburn dissipated various post-Legislature rumours regarding the immiaence of a Provincial general election with the definite statement that his Government would not appeal to the country until after another session.

And that session, he voiced assurance will be a regular session, and no special session that could, if circumstances warranted, be held before the close of the present year. Which also means, according to Liberal M.L.A.'s, who were in Queen's Park to welcome him back to his official post, that the next big ballot will not develop until 1938, at the earliest.

Nor is any Cabinet reorganization "in sight" at the present time, the Prime Minister informed the press. "But," he added, "we live in unusual times, and anything is liable to happen."

The position of the North Wellington by-election is exactly where it was when Mr. Hepburn went away. No consideration has been given to the filling of that seat during his absence and no writ will be issued until after such time as the Provincial Auditor has completed a certified statement regarding the finances for the fiscal year ending last March 31, and that statement has been published throughout the press of the Province.

"When that statement is known we will have the exact financial picture of Ontario," said Mr. Hepburn, "and it will prove how accurate the figurs were I gave in my Budget presentation. If we were to issue the North Wellington writ now, the Opposition would deny the correctness of my figures, and we would be unable to defend the Budget as thoroughly and effectively as we will be able to do with the auditor's statement made public. There won't be any controversy in that by-election over his statement."

Two or three by-elections, he said, might be held before the next session of the House. Questioned as to their locations, he said: "You fellows will have to do some guessing, I'm not going to help you out."

Mr. Hepburn, who had Chester S. Walters, Controller of Finances, in conference with him, announced that right now estates totalling more than a billion dollars in value were under survey by the Succession Duties Branch. Collection efforts were to be intensified, he said, and the Government's hope was that for this fiscal year it would be able to double collections made from estates last year

Ford Refuses To Recognize Union

Good Business for Industries to Pay High Wages, He Says — Condemns Sit-Downs

WAYS, GA.. — Henry Ford announced Wednesday that the Ford Motor Company "never will recognize the United Automobile Workers' Union of America.

The veteran motors manufacturer, still vigorous at 73, made the announcement in an interview at his winter home here soon after returning from Detroit, where he conferred with company officials in his Kansas City plant on Friday last. Ford announced at the same time a small strike had been attempted on Tuesday night in his assembly plant at St. Louis. It lasted only a short time.

The Detroit manufacturer learned of the St. Louis strike in a telephone conversation with Edsel Ford, his son who is President of the Ford Motor Company. He said a group of workers "sat down" after work on Tuesday, and were "escorted peacefully out" without any interruption of operations.

Renewing his attack on labour unions, Ford also criticized sit-downers and said public officials should take action against them.

Ford said that any of his men who struck would "be let out of the particular plant with regrets, "because we know the men are simply being duped and coerced by the strike leaders."

"We won't hold any grudge against them and will be willing to hire them back," he added.

Canada, next to Australia, was the largest supplier of wheat to Japan in 1936. At the same time, Canada not only maintained but increased her position as the largest exporter of lead, aluminum, and newsprint to the land of the rising sun. Among the many other exports, from Canada were the hockey sticks, skates and pucks.

Move To City

Notwithstanding special legislation to encourage the rural population of Denmark to remain in the rural districts, the movement to the urban districts has continued, the percentage of the total population engaged in agriculture having dropped gradually in the 50 years (1)[illegible] from 51 to 31.

Lloyd George And His Family

Photo shows the family of Mr. David Lloyd George as they relaxed in the yard of their London, England, home, recently, after arriving from Wales. Left to right are Dame Margaret Lloyd George, Miss Megan Lloyd George, and Mr. David Lloyd George, with their pet "Pwtyn," Welsh for " a bit of a thing."

What saith the Scriptures?
The Lord is not willing that any should perish but that all should come to repentance—2 Peter 3:9

Cooksville

Mr. Kilburne is able to be back at work again.

Robert Brookes has an infection in his left hand as result of running a sliver in his finger. Dr. Cantelon has been attending him

The Crofton Villa is open again. They are looking forward to a very busy summer.

Miss Doreen Bowers has had a relapse and is confined to her bed

Miss Fanny Milbourne is still ill at her home.

The sympathy of the community is extended to Mrs. Franceschini, Bert and Genevieve on the death of Mr Louis Franceschini, last Sunday.

Cooksville Girls Softball Team held their first meeting on Monday night at Cooksville School with a good attendance. Mr. John Brecken ridge was in the chair.

Miss Beulah Tommey spent last Sunday with Miss Mary Stead at Britannia

Mr. Harold Pearson visited at his home here on Sunday

United Church

W.A. held their regular meeting in classroom with a good attendance. Mrs. Durie presided. Mrs. D.H. Mc Caugherty took the devotional part. Reports of treasurer and committees were very encouraging. Bills were passed for putting supports in seats also for kitchen utensils. Committee was authorized to secure castors for piano. A vote of thanks was passed to the gentlemen for repairing the platform of the pulpit.

Arrangements are being made for a Coronation Evening on May 6th

Community Club

The last meeting of the Community Club was held at the home of Mrs W.E.W. Steen with a good attend ance. Mrs. W. Leslie presided.

After business part of the meeting a good old fashioned spelling match was held, also a geography match.

Twelve tables of euchre were played at the home of Mrs. Henry Campbell Monday, Apr. 12, winding up the social evenings for the season. The winners were: Miss Mildred McCarron and Fred Durant. Lucky number, Jack Miller.

Next meeting will be held at Mrs W. Atkinson's, Tuesday, Apr. 20.

Missionary Rally At St. Andrew's

To Christian people there is always a thrill in hearing one of Christ's ambassadors from a strange land. This will be the privilege of all who will attend St. Andrews Sun night at 7 o'clock when Rev. Douglas Wilkie of Tamsui, Formosa, will be the guest speaker. The service will take the form of a Thank Offering service under the auspices of the W. M. S. of St. Andrews. Mrs. Robert Greig will sing "The Ninety and Nine"— and Missionary hymns will be used throughout the service.

The SNAPSHOT GUILD

BE A PHOTO HISTORIAN

The story of our times is being told for the next generation by amateur photographers who take and preserve simple scenes of present-day life, such as this.

DID it ever occur to you that as the owner of an amateur camera you are blessed with the means of making a valuable and truly significant record of the times in which you live? Magazine, newspaper, news-reel and other professional photographers are doing just that every day and a vast store of pictorial history is accumulating.

Thanks to the progress and spread of photography our descendants are going to know much more about the way we lived and acted than we know of the way our great-grandfathers did. Through these millions of photographs of life and action now being taken our descendants will possess visual evidence of the things we did, how we dressed, how life went on in city and country. Contrast the advantage they will have over this generation which has to rely upon the descriptions of writers and the work of artists for its understanding of life prior to the introduction of photography scarcely more than two generations ago. However accurate the work of writers and artists may be, it cannot equal the reality and truthfulness of photography.

We amateur photographers, now millions strong in every country, are also making a tremendous contribution to this photographic record of our time. Few of us, however, are doing it by design. Most of us take pictures for the present amusement of ourselves, families and friends with not so much thought to their value and interest to our children's children. Too few of us take pains to preserve the pictures we take.

Well, what do you say to the idea of becoming a photographic historian for the benefit of your own posterity? This you can do effectively even on a small scale. It simply means making a collection of pictures, taken by yourself, best representing the life, customs, dress and activities of the present day and placing them in a special album to keep and hand down as a family possession. Some of these pictures will seem commonplace now but as interesting and valuable forty or fifty years hence as those of the "gay nineties" are to us.

Select subjects which in your judgment are most typical of the current scene. Certainly you should not neglect to include your own home life, street scenes and other views about your changing city, the homes of the rich and the homes of the poor, life in the country and present types of automobiles, airplanes, railroad trains and other things in general use which today spell modern life and tomorrow will be obsolete.

You should not fail to include off-guard snapshots of people doing things illustrative of common life—what the artists call *genre* pictures. Make your camera your companion especially in traveling and be ready for these. For example, a shot out of your car window of a scene on the platform of a railroad station may seem ordinary enough today but it is a sample of common life. Years hence this picture will be a curiosity. The modern scene is constantly changing. There is no other medium than photography which can show so truly after a lapse of years what these changes have been.

133 John van Guilder.

Adieu to Hockey

Members of our Juvenile Hockey Team were treated to a party and a grand banquet on Tuesday night at the home of Mrs. R. E. Longworth. They assembled at 8.30, and after an evening of fun they put on the feed bag. Prizes for the games were awarded to Leslie Longworth and Jack Rice

Coach and Manager Charles Evans sat at the head of the table. Mistress of ceremonies was Mrs. E. Rediek. An autograph book was presented to the coach and all his stars promptly filled up the pages

The whole team joins us in saying Thanks, a Million, to the mothers who gave their time, and, incidentally food, to the boys, and to Mrs. Long worth for the use of her spacious home. They also wish to thank those who provided cars for transportation to and from the games.

At the mention of having lady friends or wives attending with the boys the members of the Bachelor Society raised violent protest and so we went stag.

The Hockey season is over, but we still retain last year's cup, and are rarin' to go in and mix it up in lacrosse. Again, we say, thanks for all support given the boys, and we ask you to stay behind them. You may be sure they appreciate it.

Simpson & Sampson

TORONTO TOWNSHIP COUNCIL

Toronto township tax levy will be lower by nearly two and a half mills if the rate estimated by the township council at a special session Monday proves operative. Although only tentative estimates were obtained by council, the proposed rate would be 40.2 mills for 1937, as opposed to a rate of 42.6 mills last year.

Councillors believed that a considerable saving could be effected in the relief levy this year without depriving residents of the township who are on relief of ample subsistences. The relief rate was set at seven mills, a rduction of two mills from last yar's total of nine mills and a resolution was passed by the council reducing relief allowances to the Campbell report recommendations on and after June 1.

The original estimate for the township's portion of relief costs was $95,000, but council was confident that this estimate could be reduced by some thousands of dollars before it was put into actual operation.

The reduction to the Campbell report basis of relief will apply to both employable and unemployable persons who are out of work, and is designed to encourage unemployed men of the township to seek employment during the spring.

Reeve E. D. Maguire pointed out that the council could effect, in passing the relief rate at seven mills, a theoretical reduction of approximately four and a half mills. During the months of January, February and March of last year, he told the council, the province had paid 100 per cent. of relief costs, other than direct relief to unemployable recipients. This year the township has had to pay 32½ per cent. of relief from the beginning of the year, at a cost of some $31,000 more than last year, and yet there was every possibility of slightly increasing the net reduction of two mills in the relief rate without working hardship on the relief recipients.

In view of the reduction in the relief rate, council unanimously passed a road rate of three and a half mills. Members expressed the opinion that so little constructive work had been possible on the township roads during the past three years by reason of the lack of funds which had handicapped the township, that the time had come to make as extensive repairs as could be afforded under the increased rate, which was tentatively set one mill higher than that of 1936.

Final setting of the rate was impossible, Clerk J. H. Pinchin stated, because the levy for high and continuation schools could not be estimated until claims were forwarded the township by county officials. The claims, he thought, would be prepared in the near future, but amendments to the assessment act had made it difficult for county officials to work out the share of the various municipalities in the total amount assessed against the county by the various schools.

Village Council

This paragraph is reprinted from our last issue in order that you may get the correct meaning of the Act.

Mr. H. E. Cook, made a report to Council on the bill for $385.00 being fees for Streetsville pupils attending Etobicoke High School during 1936, which had been forwarded to Streetsville for payment. As the amendments to the high Schools Act which sets forth that each municipality is responsible for the cost of their pupils attending outside school, does not take effect until January 1, 1937 the bill for 1936 should be paid by the County of Peel. From January 1, 1937, however the Local High School Board will be responsible for the fees of pupils attending schools outside the municipality, providing the subjects cannot be taken at the local school

If the subjects can be taken at the local school, then the parents of the pupils attending schools outside the municipality must be responsible for the fees of such pupils.

Speak, See, Hear No Evil, an Old Japanese Proverb

The three wise monkeys symbolize an old Japanese proverb, "Speak no evil, see no evil, hear no evil." In Japanese the proverb reads, "Iwazaru, mizaru, kikazaru," which literally means "non-speaking, non-seeing, non-hearing." Therefore, notes a writer in the Indianapolis News, it often is said that the names of the monkeys are Iwazaru, who speaks no evil; Mizaru, who sees no evil, and Kikazaru, who hears no evil. Each word in the proverb ends with "zaru." By adding "zaru" to a verb in Japanese it becomes a negative adjective. The Japanese word for monkey is "saru," which phonetically becomes "zaru" when it is preceded by a modifier. Hence, the three monkeys became associated with the proverb merely as a pun.

Sometimes they are called the "Little Apes of Nikko" because they appear in mural decorations in the ancient tombs in Nikko, Japan. According to some Japanese writers the three apes symbolize the fact that the Japanese talks too much, the Chinese sees too much, and the Indian hears too much.

Among the Chinese there is a legend that Confucius originated the proverb and its symbols. When the great teacher told his disciples he was about to leave the earth, they begged him to leave them a special message to help guide them through the world of strife and trouble. The sage compiled by drawing pictures of the three monkeys on the sand and left his disciples the maxim, "Speak no evil, see no evil, hear no evil."

Galapagos Plateau Long Known to the Scientists

Existence of the so-called Galapagos plateau, submerged beneath the surface of the ocean but forming a great shelf extending from Costa Rica southward beyond the famed Cocos island and including the Galapagos archipelago has long been known, says a writer in the Los Angeles Times.

Naval hydrographic officers describe it as an irregular continental shelf extending some 900 miles out to sea. Two hundred miles off Costa Rica lies Rivadeneyra shoal which is less than ten feet below the surface of the water at mean tide. A little more elevation would have made islands of the shoals.

Around the Galapagos and Cocos island are well-defined curves of plateaus at 1,000 fathoms, and including both these plateaus is a much broader submerged plateau definitely outlined at 1,800 fathoms. The outer edge of the Galapagos plateau is shown on hydrographic charts at a 2,000-fathom curve.

Scientists long since concluded that a movement in elevation of the earth's crust in the Panamic region, at about the end of the Oligocene period or the early Miocene period, resulted in the union of North and South America, closing the gap between them, and forming Central America.

The Treaty of Conciliation

When the Treaty of Conciliation was signed between Italy and the Vatican, in 1929, one of the invaluable possessions of Christianity which was returned to Papal control was the more than 500 miles of catacombs dug in a maze of tunnels beneath the city of Rome. These catacombs were the burial places of Christians in Roman times. In the Third century they harbored Christians fleeing from pagan persecution. By the Fifth century, notes a writer in the Philadelphia Record, the catacombs were neglected, then ransacked by the Goths and Lombards, and finally forgotten. They were rediscovered in 1578.

West Indian Hurricanes

Most of the so-called West Indian hurricanes come into existence over the warm seas between the West Indies and the coast of Africa. They probably start as small eddies of air, gather momentum owing to differences in temperature and air pressure, until they become gigantic whirls. The routes followed by West Indian hurricanes in general are similar, but the storms differ much in their detailed paths. They originate in the region of the trade winds and all move westward first, most of them turning northward later.

Oysters "Grow" on Trees

The island of Trinidad in the West Indies is noted not only for its self-filling Pitch lake, source of most of the world's asphalt and the place where Sir Walter Raleigh caulked his ships, but other peculiarities. For instance, oysters grow on mangrove trees. They fasten themselves to the trees' branches at high tide and are left hanging when the tide recedes. Then, too, Trinidad has its singing fish, which emit a trumpeting sound when annoyed.

Trout Like Deep Water

The bureau of fisheries says that the depth to which lake trout can descend depends entirely on the oxygen content of the water. Lake trout are deep-water feeders and in shallow lakes they frequent the bottom. In deeper lakes there is a stratum of water below a certain depth where there is no oxygen, and no fish can live at such a depth.

Americans and French in War

It has been estimated that there were 300,781 American soldiers in the Revolutionary war. The number of French soldiers who took part varied from 4,803 to 5,350. On September 2, 1781, it was estimated that there was a French force at Yorktown of 8,000.

Mrs. A. Smith of Port Credit has rented Mr. H. Hisey's house.

Mr. and Mrs. W. R. Watson of Dixie spent Sunday with Mr and Mrs. W.F.B.Switzer

See the comparison of last year's Village Tax Rate with that of 1937 in the table in another column on this page

Mr. Harrison of Orillia has moved to Streetsville and is occupying the house formerly owned by the late Miss Mary Clifton

The Womens Association of the Streetsville United Church intend holding a Coronation Evening on Thursday May 6th. Please reserve the date.

Mr. and Mrs. Jas. Lacey, a newly married couple, have moved into the village and are living in the brick house on North Queen Street, known as the Reed property.

The W. A. of St. Andrew's Presbyterian Church, Streetsville, are holding a Coronation Tea on Wednesday, Apr. 21st, at 3 p.m. in the S.S. Room. Admission 25c. All Ladies Cordially Invited.

Dr. Gaikwad, Central India, Miss Dulcie Cook, Japan; missionaries on furlough, taking post-graduate work in Toronto, and Miss Edith Mann Ottawa, of United Church Training School, Toronto, spent the week-end with Mr. and Mrs J.D.Steen.

A committee from the Streetsville High School visited the Department of Education in Toronto on Tuesday and had an interview with Deputy Minister Duncan McArthur, M.A ,on several subjects. Owing to a great demand for Commercial subjects it may be necessary to engage a Commercial teacher. The committee will report at the next meeting of the Board.

The spring moving fever is now on —Mr. Varco is going into Mrs W H Buck's house, North Queen St, Mr Twiss is going into the V. Johnston apartment, Mr.H. Culvert is going into the cottage near Buck's Garage. Mr G.Bibby and Mr. King Hollings head have taken the Bonnette residence on Thomas St. Mr. H. Hisey has moved from his Thomas Street home to the "Snider" farm, 1st Line west and Base Line. His son in law Mr. Alex Jackson, will help him run the farm.

There will be a joint meeting of the High and Public School Boards to night. The purpose is to discuss the question of building a new High and Public School under one roof. The cost would be about $60,000, and as the depression has passed away, we think it would be an opportune time to make preparations. Of course the Village Council would need to take a vote of the ratepayers to sanction the issue of debentures. The cost to the ratepayer would be small as 80 p. c. of the cost would be paid by the County. Something must be done as both school buildings are sadly out of date

Reeve S. H. Foster represented Streetsville at the Dinner given by the Lorne Scots (Peel-Halton-Dufferin Regiment) in the Regimental Armouries, Brampton, last night. Hon. Ian McKenzie, Minister of National Defence, was the Guest of honor,and paid tribute to the manner in which the work of amalgamating the three County Regiments into one unit had been carried out. Capt. G. A. Montemurro and Capt. John W. Drennan, local officers of the Regiment, also attended.

UNITED CHURCH NOTES

Miss Dr.Gaikwad of Central India addressed the congregation of the United Church last Sunday morning. She was attired in native costume and explained that she was not a speaker but upon request had come to tell a few facts about the work in India

She explained the origin and development of the Caste System and referred to the "Outcasts" as the "Depressed Caste," the people to whom fell the lot by inheritance to keep the villages, towns and cities clean. They have no right in the Temple. One day a multitude went to the Temple intending to enter and break the custom of exclusion but the doors were closed against them.

Miss Gaikwad explained the different forms of religion and language and then told of the work of the Central India Mission and of the new Hospital unit to which she is to go upon her return to India

Since the days of strict newspaper partisanship are past it is poor business for a town to have two papers, as it is a nuisance for the subscribers and the advertisers and a meagre living for the publishers.—Wiarton Echo.

SUNDAY SCHOOL LESSON

LESSON III.
THE EFFECT OF ALCOHOLIC BEVERAGES.
(The Scientific Approach to the Liquor Problem.-
PRINTED TEXT Genesis 13:13; 19:23:25; Deuteronomy 32:31-33; Proverbs 23:29-32.
GOLDEN TEXT.—At the last it biteth like a serpent, And stingeth like an adder. Proverbs 23:32.

THE LESSON IN ITS SETTING.

Time.—The destruction of Sodom took place in B.C. 1904. The book of Proverbs was written about B.C. 1000.

Place.—The city of Sodom was located, modern archaeologists believe, at the northern end of the Dead Sea.

Genesis 13:13. "Now the men of Sodom were wicked and sinners against Jehovah exceedingly." The sin of Sodom was sensuality and that of the vilest type. The citizens of this city had sunk to the lowest plane to which it is possible for men to drop, and all their life, individually and corporately, was foul and corrupt with sin, which, like some fatal plague, would, unless destroyed, surely infect all who trafficked with these immortal sreatures.

The destruction of the cities was necessady. The fact that God did destroy them is sufficient proof that God was convinced there was nothing else to be done.

"The sun was risen upon the earth when Lot came unto Zoar. 24. Then Jehovah rained upon Sodom and upon Gomorrah brimstone and fire from Jehovah out of heaven. 25. And he overthrew those cities, and all the Plain, and all the inhabitants of the cities, and that which grew upon the ground." For a long time many Biblical writers doubted the actuality of the events in the 19th chapter of Genesis regarding the destruction of Sodom and Gomorrah, but today no fairminded scholar would even think of casting doubt upon this passage, for we now have overwhelming evidences testifying to its historicity, if we needed such evidence. "It was in the year 1929, that Father Alexis Mallon and M. Rene Neuville, engaged by the Pontifical Biblical Institute of Jerusalem, when excavating at the northtern end of the Dead Sea, under Mount Nebo, came upon the burnt-out ruins of a city, destroyed by fire and ashes, which was never rebuilt. It belonged to the eadly bronze age, and they believe it to have been Sodom. Its pottery, dating from 2500 to 2100, quite coincides. Now the battle of the Kings referred to above, took place in the Vale of Siddim which was full of slime-pits (Gen. 14:10). The Hebrew word for 'slime-pits' means 'bitumen', and this again is a corroboration of the battle being fought at the northern end of the lake where bitumen, sulphur and similar combustibles are largely deposited to-day.

Deut. 32:31-33. "For their rock is not as our Rock, even our enemies themselves being judges. 32. For their vine is of vine of Sodom, and of the fields of Gomorrah: their grapes are grapes of gall, their clusters are bitter. 33. Their wine is the poison of serpents, and the cruel venom of asps."

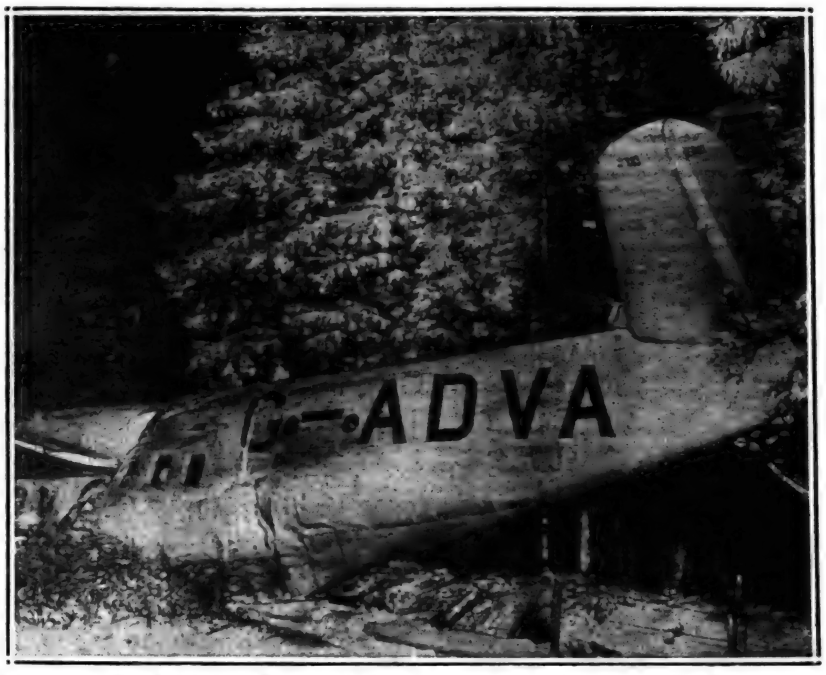
The meaning of the whole passage is that Israel, which had been smitten by its foes should have been able to defeat them with little difficulty, because the heathen had no such God as they had; but the Lord had given up his people to the heathen because their fruit resembled the fruit of Sodom in its wickedness.

"Who hath woe? who hath sorrow?" Literally the Hebrew reads, 'Who hath Oh? Who hath Alas?' These two exclamations are, as it were, actually taken from the cries of the drunkard himself after the thrill of intoxication had passed, and the excitement of a drunken orgy is over. Then does the one so indulging discover his physical woe, the woe of shame, of disappointment, of money wasted, of friends lost, of a body weakened, possibly a position lost, as actually millions could testify, or loved ones driven away. "Who hath contentious? Who hath complaining?" Anyone who has observed men under the influence of intoxicating liquor will testify to the remarkable accuracy of the picture which the writer draws of the consequences of drink. A normally peaceful man, when drunk, is ready to quarrel with anyone, and, if no one wishes to quarrel with him, then he will make every attempt to anger someone, so that a fight can be engaged in.

"Who hath wounds without cause?" That is, wounds which he has needlessly acquired, the result either of a quarrel which had no justification whatever, or of a bad fall which he would not have suffered had he been sober. "Who hath redness of eyes?" The word "redness" may be translated "darkness" or "dullness." Sir Victor Horsley, a famous British surgeon, speaking of the consequences of alcoholic intoxication, says: "The sensory derangements involve also the special senses, especially that of sight."

30. "They that tarry long at the wine; they that go to seek out mixed wine." (See also Isa. 5:11.) The word here translated "seek out" literally means "to test,' and it may refer "to the connoisseur, the man who prides himself on being well versed in brands of liquor."

31. "Look not thou upon the wine when it is red, when it sparkleth in the cup, when it goeth down smoothly." Here is a description of wine when complete fermentation has taken place. The wine of Canaan seems to have been red (Gen. 49:11; Isa. 63:1-3)." — C. H. Toy.



32. "At the last it biteth like a serpent, and stingeth like an adder." But there is an inevitable, inescapable bitterness and stinging waiting for the man who so indulges. A serpent may look beautiful, but its bite is deadly. Wine and intoxicating liquors may delight the palate for a moment, but the poison that is resident in such liquid will take its toll, and the joy with which the drinking man begins his evening of debauchery terminates in grief.

Embroidering King's Ensign For Coronation

The major portion of the heraldic and ceremonial embroideries to be used at the Coronation of King George VI are being made at the Royal School of Needlework in London, England. More than 120 ladies, highly-trained and enthusiastic, are engaged on this work. They are at present embroidering six white ensigns bearing the King's coat-of-arms for the Coronation naval review. Other work includes the canopy which will be held over Their Majesty's heads at the Coronation, and the Queen's train. An expert needlewoman at the School is shown engaged in copying the ensign of the late King George V, which is basically the same as his present Majesty's.

Maiden Trip Hillside Tragedy

The wreckage of the Capricornus, Imperial Airways gigantic flying boat which crashed into snow-clad slopes of Beaujolais Mountains, near Macon, France, on its maiden voyage to Egypt. Women passenger and four of crew died in wreck.

Movie-radio gossip

By DOROTHY

The most exciting and beautiful picture ever made in Technicolor comes from England and will soon be seen in theatres throughout the country. It is "Wings of the Morning," a United Artists picture. Harold Shuster went over from Hollywood to direct it and our own Henry Fonda plays the lead, and John McCormack, the Irish tenor who is adored everywhere there is a phonopragh, radio, or concert hall sings in it. As if that weren't enough, they have tossed in for good measure authentic views of the running of the English Derby.

Sylvia Sidney gets the week's award for being the best talent scout. Some time ago Marc Connelley told her about a play he was going to produce in New York and she said she knew just the girl to play the lead in it. She had seen a girl named Katherine Locke in a very small part in a play and she was sure Miss Locke would be wonderful if given a real chance. Sylvia didn't wait for Mr. Connelley to send for Miss Locke. She located her and she got the part.

Ginger Rogers

Eleanor Powell would like to form an alumni association of her old dancing school, but all the people who are eligible for membership in Hollywood are much too busy making pictures to be bothered with attending meetings. There is Ginger Rogers, Ruby Keeler and Miriam Hopkins — and they are all among the busiest of the people out here. Eleanor herself has a little time on her hands only because she turned her ankle and has to stay at home for a few days to rest before she can go into a strenuous number for "Broadway Melody."

ODDS AND ENDS — Marlene Dietrich thinks that she and Carole Lombard look alike and both girls are delighted — Miriam Hopkins has now bought the late John Gilbert's house and is redecorating it in lovely pastel colors that best set off her blond beauty — Paul Muni has no lurking ambitions to cut in on Jack Benny's comic honors, but he did play "The Bee" on the violin for a few friends— About half of the beautiful girls in Hollywood tried out for the part of Flavia in "The Prisoner of Zenda." — Madeleine Carroll got it. — Bert Wheeler is so unwilling to leave the sunshine and swank of Palm Springs that he is commuting to Hollywood by airplane.

The Book Shelf.

BY MAIR M. MORGAN

"WITH THE WEST IN HER EYES," by Kathleen Strange (George J. McLeod Limited, Toronto).

We've all read novels of farm life, where the lives of the people seem drab, cold and bitter; where the earth seems to combat any effort of man to rise above crops, cows and chickens. Humor always seemed strangely lacking. We would close the book with a "Br-r-r-r—the cold earth."

Mrs. Strange has created a very human document based on living, warm, everyday happenings.

While enroute to Hawaii in 1919, her husband, Major Strange, fell ill and was advised by a doctor to take up farming.

Starting, without any experience, they buy a farm in a remote rural community in Alberta.

From the moment they arrive at the station on a hot August day, things start to happen.

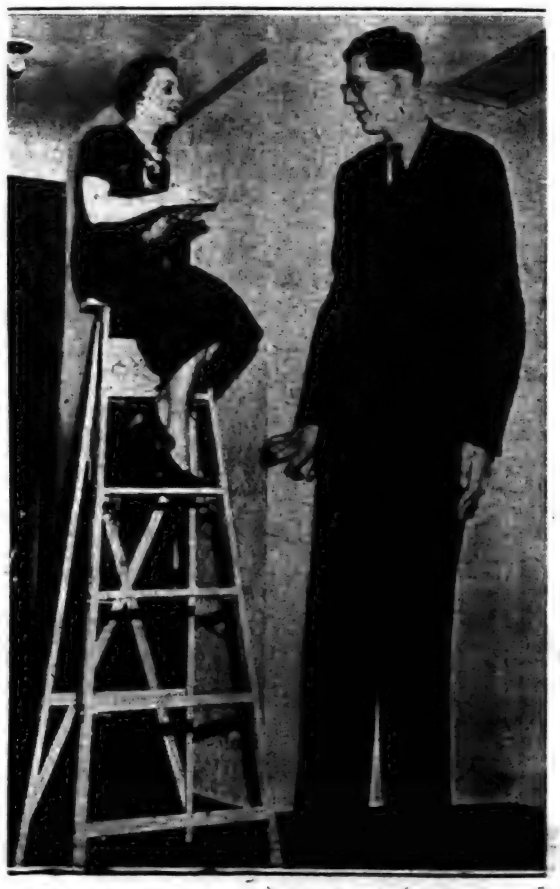
Mrs. Strange knew less than nothing about cooking, and as for milking a cow! Yet within a month she was producing bread, cakes and pies and milking the cow! How she did this, told in a humorous vein, strikes the city reader with admiration.

The building of the new house, the seeding of the first crop, the harvest. The various experiments, then the beginning of a great seed business, bringing success and fame to the Stranges, makes engrossing reading. It is enjoyable reading and gives one a good insight into Canada's great industry, Agriculture, from the woman's standpoint.

As an afterthought, we note this manuscript won the $1,000 prize in the Canadian Book Contest.

"MARRIED PEOPLE," by Mary Roberts Rinehart (Oxford University Press, Ltd., Toronto), $2.25, is a collection of ten sketches of married people, ranging from newlyweds to those who have reached the twenty-year mark. All are entertaining; all human. A good book to have beside your bed. Any of the sketches can be read again and again.

Duties on Horses



Horses are not more than $150 in value imported into the United States from Canada are dutiable at $20 per head; horses over $150 in value are subject to a duty of 20 per cent ad aviorem. Prior to January, 1936, the duty on horses of not more than $150 in value was $30 per head. From 1931 to 1935 there was a slow but steady increase in the number of Canadian horses imported into the United States and in 1936 the imports rose to 17,156 head for the not more than $150 classification and to 326 head for horses over the $150 figure.

Scout as Duke's Messenger

Scout Charles Edward Smith, 16, of Townmead Road, Fulham, began his duties as messenger to the Duke of Gloucester at York House on March 22. Smith was a newspaper seller in Fulham. Young Smith is shown arriving for duty at York House.

Getting To Be Big Boy

When a reporter goes out to interview a celebrity he usually carries a notebook and a pencil as sole equipment. But this young reporter had to take along a step-ladder as well to cover her assignment. Here Robert Wadlow, 19-year-old youth of Alton, Ill., who stands eight feet, seven inches high, and is still growing, is shown being interviewed in Omaha, Nebr., where he appeared in a charity show. Although his family has been opposed to his appearing with circuses a contract has been signed calling for appearance with one of the large circuses in New York, Brooklyn, and Boston, only in a "dignified" act.

Worried By Pimples And Eczema

Complexion Unblemished after Six Weeks of Kruschen

"For the past two years," writes a woman, "my face was covered with hard pimples and red blotches, and I also had eczema on my neck and forearms. I tried lotions, creams and ointments, without the slightest affect. I was so worried. Fortunately I decided to give Kruschen a trial, and without any exaggeration, within six weeks my face was without a blemish, and I have not had a sign of eczema since. I take Kruschen regularly every morning, and would not be without it."—(Mrs.) J.A.

Pimples and eczema are frequently due to impurities in the blood—irritant poisons which sluggish body organs are failing to expel from the system. Kruschen Salts help to keep the body organs functioning normally and healthily, thus preventing the accumulation of impurities in the blood.

A Famous Ship Stays in Port

Boat lovers who lament the breaking up of a fine ship at the end of her career will find comfort in the case of the Fram, vessel of three famous Arctic explorers. This stout little craft, instead of being consigned to the ship-breakers has been given a waterside museum home.

This ship's name is linked with the memory of three of the world's foremost Arctic venturers — Fridtjof Nansen, Roald Amundsen and Otto Sverdrup. Arctic experiences and observations as a young man gave Nansen many of his ideas for the unique design of the Fram, and she was built for his polar expedition of 1893-96. Specially intended for duty in ice, she is the product of the well-known shipbuilder, Colin Archer.

Retired from active service, the Fram lay for some time in Norse waters. It was finally decided to make the famous ship the focal point of a special museum of Arctic curiosities.

Activities definitely began in the spring ofo 1933, when a general invitation was issued to Norwegian architects to participate in an honorary competition for a structure suitable for housing the Fram. Among the 62 architects who entered the award was made to Mr. Bjarne Toien. Plans called for the building of a small wood and steel affair, steeply pitched and amply sky-lighted. A suitable site, handsomely wooded and on the island of Bygodoy, in the harbor of Oslo, was donated to the committee, and Fram House was erected at a cost of $60,000. The boat was drawn in place and the building erected around it.

Heated electrically, and well ventilated, Fram House is 180 feet long, 85 feet high and 75 feet wide with a catwalk all the way around inside, so that one can study the boat from any angle. As many of the Fram's instruments as possible have been restored and much of her historic equipment is intact. — Christian Science Monitor Magazine.

HAVE YOU HEARD

The acid test of a man's Sunday religion is his Monday's behavior.

—o—

A girl asked her father: "Dad, don't you believe that two can live as cheaply as one?" "I certainly do," he answered. "What's more, right now, your mother and I are living as cheaply as you."

—o—

There are plenty of men who are willing to work until their tongues hang out if they get what they call fun out of it instead of money.

—o—

Young Bride (looking in window of jewelry store)—George, I'd love to have that bracelet!

George—I can't afford to buy it for you, dear.

Bride—But if you could, you would, wouldn't you?

George—I'm afraid not.

Bride—Why?

George — It isn't good enough, dear!

Bride—Oh, you darling!

—o—

A wise wife is the one who makes her husband believe he is the head of the house when he is really only chairman of the ways and means committee.

—o—

Mrs. Pennington—How did you like the sample of my marrow jam I sent you?

Mrs. Jamieson—Was that marrow jam? Oh, dear, I'm so sorry. My husband is using it for sticking the stamps in his album.

—o—

Customer—Give me some of that prepared orthocaetylsalicyic acid.

Druggist—Do you mean aspirin?

Customer — Yeah! I never can think of that name.

—o—

All of us know some persons who spend all their energy in talk.

—o—

A travelling salesman visited a large factory and told the boss he could pick out all the married men among the employees. He stationed himself at the door, and as the men came from dinner he pointed to those he thought were married. In almost every case he was right.

Boss (amazed) —How do you do it?

Travelling man—Oh, it is quite simple, quite simple. The married men all wipe their feet on the mat. The single men do not.

—o—

Read it or not:—

In North America recent figures showed 185,383 Sunday schools, Teachers and officers 2,197,400, and pupils, 20,627,652.

—o—

A parasite gets by unnoticed until he beings to stick his tentacles into our bank roll.

—o—

That settles that:—"I don't suppose you don't know of nobody who don't want to hire nobody to do nothin', do you?

—o—

A very stout lady, walking through a park during an extremely hot day, observed that she was being followed by a man.

Stout Lady—What do you mean by following me?

But the man, without replying, slipped away.

Then, when the stout lady resumed her walk, she spied the man following her again, and again she accosted him:

She almost fainted when she got this reply:

Man—For heaven's sake, lady, don't call a cop and chase me away. You are the only shady spot in the whole park.

—o—

Hard work and no play may make a dull boy, but he usually has money in the bank.

—o—

Johnny Bull—We have some very large birds in England. Why, once, while I was standing in a zoological garden, I saw a man come in on an eagle.

Yankee Tourist—Brother, that's nothing! Once, while standing in a ball park, I saw a player go out on a fly!

—o—

Setting a good example is much better than giving good advice.

GARDENING

By GORDON L. SMITH

Grass seed may be compared to good tobacco. The best seed is a mixture or blend of different grasses. A proportion of those more expensive and slower germinating but permanent grasses will be mixed with a certain quantity of cheap, quick-growing seed. It is the former which form the fine-stemmed, deep green permanent turf which goes on improving with the years. A certain amount of the cheap, quick-growing kinds are needed to shelter and nurse along the others for the first summer, but sowing these alone is not sufficient for a permanent lawn. Hence, a well-balanced, high quality mixture is recommended.

SOW LAWNS EARLY

Grass makes its growth in cool weather; therefore, early sowing is advisable.

The ground should be allowed to settle after digging or plowing, and then levelled again. If there is time it is advisable to repeat this process several times. The top soil should then be raked fine and the grass sown at a liberal rate, once across and once lengthwise. This double sowing insures an even distribution. For obvious reasons seed is sown on a day when there is no wind. In covering, the gardener is advised to rake one way only and then firm the soil with a heavy roller or pounder.

The first actual gardening operations, if the ground is ready and free from surplus moisture, will be to plant those extra early flowers like sweet peas, cosmos, marigolds, and other hardy annuals and almost any of the perennials. This is also the time, authorities advise, to get in grass seed. In the vegetable line, first sowings of lettuce, spinach, carrots, beets, and even potatoes, will be made.

At first, one is advised to make small sowings and so spread out the harvesting season. Then, if winter return again after these first seedings are made, the loss will be only trivial. Seed, after all, is the cheapest thing about gardening and one of the few factors over which the gardener has absolute control. On these counts alone, it is highly important that only the best seed from reliable Canadian sources should be used. Everything else is wasted; soil; fertilizer and labor if the foundation seed is not right.

"Conditions now among nations point to a war of wars that may destroy present civilization."
—Manuel Quezon.

Nurses Approve Registration

Recommendations Made at Annual Convention

LONDON, ONT. — The Plan of Dominion registration of nurses and the formation of a Canadian College of Nursing was approved by the Registered Nurses' Association of Ontario at Thursday's session of their convention being held here.

Issue No. 16 — '37

The provincial organization, recommends that the membership in the college shall be of the members and fellows, that the affairs of the college be governed by a council that all who are members of the C.N.A. and registered in their own provinces will automatically, on payment of fees, become members when the regulation is initiated and subsequent to organization entrance will be examination and the payment of fees. The fee would be $25.

"We are today, looking up to the intellectual quality of women. I have seen women in past years taking a place in thinking in a way men are not doing today," said Dr. Robert C. Wallace, principal of Queen's University, Kingston.

Dr. Wallace believes the middle or upper school culture is not sufficient general education for the nurse. And there are many adjustments to be made in the curriculum for nurse education. "This profession is one of the last to free itself from the apprenticeship system, but the tendency is in that direction," the speaker said. An eight-hour day including academic work, for six days a week and a period of community service nursing are among the changes recommended. The standards of qualification for the teaching of nurses should be raised and much attention should be directed to the personality of the nurse and its development. "The personality of the nurse has a tremendous influence on the patient," Dr. Wallace stated.

More carefully selected students, better qualified teachers and more effective organization of clinic teaching and supervision are advised by Miss Lindeburgh, who is the convenor of the curriculum committee of the Canadian Nurses' Association.

The primary concern of the committee has been the individual nurse in training. "Our concern is not how well she can be made to fit into the scheme of hospital nursing service, and the maximum load she is able to carry over a three-year period, in contrast it is what are the potentialities of the student, and to what extent can they be developed," Miss Lindeburgh stated.

Private Duty

Only five Ontario cities have eight-hour days in certain hospitals for the private duty nurses, the Private Duty Section of the Registered Nurses Association of Ontario, was told. The cities are London, St. Thomas, Sault Ste. Marie, Simcoe and Toronto. Five other cities, Hamilton, Peterborough, Belleville, St. Catharines and Kingston have hospital staffs which have voted in favour of the new hours. Ottawa, Windsor and Sarnia are expected to vote in this connection soon. The eight-hour day was turned down in only one city, Stratford.

Eastern Canada Lamb Feeding

Since the initiation of the Dominion lam feeding policy by the Federal Department of Agriculture four years ago, there has been a steady increase in the number of farmers feeding lambs in Ontario. The project makes possible the feeding and fattening of western range lambs during each Fall and Winter on farms in Eastern Canada where there is ample accommodation in farm buildings, a good water supply, and a plentiful stock of feed, including clover and alfalfa and home-grown grains. In the Fall of 1936 interest in lamb feeding spread from Ontario to Quebec, where a number of farmers are now feeding three of the double-deck carloads of lambs, totalling 901 head. In Ontario many farmers operating under the feeder purchased lambs outright. During the Fall of 1936 approximately 50,000 western range lambs were placed on the feed in Ontario and Quebec.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Surgeon Sees Hope For Cancer Victims

WASHINGTON.—Research work is bringing more complete understanding of the cause of cancer and development of more effective methods of treatment, Surgeon General Thomas Parran of the Public Health Service said this week.

"I think we may be on the eve of important developments in getting at the factors which cause cancer and thereby eliminating them,' he said.

That belief, he added, is inspired not by the discovery of methods preventing cancer but, paradoxically, because many chemical substances have been found which produce cancer.

Some of these substances, Dr. Parran explained, have been derived from coal tar, which long has been known to cause cancer, and are closely related chemically to normal constituents of the body.

This suggests, he said, that it may be possible to develop other substances which will retard the production and growth of cancer, just as coal tar derivatives promote growth.

Scientists of the public health service believe that the explanation of the cause of cancer will be found in changes which occur in the chemical reactions of the body.

Senator Bone, Democrat, Washington, and Representative Magnuson, Democrat, Washington, asked Congress yesterday to spend $1,000,000 for a government cancer research program.

Only about $500,000 annually has been spent on cancer research in all the laboratories of the country, Dr. Parran said. This includes the government's expenditure of $115,000.

Working Girl Born Traveler

The working woman, says Miss Audrey Shirtliff, is a born traveler. If more people realize it, much more could be done by way of giving an outlet to her desire to move about, to see fresh things, to make new contacts and new friendships, according to a story from London, England, in the Christian Science Monitor.

Miss Audrey Shirtliff ought to know about such matters because she is the one and only woman in England it is said, who, in the capacity of representative of a big railway concern, is engaged in finding out what women want in the way of travel and of supplying it whenever possible.

It is the working woman in whom she is especially interested. Not because the railways company she serves has any special predilection for working women, but because Miss Shirtliff herself has grasped what it means to live in the poorer parts of the huge city, to know nothing beyond its interminable walls, its unremitting war with grime, its noise, its restless movement, and the opportunity has come to her, to throw her energy into lending a helping hand in the relief of such conditions.

Her work consists in interviewing the officials of countles factories, and workshops, and multiple shops, and organizations generally, and—in selling railway tickets. That is all about it, and there would be nothing of romance whatever were it not that the seller can see, if she knows how to look, something more in the transaction than the vending of a littleoblong of green cardboard—she can perceive, by the use of a quick imagination, that an oblong of green cardboard may be turned into a magic carpet when handled in the right way.

Miss Shirtliff tells of how, not long ago, she got the chance of sending a party of women down to Bournemouth. Not one of them had ever seen the Wessex country before, and, she says, they were spellbound. They did not know, she says, that "England had anything like that." They could hardly believe it But in glimpses such as these may lie the opening to a new world, and it is this thing that forms the romance of being a peddlar in magic

W. P. Bull, K. C. Speaks at Niagara

Probabilities for next week are: colder with snow.

Speaking to a capacity audience in St. Mark's Parish Hall here on Tuesday evening, in a setting thoroughly historical and to a people very responsive, Mr. Wm. Perkins Bull, K.C., of Toronto, noted author and historian, told the story of the United Empire Loyalists in an address that opened many new angles and which was greatly enjoyed by all who heard him.

Mr. Bull, whose latest volume, "From Revolution to Repulsion," will soon be released, has undertaken a vast amount of research work in connection with some 200 Loyalist families and this has placed him among the leading authorities on the subject.

As Daughters of the Empire you are spiritual descendants of those Loyalists who, in the last quarter of the eighteenth century, sacrificed to the limit for the Crown. Furthermore, since you are residents of that little speck of earth colloquially known as the Niagara District, I feel sure each of your family trees has at least one anti-rebel root. Indeed, I would wager any lady in this audience a hat, that if her people have lived hereabouts for say three generations or more, there is Loyalist blood emblazoned on her family escutcheon.

It has been growing fashionable in recent years to decry the U. E. Loyalists. I want to appeal to you not to let that happen. Each of us has something to which he or she is loyal above all else, but the question is what price are we willing to pay for our loyalty. Men in every generation have given their lives, or all that made life worth while, for religion, science, their country or their loved ones. But how seldom has the history of the world seen the wholesale exodus of a people inspired by loyalty to a principle and by that alone. Let us see those people as they were, not weaklings and fools as the British too often treated them, nor black villans as they appeared to their rebellious fellow countrymen, nor ever suffering saints as their own historians too often depict them, but human beings pulled to and fro by all sorts of influences just as men and women are today. It takes study to see them this way, and a great deal of study, but it is worth while.

HEAVEN

"The joys of heaven will begin as soon as we attain the Character of heaven and do its duties. Try that and prove its truth—As much goodness and piety, So much heaven."
—Theodore Parker.

"The sinner makes his own hell by doing evil, and the saint his own heaven by doing good."—Mary Baker Eddy.

"Neither shall they say, Lo here! or lo there! for, behold the kingdom of God is within you."—Luke 17: 21.

"It is heaven upon earth to have a man's mind move in charity, rest in providence and turn upon the poles of truth."—Bacon.

"We are as near to heaven as we are far from self, and far from the love of a sinful world."—Rutherford.

"Heaven must be in me before I can be in heaven."—Stanford.

NEWS ITEM FROM OTTAWA

Gordon Graydon, Federal Member for Peel, directed on Thursday last an enquiry to the Postmaster General on the floor of the House of Commons with respect to the rumoured appointment of a new postmaster at Palgrave. Mr. Graydon desired to know if such an appointment had been made, and if any returned soldiers had made application for the job. He also asked the Minister what reasons existed for the selection of a postmaster without an overseas record in this instance.

The Postmaster General denied that a permanent appointment had been made and stated that only a temporary arrangement had been completed. He further informed the Member for Peel that the permanent appointment would be made in the usual way, and that applications for the position had been made by returned men in this case.

CORONATION DAY

A public meeting was held at the Town Hall Monday night for the purpose of making arrangements for a proper celebration of Coronation Day. All organizations were invited and there was a good representation present.

Officers and persons to represent the different village organizations were chosen as follows:

President, Len Lee.
Secretary, Jas. Sinclair.
Treasurer, C. P. McArthur.
Legion, William Arch, C. P. McArthur.
Orange, Vic. Bonham, Ross Evans.
Masonic, Harry Hope, Frank Reid.
Oddfellows, Fred Noble, Jas. Sinclair.
Business Men, H. Q. Burns, Len Lee.
Public School, R. Lancaid.
Women's Institute, Miss Mabel Graydon.
Eastern Star, Mrs. [illegible] Wolfe.
Other appointments [illegible] made later.
Next meeting will [illegible] day, April 20th.

"Elephant-Bear's" Bones in U. S. National Museum

Bones of a great beast that looked like a bear, had feet rather like an elephant's, but was not very nearly related to either animal, are on display in the Smithsonian Institution in Washington. The fossils were found in the Big Horn Basin region in Wyoming. The skeleton was embedded in a matrix of stone, says Science Service.

The creature, known to scientists as Coryphodon, was heavy-bodied like a tapir and not quite so high at the shoulder as an ox. It probably was pretty much "boss" in its day, some sixty million years ago, for its great bulk was reinforced by a pair of formidable 8-inch tusks in its jaws.

Coryphodon's foot bones are what especially intrigue scientists. The animal neither walked flat-footed like a bear nor up on the ends of its thick toes like a modern elephant. It seems to have been progressing in the latter direction, however, especially in its forefeet which bore the greater part of its weight. Its gait probably was a slow shuffle, like that of the modern elephant.

In the same region where the elephant-bear flourished there lived also the earlier types of horses. The latter line has survived, while the bigger, more dominant brute has perished. The horse-ancestors made up for their lesser bulk and fighting ability by greater agility and brain capacity, and therefore greater adaptability. The elephant-bear, a massive, stubborn conservative, was beaten by a changing world which it could neither understand nor get used to.

Many Miles of Chewing Gum Consumed Annually

Over 100,000 miles of chewing gum are sold every year, the major portion being consumed in the United States, states the Montreal Herald.

Chewing gum in its raw state is the juice of a tree known as the sapote, which grows in various parts of Central America.

The sapote is a graceful tree, with a straight trunk some forty feet high. It is tapped very much after the manner of a rubber tree, spiral cuts being made in the bark, through which the juice runs down the trunk to jars placed at the foot.

The sap, or "chicle," as it is called, looks like milk when it first enters the jar, but on exposure the color changes to a dull yellow, and thickens until it is almost like sirup.

The gum is taken out of the jars and boiled down in huge pots, after which it is kneaded and excess moisture is squeezed out. It is then molded into large loaves, cooled, and wrapped in canvas for exportation to the chewing gum factory.

In the factory it is mixed and boiled in copper vats to the desired thickness, and sugar is added with flavoring essences.

Occupation of Cyprus

On June 4, 1878, Great Britain, by treaty with the sultan of Turkey, took over the occupation and administration of Cyprus. The Turks remained nominal sovereigns, and received an annual "tribute" of £92,800. At the outbreak of the war with Turkey, November 5, 1914, Cyprus was formally annexed to the British crown and became an integral part of the empire. At that time it was announced that every Ottoman subject residing on the island would become a British subject, unless he stated in writing his desire to retain his Ottoman nationality. With very few exceptions, the Greek residents accepted with enthusiasm and the Turks without demur. However the so-called "Turkish tribute" is still paid borne by the revenues of the island.

Many Uses for Cacti

Cacti are put to many uses. They furnish fruit known as Indian figs. Some cactus plant pulps of a texture of melon rind are made to conserves like orange or citron peel and sold or made into candy. From other cacti drugs used medicinally, or deadly poisons, are extracted. The lophophorns yields peyote that temporarily turn its addicts into irresponsible madmen. Some sturdy cactus ous structures serve as fence posts timbers for mines, or even as material for Indian huts. Cacti really ranges from seeds ground in flour for food to living plants thickly for impenetrable fences.—Los Angeles Times.

The Gaelic Word "Baile"

The Gaelic word "Baile" (pronounced "Ball-ya"), meaning a was formerly used to denote any group of dwellings or settlements larger than a mere village and the name of a local chief was added, says Pearson's Weekly. Thus we have Bally-mar Bally-bonan, etc. Where there was a local lord or chief of sufficient distance to be thus honored, the town distinguished by some peculiarity the surrounding neighborhood, Ball-na-hinch—or Ballynahinch—"town-of-the-islands."

The Maidu Indians

The Maidu Indians is a group small tribes in California, belonging to the Pen-Utian linguistic family, formerly located on the Sacramento river. Of the three divisions—valley foothill and mountain tribes—the valley Indians were the most prosperous and culturally developed. Originally numbering between 8,000 and 10,000 there are less than 1,000, living chiefly at the Round Valley reservation, California.

1937 Tax Bills Will Soon Be Issued

The Village Clerk has started to make out those interesting little Tax Bills which all property owners are so anxiously waiting to receive. They are a pretty pink color this year and should make you feel good to get one. The first instalment falls due June 1st, the 2nd Aug. 15th, and the 3rd Nov. 1st. The Tax Rate is 2 mills higher this year—but don't blame the Council or the High School Board either, for the increase. The Ontario Government made the law which makes Streetsville High School Board responsible to Islington High School for the attendance of Streetsville scholars at that High School because certain subjects they want to take are not being taught in our H. S. The H.S. Board must get the money from our Village Council—so up goes the tax rate. The amount required by Islington High School Board for 1937 on account of the Streetsville pupils is $800, which adds 4 mills onto our taxes for this year. We think it about time a new High School was built in Streetsville with more accommodations and one more teacher, at least, so that the parents would not have to send their children away from home to take the higher courses. According to the questionaire presented to the pupi's recently, 73 per cent. were desirous of taking a commercial course—and they cannot receive it for the lack of equipment.

People Want New Schools

A combined meeting of High and Public Boards of Streetsville was held last Thursday night at Public School. The H.S. Board were the guests. The Rev. J.Y. Fraser was chosen chairman of the meeting and Mr. Leo Lee acted as secretary. A few suggestions were advanced about remodelling the Public school building and adding enough rooms to accommodate both schools. This would mean a saving on caretaking and fuel bills. If more land was needed, part of Maiden Lane might be expropriated. Nothing definite was arrived at. The project is only in the suggestive stage and many meetings will need to be held before anything definite is agreed upon. It was decided for each Board to have a meeting and decide if they really wanted a combined school, and to report at another joint meeting of the boards to be held later.

Prices were presented of the cost of remodelling schools in other towns and we might possibly secure a suitable building here for less than the figure we quoted last week, namely sixty thousand. Of course there will be opposition to the movement—there always was. You might say the old schools are good enough—up to date people want something better and expect to get it even if it does increase the taxes a mill or two.

Is YOUR paper paid for ?

The Open Column

The Oshawa strike has brought a somewhat surprising development in newspaper circles. The Star, supposedly a semi-Liberal organ, is tooting loudly against Hepburn, and the Telegram, usually noisy in its condemnation of the vivacious Liberal premier, is just as noisy in support of his strike stand, or stance, The Globe-Mail is a bit less pro-Hepburn than the Telegram.

An interesting "break" occurred at Brampton, when Hon. Ian Mackenzie announced that Canada would stand on its own heels in the event of war, and would not rely on the Monroe doctrine. After this announcement appeared in the paper, Mr. Mackenzie bethought himself that his frankness might cause international head-scratchings, and he decided that he hadn't said quite what the papers gave him credit for saying. The pressmen, in this case, were relegated to a dark gallery at the rear of the armories, where the banquet at which Mr. Mackenzie spoke was held, and it is highly probable that the speaker did not know the hounds of the press were on his trail.

Peel Juniors will soon need a new theatre for their annual dramatic competitions. St. Paul's auditorium, at Brampton, was jammed to the doors for the finals, and quite a number of persons, including your informant, could not get seats.

Empty and in bad repair for many years, the "Stone Church of Sydenham" was reopened on Sunday, and will house services of a Baptist mission during the coming summer. Although the little building will hold but few more than a hundred worshippers bequests amounting to more than $13,000 were left for its maintenance.

Herb Pinchin, Toronto Township clerk, claims that the amendments to the assessment act relating to high and continuation schools, which have thinned the hair of several county officials during the past three months, are not operative this year, as far as the Toronto Township levy is concerned. At the same time, Brampton has prepared to strike its assessment on the new basis.

March 22, 1937.

Mr. William Couse,
Streetsville, Ont.

Dear Mr. Couse:

It is now a long time since the 1936 Royal Winter Fair and quite a while since you were good enough to let me have the opportunity of reading the very interesting essays written by pupils of the Streetsville High School, in connection with the trip they made to our Show. Apparently each child is appreciative of the opportunity they had to visit our Fair, and, one thing sure, they are likely to think more of the product of the apiary than ever before.

May I say how much I appreciate the personal interest you took in the development of the "Youth in Agriculture" idea and the very practical way in which you encouraged the young people to observe and learn something while visiting the Royal. My one regret is that such an effort was not put forth in more localities.

I return the essays herewith and again wish to thank you for your whole-hearted co-operation and assistance which added to the success of the 1936 Royal Winter Fair.

Yours faithfully,
WILL A. DRYDEN,
Manager.

P.S.—This letter is self-explanatory.
EDITOR.

INTEGRITY

"Nothing more completely baffles one who is full of tricks and duplicity, than straightforward and simple integrity in another."—Colton.

"The man of integrity is one who makes it his constant rule to follow the road of duty, according as Truth and the voice of his conscience point it out to him."—Mary Baker Eddy.

"A man of integrity will never listen to any plea against conscience."
—Home.

"Integrity is the first step to true greatness. To maintain it in high places costs self-denial; in all places it is liable to opposition, but its end is glorious, and the universe will yet do it homage."—C. Simmons.

"Give us the man of integrity, on whom we know we can depend; who will stand firm when others fail; the friend, faithful and true, the adviser, honest and fearless; the adversary, just and chivalrous. Such a one is a fragment of the Rock of Ages."
—J. P. Stanley.

"Nothing is at last sacred but the integrity of your own mind. Absolve you to yourself and you shall have the suffrage of the world."—Emerson.

Mr. Garland Brooks, who has had charge of the morning service at Cooksville United Church, preached his farewell sermon last Sunday. Rev. G. M. Chidley will take both services from now until the end of May.

Mr. George Dyer of Cooksville, is on the sick list.

Don't forget the coronation party at the Bowling Club rooms, tonight (Thursday).

Miss A. A. Cresswell of Martintown is the guest of her nephew, Mr. C. P. McArthur, and family.

The Coronation Committee for the Streetsville celebration on May 12th met Monday night and made some further arrangements.

CHILDREN'S AID SOCIETY

The second annual meeting of the Children's Aid Society of the counties of Peel and Halton will be held in the Court House, Brampton, at 3 p.m., D.S.T., Wednesday, April 28th. Annual Reports will be presented and officers elected for the ensuing year.

The guest speaker on this occasion will be Mrs. J. S. Driscoll, Director of the York County Children's Aid Society. Representatives from the Provincial Department of Public Welfare will also address the meeting.

A very cordial invitation is extended to all who are interested in the work of the society.

Teacher—"Now, can any boy give me a sentence using the word 'diadem'?"

Pupil—"People who drive carelessly across railway tracks diadem sight quicker than those who stop, look and listen."

BRAMPTON

TRINITY DRAMATISTS WIN TROPHY IN PEEL

Trinity defeated Ebenezer and Terra Cotta in the finals of the Peel Junior Dramatic Competition in the auditorium of St. Paul's United Church Friday night.

A capacity audience attended the plays, and Campbell Mathews, Toronto, judge of the series, found little to choose between the three presentations.

EASTERN STAR OFFICERS

Peel Chapter, O.E.S., held their annual election of officers Monday night, when the following were chosen to hold office for the ensuing twelve months:

Worthy Matron—Mrs. E. C. Drew.
Worthy Patron—Sam. Cordingly.
Associate Matron—Mrs. E. W. Hare.
Associate Patron—Geo. S. Bonham.
Secretary—Mrs. W. G. Cook.
Treasurer—Miss E. M. Reid.
Conductress—Mrs. J. T. O'Neil.
Assoc. Conductress—Mrs. J. H. Beattie.
Trustees—Mrs. W. Atkinson, Mrs. H. W. Couse, Mrs. G. S. Bonham.
Auditors—Mrs. H. W. Wolfe, Sam Cordingley, Geo. S. Bonham.

Dr. J. A. Cation and Mrs. Cation, Toronto, Mr. MacDonald and Mrs. MacDonald, Weston, and Miss Cora McGowan, Oakville, assisted with the election.

After a dainty lunch, a pleasant evening was brought to a close.

TRINITY CHURCH NOTES

Representatives from Trinity Church A.Y.P.A., attended a monthly meeting of the Peel Deanery and District Local Council, held at Glen Williams on Tuesday evening.

The services on Sunday, April 25th, in Trinity Church, will be held on Daylight Saving Time, and the congregation is asked to govern themselves accordingly. The services will be at 11 and 7 D.S.T.

The next meeting of the Peel Deanery Sunday School Teachers' Association will be held on Tuesday evening, April 27th, at Christ Church, Brampton. It is hoped that our Sunday School will be represented at this meeting.

It is hoped that many members of the Girls' Auxiliary will be able to attend the annual meeting of the W.A. in Toronto. The girls' meeting is held on Friday evening, April 30th, at St. Paul's Church, Bloor Street.

The services in Trinity Church on May 2nd will be conducted by the newly-appointed rector, Rev. E. S. Ottley.

On the Sunday evening, before Coronation Day, there will be a Coronation Service in Trinity Church. Special service sheets, approved by the Archbishops of York and Canterbury, are being secured for the service. An invitation is given to all to be present at 7 p.m. on Sunday, May 9th. The service will be conducted by Rev. Ottley.

LET US SMILE

Sea Captain—Good morning, Parson. Haven't seen you lately.

Parson—No, Captain. I've been busy. Only this morning I married three couples in fifteen minutes.

Captain—Smart going, Parson. That's twelve knots an hour!

The Young People's Society of Cooksville will put on the play "Path Across the Hills," on Friday, April 23rd.

Mrs. Joseph Page, Cooksville, was taken to the Western Hospital, Toronto, for treatment.

We Pay For Modern Schools

When ever I read that command in the Bible, "Remove not the ancient landmarks our fathers have set." It makes me think of some of the ancient landmarks our pioneer fathers have set. When they settled in this unbroken forest their log cabins came first. Then came the log schoolhouse. And at that time there was no clergy reserve fund, no township or county council and no organized school board; the enterprise was purely local. Scotchmen are always accused of grabbing everything within their reach and I, being one of that class, find myself in possession of considerable pioneer school history. Even before I was of school age, when they used to thresh with the horsepower threshing machines, when resting the five teams on a hot summer day. How often during these resting spells, the conversation would be about schools. There would be about a dozen farmers and their sons at these threshings and all would generally take part in the discussion. There were always tales told about the first log schoolhouse, then the second would be a frame one, then the present beautiful brick or frame buildings, dotted all over the country, that are a credit to the descendents of the old pioneers. And now these old landmarks are in danger of being removed. And the descendents of the old pioneers will have nothing to say or do about it, but look on and pay the bill. Let us look into the future and see what the cost will be. In 1920 the first consolidated school built in Manitoba would be similar to schools that would be built here. This school was an imposing structure, comprising six class rooms, laboratories, teachers' offices and an assembly hall, the whole built in the form of the letter H. A long shed like a stable marked the five acre yard, large enough to accommodate six summer and six winter vans, with twelve horses. The summer vans resembled such stage coaches as had been in use twenty years ago; the winter vans mounted on bob sleighs, had boxlike canvas tops. Inside was a driver's seat, behind it a stove screwed to the floor, and two benches running the length of the van. The school was administered by a board consisting of one trustee from each district. The route was prescribed by the board. By the time the school was reached, the first children had travelled fourteen miles and the van had thirty-one children. The first children had to board the conveyance at a quarter past seven. That was before daylight in the winter. Often during the winter the children were late getting to school. At night it was often six or after when they got home. The teacher in this school asked the scholars for a composition on "Why I Like Consolidated Schools." The following is the composition of a fourteen-year-old girl: Why I like Consolidation. The fact is I don't like it at all. I have to get up at half past five in the morning. Breakfast I have at a quarter past six. Before seven I leave the house warmly wrapped to walk to the corner of my father's farm. At seven I hand myself over to the jailer who takes me to the school. He tries to bandy impertinent jokes with me. In the van it is hot, I take off my wraps. For the first half hour it is not too bad. I have at least ample room. Then we pick up a bunch of nine children from three families. After another three quarters of an hour we pick up eleven more. Then in three more stops ten more are added; complete load thirty-one. Whenever the van stops I bend forward to get a whiff of the delicious fresh air. The air we breathe over and over again nauseates me. By this time I am sitting on my wraps, we are so crowded. I don't like to do that. I have nice clothes and like to take care of them. None of the other children will sit still. At twenty minutes past nine we are handed over to a new set of jailers. I am so stupified with the bad air and jolting that study is the last thing I want to do. But that is what we are sent for. At four o'clock, which comes as a great relief, I hand myself back to the jailer of the morning. When I get home I have no life left and certainly no desire to write a good composition on why I should love consolidated schools.

Then like a plague coming over the country, the sowers came forth to sow the seeds of discontent. And how successful they have been to lure the boys and girls from the open country to the glare and glamor of the big city. And now you can seldom find a farmer's son or daughter wanting to live in the country on a farm. And who is there could look for anything different when for years we have had so much of the following literature.

If Canadian rural life is to be saved some radical changes must take place in the rural school. First of all the little one room school inadequately equipped, poorly cared for, inefficiently taught, must disappear. The consolidated school must take its place. But there is another change just as radical and just as loudly urging its claims. If our rural schools are to be administered efficiently in view of the necessities of changing conditions, the local school board must give place to a body chosen from a larger area than a rural school section. A municipal school board covering a municipality in the west and a township in the east, is much more likely to find six or seven public spirited wide awake school trustees, than thirty or forty or sixty. A great menace to the rural school is found in the general weakness of its boards. Very few country bred people have had adequate educational advantages to appreciate the needs of a school. This results frequently in a board organization of well meaning, honest, but ignorant, therefore inefficient men. To leave the important office of engaging and dismissing a teacher to a body of three men appointed for no special reason is to take a risk too great. The fact that there are literally thousands of untrained teachers in the rural schools in this Dominion emphasizes the necessity of more intimate supervision. An eighteen-year-old girl is sent out to teach a school from three to sixty pupils. She is inexperienced in life, knows little of human nature, is immature physically, and mentally, has had a short training in normal school, or no training at all. And by the description given of this eighteen-year-old girl who was sent out by the board of education with a license to teach school, she should have been sent to a hospital or a mental institution. Then this is used as an argument to disqualify the three men on rural trustee boards. Three men who are always appointed by the ratepayers and parents, and who could dismiss them at a moment's notice if found out guilty of doing anything that was unfavourable to the interest of the pupils or the school. And these men's services were always given free from charge or any obligation. And now we will repeat the argument given by Dr. F. B. Proudfoot, of Russell, in his presidential address to the rural trustees' section of the Ontario Educational Association. Dr. Proudfoot scores the system of having the schools of the Province the size of Ontario operated by eight hundred separate boards. We have heard this argument of Dr. Proudfoot so often through the press that it seems within our rights to ask the question, Why would the people in these rural sections pass over to a municipal board almost the last landmark of power they possess, and hand it over to men whose only qualification is they are members of our municipal council? These men in arm chairs, who are so anxious for a school board appointed by the members of a township to supplement the three local trustees, should be taken by the hand and introduced to these officers. The members of our municipal council are not selected because they are the brainiest men in the municipality. There is not one office but what an ordinary public school pupil could fill. They never lost one hour or spent one dollar to fit them for this work. And they so soon get puffed up with the importance of their office and they arrange among themselves what their services are worth. Our council has come to be a family compact, even greater than the 1837 rebellion. We hope kind providence will protect the overburdened tillers of the soil from giving any more power and money to our municipal members and protect our rural schools from their power. The rural people are not asking these learned men for advice so freely given and for which the already burdened taxpayer would have to pay. The rural people do not want consolidated schools. They want to see our little one-room country school that has done so much and is still doing so much to prepare our young people for the battle of life. This verse of scripture always come to me when I hear some men giving advice: "Much learning has made them mad."

SANDY.

COOKSVILLE

Cooksville Volunteer Firemen held a very successful dance Friday night in Dixie school. The proceeds will be used to buy new equipment.

Harold Pfeiffer, Waterloo transport driver, was arrested on Saturday by Traffic Officer Fraser Bell and lodged in Brampton jail on a charge of being intoxicated in charge of a motor vehicle after the officer had followed Pfeiffer's truck for some distance up the Centre road. Bail was set at $500.

A charge of reckless driving was laid against T. W. Davis, Maynard Ave., Toronto, following a minor accident on the Dundas Highway near Erindale, when Davis is alleged to have struck another motor in charge of Earl Williamson, Long Branch.

SUNDAY SCHOOL LESSON

LESSON IV

The Obedience of Noah — Genesis 5:28 — 9:28

Printed Text — Genesis 8:20-22; 9:8-17

Golden Text — "By faith, Noah, being warned of God concerning things not seen as yet, moved with godly fear, prepared an ark to the saving of his house." — Hebrews 11:7.

THE LESSON IN ITS SETTING

Time — The traditional date for the flood is about 2350 B.C. Recent archaeological discoveries would place the flood nearer 3000 B.C. Ancient chronology is far from being settled, and we need not examine this difficult problem in this lesson.

Place — Where Noah was when he built the ark, we do not know. Mt. Ararat on which the ark rested after the flood, is in Armenia, near where the Tigris River has its source, almost directly north of the city of Babylon.

"And took of every clean beast, and of every clean bird, and offered a burnt offering on the altar." For a list of animals counted as clean in the sacrifical rituals of Israel, see especially Deut. 14. The burnt offering is the first to be described in the book of Leviticus (chapter 1), and, of course, was one in which not only was an animal offered in sacrifice, but one in which the slain animal was not consumed on the altar with fire.

"And Jehovah smelled the sweet savor." The sacrifice of the patriarch was as acceptable to God as refreshing odors are to the senses of a man. "And Jehovah said in his heart, I will not again curse the ground any more for man's sake, for that the imagination of man's heart is evil from his youth; neither will I again smite any more everything living, as I have done while the earth remaineth, seedtime and harvest, cold and heat, and summer and winter, and day and night shall not cease." This declaration is not a revocation of the curse of Gen. 3:17, nor a pledge that such curse would not be duplicated. The language refers solely to the visitation of the deluge, and promises, not that God may not sometimes visit particular localities with a flood, but that another such world-wide catastrophe should never overtake the human race.

"And God spake unto Noah, and to his sons with him saying, And I, behold, I establish my covenant with you, and with your seed after you; and with every living creature that is with you, the birds, the cattle, and every beast of the earth with you; of all that go out of the ark, even every beast of the earth. And I will establish my covenant with you; neither shall all flesh be cut off any more by the waters of the flood; neither shall there any more be a flood to destroy the earth." The word my points to a covenant already in existence, though not formerly mentioned until the time of Noah.

"And God said, this is the token of the covenant, which I make between me and you and every living creature that is with you, for perpetual generations; I do set my bow in the cloud, and it shall be for a token of a covenant between me and the earth." The wordnow refers, of course in this marrative, to what we call the rainbow, i.e., a bow arc of several colors appearing in the heavens during or after rainfall, 'formed opposite the sun by the refraction and reflection of the sun's rays in drops of rain. The word rainbow is not found in the Old Testament, and only twice in the New Testament (Rev. 4:3; 10:1). It is not said that the rainbow first appears at this time, for, undoubtedly, due to the invariableness of the laws which do cause rainbows, there must have been many before this time, whenever the physical conditions creating a rainbow existed, but what the passage does tell us is that now, for the first time, God appoints this phenomenon as a token of his pledge to never again curse the earth with a flood.

"And it shall come to pass, when I bring a cloud over the earth, that the bow shall be seen in the cloud. And I will remember my covenant, which is between me and you and every living creature of all flesh; and the waters shall no more become a flood to destroy all flesh. And the bow shall be in the cloud; and I will look upon it, that I may remember the lasting covenant between God and every living creature of all flesh that is upon the earth. And God said unto Noah, this is the token of the covenant which I have established between me and all flesh that is upon the earth." The activity ascribed to God should be particularly noticed. Four times is he said to establish his covenant (9, 11, 12, 17); once he is said to set his bow in the cloud (13); once he is said to bring clouds over the earth (14); and twice it is said that he would remember his covenant (15, 16); and once that he would look upon the bow in remembering his covenant (16). "And there are no obligations on the part of men or of the creatures. This covenant is God's only. It is contingent on nothing done by the recipients. God binds himself whatever be the conduct of men. This covenant is the self motivated promise of an unconditional mercy.

Farm Problems

Conducted by
PROFESSOR HENRY C. BELL
with the co-operation of the various departments of Ontario Agricultural College

1. Question: "Have you any evidence to show beneficial results to grain crops when salt is applied? Would 250 lbs. per acre cause injury? Does salt cause more moisture to be available to the growing crop?" —R. P. Huron County.

Answer: The use of salt with sugar beets was common practice in England some years ago. Salt does not add any plantfood, but the sodium of the salt lets loose the potash out of the soil Sugar beets are particularly potash-loving crops on account of the starch and other carbonhydrates that they contain, hence the liberation of potash helps in their growth. I find records where English farmers used salt on soils growing barley. The same reaction results there namely that the barley crop benefitted from the potash which the salt let loose. Malsters, however, found that the addition of salt lowered the quality of the barley for malting purposes.

The sowing of salt at 250 lbs. per acre would not be injurious to crops. In a short time, however, it would be injurious to the soil, in that it leads to the depletion of the potash of the soil. In the case of sugar beets or mangels, it may be that the help which these crops receive from salt is to some extent due to the fact that the beet plant is thought to have originated near the sea. Salt has no plantfood value whatever. As far as we know, it acts only as a stimulant.

When it is applied in quantity, it does draw moisture from the air, but at the small rate of application which would be possible to put on the soil, I cannot conceive any beneficial effect resulting from the application of salt due to the moisture it gathers.

I never advise the use of salt because as I have already said, it is nothing but a whip or stimulant to the soil.

Question: "Would it be possible to sow fertilizer after the grain has been sown? I am not going to be able to procure a fertilizer drill at time of sowing, but could get one shortly afterwards. Would it be possible to sow the grain with an ordinary drill and follow later with fertilizer? If this is possible, how much later could this be done to get the best results?"—C. B., Perth County.

Answer: I would not advise trying to add fertilizer to the field after the grain has been sown. I am afraid the discs and shoes would tear out the young sprouting seeds to such an extent that it would do more injury than good. The one exception to this is a top dressing of nitrate of soda, sulphate of ammonia or cyanamid. This can be made by broadcasting the nitrogen carrying material on top of the wheat. This is common practice in England in the Spring, especially on wheat and barley. Understand, broadcasting does not work the fertilizer into the soil. It simply scatters the material on top. The moisture of the soil and any rain that falls dissolves this material and about five bushels per acre improvement usually results.

Seeding Dates For Grain Crops

Result of Five Years' Experimental Seeding at Different Dates

An experiment to test the best dates for seeding grain crops was commenced at the Experimental Farm, Ottawa, in 1925 and carried on for five years in which wheat, barley, pear Banner oats (a late variety), and Alaska oats (an early variety) were seeded at five differenet dates at two weeks intervals. The objec of this experiment was to learn the most suitable date to seed these crops under Ottawa conditions and also learn which of the crops was best adapted for late seeding in the event of a delayed seeding. The experiment was conducted in a rotation of grain, clover, thus allowing for duplicate plots of grain seeded at the varying dates, one crop following clover, the other following grain.

The results of these dates of seeding grain experiments at Ottawa indicate that wheat and peas should be sown as early as possible in the Spring. Barley and Banner oats may be seeded without loss of yield as late as May 15, and Alaska oats (the early variety) as late as June 1. Buckwheat may be seeded at any time during June, preferably about the beginning of the month. It should be remembered that the results of these experiments conducted at Ottawa may not be applicable to other points with different climate and soil conditions. As a rule, however, wheat oats, barley, and peas should be seeded as soon as the soil is sufficiently dry to permit working satisfactorily.

Barley adapts itself to growth over the longest range of seeding dates and, if necessity demands that a crop be seeded late, barley is a suitable crop Alaska oats is also a very suitable crop for this purpose.

ONLY ROYAL HEIR IN 600 YEARS

The infant son of the Crown Prince and Princess, the only royal heir born in Norway for nearly 600 years, was christened, Harald, in Oslo, recently. He is shown in his first portrait with his sisters, Princess Raghild (left) and Princess Astrid. The last heir-presumptive born in Norway was Olav Haakonsson, in 1370.

Picturesque Corps Parade

The picturesque Yeoman of the Guard, wearing the uniform of their 16th century forebears, photographed during their annual Easter morning parade and service at the Tower of London.

Will Reside In Montreal

Mr. and Mrs. Frederick Bourchier Taylor, of London, England, who are coming to reside in Montreal, in the early summer. Mr. Taylor is a painter-etcher and has received great praise in England for his work. A son of Colonel and Mrs. Plunket B. Taylor, of Rockliffe Park, Ottawa, he is a graduate of McGill University, having won a scholarship, and lived here prior to going to England to study. Mrs. Taylor is a daughter of Mr. and Mrs. Delamere Magee, of Toronto. The marriage took place in London, England, last December.

Swan Aided in Hatching Eggs

LOS ANGELES.—It begins to look as if a policeman may be assigned to help a swan hatch her eggs. The park has asked the Police Chief to station a patrolman near the swan's nest daily during the hatching process. It was George R. Mitchell, president of the Humane Education Society, who said that originally the swan had nine eggs, but somebody had pushed the bird off the nest and stolen five.

Movie-radio gossip

By DOROTHY

So many people complained about the moderately-happy ending of "Lost Horizon" that the director changed it several weeks after the picture had started its triumphant run in New York and Los Angeles. The ending that the rest of the country will see makes it appear very doubtful that Ronald Colman will ever fight his way through a blizzard to the heavenly peace of Shangri-la high in the Thibetan hills. With either ending this is a picture that everyone will want to see.

—•—

Fruits and vegetables are the heroes and heroines of a movie being shown extensively in the producing regions of the South and Far West. The picture, designed to bring the big city auction markets to growers, dramatizes the selling process on a typical auction market where thousands of cars of fruits and vegetables are translated into millions of dollars in revenue to the growers every year.

List among your future film favorites Ella Logan whom you will soon see in Universal's "Top of the Town." She is the enchanting singer with a thick Scottish burr to her voice who, accent or no, used to shout swing music over the radio with Abe Lyman's band. I like her best when she sings simple songs, but swing addicts rave about her ability to improve new hi-de-hos.

—•—

"Seventh Heaven" was previewed in Hollywood this week, and everyone agrees that it brings more glory to Jimmy Stewart than to Simone Simon, though she is pert and appealing in the role that brought Janet Gaynor fame. Simone arrived at the preview wearing a hair ribon tied in a bow just over her forehead, and was so noticeably nervous that she fidgeted with her coat, her dress, and her hair ribbon all evening. She was accompanied by Anton Litvak.

Simone Simon

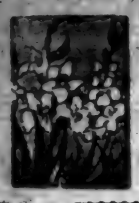
ODDS and ENDS:— A make-up girl at the Paramount Studio has 12 wrist watches given to her by grateful stars. Just to be different, Frances Dee gave her an alarm clock at the finish of "Souls at Sea" . . . . Ann Sothern will probably win the airlines award for the most persistent air-commuter of the year Whenever she has two or three days to spare, she dashes off to Chicago to see her husband, Roger Pryor, who is leading a band there. . . Everyone at Paramount is glad to have Marlene Dietrich back, particularly the electricians and carpenters on her set. She brings such luscious Viennese cakes and cookies to them.

Husband (reprovingly)—Didn't I hear you tell your friends that your pretty dress came from abroad?



Wife—Not exactly, dear. You see, it's last year's dress which I turned inside out. I simply said 'It's from the other side.'

The Mail Goes Through

"Old Bill" Trainer, interviewed by the Lethbridge Herald—"As far as I can remember, the hardest trip I ever had to get the mail through was around the middle of January this year The snow was at its deepest and the thermometer around 30 degrees below zero

"I left Manyberries as usual around daylight with my sleigh and team with the mail piled behind and it wasn't so bad in my closed-in cab with the heater going. I arrived at Comrey alright that night and the next day I set out for Onefour. The drifts were bad through Devil's Dive and Lost River where there is no traffic, and as I was going down Lost River hill the drifts were about six feet deep and one horse got down. Well, I unhitched the other horse and managed to pull him out and got on again.

"The next day I made the trip to Wildhorse without any trouble and the following day I started the return trip. I got to the postoffice at Carlson's alright, but leaving there, there was such a terrible blizzard, and there being no fences, I got off the trail and got lost in a two-mile stretch Well, I kept on going till finally we struck a fence and following it I arrived at the farm house where I stayed the night. The rest of that trip wasn't so bad but there was one time that it took me all of seven days to make the trip which I make in Summer in less than two days.'

GARDENING

By GORDON L. SMITH

With many vegetables the season can be greatly extended by using very early, as well as late, types. In garden peas, for example, the time of maturity will vary from about 50 days to 75. Instead of planting only one variety it is advisable to include at least three. Early sowing is essential but in certain parts of the country a Fall crop with a quick-growing variety is also possible. In corn, the very early Bantam types mature weeks ahead of the regular season and some of the late, both white and yellow kinds, are on until frost or even after.

READY-MADE GARDENS

The gardener is advised for the quickest possible results, to purchase a certain quantity of started plants of both flowers and vegetables. These are usually purchased from the greenhouse, florist or seed house. It is important to get the varieties wanted, and on this account it is a splendid idea to consult a good Canadian seed catalogue before placing an order. The gardener can look over the various varieties offered in the catalogue and should make sure that the particular varieties wanted are in the boxes of the plants bought.

Among the flowers which can be purchased as started plants are the cosmos, zinnias, petunias, marigolds, salpiglossis, nicotine and a host of others. Cabbage, celery, tomato, head lettuce, egg an dpepper plants in the veetable line are all sold as started plants.

WHERE SPACE IS LIMITED

The householders with only a little land to spare should concentrate on those vegetables which give the biggest returns for the smallest space occupied. Among such kinds are beans carrots, onions, lettuce, swiss chard, spinach, cucumbers and beets. In the lesser-known vegetables, are the leaks, egg and pepper plants, broad beans and cos lettuce. These can all be grown in almost any part of Canada. Experts advise the inclusion of something new in the vegetable line each year so that variety can be gradually widened.

Expect $2 Wheat

So much was said and written about the tremendous world wheat surplus and how it was depressing wheat prices that it comes almost like a bolt from the blue to read that actually no surplus existed since the cry first went forth.

A news dispatch from London states that "It is agreed that the prevailing belief of recent years that a chronic over-production existed was fallacious. An analysis of production and that what appeared to be over-production actually was the result of producers to liquidate surplus stocks accumulated in two most exceptional crops."

If that be so, asks the Kitchener Record, why did some statesmen who should have been in the know advocate a sharp reduction of acreage sown to wheat? The whole thing is conflicting and leaves the average man nonplussed.

At any rate it is evident that the price of wheat is going up steadily. We are well past dollar wheat at which figure the prairie farmer was calculated to earn a margin of profit, provided he had a crop.

However dollar wheat will look like small potatoes if predictions come true for in some quarters it is anticipated that the price of wheat will go to at least $2.10 in July. That would be early enough for the farmer who can't afford to hold his grain to cash in on the sharp advance in this all-important product of the Prairie Provinces. Imagine what such increased purchasing power would mean to the industrial East!

Apple Trees Killed By Frost Replaced

More than 11,000 young apple trees, 11,236 to be exact, were planted in Middlesex County in 1934 and 1935, and county growers are optimistic of regaining the export market lost as a result of the frost damage in the winter of 133-34. The report on apple tree planting is made by J. J. Johnston, Dominion fruit inspector who pointed out that many valuable trees in Baldwin and King orchards were lost by frost.

"The types of apple trees planted are such that our export business should rise again to the 1933 peak level when over 11,000 barrels were sent of Great Britain," he said. Spies, McIntosh, Delicious, now and Baldwins, are the most popular varieties being replanted

An increased export demand for evaporated and canned apples has provided a new outlet for the country's supply and Mr. Johnson believes this trend will also prove an aid to the grower Approximately 6,700 barrels of last year's crop were canned, evaporated or made into cider.

Mr. Johnson pointed to the 1936 crop of 40,600 barrels against the small harvest of 22,700 in 1935 in supporting his views that Middlesex is again climbing to the production pinnacle. As the 1936 crop was unusually heavy he does not expect the 1937 one to be more than medium, although the weather this winter has been favorable for orchards.

Plant Labels That Last Easily Made

Plant labels of several years' permanence can be fashioned simply by any gardener. The ordinary wooden label may be written on with black ink, than dipped in varnish or shellac, and drained and dried before being set in place in the garden.

Possibly less conspicuous and even more durable are labels made of zinc. A sheet of zinc, purchased from the plumber, may be cut into strips of the desired label size. Satisfactory measurements for general use are six inches long by an inch and a quarter wide. A mixture of one liquid ounce of hydrochloric acid and one ounce of powdered antimony makes the writing solution. A sharp-pointed wooden skewer or sharpened hand twig is used for writing, the antimony being stirred into the acid when using. The legend will turn black on both the zinc and both writing and label last indefinitely through sun and storm.

Problem: Over 40

America's greatest problem is the sad plight of men and women over 40 who must eat but who cannot find work. This "too-old-at-40" fallacy is not only unjust to the unemployed but it is still more unjust to the employers as it automatically bars from American industry the best, fastest and most dependable workers, people whose creative and executive powers are just beginning to function at their best. — James Murphy, New York. (letter in New York Times).

Largest Banks The World Over

The largest bank in the English-speaking world — probably in the world — is the Federal Reserve Bank of New York. Next in line is England's Midland Bank, then the Chase National of New York, and three others of London's big five: Barclay's, Lloyd's and Westminster.

Each year, the California Bank of Los Angeles compiles a ranking of the 150 largest banks in English-speaking countries based on deposit liabilities. The New York Reserve Bank stands well in the lead in this comparison with deposits of almost $3,200,000,000. Only three other banks have totals of more than 2,000,000,000, none of them within $800 millions of the big New York institution.

Canadian banks stand very well in the list, with the Royal ranking 17tht and the Montreal a jump behind. It is of interest that the Canadian institutions are substantially larger than those in any of the other British Dominions or possessions. In all Canada has 10 "chartered" banks. Of those no less than eight are included in the 150 largest. Further, for good measure the Bank of Canada appears in this year's list. Ranking of the other Canadian banks is as follows: Commerce, 24; Nova Scotia, 53; Imperial 107; National, 116; Dominion 119; and Toronto, 123.

Delving into the historical records it is found that of the 150 banks, 44, or 30 per cent, are 100 or more years of age. As would be expected, oldest of the lot is an English bank, Coutts & Co., which dates away back to 1692.

Control Mold On Products of Farm

Scientists Devise Method to Save Millions of Dollars

AMES, Iowa.—Iowa State College scientists announce discovery of a cheap, practical method of controlling mold—the leech-like growth that teals the life-blood of plants and taints food.

Dr I E. Melbus and Dr. George C. Kent, botanists, said three years' experimentation yielded a substance —a "toxin"—that will retard the fungus and mold growth on corn, barley fruits and vegetables.

They estimated farmers may be able to save millions of dollars yearly by applying the toxin on fruits, grains and vegetables.

Losses due to fungus disease on all economic plants, they said, has been estimated as high as $1,500,000,000 annually compared with insect damage estimated at $1,000,000,000.

Mold the botanists explained, is the common family name for the large group of sometimes visible parasites. Higher in the biological scale than bacteria and numbering possibly hundreds of species.

HAVE YOU HEARD

Charity often means that we are willing to pass the hat if other people will fill it.

Friend—Are you going to be bothered much with your income tax this year?

No, I have just figured out that at the highest tax rate they can charge me the government will owe me over $100.

It isn't what you say you are going to do that counts—it is what you actually do that turns the trick.

READ IT OR NOT—The American Buzzard is the fastest flying bird.

Some folks burn their bridges behind them, and some burn theirs befors them.

You might better be called a tightwad by the crowd than called to account by your creditors.

Neighbor—What was your husband storming about last night?

Neighbor—Oh, it was so silly of him. He got angry. He found I had used his tennis racket to strain potatoes.

Many a man who think he is the picture of health is only the picture of high blood pressure.

Jane—Don't you thing its awful? Charlie never comes home until after midnight.

Susan—You ought to be happy. My husband starts out at that time.

Some men do what their wives tell them to do and some men are not married.

His Father—As it is your birthday. I'll cancel the $5 you borrowed the other day, so you won't owe me anything.

Clarence—If its just the same to you, Dad, I'll take the $5 in cash.

It is better to be loved and lost than to have loved promiscuously, and makes less work for the courts.

There will always be those who think they know your duty better than you know it.

Here's Progress

Once it would take a woman as long as 14 minutes to get the correct change for a theatre ticket out of her handbag. Incredible, isn't it? Why, in 14 minutes you can cook 3 pounds of macaroni, buy a dozen two-cent stamps, call Scranton, or Ironton, Pennsylvania.

But now we have the zipper handbags for ladies. Everything opens with a lightning zip—outer handbag, compartments, change, purse, all fly open at the touch.

How long does it take the lady to get the price of a theatre ticket together now? Fourteen minutes. — Judge.

COMMISSIONER JOHN McMILLAN

20 ALBERT STREET - - - - TORONTO

Along Canada's Mining Highway

British Columbia reports indicate financing of the large B.C. Nickel deposit by a Canadian-U.S. Syndicate holding contracts for disposal of concentrates to Japanese interests.

Alberta reports Brown Oil Corporation No. 1 and 2 wells deepening rapidly, also drilling under way on Plains Petroleums No. 2 well. A new oil field is indicated by this company's No. 1 well. Acidizing of the Foundation well in Turner Valley is taking place to enlarge production.

In Manitoba, Sherritt-Gordon is preparing for resumption of production.

Ontario's fields are most active. Madsen in Red Lake is moving ahead with its shaft sinking and development plans Hardrock in the Long Lac Camp is developing new high grade in the west shaft section. The McLeod situation underground is reported to be better. Hutchison Lake will be drifting on two levels shortly.

In Porcupine, important ore is reported on Preston East Dome's 200-foot level west drive. The Virita Porcupine has announced diamond drilling arrangements — Pamour reports improving operating results — Kirkland Lake Gold reports a most important ore development at depth south of the Macassa line, The Larder Lake field, from fifteen to twenty-five miles east of Kirkland Lake, is the scene of intense activity. Kerr Addison, by diamond drilling, is enlarging its most important ore limits. Martin Bird continues to develop new ore on three levels underground. Omega steadily prepares for future enlarged production. Upper Canada has attained its 500-foot level shaft objective with underground ore development to begin shortly.

Chesterville reports important results in diamond drilling, with Noranda reported as having entered the company's affairs as a substantial shareholder. Pelangio Larder reports diamond drilling to commence at once. Armistice has already started to drill. Arjon, adjoining Kerr-Addison, is preparing for active work and Barber-Larder has surface work under way. Siscoe has obtained the services of a prominent engineer to direct their diamond drilling and surface operations.

Quebec areas are making record progress. The Quebec Manitou section to the east of Lamaque is developing a boom, with many properties obtaining finances

Newspapers Earn Praise Says Head

University President Says Radio Will Never Supplant Them

LONDON, ONT. — Simple reasoning convinces him that the radio cannot usurp the functions of the newspaper, Dr. W. Sherwood Fox, president of the University of Western Ontario and distinguished educationist, told the annual convention of the Ontario-Quebec division, Canadian Weekly Newspapers Association here.

"Chew the Cud"

Putting the question to the delegates, Dr. Fox replied himself: "I've reached an answer which is satisfactory to me. As I know newspaper readers, they like to ruminate over articles which interest them — chew the cud, as it were.

"Well, you can't do much chewing of the cud over what goes in one ear and out the other ,which is the radio broadcast. On the radio you hear one thing one second and a long string of other things in succeeding seconds."

Bruce M. Pearce, retiring president of the division, exhorted the weekly editors to "give more leadership than we do at the present time."

The small paper, he maintained should do its part in "fighting Communism. Fascism and all the other isms in Canada — because, after all, there is no reason for them in this country."

"The press is one of the indispensible things of civilization," declared Dr. Fox. "It is essential in maintaining civilization and also in developing it to greater human achievement."

It was the "desire and the need" for news which created the newspaper, he continued, reminding that ancient Rome had bulletins on stone which were placed in the forums. The first English paper, he said, was published about 1620, and in strange comparison to today, it published foreign news almost exclusively.

Guide To Civilization

"People of those times thought that local news was too incidental, too trivial, too near at home," he explained. "It has been left to us in modern times to appreciate the value of local news."

It is also interesting to note, he asserted that American newspapers also dealt very little with politics, the people getting the latest on that phase of life through "pamphleteers."

"People who criticize newspapers he said, "don't realize that if there is anything wrong with the papers it is only a reflection of wrongs which have first come into society. Today, newspapers have developed to the extent where they have the power of affecting society as well as reflecting it. They have become a vital guide in civilization."

Dr. Fox held that, during the depression years, the "greatest influence for good" came through the editorial attitude of the average newspaper.

"In spite of the bewilderment which may have been created in the news columns," he said, "the editorial columns of both the weeklies and the dailies have talked to the people in a tone which indicated that panic was not the way out.

"Editorials stressed the need of calmness, and cool deliberation of the facts before remedial action was taken. So I want to pay tribute to the power of the press during the days of depression."

While the circulation is "relatively small," the strength of the weekly paper always impressed him, declared the Western "U" president. "Its editor remains a human being in relation to his readers and that is a wonderful fact," he said. "That contrasts with the editors of the great city dailies whose identities are lost."

Dr. Fox told the gathering some of the facts about the University of Western Ontario which are not generally realized. Next year, Western will celebrate its 60th birthday he said, and it is older than all but three English universities.

With its registration of 2,614 students, Western is larger than any other Western Canada College with the exception of the University of Manitoba, he informed. Its registration is two and a half times larger than that of Dalhousie University, and in arts registration it is larger than either Queen's or McGill.

Dr. Fox held it "unfair" to compare Canadian college problems with those in the United States. Canada, he stated, has only 20 universities exercising degree-conferring powers, while the United States has 880 universities in similar positions. In proportion to the population of Canada, the United States would have 240 colleges, he said.

He concluded with an admonition on the responsibility of an editor.

"If the editor has diplomacy, he will know that sometimes the longest way round is the shortest way home," he declared. "Following that precept he can lay before the people good sound constructive thought and make them believe that they want it."

The Awful Child Wants To Know

"Why is the Government giving Army recruits a special diet?"

"To make them fit and strong."

"Way?"

"To fight somebody, I suppose."

"Why weren't they fit and strong before?"

"Because they didn't have enough to eat when they were children."

"Why didn't the Government give them a special diet then?"

"Because nobody realized they would be wanted as soldiers."

"Does the Government only feed people up when they've got to fight somebody?"

"Obviously."

"If they had been given a special diet when they were children would they be fit and strong now?"

"Yes, and half as big again. There would also be enough recruits to fill the Army twice over."

"Why?"

"Because all those rejected as unfit would be fit."

'Well, if they fed all the children now they would have plenty of soldiers when they grow up, wouldn't they?

"Yes."

"Well, why don't they do it?"

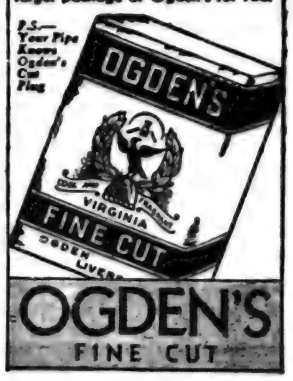
"Because that would be waste of money."

"Why?"

"You can't expect the goevrnment to feed children who may not be wanted as soldiers."

There are 1,024,000 persons by the name of Johnston in the United States.

MOTHERS, DAUGHTERS



NO need for women or girls to suffer every month from periodic pains, headache or sideaches. In girlhood Dr. Pierce's Favorite Prescription is a very beneficial tonic. This is what Mrs. Sarah Jordan of 32 Darling St., Brantford, Ont., said: "At one time I was so sick I could hardly hold my head up and I felt nauseated. I was frightfully upset, hardly slept a wink at night and any effort would leave me ready to cry. Also, I had pains in the back of my head. I had used Dr. Pierce's Favorite Prescription only a short while when it helped me wonderfully. The nausea no longer troubled me and the headaches and pain disappeared." New size, tabs. 50c.

The SNAPSHOT GUILD

HOME-TOWN STREET SCENES

It won't be long now before opportunities to snap pictures like this will be gone.

HOW many of you have as a family possession photographs of scenes about town in the days of horse cars, watering troughs and hitching posts? Not many probably, because those were the days when amateur photographers were few and far between.

Such photographs were usually the work of the professional and those that remain today are mostly in museums and newspaper offices. Most of you without doubt have seen the published reproductions of them and exclaimed in comparing those old-time scenes with the appearance of the city today. The horse cars have been replaced by trolley cars and autobusses. A horse and buggy in the street is a curiosity. There are new and loftier buildings, new names on the store signs, more traffic on street and sidewalk—the same thoroughfares, but quite different in appearance.

These thoughts suggest that the amateur photographer of today, so well equipped as he is to take pictures, will find lasting pleasure in making a photographic record of the changing appearance of the community in which he lives. Pictures that are taken now of street scenes and important buildings will become historic treasures in the homes of those who are now children. Some of the buildings will then be gone, changes in fashion will give a curious appearance to people photographed in present-day attire, and there will be many unforeseen alterations that, years hence, will make pictures of the present scene intensely interesting.

But whether or not you are inspired to take such pictures for their historical interest, you will find that photographing street scenes and "life and action" incidents about the city is one of the most interesting phases of outdoor picture-taking. To be successful with these pictures, bear in mind that you will have to work quickly and quietly, attracting as little attention as possible where people are to be included and you must be able to take in an interesting situation at a glance.

The ability to level your camera quickly and accurately is particularly important, as in most cases the architecture of surrounding buildings will show, and, if the camera is not level, the lines will be anything but pleasing.

The view-point of the camera is also important. Many pictures of street scenes show that its position was too low. Often a good shot of a busy street can be made from the steps of some public building. Interesting and odd views are obtained from windows of high buildings, pointing the camera down.

When taking streets from the curb, hold the camera as high as you can. Cameras with eye-level finders are especially convenient for this kind of work. Don't take pictures when a fast-moving vehicle is very near unless your camera is equipped with a very fast shutter and you want a picture of the vehicle as the principal subject.

There is hardly a city which does not afford camera owners subjects possessing interesting features from the structural and historical points of view. In most architectural work full detail is essential, in which case the lens should be stopped down to the smallest opening consistent with the lighting conditions and shutter speed used.

DEDICATE BIBLE AT ALLENWOOD

The ladies of the congregation of Allenwood United Church presented to the Church at the service on Easter Sunday, a beautiful Bible dedicated in honor of the memory of the late Howard Purchase.

Miss Inez Hickling read the following address:

"In Memoriam"

Francis Ridley Havergal in commenting on the influence exerted by a person's mere presence, said, "Some people carry an atmosphere in which all unkind thoughts shrivel up and cannot grow into expression." Such was the influence exerted by the personality of Howard G. Purchase, who in his brief stay among us, lived in the hearts of all who knew him. Such a tribute could be paid only to one who lived in close fellowship with God.

It is in memory of him, that the congregation of Allenwood Church dedicate this copy of the Holy Bible in which the following inscription has been inserted—

'Presented to the Allenwood United Church in loving memory of Howard G. Purchase whose Christian character was an inspiration to all with whom he came in contact.—Easter, 1937."

Mr. W. A. Trace presented the Bible and led in prayer. Mr. Purchase accepted the gift on behalf of the Church with a few words of deep appreciation, after which he read the Easter lesson from its pages.

Allenwood is a charge on the Elmvale Circuit and Rev. Geo. H. Purchase is the minister.

THE OPEN COLUMN

Streetsville, Ontario,
April 19, 1937.

The Editor,
The Review,
Streetsville.

Dear Sir:—Re Article in the Toronto Star, page 3, April 17th, "United Church Policy seen behind Strikers in Oshawa."

Many readers will regret this item given a feature place in a city paper. It is capable of doing the Church a lot of damage. There can be no doubt as to the general sympathy of the public with the workers of the country in their struggle for economic righteousness and there is no doubt also that the stand of the United Church in the fight for "The Christianization of the Social Order" has given considerable encouragement to the workers of the land.

But to say that the United Church stands behind the C.I.O., and against the Premier of the Province is to do violence to the rules of the game.

The Church, the tireless defender of the people has regretfully, many a time been forced to take issue with Labour in the presentation of unjust claims and in the use of means to an end the Church could not support.

I feel that it has yet to be established that the C.I.O., is the best organization with which to affiliate to secure the best interests of Labour in this land. It is not beyond the bounds of possibility that the organization might prove a montre applying gangster methods, denying the cherished liberty most people prize and forcing the payment of dues before people may work. Its officers pleased with power become intollerant, eager to make trouble to make themselves indispensible to the workers. One unfortunate trouble with Unions and their officers is the feeling commonly felt that officers must justify their jobs by creating delicate situations or fomenting strikes. It is a pity they cannot be paid for the tranquility and peace they create rather than for the trouble and strikes they cause. The constant threat of strikes works an evil to the whole body of the people. Once let the objectives of Labour be stated and realized then there should be peace and progress. Certainly the United Church is not committed to support any organization unless and until it is assured that the greatest good to the greatest number will ensue, or that the cause to be sustained is righteous and just.

This does not yet appear in the Oshawa strike. Many Canadians feel that the United States is impoverished by its agitators, its gangsters, by the people who seek to make trouble for others whilst fattening on the situation created and are opposed to these situations being duplicated in Canada under the guise of Labour Unions or otherwise.

Yours faithfully,
THOS. D. JONES.

OBITUARY

A Marcus Ansley, for 15 years a resident of the Eldorado district, Churchville, passed away on Saturday. He was greatly interested in horses and had won many prizes at country fairs. He is survived by his wife, and one daughter.

James Smith, 73, passed away at his home, first line east, Brampton, April 17th. He was a member of the United Church. Surviving are his wife, three sons and three daughters.

Edwin R. Armstrong, 77, passed away at Brampton on April 18th. He had been an employee of the Dale Estate for 35 years. He was a member of the United Church. He is survived by his widow and one daughter and son.

District News

Dogs killed fifteen hens on the farm of Thos. Esterbrook and twenty-nine at Frank Pashak's, Dixie, during the past week.

Mr. and Mrs. Harry Ambrose at Bronte, celebrated the 58th anniversary of their wedding recently. He is 80 years of age and she, 77. They are enjoying good health.

The old stone church, on the Dundas Highway, at Dixie, was re-opened last Sunday. The speakers were Dr. F. Tracy and Dr. C. H. Schutt, Baptists of Toronto. It is just 100 years since this church was first opened, and the trustees were Allan Robinette, Joseph Silverthorne and Samuel Harris. The church was used by Presbyterians, Anglicans, and Baptists, but fell into decay and was closed for some years. The money to pay for the improvements was provided for in the will of the late Sir William Gage.

Mrs. E. Lou Watts has been elected Worthy Matron of Orchid Chapter, Order Eastern Star, Brampton, and Mr. Charles Campkin, Worthy Patron.

When two trucks sideswiped each other on the No.7 Highway near Acton, Lynn Baines, 19, of Preston, was fatally injured, and died on the way to the hospital.

Mrs. Benjamin Harrop passed away at her home in Esquesing Twp., recently, in her 70th year. She was born at Tullamore, Peel County, her maiden name being Rachel Morrison. She is survived by her husband, four sons and three daughters.

Daylight Saving Time will go into effect in Streetsville next Sunday morning, same time as Toronto.

Brampton is preparing for a big celebration on Coronation Day. There will be a parade, street dance, softball game and a devotional service.

Sixteen candidates were confirmed at St. Nicholas Anglican Church, Lakeview, last week by Archbishop D. T. Owen, Primate of all Canada. Rev. K. R. Berkley of Port Credit, assisted in the service.

Streetsville veterans held another very successful dance in their hall last Saturday night. Ed. Lowden's orchestra furnished the music.

D. E. Smith has been chosen secretary of Peel County Agricultural Society, to succeed Frank Kitto, resigned. The new fair board is making progress with their negotiations with Miss Craig in reference to their indebtedness to her for principal and interest on the mortgage on the grounds.

Medical practitioners and nurses of the district entertained at the home of Dr. Allan Noble, Brampton, last Friday evening in honor of Dr. O. T. Steen, Streetsville, and Miss Eunice McGarrall, R.N., Toronto.

Six people were operated on for appendicitis at Peel Memorial Hospital last week.

Charles W. Raine and Miss Winnifred A. Bridle were married at Brampton last week by Rev. R. W. Allen.

Rankin C. Kellam of Weston and Miss Elizabeth J. McKinney of Brampton were married on April 14 by Revs. R. V. Wilson of Norval and R. G. Davidson of Thistletown.

"Extravaganza" was successfully given at Erindale last week by Mrs. F. C hipp and her company of Hornby, and was much enjoyed.

W. J. Galbraith, ex-public school inspector for Peel County, celebrated his 88th birthday on April 13th.

James Giles, who was born in Port Credit 82 years ago, died in Toronto on the diamond anniversary of his wedding. His father and brothers were sailors on Lake Ontario.

Mrs. McMullen of Malton celebrated her 85th birthday on April 9th. She is enjoying wonderful health.

Frederick M. Soper passed away at Chatham on April 9th and was buried in Bethany cemetery, near Malton. He was born on the fourth line, near Malton, 30 years ago.

Lawson Chesney, Huttonville, was elected president of the Peel Presbyterian Young People's Union which met at Mayfield last week. Aubrey Oldham of Sarnia was the guest speaker.

Peel Music Festival got away to a good start last night at Port Credit, with 1100 entries. It will be terminated by a concert in St. Paul's United church, Brampton.

Roaming dogs have killed many hogs around Dixie and the owners of the porkers will see the Township Council about it.

A consignment of 600,000 herring fry was placed in Lake Ontario, at Port Credit, last week. This, with the 1,500,000 deposit of white fish fry a month ago, ought to provide good catches for commercial fishermen five years from now.

Jack Sweeney, a Brampton youth, was fined $25 and costs for doing wilful damage to walls of a C.P.R. building, and ordered to pay $30, the cost of repairs. If he does not raise the money he will have to spend 30 days in jail.

Halton County Music Festival is being held today, Friday and Saturday in Milton.

TRINITY CHURCH NOTES

The 5th annual banquet and dance of the Peel Deanery and District Local Council will be held on Wednesday, May 5th, at 7 o'clock at the Trinity Church Parish Hall. It is expected that there will be a full representation from the 18 A.Y.P.A. groups in the Deanery, Miss Sybil Bennett, the only lady Barrister in Peel County, will be the special speaker. After the banquet and program, a dance will be held in the upstairs of the Parish Hall

Sporting Notes

Now,that hockey is over, the team is to organize as a first class lacrosse team and we think they will succeed

At a meeting held on Tuesday night it was decided to hold euchres to raise money to pay off a few small debts of the hockey team and to help finance the lacrosse team. Your aid is solicited and appreciated.

Next Tuesday at The Queen's Hotel will be the first. O K.—It's a date. There will be good prizes

Having forgotten to do so before we take this opportunity to thank the Editor for space allotted to this column and we hope that through us he will keep you posted on sports news for the coming season.

A lacrosse match may be held on May 12 with a champion team. This has not been decided for sure, yet

St. Andrew's Notes

The Ladies of St. Andrew's Presbyterian Church held a Coronation Tea in the S.S. Room of the Church Wednesday afternoon, with a nice number present despite the rain.

In the centre of the room was a large table decorated with National colors,a crown, and silver candelabra with blue and white candles. The bouquet of flowers in the centre of the table was stocks, iris, and carnations. Beautiful hydrangea plants decorated the front of the room, and a shield of the King and Queen and flags were displayed.

The program included:—
National Anthem
Coronation Prayer, John Masefield (Poet Laureate) read by Miss Eva Reid
Sslo, Mrs. Hare
Reading, Mrs. Lindsay
Solo, Mrs. Greig.

Contests were won by Mrs. W. D Lindsay, Mrs. E.F. Redick and Mrs H. Saul.

Coronation Pageant, Mrs F. Maas with several young ladies dressed to represent different countries

The accompanists were Mrs. M. D Lundy and Miss V. Bowie

At St. Andrew's Sunday Evening

A matter of vital importance will be dealt with at st. Andrew's on Sunday evening at 7 30 when the minister the Rev. John Y. Fraser, will preach on the subject; Wanted—An United Christendom. The following questions will be answered :

1 What shall we say about the oft repeated and misrepresented text That they might all be one ?

2 What is the attitude of the Evangelical and Bible Loving Christians to the ReUnion of Christendom ?

3 Is there denominational bigotry in Streetsville ?

4 Are there people who speak of their Church as THE CHURCH to the exclusion of all other branches of the Church of Christ ?

5 What are some other obstacles in the way ?

All services on Daylight Saving Time. .....The evening service commences at 7.30, instead of 7.00

"SALADA" TEA

Love Huntress

By H. GLYNN-WARD

Claudia Townsend meets Dick Whalen at a hockey game in Seattle one night. Her interest in Dick infuriates Wallace Bornell, rich young lumberman, who wants to marry her. To get Dick out of the way, Wallace offers him a job in one of his lumber camps in British Columbia. Claudia, meanwhile, persuades her father to give Dick a job in his office. However, they have to go to Victoria for a few days to settle the matter. Claudia wires to Dick on Friday to tell him that the job is his but when the telegram comes Bornell manages to intercept it. Hurt by Claudia's failure to keep her promise, Dick accepts Bornell's offer. He goes to the lumber camp at Burns Lake, and a short time later, he discovers that the Bornell company is stealing lumber. He asks the boss, Braddock for an explanation, but he puts him off and the next day starts for Seattle. That night, Dick writes a letter to Claudia.

CHAPTER V

When Claudia Townsend returned to Seattle from Victoria, she was buoyantly happy. She had managed to arrange the job for Dick, and she telephoned her father's office immediately to ask for Mr. Whalen.

The answer — "No Mr. Whalen in this office" — left Claudia unbelieving. She asked to speak to her father.

"Well, Claudia," he said, "your young man never turned up! Had to give the job to the next man. I guess he didn't want the job."

Confused and hurt, Claudia rang up the Hotel Metropole and asked for Mr. Whalen.

"Mr. Whalen checked out on Saturday morning," was the answer.

"But—" she said excitedly, "where did he go?"

"Mr. Whalen left no address, Miss," the clerk told her. "He told us he'd send an address later."

Claudia was sick with disappointment. Dick had gone — after all the plans they had made, after all she had promised to do in his behalf — and he had left not a word for her!

"Could you tell me if a telegram was delivered to Mr. Walen on last Friday? It is very important!"

"Yes, ma'am—" came the voice a few minutes later — "a telegram was delivered to Mr. Whalen on Friday evening."

The shock left Claudia trembling. Obviously, she told herself, Dick Whalen had amused himself with her, and gone out of her life without a word when it suited him. What a fool she had been! Better even to have listened to Wallace Bornell's advice not to run around with a man too much, who was an utter stranger.

But though Claudia tried to harden her heart and not care, she had been more attracted to Dick Whalen than by any other man she had ever met. She had fallen in love with him and she realized now that no other man could possibly fill the gap left by him in her heart.

Claudia was not the sort of girl to show how much she had been hurt by a man who had snubbed her. Now she threw herself into all the excitement that offered, accepting all invitations and lived in a continual whirl.

"Claudia, you are doing too much," her mother said one day. "Why don't you go up to Banff for the winter sports with the Hodgsons?"

But Claudia did not want to leave Seattle with so much going on. Even from herself she tried to conceal her real reason for staying — hope that word might come from Whalen. At the hotel they had finally received and given her Dick's address at Burns Lake, British Columbia. She had never heard of Burns Lake.

It made her even more bitter to know that he had settled somewhere and still did not write her a line. She tossed her head and tried her best to forget him.

Meanwhile, Wallace Bornell pursued his adventure. He was with Claudia more than ever before.

"Claudia," he said to her once, "don't you know that I'll move heaven and earth to get you? You may as well say yes now!"

Claudia toyed with the idea. Here was a man who loved her madly, was immensely rich, had position, and was well known to her family and friends. It would be an excellent match. She told herself she wouldn't marry Dick now if he came to her on bended knees!

Impulsively one day she decided to accept Wallace. She went to the telephone to call him, but then changed her mind and went out for a lonely drive in her car to think it over. She had carefully refrained from asking Bornell if he knew where Dick Whalen had gone. She knew that Wallace had known how much they had been together, and she did not want to risk his sarcastic smile.

Coming back through town she had to pass the building which housed the Bornell Lumber Company's office. She looked up at it, smiled and parked her car. She would run up and see Wallace in person. She had made up her mind now.

It was late in the afternoon and Claudia met the stenographer leaving by the outer office door.

"Oh, do you want to see Mr. Bornell?" the girl asked.

"Yes, is he in?"

"Yes, but he's in conference in the inner office—"

"That's all right," said Claudia. "I'll wait here." The girl closed the door and left her alone in the luxurious outer office. She sat down to wait.

Claudia could hear voices from the inner office, Bornell's and another man's. Then chairs moved back — they were coming out. The handle turned, the door opened a crack — then discreetly the man pushed it to again. A crack still remained, open enough to allow Claudia to hear what was being said.

She listened idly, at first, an unwilling eavesdropper, as she realized that the talk was serious and confidential. Then suddenly she caught a name — the name that was uppermost in her heart — and she sat rigid, listening with every nerve.

"... won't lie heavy on my conscience!" the man was saying. "He's got what's coming to him all right for nosing into things that ain't his business. Whalen's just the sort to turn spy and inform the government. Then where'd we be?"

Claudia bent forward, straining straining to hear the next words.

"We'd be cleaned out of business, Braddock, lose all our holdings in that country! We'd be ruined!" This voice was Bornell's, and it sank hoarsely on the last words. "You do as I say. Get rid of him—and quick!" His voice dropped too low to be heard.

"Easy enough," said the other man's voice a moment later. 'There's aplenty up there with a grudge against Whalen. One fellow specially, and it happens I've got something on him! You'll stand by me, Mr. Wallace, should anything come of this?"

"I've said I would—" came Bornell's quick, irritated voice, "only hurry up about it! Communicate with me by wire, using the word accident."

"I'll see to it."

They were coming out. Claudia, her heart pounding with anger and excitement, hurriedly opened her vanity case. They musn't know—mustn't suspect that she had heard! If it really was Dick Whalen they had been talking about—then he was in danger.

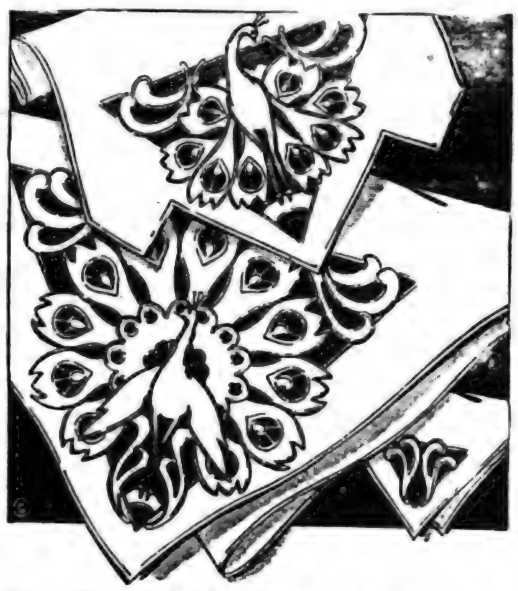
Wages Increased

Swift Canadian Co., Limited, announce an increase in wages at their Dairy and Poultry Plants, located at Stratford and Belleville. In accordance with the policy of the company to keep abreast of the times, they have established a minimum rate of 35c per hour for male employees, and 27½c per hour for female employees, and have also established an equitable differential for employees occupying skilled and semi-skilled positions.

The increases were worked out between the management and the employees through the plant assemblies, composed of representatives elected by the employees and representatives appointed by the management.

It is their hope not only to keep abreast of the times, but to be known as one of the good employers with whom men and women can join their efforts to their lasting satisfaction, so that they would want to find their life-work within the company

Average Weekly Pay In Britain Is $10.75

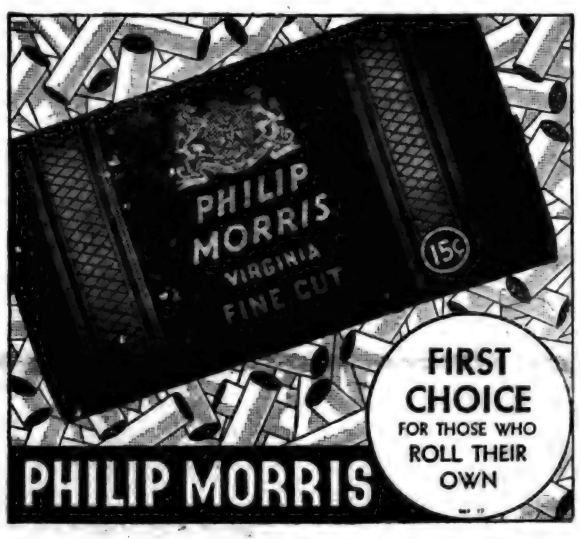


LONDON.—The average weekly wage of nearly 2,000,000 British factory workers is 10.75, a census recently compiled by the Ministry of Labor shows.

Among the million workers in the textile industries many earn as much as $18 a week, making hosiery, while others make as little as $11 a week spinning flax and hemp.

Men average $13.75 a week in the textile groups, but the wage average of all workers is lowered to $9 by the wages paid to women and girls, some of whom receive only $3.25 a week.

Tailpiece — Scotland Yard, cooperating with police of Europe and the United States, have prepared a complete list of all the unwelcome visitors — international tricksters, confidence men, and pickpockets, who were expecting rich hauls. They will be kept under a strict watch.



Linens Acquire Untold Loveliness Done In Laura Wheeler Cutwork

CUTWORK PEACOCKS — PATTERN 1145

A regal peacock, his tail spread, inspired this rich design that's just the thing for scarf ends, dinner cloth, chair sets, or pillow! In years to come you'll treasure the linens you adorned with this exquisite cutwork motif. It's simple to do, mainly without bars—and the smaller accompanying designs are ideal for mapkins or towels. Pattern 1145 contains a transfer pattern of two motifs 9½ x 12¼ inches, two motifs 6½ x 8¼ inches and four motifs 2 x 2½ inches; material requirements; illustrations of stitches used; color suggestions.

Send 20 cents in coin for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Write plainly PATTERN NUMBER, your NAME and ADDRESS.

Woman's World

By Mair M. Morgan

The Proof of the Pudding

If your family is like most of the families in this country, they will turn up their noses at ordinary bread pudding. They take it for granted that it is a makeshift dessert and they feel that the place for any left over bread is in stuffings, not desserts. But here is one way to make real bread pudding that will fool them and surprise you.

The addition of rich, flavoursome chocolate seems to make all the difference in the world in the taste and gives you a lovely looking dessert. No one will turn up their noses at this Chocolate Bread Pudding, but they will pass their plates back for more. It's a wholesome, nourishing dessert and good for every member of the family, even the youngest.

Since this really is an economy dessert, let the best chocolate you can buy. It makes the pudding and will prove to be an economy in the long run. Well, you all know what they say about pudding—so let your family prove it.

Chocolate Bread Pudding

2 squares unsweetened chocolate, cut in pieces; 3 cups cold milk, 1 cup of sugar ½ teaspoon salt, 3 eggs, slightly beaten, 1 teaspoon vanilla, 1½ cups ½ inch cubes stale bread.

Add chocolate to milk in double boiler and heat. When chocolate is melted, beat with rotary egg beater until blended. Combine sugar, salt, and eggs. Add chocolate mixture gradually, stirring vigorously. Add vanilla. Place bread in greased baking dish. Pour mixture over it. Place dish in a pan of hot water and bake in moderate oven (350 degrees F.) 50 to 60 minutes, or until the pudding is firm. Serve hot with hard sauce, or whipped cream or cold with cream. Serve six. It adds to the appearance of the pudding if from two or three tablespoonfuls of the hard sauce or whipped cream is placed on the top of the pudding just before serving.

New Ways With Cheese

Cheese and Spaghetti — Break up 1½ oz. spaghetti into a small piedish and simmer in water for half an hour. Then mix 2 teaspoonfuls flour and ¼ teaspoonful mustard with 2 oz. grated cheese. Season well with pepper and salt and cook for half an hour. Serve on rounds of toast.

Cheese and Tomato Salad — 3 oz. cheese, 2 medium-sized tomatoes, seasoning, salad cream, lettuce leaves. Grate the cheese finely, then skin and chop up the tomatoes and mix to a paste with the cheese, adding seasoning to taste. Serve the mixture on individual plates surrounding with lettuce leaves. Sprinkle the salads with a little finely-grated cheese and decorate with small pieces of tomato.

Cheese Savoury — Spread seasoned cream cheese on small rounds of previously cooked short pastry. Over the cheese place a round of tomato and a dash of mayonnaise, and top each with a slice of olive. Place in paper containers, sprinkle with finely-grated cheese, and garnish.

Cheese Moulds — Pour 1¼ cupfuls milk over 2 cupfuls soft breadcrumbs; add 3 well-beaten eggs, 1 heaped cupful of grated cheese, 1 teaspoonful of salt, peper to taste, and 1 tablespoonful of melted butter. Pour into buttered moulds and bake from 20 to 30 minutes in a moderate oven.

Painting A Kitchen

With grease and smoke in the air, kitchen walls, ceilings and woodwork quickly become dingy. For cleanliness therefore, the preparations used should be of a kind to which grease and dirt will not hold. Enamel is the best for a kitchen, its glossy surface making washing easy.

The first step in re-painting a kitchen is to clean the walls and the woodwork. All the surfaces of a kitchen pick up a film of grease. This must be taken off, for paint will not hold over it. It can be removed with a washing soda solution or with a mixture of ammonia and water.

If the old surface is glossy the gloss must be dulled in order that the new paint may hold. This can be done by rubbing with sandpaper or steel wool. A washing soda solution will cut the gloss.

When washing soda or a similar chemical has been used, thorough rinsing should follow to take off all the traces. Painting should not start until all the surfaces are thoroughly dry.

15,000 Canadians Going To London

OTTAWA—Fifteen thousand Canadian residents are likely to go to Great Britain this year mainly but not wholly to the Coronation.

Two thousand new passports for them were issued in February, 8,000 in March, and there will be over 4,000 this month from present indications. The yearly issue is between 24,000 and 25,000 and they are good for five years. Anyone having such a passport can use it now without the necessity of coming back here for renewal or certification.

News from Niagara

Some of the fruit growers have the habit of clipping a branch from their peach trees, putting it in water, to watch for the extent of the blossoms. In one case, the result was magnificent which indicates that the peach crop is safe for 1937, except for the usual hazard of Spring frosts. — St. Catharines Standard.

One Way Out of It

"It might be dangerous to kiss one's wife in public on Sunday in Toronto the Good," chortles Hamilton Spectator. Obviously, then, the thing to do is kiss someone's else's. — Woodstock Sentinel-Review.

The Quick Stop

First Inventor: "I'm going to invent an auto brake that will bring a car going 40 miles an hour to a dead stop within 20 feet."

Second Inventor: "Fine. Then I'll invent a gadget to keep the driver from going through the windshield when it does." — Ottawa Journal.

Quints' Popularity

One of the requests of Princess Chichibu of Japan during the short stay of herself and her husband in Canada was for a photograph of the Dionne quintuplets. These little ladies have certainly advertised the Dominion more than any other agency. —Brantford Expositor.

On the Wall

At a wall paper show in Boston one pattern included a kitchen towel and glove draped across a curved piano keyboard. In the background a plant with branches of bathroom glasses, cullers, a reading lamp, an ice cream cone, a huge flower with an alarm clock centre, a closed tulip and strings of teacups. Just why the can opener and the ash can should have been left out of it is a bit of a puzzle.—Brantford Expositor.

Stay Under Fifty

There may have been some excuse for people thinking the 35-mile limit a joke and behaving accordingly. But with the limit raised to 50 miles, such an excuse vanishes. Rare, indeed, is the individual who finds it really necessary to travel in excess of such a speed even in the course of business, although we are well aware of the fact that higher speeds are maintained by the people who do not care for others on the road any more than they do for their own hides. A speed of 50 miles an hour is high enough for all ordinary legitimate travel. In view of this, the provincial authorities will be remiss in their duty if they do not proceed to keep close watch upon traffic. — Brockville Recorder and Times

Hope He's Right

Dean Inge has produced another book in which he discusses many things. One of his prophecies is that there will not be a devastating European war because of the lack of funds. He depicts Germany in such bad financial shape that he doubts whether the Hitler regime can last very much longer, and Italy he avers is not in much better case. The Rev. gentleman has frequently proved himself a good forecaster. It is to be hoped that he is also one in this instance. —Brantford Expositor.

Radium Costs

Discovery of radium in Canada (in the Great Bear area) is said to have broken the Congo trust, which previously kept the precious substance at $75 a gram. If this be true, it is not the least of Canada's contributions to the good of mankind. — Ottawa Journal.

Endorses De Luxe

Titled ladies have endorsed the products of industry for a consideration —notably cosmetics and cigarettes. But they, and all other endorsers, are amateurs compared with the priceless Dionne quintuplets. Annette, Emilie, Celcie, Yvonne and Marie are, appropriately enough, five figure endorsers. They swear by a certain brand of breakfast food and are paid $15,000 —with no obligation to eat the product, at least not every morning. They endorse a famous make of soap, and, behold, their bank account is given a $27,500 boost. Easy money, girls, but honestly earned. As surprising as the prices paid for their endorsements is the variety of things they approve. Cod liver oil, "tiny town togs," lollypops, tooth paste, jewelry, corn syrup, children's purses and bags, shoes, dolls and ribbons—all are grist for the Callander mill which, it is revealed, has now ground out $765,000. — Ottawa Citizen.

Safer Glass

Shatter-proof glass, familiar to everyone who looks through a modern windshield, is made like a sandwich —a couple of layers of silicate glass stuck together by a thin filling of celluloid film, cellulose acetate film, or polymerized film. The glass will break but the pieces stick to the binder. Now a German firm is making something different. Its product has an organic base (polymerized methyl ester) instead of silicate, is lighter than regular shatter-proof glass, and according to tests will stand 8 to 10 times the blow. When it cracks, the edges aren't sharp.— Brandon Sun.

Domestic Science

Many a man who longs for things like his mother used to make forgets that his wife may long for cheques like her father used to make.—Guelph Mercury.

Building and Taxation

Some means of encouraging the entry of capital into building is obviously necessary if an increase in building activity is considered desirable — and it is generally agreed that a recovery in building would do more than anything else to bring prosperity back. Increased taxation will not encourage building. It will, as the Real Estate Exchange suggests, do just the reverse, because it will make it less likely that capital invested in building will learn a reasonable return. — Vancouver Province.

Cost of Monarchy

The fact to remember is that what the King and the Royal Family receive from the British nation is very considerably less than the revenue the King hands over to the nation. Under the circumstances, Great Britain is not likely to request contributions from the Dominions. — Saint John Telegraph-Journal.

Mankind and Medical Science

Many centuries ago, Leopold, Duke of Austria, and stern captor of Richard the Lion-Hearted, lay groaning and helpless on the battlefield. His horse had fallen on him, smashing his leg to bits. All the attending physicians agreed that the royal patient had to have his limb amputated. But in that dark and illiterate age not one of the Duke's doctors, the best in Europe, knew how to perform such a hazardous operation. In desperation Leopold seized a mallet and sword and slashed off his leg in order to abate the pain. He died from the loss of blood that gushed from the wound. To-day the meanest resident of the worst slum on this continent can secure medical treatment denied a few hundred years ago to barons and kings. The contrast points the moral and enobles the meaning of the great story of medicine.—the tale of a man's glorious humanity to man. — Edmonton Bulletin.

THE EMPIRE

South Africa Drying Up

For 60 years men who have taken an intelligent interest in the soil of the Union have known that it has grown steadily worse. Even in the most fruitful parts its quality now often falls below the standard usually accepted for agricultural purposes in such progressive countries as the United States of America. And this fact is more intimately connected with the question of moisture than with any other factor. South Africa, people say, is drying up. The rainfall is the same, but the water is not distributed and stored in the way which Nature originally arranged for itself. There used to be a balance between the rainfall and the amount and character of the vegetation. That balance has been disturbed by man. He brought his flocks and herds and seed. And with the destruction of trees and bushes, with the grass-burning and over-grazing and with the trampling of animals, the havoc was gradually worked and the country now stands in the presence of a grave national danger. — Cape Argus.

Cause and Effect?

We are as sincere in our desire for world peace as the most ardent pacifist, but we believe that pacifist agitation has increased and is still increasing the danger of war. Before Britain embarked on her re-armament programme, practically every major world power was barking "War!" Today they are even more articulate for—Peace. Is it merely a coincidence that their attitude has changed since Britain announced her vigorous defence policy? — Hong Kong Press.

"Now that the rulers can speak to millions of people over the radio they don't keep things a secret any more." — H. Phillips Oppenheim.

Province Hard Hit By Strikes

Plants in Many Cities Are Closed By Oshawa Walkout

TORONTO. — As the General Motors strike at Oshawa enters its second week, reports from Ontario towns and cities indicate the effect the walk-out is beginning to exert on the industry of the Province.

From Windsor comes word that curtailed production in the General Motors plant there may affect 1,000 workers. Five hundred were forced to also leave when the main plant at Oshawa closed down, as there was no outlet for motors manufactured at the Windsor branch. With the further curtailed production of parts, 400 more men may lose their jobs. Some 300 may also be laid off at the Walker Metal Products plant, where iron castings are made for General Motors cars, and eighteen have already been laid off at the Kelsey Wheel factory.

Woodstock Plant

Work on General Motors parts stopped Wednesday at the Woodstock plant on the Eureka Planter Company. Sufficient orders from other sources have so far kept the full staff busy.

At St. Catharines, McKinnon Industries, subsidiary of General Motors, reported advice from the parent company at Oshawa, "to hold up work on material supplies for their use except on special service parts."

Manager W. A. Wecker said a curtailment of hours affecting 600 employees would have to me made. The hours would not be cut drastically, however, because a number of unfilled orders for other plants would help in maintaining employment.

John Conroy, of the Conroy Manufacturing Company, at St. Catharines, said between 35 and 45 men would be laid off at his plant because production had been lowered 70 per cent as a result of the General Motors strike.

At Hamilton

Officials of the Thompson Products and Hayes Steel at Hamilton said that efforts were being made to rearrange production to keep men at work.

Hamilton industrial concerns which received more than $1,000,000 worth of business from General Motors last year, have suspended work on large orders from General Motors, because of present labor trouble at Oshawa, but local workmen are not expected to lose their jobs as a result. Orders from other sources will enable the forms to continue peak production, it was reported today. Steel Company, Union Drawn Steel, Burlington Steel, Canadian Drawn Steel, Firestone Tire, Westinghouse, United-Carr Fastener and other companies have been given orders from Oshawa.

Car dealers report they will be without new machines if the strike is prolonged, and this might result in reduction in sales staff.

A check at Chatham revealed that no factory there was affected by the Oshawa strike. The Ontario Steel Products and Chatham Malleable and Steel Works are carrying on production on a normal scale.

Children With Pneumonia Get Cold Air Treatment

LONDON, ENG., — Lives of hundreds of children suffering from acute primary pneumonia are reported to have been saved by a novel cold air treatment introduced by Dr. H. L. Wallace of the Royal Edinburgh Hospital for Sick Children.

Writing in the current issue of the British Medical Journal, Dr. Wallace says:

"During recent years it has been the practise in one of the wards of the hospital to submit every case of pneumonia on admission to an intensive open-air regime.

"This is carried out irrespective of the season of the year or of the weather conditions, with one exception of fog, each child being placed on the windward side of the ward beside a widely opened window so that the cold air without plays directly on the face of the child."

An essential precaution it is pointed out, is that the patient should be warmly clad to prevent chilling, the face being the only part of the body exposed to the air. All cases of pneumonia are thus treated, both day and night, until the temperature falls and remains at a normal level.

Dr. Wallace says this rigorous method of treatment has been thoroughly tested in more than 300 cases. The impression of physicians and nurses attached to the ward, he writes, is that exposure to a moving current of cold air is the means of saving lives of the children of all ages afflicted with an acute, primary form of the disease.

It brings comfort to the patient, aids appetite and helps to render unnecessary other forms of treatments which might prove exhausting to a young child.

Sees New High In Tourist Trade

Transport Minister Hour Asks Courtesy and Fair Dealing For Visitors.

OTTAWA. — An all-time tourist traffic for Canada in 1937 was forecast this week by Transport Minister Mr. Howe. He based his expectation on the number of inquiries received by the Canadian Travel Bureau and the generally improved business conditions in United States.

Coupled with the Minister's forecast was a reiteration of his advice given a year ago to all agencies associated with or catering to tourist travel to exercise courtesy and fair dealing in their treatment of the visitors.

"The Canadian Travel Bureau has received 26,896 inquiries since the first of the years," said Mr. Howe, "an increase of 93 per cent over the number received in the corresponding period of a year ago. These inquiries give every indication that our tourist industry in 1937 is to be much larger than a year ago.

"The Government's tourist advertising and publicity campaign in the U.S. is bringing most favourable results and the daily average of inquiries at the present time is more than 600. We have now developed a splendid co-operative tourist effort with the Provinces and the large transportation companies while the Customs and Immigration regulations have been adapted to meet the modern demands of the traveller, and reciprocal shopping privileges have been extended.

Blind Pickets Aid Sightless Sitdowners

Coming to the aid of blind men and women who began sit-in strike against philanthropic organization's weaving shop in New York City, these two blind men picketed in front of the building with the help of girl sympahtizer.

50,000 Cattle Shipped to U. S. A.

Profits Up to $30 Per Head Seen for Canadian Stockmen — the Winter Loss Slight

OTTAWA, — Canadian cattlemen, with several hundred million dollars invested in the beef-raising industry, are now more jubilant about prospects for a profitable year than they were a couple of months ago when a million head of range cattle in the Prairie Provinces were said to be threatened with starvation by reason of the severity of the winter and the serious shortage of feed.

No Excessive Loss

Senator Daniel Riley, President of the Western Stockmen's Association and regarded as an authority in the cattle industry, has now been advised that the losses, sustained by Western ranchers, due to pastures having been buried for weeks under several feet of snow, have not been excessive. And some time ago it was feared thousands of head of cattle out on the ranges would perish because the customary chinooks had not been as frequent as usual.

But what particularly pleases cattlemen in Ontario and Western Canada is the steady demand for Canadian cattle in the markets of the United States. Already this year more than 50,000 head have been marketed all across the line at profitable prices. Thanks to the Canadian-United States trade agreement, efficient Canadian stock feeders have made as much as $25 and $30 a head profit on choice beef cattle, sold for consumption in the United States.

The trade agreement which went into effect a year ago last January provided for a reduction in the American Customs tariff on Canadian cattle from three to two cents per pound and for a quota of 155,000. As a matter of fact, however, Canada actually sold 191,000 head of cattle and 50,541 calves in the United States last year, or about 36,000 cattle in excess of the quota.

Bigger Profit Made

Some of these animals were pure bred stock and beef cattle of weights not covered by the quota. It is estimated that for every good steer the Canadian farmer got $10 more in the United States than he would have gotten but for the reciprocity pact.

It is interesting to note that in the year 1934, before the trade agreement was in operation, Canada sold only 6,341 head of cattle in the United States and only 226 calves. Those in close touch with market conditions will not be surprised if well onto 200,000 head are exported to the United States this year, as 50,000 head were shipped across the border during the first quarter. These were chiefly animals which had been stall-fed in Ontario or fattened on feed lots in the West. Ontario supplied some 15,000 head of the shipments to the United States thus far this year.

Sporting Comment
By KEN EDWARDS

Hi folks! Here we are back with you again with a few facts and figures from the sport area.

The other night while the writer was out with an old boy from Upper Canada College, Wally Syrett, by name, a golfer of honorable mention and a man of statistics like his father, the topic of speed arose. A topic on which Mr. Syrett is quite fluent.

Our informer was saying "we all know that Sir Malcolm Campbell has driven his beloved Bluebird hundreds of miles an hour and that Gar Wood broke the world's speed record on the water, but does the ordinary sport fan know that the golf ball has been also known to travel at the rate of 190 m.p.h?"

"And take baseball for instance. The maximum speed of a baseball is 95 m.p.h.

"Does the fan know, too, that big Willie Tilden once socked a tennis ball which was reputed to have travelled 150 miles an hour?"

"Then comes a cricket ball, says Wally, at a maximum speed of 90 m.p.h. Then a football at 50, followed by a billiard ball at 22 m.p.h."

And for these facts, Wally, old kid, I know our followers say "many thanks."

Flash! Flash! — Did you know that nine of the eleven pitchers on the Phillies' roster are 6 or more than 6 feet tall?

Yes! the gals are at it now. Way down in Richmond, Va., a few weeks ago a championship wrestling bout was staged between champion, Miss Clara Mortensen, of California, and Miss Clarice Davis, of Iowa. The gents that take these two gals "forever and a day" will just be bears for punishment, that's all. Nevertheless at this little scramble the lassies packed in 4,000 fans.

Well, guess we better rattle along — say, didja' hear about the Scotchman that took his boy out of school because he had to pay attention! — Please excuse it gang.

So long till next week.

KEN.

News in Review

More Jobs, Less Relief

WINNIPEG, — More jobs and less relief featured the first quarter of the year 1937 in Winnipeg. Figures from the single men's relief office showed a decrease of nearly 1,000 in those obtaining assistance. At the end of March, 7,547 jobs had been found for unemployed men compared with 6,680 in the first quarter of 1936.

Taken By Death

BRAMPTON, — Frederick James Peaker, one of Brampton's best-known residents, and one time member of the famous Brampton Excelsior lacrosse team, died this week in his 69th year. He was the son of William Peaker, who emigrated from England. For many years the late Mr. Peaker was attached to the Brampton Fire Brigade. He was also a prominent curler. He is survived by four brothers: Dr. E. A. Peaker, Toronto; Dr. Kenneth Peaker, Toronto; Dr. O. A. Peaker, Brampton, and George Peaker of Toronto; and two sisters, Mrs. D. E. Baynon, Toronto, and Mrs. Frank Hillock, Brampton.

Regina First in Canada to Go On Daylight Saving

REGINA, — Regina citizens are going about their business on Daylight Saving time. The only Western city to adopt "fast" time, the clocks were moved ahead one hour last Sunday. All towns of the district are on the Mountain Standard time.

Riel Rebellion Veteran Dead

SAVARY ISLAND, B.C., — Captain George Johnston Ashworth, 74, newspaperman, barrister and veteran of the Riel Rebellion died here this week — Captain Ashworth pioneer Vancouver resident, had been employed by the Vancouver World, the News-Advertiser and the Vancouver Sun, retiring from active work a few years ago. Edward and J. J. Ashorth of Toronto are brothers.

Prosperity Returning

BRAMPTON, — Prosperity is returning to the Brampton district slowly but surely, it was indicated by the customs returns for 1936-37, as compiled by the chief of the Brampton Customs port, Col. R. V. Conover. Last year, receipts of the port amounted to $57,248.92 in duty, $154,992.29 in sales tax and $38.04 in sundries. Duty paid in the preceding fiscal year of the port was $77,304.47, but sales tax was only $122,520, giving a net increase in collections of $12,416.56.

Advertise For A Wife

WATERFORD, — It pays to advertise.

George Lossing, of Port Rowan, got tired of living alone, and advertised for a wife.

So far he has received 100 letters from omen anxious to join him in the wedded bliss. One woman in Picton stipulates that the happy date must be set at some distant date.

His chief problem now is which one to choose.

Drove At 80 M.P.H. To Sick Daughter

WINDSOR, — Because he was rushing to the side of his daughter, critically ill in Alabama, Charles D. Carson of Toronto, who sped through Tilbury at 80 miles an hour was let off with a $5 fine. Carson did not appear, but in a letter to Magistrate Smith said he made the trip from Toronto to Birmingham in one jump.

Against Recruiting Women For Ministry

TORONTO, — No special effort should be undertaken at this time to recruit women as candidates for the ministry was the recommendation that was brought before the Board of Christian Education of the United Church of Canada at the annual meeting held at Emmanuel College.

"It would be well if women applicants should not be received as candidates, at an earlier age than 22 to 25 years, when their character and their adjustments to life would have become relatively stable," read the recommendation.

Nurses Avert Panic

PENTANG, — Fire caused by a defective chimney in the Penetanguishene General and Marine Hospital caused a minor flurry of panic among the dozen patients in the institution when smoke started eddying through the corridors.

A few patients became terrified but their fears were set at rest by courageous nurses. No material damages resulted from the blaze and smoke damage was largely confined to the nurses' quarters on the top floor.

$4,700,00 Public Works

VICTORIA, — Premier T. D. Pattullo has announced a works program for British Columbia involving expenditure of $4,700,000.

The Premier said negotiations between the Province and the Federal Government over a joint works program had been completed with the decision to spend $1,700,000 mainly on road construction. In addition, he said a $3,000,000 loan obtained by the Province in the East would be spent to improve roads wherever necessary.

COOKSVILLE

William Lyons, Port Credit, was taken to St. Joseph's Hospital in critical condition, suffering from severe fractures of the skull and lacerations about the head.

He had been a passenger in an auto driven by LeRoy Brett, Toronto, which had stalled on the Dundas highway west of Cooksville, and had got out of the car to walk across the pavement, when he stumbled and fell against the side of a motor driven by Michael Halloway, Northmount Ave., Lakeview.

Lyons was thrown to the pavement, his scalp terribly torn, and a portion of his skull crushed. Traffic Officer Fraser Bell, Cooksville, had him taken to the hospital, together with his brother, John Lyons, Dufferin street. It was expected that the uninjured brother would be needed at once to give a blood transfusion. Lyons was attended at the scene of the accident by Dr. C. F. Cantelon, Cooksville. Brett was later taken to Brampton, where he was held as a material witness until bail was obtained.

Traffic was tied up for a long period by the accident, and the traffic officer was kept busy for more than an hour before the line of cars had been dissolved, and all details of the accident obtained.

H. J. Hazard and P. E. Syme, Whereas Application has been made by National Trust Company Limited as Trustees of the estate of James Ryrie, deceased, the registered owner of all lots covered by a Plan registered in the Registry Office for the County of Peel as Number E.22 for the approval and consent of council to the amendment and/or redivision of the said Plan as hereinafter set out.

And Whereas no money has been expended by or on behalf of the Township of Toronto for work done on any road shown on the said Plan and the said Township has never assumed or accepted the said roads or any part of them as highways.

Resolved that the Council do approve of and consent to the amendment and/or redivision of the said Plan E.22 as follows:

1. That all roads shown on the said Plan and coloured brown thereon, be closed.

2. That all lots shewn on the said plan, namely lots 1 to 18 (both inclusive) be redivided and/or joined together onto one lot or block.

3. That a new or amending plan be filed shewing thereon the alterations aforesaid.

And that the Reeve and Clerk of the Township be and they are hereby authorized to endorse the approval of the Township on the said new or amending plan under the seal of the Corporation and also to do all acts and things and to sign and execute under the seal of the corporation all documents that may be necessary or convenient for carrying into effect the intention of this resolution. Carried.

On motion council adjourned.

E. D. MAGUIRE, Reeve. J. H. PINCHIN, Clerk.

The Open Column

We saw one of the most remarkable athletic displays it has ever been our good fortune to witness, Friday night, at the Maple Leaf Gardens. Messrs. Perry and Vines were putting on a tennis opus advertised as the battle for the championship of the world, but it was not their exhibition of ball-batting that enthralled us, but the magnificent presentation of combined retrieving, ballet-dancing, short distance sprinting and poise provided by Eddie, the ball boy.

You see, such super-performers of the netted court as Perry and Vines will not condescend to smack a ball across the webbing as long as there is a loose ball rolling about anywhere within fifty feet of them. So Eddie, who goes along with the troupe, as soon as he sees a wandering sphere encumbering any part of the big canvas on which the players go through their stuff, dashes frantically towards it, taking short, tripping steps. Within ten feet of the ball, he begins to swoop, and, as he reaches the pill, is tied in a knot resembling the figure on the left of the famous Laocoon group of statuary. He snaps out of his twist backing up, with the truant ball firmly clutched in a dimple fist, after executing a dodge or shift that would make most rugby players green with envy.

The crowd, at times, paid more attention to the work of Eddie the ball boy than it did to the work of the tennis champs. And speaking of champs, we got the shock of our lives when the announcer pleaded with the crowd to pipe down between acts, as the players were so busy concentrating they were annoyed by the applause. The crowd came right back, after that one, and started to "sh-sh-sh" as Perry or Vines would get ready to serve. Perry was quite upset, and had to delay his service until the shushing died away.

Personally, we have seen a good many exhibitions of sport, of one sort and another, and the only other time we can remember the crowd being asked to shut up and keep their jubilations to themselves was at a boxing match in the Brampton armories, under the English convention that prohibits the spectators from making any comment on the proceedings. A friend of ours was taking a severe smacking from a smaller boy, and we suggested to our big, lumbering friend that he turn loose a few really hefty blows. The referee turned and glared, and barked "No comments, please". We felt terribly squelched. But Friday's exhibition of temperament on the part of Perry and Vines left us cold. If we can't yell, or at least clap, when we view a sporting event, what exercise are we going to get out of it?

And while speaking about events at the Maple Leaf Gardens, we would like to mention a theory we have formed to any university student who is interested in electricity. Y'know, several attempts have been made to invent a lie detector operated by the delicate currents of electricity flowing through the human body. Well, we have a hunch that, if instruments sufficiently delicate to measure it could be obtained, there would be a pronounced increase in the atmosphere charge of electric energy within the Gardens when a really hot sporting event was in progress. For instance, if a sports fan goes to see a hockey game attended by, say, a thousand fans, he seldom gets really excited, no matter how brisk the game. But, if the place is jammed to the rafters, the spectator, individualy, usually works up a tremendous temperature. Probably the chief cause of this phenomenon is simply a matter of mass psychology, but it would be interesting, to say the least, if some electrical wizard could prove or disprove the possibility that mass psychology is controlled by subtle electrical emanations from the human body.

Jack Thompson, 17, of Toronto, was charged with stealing $29.55 from the home of Allan Honsberger, Clarkson, and was given one year suspended sentence by Magistrate McIlveen in Port Credit Police Court last week.

Miss Anne Sinclair, Streetsville, was heard over CFRB Wednesday morning. She was one of outstanding artists at the Peel Musical Festival last week, winning two gold medals.

LET US SMILE

Mr. Slack of Slacken & Push, suddenly entering his counting house found one of his clerks steadying a large endways book on his chin.

"Why aren't you at work?" he growled.

"I am sir," replied the clerk. "I am balancing the ledger, sir."

Mr. Wix Atkinson was taken to Peel Memorial Hospital on Sunday morning for an operation for appendicitis.

Some Streetsville members of Port Credit Chapter, Royal Arch Masons, attended Grand Chapter at Toronto, this week.

Malton Women's Institute has elected the followng officers for the ensuing year: president, Miss Jessie Grice; 1st vice, Mrs. D. Lammy; 2nd vice, Mrs. A. Viney; secretary-treasurer, Mrs. J. A. McBride.

Robert John Gorman passed away at his home in Trafalgar, on April 22nd. He is survived by his wife and two sons, Dr. Morley E., and Stanley E. The funeral took place in Oakville.

Mr. Charles William Martin of Milton, Ontario, announces the engagement of his daughter, Jessie McCraney, to Mr. John D. Duncan, son of Mr. and Mrs. John Duncan of Vancouver. The marriage will take place the latter part of May.

Officers and members of River Park Lodge, A.F. & A.M., will celebrate the sixtieth anniversary of the opening of the Lodge in Streetsville next Tuesday, May 4th, when Most Wor. Bro. A. J. Anderson, the Grand Master, and many other notables will be present. There will be a banquet, a program and a generally good time for all. Mr. H. W. Hope is the Worshipful Master during the Jubilee year.

STEEN—McKERROW

The marriage took place Saturday afternoon, April 24th, in Rhodes Avenue United Church, Toronto, with Rev. D. W. Christie officiating, of Eunice McKerrow, Reg. N., daughter of Mr. W. C. and the late Mrs. McKerrow, to Dr. Oliver T. Steen. Mr. Herb Falconer played the wedding music.

The bride, given in marriage by her brother-in-law, Mr. F. W. Langford, wore a pretty hyacinth blue afternoon gown with chocolate brown accessories and her corsage was of Johanna Hill roses, freesia and lily-of-the-valley. Her sister, Miss Hazel McKerrow, was her only attendant, wearing a grey suit with navy blue accessories and corsage of Briarcliffe roses and lily-of-the-valley. Mr. James Steen, brother of the groom, was best man.

Immediately following the ceremony, the couple left for Jackson, Michigan, and on their return will live at Streetsville, Ontario. For going away the bride donned a beige coat with brown accessories.

ENGAGEMENTS

Mr. and Mrs. G. A. Cowieson, Toronto, announce the engagement of their daughter, Dorothy Kathleen, to Mr. J. Ivan Death, son of Mr. and Mrs. H. B. Death of Port Credit. The wedding will take place quietly early in June.

Dr. and Mrs. S. H. Smith announce the engagement of their elder daughter, Norma Anna, to Leonard J., son of Mrs. Atkinson and the late Eli Atkinson of Streetsville. The marriage to take place early in June.

Mr. and Mrs. S. Carter, Toronto, announce the engagement of their daughter, Winnifred, to Alex Genik, son of the late Mr. and Mrs. C. Genik of Winnipeg, marriage to take place May 1st.

TRINITY CHURCH NOTES

Trinity Church A.Y.P.A. met on Monday evening, April 26th, in the Parish Hall. After a rather lengthy business discussion, the members present enjoyed progressive games.

Representatives from Trinity Church Sunday School attended the closing meeting of the season for the Peel Deanery Sunday School Teacher's Association held on Tuesday evening, April 27th, at Christ Church, Brampton. Rev. Dr. Isherwood, of Wycliffe College, was the special speaker, and the subject was "Missionary Work in China."

The services next Sunday, May 2nd, at Trinity Church, will be conducted by the newly-appointed Rector, Rev. E. S. Ottley, who will then officially take over the duties of the Parish. There will be an early Communion Service at 8 o'clock, to which we would like to see as many as possible of the young people of all organizations of the Church, as well as others of the congregation. Sunday School is at 10 o'clock, morning Prayer and Holy Communion at 11, and Evening Prayer at 7. All services on Daylight Saving Time.

The Fifth Annual Peel Deanery and District Local Council Banquet and Dance will be held in Trinity Church Parish Hall on Wednesday evening, May 5th, at 7 p.m. The ladies of the church are catering for the banquet, and it is hoped that all churches in the Deanery will be represented. Miss Sybil Bennett, the only lady barrister in Peel County, will be the special speaker. After the banquet and programme, a dance will be held in the up-stairs of the hall.

A special Coronation Service will be held in Trinity Church on Sunday evening, May 9th, at 7 o'clock. Special service sheets will be used, the service being approved by the Archbishops of Canterbury and York. An invitation is extended to all to attend this Coronation service. The service will be conducted by Rev. Mr. Ottley.

Bethesda United Church, Dixie, are holding a father and son banquet tonight, April 29.

Well, Mr. Citizen, how do you like getting up an hour earlier in the morning since daylight saving came into effect?

Robert W. Gould of Windsor and Miss Pearl A. Cordingley, Clarkson, were married on April 17 by Rev. Dr. H. W. Avison. The young couple will reside at Windsor.

Charles Curtiss of Cooksville and Miss Elnora McKay were married on April 17 by Rev. G. F. Banks of Erindale. They will reside at Dixie.

The Women's Association of Cooksville United Church will hold a coronation tea at the parsonage on May 11.

Mr. W. Good and sister, Mrs. Rapple, have moved from Toronto to their farm at Cooksville.

Mr. and Mrs. Frank Noble and children and Mr. and Mrs. O. R. Church visited with Mr. and Mrs. Paul Snider at Maple, York County, on Sunday.

WOMEN'S INSTITUTE

The April meeting of the Women's Institute was held in the club room with Miss Mabel Graydon, Pres., in the chair. The members were welcomed by Mrs. Dingwall, hostess. The roll call was answered by paying fees for the coming year. The motto, "Nothing is Impossible," was ably taken by Mrs. C. H. Falconer.

The election of officers for 1937-38 was conducted by Mrs. H. Hunter, of Erindale, when the following officers were elected: Hon. Pres., Mrs. E. Redick; Pres., Miss M. Graydon; 1st Vice, Mrs. D. Lindsay; 2nd Vice, Mrs. C. C. Meredith; secretary-treasurer, Mrs. P. R. Kaiser; assistant, Mrs. G. E. Bunt; directors, Mrs. C. H. Falconer, Mrs. J. Caslor, Mrs. D. McCaugherty; flower committee, Mrs. V. Johnston, Mrs. B. Brighty, Mrs. F. Lepofsky; district director, Mrs. D. Lindsay; press reporter, Mrs. G. Bunt; auditors, Mrs. A. B. Bruce, Mrs. W. C. Andrews; standing committees—health and child welfare, Mrs. C. H. Falconer; home economics, Mrs. J. Atkinson; education, Mrs. Lundy; relief and community activities, Mrs. J. Switzer, Mrs. Gould; historical research, Mrs. Langmaid; Canadian Industries, Mrs. Jourdan; international relationship, Mrs. Jones.

The meeting closed with a social half hour, when a dainty lunch was served by Mrs. McCaugherty, Mrs. Greig and Mrs. Wright.

HIGH SCHOOL BOARD

The High School Board held a special meeting with all members present, except Mr. William Couse.

A motion was passed to meet with the Public School Board the following night in connection with the proposed new combination school for the village.

Another motion was passed to the effect that the High School Board was in favor of the building of a combination school.

The matter of some change in the curriculum was discussed and it may be necessary to make some change in the teaching staff, because the Department of Education has issued a new program for High Schools which makes it compulsory to take up Household Science, Manual Training, Music and Art.

ERINDALE

The following officers have been elected for the Erindale Conservative Association: president, Verne Barker; 1st vice, Albert Rogers; 2nd vice, Mrs. Verne Barker; secretary, Fred Jones; junior chairman, Thompson Adamson; deputy chairman, Robert Kirby. Speeches were made by Gordon Graydon, M.P., Col. Tom Kennedy, W. J. McKinney, Harry Willis, R. D. Salmond, Irwin Kellet, and Mr. Moore. The meeting was largely attended, which shows a greater interest is being taken in politics.

UNITED CHURCH NOTES

The Young People's League of the Streetsville United Church met on Monday night under the department of Citizenship with a good attendance undisturbed by the wet weather. The meeting opened under the direction of the President, Wesley Durie, and the business of the League was discussed. Then the meeting was turned over to Miss Jean Temple and a "Coronation" program was presented. A violin duet by Misses Jean and Margaret Temple was a pleasant surprise, because they only began to study this difficult instrument last November and produced remarkably pure tones in two-part playing. Miss Elsie Temple accompanied at the piano. After the program the group entered into games for a half an hour.

Drumquin

Another real estate deal has gone through. The old familiar Brown property at the corner here, which has been owned by Mr. T. Itchins, who has been operating several apiaries, has been sold to Mr. C. Saunders of Agerton, including the equipment. The older residents will long remember this corner where the famous drag harrow and many other farm implements and road vehicles were made.

The many friends of Mr. and Mrs. Itchins are sorry they are leaving.

Mr. Itchins, who has had poor health for some time, is taking a rest.

The Hydro men are busy placing poles from the Coyne school corners to Mr. Cross' property, formerly the Coyne estate.

It is with regret we chronicle the passing of Mrs. Chester Featherstone, sixth line, early Sunday morning. She had been in poor health for some time, although every effort was made to improve her health, it seemed to be of no avail. The funeral took place on Tuesday afternoon to Bethel Church and cemetery.

The musical festival, which was held in Milton United Church Thursday, Friday and Saturday of last week was well represented from these parts. Number Nine School pupils were among the winners. A chorus of eleven boys and girls won the silver cup while little Olive Lyster took high honors for her singing. Congratulations to Anna Clifton for her piano solo, for which she obtained high honors.

Music is taking a high lead in the schools.

The Evening Telegram Co. are putting on a daily through service, commencing today, Monday. This means those taking the paper will receive it the same day as printed, the same as those in town. This is only for those on the main highways from Trafalgar to Campbellville via the 7th line. Once more it pays to reside on a main road.

A little baby girl has arrived at the home of Mr. and Mrs. Gerald Neil.

Mr. Norman Campbell has sold his farm to Mr. W. Bigger.

Norman is giving up farming. We are sorry to lose him and Mrs. Campbell from our midst.

EDEN CHURCH

At a social evening held in the Eden United Church Mr. and Mrs. B. Chambers were the recipients of a lovely walnut tea wagon and coronation comport in recognition of the faithful services rendered the Church for many years past, and especially in appreciation of over 26 years services given by Mrs. Chambers as organist and choir leader.

A brief, but delightful program of music came first. The choir sang two selections, "Worship the Lord of Glory," and "Magnify His Holy Name." Miss Anne Sinclair sang the two numbers prepared for the Peel Festival, in which she won distinction, taking the gold medals in each class. Miss Beatrice Jones sang "The Old Village Choir," and the minister played flute solos. Messrs. Joe Lyons and Wilmer Cation gave a fine impersonation, "George and Salena"; a quartette by Misses Mildred May, Muriel Mason, and Messrs Elmer Waite and Wilmer Mason. Each number was well given, as is customary in events at Eden.

Then Mr. O. S. May read an address to Mrs. Chambers, who had been escorted to the front by the minister, expressing the appreciation of the church for the faithful services rendered with grace and charm through the years. Mrs. A. G. Waite then made the presentation and Mrs. Chambers feelingly replied. Then followed a social time in the basement, when contests and lunch were enjoyed.

"SALADA"

GREEN TEA

Love Huntress

By H. GLYNN-WARD

Claudia Townsend meets Dick Whalen at a hockey game in Seattle one night. Her interest in Dick infuriates Wallace Bornell, rich young lumberman, who wants her to marry him. To get Dick out of the way, Wallace offers him a job in one of his lumber camps in British Columbia. Claudia, meanwhile, goes to Victoria with her father to see about a job for Dick. When she wires him that the job is his, Bornell manages to intercept the telegram. Dick then accepts Bornell's offer and goes north. At the lumber camp he discovers that the Bornell company is stealing timber. When he asks the boss, Braddock, for an explanation, he put him off and next day starts for Seattle. The following day Claudia stops in at Bornell's office and, by chance, overhears Bornell and Braddock plotting to do away with Dick.

CHAPTER VI

Claudia had her wits about her, sharper now than ever. She must find out more.

She heard Bornell say, "You'd better be off at once, or you'll miss the boat from Vancouver."

"No boat tonight," the man answered. "I'll have to wait till tomorrow."

They had opened the door and come out into the outer office as they spoke. They stopped short as they saw Claudia. But she was leaning back comfortably in a chair, intent on her hand-mirror, her powder-puff, and her nose.

"Why, Claudia!" Wallace exclaimed suspiciously. "What on earth are you doing here?"

She flashed a smile at him and looked back into her mirror.

"I thought I'd surprise you, Wally! I'm so cold and hungry, I just thought how nice a cup of tea would be—with you!"

There was a moment's dead silence as the two men exchanged glances. Had she heard anything? The seeming innocence of the girl, her utter nonchalance, disarmed suspicion.

"Why, I'm more than delighted—" Bornell dismissed Braddock with a nod, and the big man walked heavily out of the office. "Where shall we go? To what do I owe this most unusual invitation?"

"Well—I haven't seen you for three whole days, Wally, so I thought I'd look in on my way home to tell you that I'm going up to Banff for the winter sports in a day or so, with the Hodgsons, you know. In fact, they're there already."

She had risen and was walking casually towards the door. Bornell followed, putting an arm around her shoulders.

"Just one little kiss. . . " She pulled away from him—oh, how she hated him! But she tried to play up to him a little as they left the office.

• • •

She drove him in her car to a fashionable restaurant.

"I've a good mind to run up to Banff while you're here," he said when they had ordered tea.

"Why not? It would be fun! You must know British Columbia awfully well, Wally, you have so much property up there."

"Why no," he smiled. "Banff is in the Rockies."

"Where is it then? Anywhere where there's ice and snow and skiing?"

"Part of our holdings are in the far north."

"Couldn't we go and ski up there, a party of us? What town is nearest to your properties, Wally?"

"Oh— Fort George, and a little place called Burns Lake."

Burns Lake! That was what she had wanted to know. Now she was quite sure they had been talking about Dick Whalen.

After tea Claudia said goodbye to Bornell outside the office of a railway agency. Ostensibly she was going to find out about trains and fares to Banff, but her real reasons was to find out the whereabouts of Burns Lake.

When she returned home she found a letter waiting for her— a letter from Dick Whalen at Burns Lake!

She gasped in surprise when she saw it. But her surprise deepened as she read it. Here were explanations enough to damn Bornell forever!

• • •

It was Bornell who had offered Dick a job in his camps in the far north! Bornell had sounded none too fond of Dick when he had spoken of him to her. He must have wanted Dick out of the way! Quickly the motive for that suggested itself to Claudia—jealousy, on her account!

Dick had never received her telegram at all! But the hotel people had told her that it had been delivered. There must be some explanation. No wonder Dick had left her in silence. He thought she had let him down, failed in her promise.

A great load was lifted from her heart she could have cried aloud for joy and relief. Now she knew that Dick was all she had first thought of him. He had neither failed her nor snubbed her.

But Dick was in danger now! Bornell and that big man were going to "get rid of him" because of something he had found out! He must be warned immediately! The girl's dormant love for him had come surging up afresh. Her wits worked quickly. . . and all at once the idea came to her. She would go up there herself! It would be safer and more certain than any wire could be, or letter

She had found out that Burns Lake could be reached either by taking the boat to Prince Rupert and then going across country by train, or by going north from Vancouver by train and then westward, a long train journey. The big man, Braddock, whom Claudia had seen in Bornell's office, had said it would be just as quick to wait for tomorrow's boat.

She would go up by boat. Her family would think she was going to Banff; that would make it easy for her to take skis with her. It would not be altogether a lie, for she would turn up at Banff some time later—making a round-about journey.

• • •

Claudia knew nothing of logging-camps, except by hearsay. But the fact that she had been brought up in the lap of luxury had not deprived her of initiative, of one iota of her natural spunk. She armed herself with all the money she could lay hands on, her ski and winter outfit, and set out into the world of adventure prepared for anything.

On the boat she came face to face with Braddock, recognizing him immediately but giving no sign of it. He gave her a stare, then took the cigar out of his mouth, turned it over and over thoughtfully. Braddock was a shrewd and cunning man, by no means a fool.

Here was the girl he had seen waiting in the Bornell office, a girl who might or might not have heard him and Bornell talking. This was not the tourist season, and to find her here was a coincidence too strange to be by chance. If she were bound for the same destination as he—was it in Bornell's interest, or against it?

This girl might hold all their fates in the hollow of her little hands. Braddock was not the man to leave anything to chance.

He kept an eye on Claudia Townsend. When they reached Burns Lake long after dark, he saw her step out of the Pullman far ahead, and chuckled as he watched her standing there alone, looking about her obviously a bit bewildered at the immensity of the country around her, the lack of a porter of any sort, the few lights that came from the scattered dwellings of the village.

He hurried over to the inn, booked a sleigh to take him at once down to the camp, and saw to it that no other sleigh would be at Claudia's disposal until next morning.

(To be Continued.)

Tea Towels Bubbling With Charm Are These By Laura Wheeler

BUBBLE GIRL TOWELS PATTERN 1305

Just let these merry "Bubble-blowers" take charge of your kitchen, for they'll do a fine job of drying your dishes. Right out of the scrap bag—their bouffant skirts and poke-bonnets, for each is a simple patch to be cut and appliqued, then finished off with outline and running stitch. If you prefer, you can omit the applique and just embroider them. Pattern 1305 contains a transfer pattern of seven motifs averaging 5 x 7¾ inches; color suggestions; illustrations of all stitches used; material requirements.

Send 20 cents in stamps or coin (coin preferred) for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Write plainly PATTERN NUMBER, your NAME and ADDRESS.

Woman's World

By Mair M. Morgan

CHOCOLATE AND ALMOND

Here is a cake that promises to be a hit this season and many other seasons too. It's a new and entirely different cake, and, of course, you want to be the first in your crowd to serve it. But it won't be your exclusive— recipe very long because everyone else will want to try it and after serving this cake once, it will become an outstanding favorite. Now, however, is your chance to make a name for yourself by being the first to serve this delicious Chocolate Almond Cake.

Because it is so good and for fear someone may not get a slice, the proportions given will make an extra large cake and you will appreciate that when the cake begins to disappear. It will prove ideal as your contribution towards a supper club, a church dinner or at your own bridge party.

It's an elegant looking cake too, and the combination of flavors — chocolate and almond and the combination of the rich brown and cream colors will please everyone.

Chocolate Almond Cake

2½ cups sifted cake flour.
¼ teaspoon salt
2 cups sugar
3 squares unsweetened chocolate melted
2 teaspoons vanilla
1 cup butter or other shortening
1 teaspoon soda
5 eggs, well beaten
1 cup sour milk or buttermilk

Sift flour once, measure, add the soda and salt, and sift together 3 times. Cream butter thoroughly, add sugar gradually, and cream until it is light and fluffy. Add eggs and beat well, then chocolate and blend. Add flour, alternately with milk, a small amount at a time, beating after each addition until smooth. Add vanilla. Bake in greased loaf pan, 15 x 9 x 2 inches, in slow oven (325 Deg. F.) 50 minutes, or until done. Remove cake from pan, cut in halves crosswise and trim to straighten the edges. Put together with Toasted Almond Filling between layers and Mocha Chocolate Frosting on top and sides of cake. Decorate top with shredded toasted almonds, if desired.

Toasted Almond Filling

Cook 1 cup chopped blanched almonds slowly in 4 tablespoons butter until well toasted, stirring constantly. Recomve from fire and add a tablespoons top milk. Then add 3 cups sifted confectioners' sugar gradually, beating until smooth. Stir in dash of salt and 2 tablespoons of vanilla. Cook until thick enough to spread. (For less luxurious filling use ½ or 3-4 of this recipe).

Mocha Chocolate Frosting

Cream 2 tablespoons butter; add 1 cup sifted confectioners' sugar gradually, blending thoroughly. Add 1-8 teaspoon salt, and 2 squares of unsweetened chocolate, melted, and mix well. Then add 4 cups sifted confectioners' sugar, alternately with ½ cup strong coffee, until of right consistency to spread. Beat after each addition until smooth.

Ten Questions

Q. How can I treat white curtains that are sunburned and yellowed from the summer's sun?

A. They can be made ecru by dipping in a coffee solution. The sunburned spots will be covered and the room will have a softer tone than when the curtains were white.

Q. How can I take proper care of the fingernails before cleaning and polishing the stove, or doing similar work?

A. Rub some soap under the fingernails and it will be impossible for them to accumulate dirt.

Q. How can I iron table linen so as to give it a satin gloss?

A. Iron on the wrong side first, then on the right side.

Q. How can I remove all small insects when preparing greens?

A. By sprinkling some baking soda on the greens before pouring water on them for the first washing.

Q. How can I clean greasy woodwork?

A. Try cleaning it with a cloth dipped in turpentine. Follow this by wiping with a cloth dipped in water, to which a little kerosene has been added.

Q. How can I remove ice cream from a can without difficulty?

A. Wrap a hot cloth around the can and the cream will slide out easily.

Q. What is a good remedy for freckles?

A. Bathe the face in fresh buttermilk, or mix two ounces of sour milk, or buttermilk, with two drams of grated horseradish, and six drams of cornmeal. Spread this mixture between thin muslin and apply to the affected parts at night, leaving on as long as possible; but be careful not to get it in the eyes.

Q. How can I prevent leather shoes from hardening after being out in a heavy rain?

A. By washing the leather with warm water and then rubbing quite thoroughly with castor oil.

Q. How can I improve the flavors of gooseberry pie and elderberry pie?

A. Add a little salt to the gooseberry pie, and a tablespoonful of vinegar to the elderberry pie, to improve their flavors.

Q. How can I remove vegetable stains from the hands?

A. Try rubbing the juice of ripe cucumbers over them.

Says Hockey Rival Of Music In Canada

Mary Ramsay Praises Canadian Audiences After Recent Tour

NEW YORK—Mary Ramsay, Scottish pianist, and Anders Timberg, Swedish tenor, this week applauded Canadian audiences as "appreciative and responsive to music." They are returning to England after a tour of Canada.

"However, I must say we had one great rival—and that was hockey," added Miss Ramsay whimsically. "We had to postpone one concert as there was a big game the same evening."

She went on to tell of arriving in a western Canadian town for a concert and being met by the manager of the concert hall with the warning that the recital, if given, would fall upon empty seats as a hockey game was to be played that night.

"We finally went to the game ourselves and held our concert the next night," she said.

How Do They Get Them?

Revolvers are of no use against machine-guns, and so the Mounties will be equipped with rifles, to deal with gangster thugs. But how do the public rats get the machine-guns? There should be closer supervision over the sale of fire-arms on this continent. — Chatham News.

An Unusual Fatality

An immense crowd of people attended a funeral in London, Eng., to do honor to the memory of an Australian soldier who had been killed in a peculiar manner while in England as a member of the Australian military contingent to the coronation. He was hit by a bicyclist on Birdgate Walk, outside Wellington barracks where the Australian contingent is quartered.

The simplicity of the accident that took this man's life illustrates the anomalies that are found in the affairs of existence. Gunner Arthur Percy Sullivan, V.C., who was the victim of the mishap, won the Victoria Cross in 1919 when he rescued four comrades from a Russian swamp under heavy fire. After an experience of that kind, the normal conclusion would be that the subject would have a reasonable chance to escape the less spectacular hazards of the streets. But there is nothing certain in that connection and human beings must be prepared for the unexpected at all times — Galt Reporter.

Naming The Baby

A psychologist issues a warning to parents not to give them odd names. This also applies to what might be called the "period names" assigned to girls. It will be as easy to compute the ages of the "Marinas" of the present day as it was to compute the ages of the "Almas" and "Victorias" of the last. — Brockville Recorder and Times.

Bought Own Baskets

Giving the boys a cent for every fruit basket returned, a local grocer found himself getting on a buying campaign that rather astounded him at the unlimited supply of the basket market. Becoming suspicious of the never-failing stream of youthful basket vendors, he made bold one day to inquire into the methods of gathering the empties and one less sophisticated than the other let him into the secret that they were recruiting their supply from the stock contained in his back warehouse, or in other words he was buying the same baskets over and over again. The buying campaign stopped with the abruptness of a sit-down strike in an ammunition factory during a bombing raid. -- Walkerton Herald-Times.

Good Thing as Carriers

The Guelph Mercury points out that happiness is contagious. It is, and there are some people — bless them—who are "carriers" of it. It should not be regarded as a "disease" of childhood, or even of youth. No one is more to be pitied than the man or woman who has "developed an immunity". — Toronto Star.

An Industry Grows

The Coldwell Linen Mills, established at Iroquois, furnish an outstanding example of an industry growing and flourishing in a relatively small Ontario community. This plant, starting in a small way, has steadily expanded as its products have commanded an ever-growing share of the Canadian market, and another large addition about to be built illustrates the continued success which is attending the undertaking. —Brockville Recorder and Times.

Not in Favor

The moth is not a society favorite, even if it does frequently appear in a dress suit. — Ottawa Journal.

You Bet Your Life

If a man were to bet $17,000,000 against $1 that he could toss a booklet into the air, and catch it as it falls he certainly would be thought to be foolish. He probably would win, but the small gain would not be worth the tremendous risk. By the same token, the pedestrian who risks all the remaining minutes of his life just to save a single minute by crossing the street recklessly, is an exceedingly foolish man. In a booklet, "You Bet Your Life", that it has just issued, a prominent insurance company uses the above illustration among others, to demonstrate the folly of gambling with your life. — Kitchener Record.

Can Be Banished

In spite of marked progress during recent years as a result of immunization campaigns, we cannot say that diphtheria has been really conquered in Canada as long as the disease claims 160 lives in three months, as the latest report of the Bureau of Statistics indicates. But the means of complete conquest lies readily at hand if only individuals and communities will use it. — Brockville Recorder and Times.

Dean Inge As Prophet

Dean Inge has produced another book in which he discusses many things. One of his prophecies is that there will not be a devasting European war because of the lack of funds. He depicts Germany in such bad financial shape that he doubts whether the Hitler regime can last very much longer, and Italy, he avers, is not in much better case. The reverend gentleman has frequently proved himself a good forecaster. It is to be hoped that he is also one in this instance. —Brantford Expositor.

Floods and Droughts

The swamps, creeks and streams which are now so full to overflowing of water will be much less full a few weeks hence and mid-summer may see them almost bone-dry with the farmers dependent upon them for moisture complaining of the drought and being compelled to bring water for perhaps considerable distance to supply their stock and carry on other farm operations. This is one of the penalties that we mus. pay for the liberties which have been taken with the standing forests of other days and with the swamps that once stored up moisture for summer use. The provincial forester, E. J. Zavitz, said the other day that the preservation of existing swamps, together with the creation of additional ones, might become necessary if there is to be an ample supply of water. Int some parts of the United States, he pointed out, whole communities are being moved and the land upon which they stand is being turned back into marshes to protect watersheds and end floods and droughts. — Brockville Recorder.

Barrier to Happiness

One of the chief bars against happiness is the empty mind. People who have retired from business or after a lifetime of labor with no hobby or interest are bound to be thrust back in themselves, and the house of life is not intended for one solitary tenant. It should have a welcome for friends and hobbies and service for others. — Carleton Place Canadian.

THE EMPIRE

Italian Defeat

For Mussolini the worst of it is that his troops at Madrid really were defeated. The rout, for it was a rout, was on a limited scale, and no one can yet say whether it was an isolated episode or whether it was characteristic of the fighting quality of the Italians with Franco and therefore likely to recur. But within its limits it was serious; all the more serious because it is humiliating and Divus Augustus is his own country, must not be humiliated. That is why the Italian people are told nothing of the defeat by their own press. That is why Signor Gayda, Mussolini's mouthpiece, is telling the public that the Italian troops at Madrid have been "rectifying their front," that old hypocrisy which became so stale a jest in the Great War.—Manchester Guardian.

Mine Host, John Bull

The way in which Britain manages the Coronation will colour, for good or bad, the opinions of scores of thousands of overseas visitors about the capability of our people. If the occasion and our pageantry are grand enough to bring the world flocking, our hospitality must guarantee everybody comfortable and fairly priced quarters. This responsibility is now being shouldered, with the approval of the Government, by an Accomodatio Committee set up by the Hotels and Restaurants Association, the Residential Hotels Association and the Travel and Industrial Development Association. Their enterprise—which deserves all praise — will secure a census of the available rooms for visitors. — London Daily Mail.

War Trophies To Be Used as Scrap King Takes Lead

LONDON—Led by the King, a movement is sweeping England to scrap the proud trophies won by the British armies on the field of battle to help finance Britain's $7,500,000,000 program for new armaments.

His Majesty started the campaign with an order to remove two German field pieces from the east terrace of Windsor Castle. It was he considered such war relics not in keeping with the beauty of the terrace and its famous sunken gardens.

Other hard won trophies will be offered for sale as so much scrap iron to help finance the rearmament program.

Lauds Small Farms

George Bouchard, M.P., Declares They Make For Contentment and Happiness

TORONTO — Canada had attempted to build a Babel tower that was "all materialism" and that embodied a "great confusion to tongues," said Georges Bouchard, M.P., from Quebec to a reporter, making a plea for the small farm and the fostering of the rustic arts.

Mr. Bouchard, who claims he is "intellectually" a tiller of the soil, and points out that his family have been part of the Quebec soil for ten generations, "since before 1630," arrived in Toronto to address the Handicraft Association of Canada, and to attend the executive meeting of the Canadian Association of Adult Education.

The member for Kamouraska is a professor in the Agricultural College at Sainte-Anne-de-la-Pocatiere, was the founder of the French-Canadian Women's Institutes and has made a hobby of handicrafts for more than twenty years.

He believes that if Canada is to enjoy stability and employment, as well as contentment and happiness, there must be a lot of small farms. The large industrial farm has led to instability, over-production and unemployment. In his part of Quebec, where there is a shorter season, not as uniform a soil, and where the farms are not as close to the large centres as in Southern Ontario, the people are closer to a self-supporting basis.

Must Stop Motors While Filling Tank

New Regulations Cover the Handling and Storage of Gasoline

TORONTO — Regulations governing the handling and storage of gasoline have just come into effect. The act, passed at the recent session of the legislature comes under the fire marshals department.

Regulations require handlers of the gasoline to not smoke; tanks of more than 50 gallons capacity used for the transporting of gasoline must be permanently attached to the truck chassis; trucks used for the transportation of gasoline must carry fire extinguishers; special types of valves and non-leak tanks must be used.

Service stations are warned against the use of visible type of pumps where gasoline is displayed in a glass container of more than one gallon capacity. None of these shall be installed after January, 1942, and every such pump must be taken out of service by 1947. Pumps now installed on public streets, lanes or highways must be out of service also by 1947. And no pump shall henceforth be installed in such a way that a vehicle sits upon the street or highway while being served.

Owners of automobiles must turn off the engine when having the gasoline tank filled.

No petroleum product, such as the crank case oil shall be allowed to enter a sewer or subsurface drainage system. Officials of the department may limit the number of empty gasoline drums stored in any one place.

Cigarettes

Spice cans and syrup jars in the kitchen cupboard play a big part in giving certain cigarettes their distinctive flavors. Foster D. Snell, Inc., industrial chemists, report that among the flavoring agents commonly added to cigarettes are cocoa, chocolate, licorice, ginger, cinnamon, vanilla, molasses, rum, brandy, maple syrup, oils of anise, juniper, cloves, honey and sugar.

News In Review

Buy Wheat in U. S.

WINNIPEG— Diminished supplies of Canadian wheat available for export at the Lakehead and in Eastern ports has resulted in Canadian and foreign exporters purchasing Canadian wheat at Duluth, Minn., grain traders said here.

Repurchase of 200,000 bushels of No. 1 Northern at Duluth by Canadian interests last week was confirmed. With only 1,899,320 bushels of Canadian wheat in store at Duluth, however, buying cannot be large.

The opening of lake navigation last week-end brought the problem of low available supplies of exportable wheat into the open. With approximately 38,000,000 bushels of Canadian wheat in store at Fort William and Port Arthur and Eastern Canadian and United States ports, compared with 108,000,000 last year, exporters are entering new markets seeking wheat to meet commitments abroad.

Span Canada in 21 Hours

OTTAWA—Transport Minister C. D. Howe has returned to Ottawa, after consulting President S. J. Hungerford of the Canadian National Railways on the projected trans-Canada airlines which will be controlled by the railway. The Minister said he still expected the transcontinental service would start next fall, depending on the delivery of planes and the construction of emergency landing fields, particularly in the West.

Parliament passed legislation last session to set up the $5,000,000 corporation to control the airline, 51 per cent. of the stock being retained by the C.N.R. The minority stock will be held by air companies operating the service.

Tentative plans call for an overnight jump from Montreal to Vancouver, leaving the East at 8 p.m. and arriving at the West Coast at 2 p.m. the following day. A connecting link will be flown from Montreal to Halifax, making a tran-Canada flight of twenty-one or twenty-two hours.

Plan to Protect Fisherman

WINNIPEG—Formation of a credit agency in New York for the protection of Lake Winnipeg fish producers from unscrupulous buyers was discussed at a conference between producers' and representativs and the Manitoba Department of Natural Resources. Hon. J. S. McDiarmid, Minister of Natural Resources, said the agency would keep a check on buyers with aid of the Canadian Trade Commissioner in New York.

Quints Will Wear Canadian Wool Suits

TORONTO—Next winter the five little sisters at Callander are going to wear suits made of Canadian wool, spun in Canadian homes.

That is the plan of the Canadian Wool Growers' Association revealed by Georges Bouchard, M.P. for Kamouraska, Quebec, a director of the wool growers.

Mr. Bouchard told a reporter here that the association intended to sponsor a competition for the best suits of Canadian wool, for the Dionne quintuplets. He asked the Handcrats Association of Canada for assistance in organizing the project, which would not only benefit the wool growers, but also the handcraft workers.

Saskatchewan Farmers Start Work In Earnest

REGINA—Seeding is general in most districts of Saskatchewan, according to Hon. J. G. Taggart, Minister of Agriculture. Surface moisture conditions are reported reasonably good though there is deficiency of subsoil moisture in some areas. Between thirty-five and forty men are leaving Regina daily for farm work, while thousands who were employed during the winter months under the farm bonus scheme are remaining on farms.

Eat 26 Dozen Eggs per Head at Oshawa

The City of Oshawa, Ontario, eats more eggs than any other city in the Dominion. This fact is revealed in the recent studies of the consumption of various food products in different cities and rural districts of Canada, carried out by the Economics Branch, Dominion Department of Agriculture, in co-operation with the Provincial Departments.

With regard to the annual consumption of eggs, the City of Oshawa led with 26 dozens per capita. Saint John, N.B., and Quebec City scored a draw with 17 dozen per head in each city, and the inhabitants of Montreal were responsible for 16 dozens per person. The Chinese in Canada ate 12 dozens of eggs per head during the year, and the Japanese consumed 16 dozens per person.

Increase Prize List in Collingwood Fair

THORNBURY— The agricultural society of Collingwood township decided at a meeting to have a steel roof put on the horse sheds in the fair grounds. They added a separate class for Percheron horses, the prize list being increasd $30.

Arrangements were completed for field crop competitions in barley. The plot will require four acres of ground and entry fee will be $1. The provincia department will pay 50 per cent. of the costs.

Drastic Check on Cattle Disease

LONDON—So alarming has become the threat of the dreaded Bang's disease among Canadian cattle that the Western Fair, along with other leading exhibitions may adopt the precaution of compelling blood tests of animas entering the show.

Bang's disease is said to be greatly worrying agricultural authorities in the province. If unchecked, many herds may face semi-destruction, it is claimed. Added to this is the contention that Bang's disease causes undulent fever among humans.

The disease — contagious abortion among cattle — is also blamed for reducing the butter fat content of milk.

Sees Soy Bean ... A 'Wool' Source

Jackson, Miss.—Dr. H. E. Barnard, research director for the Farm Chemurgic Council, told the Mississippi Farm Chemurgic Conference today that soy beans, which last year attained the ranking of the American farmer's fourth largest cash crop, may become the source of an artificial wool he said, was produced from milk casien as practical operation in Italy The protein of soy beans is very similar in composition to the casien of milk, he added.

Best Musical Education World Can Offer Awaits Winnipeg Lad

WINNIPEG. — Arthur Benjamin prominent English critic, made plans last week to give Winnipeg's 12-year-old cellist, Lorne Munroe, whom Benjamin described as a genius, the "best musical education the world can provide."

"If Sir Hugh Allan of the Royal College of Music in England could hear the boy play just once, I'm almost certain a scholarship would be granted him," said the London critic, adjudicating at the Manitoba Musical Festival.

Benjamin offered to take Lorne to England with him, provide him with board and lodging in his own home and see that he is given the best musical education possible if a Winnipeg service club would undertake $1,000 annual maintenance expenses The service club is considering the offer.

Lorne has studied only in Winnipeg but he took his first cello instruction when he was three years of age and 2½ hours of daily practice in recent years have been under direction of his mother, a pianist. Mrs. Munroe, wife of Wallace R. Munroe, commercial artist, still teaches Lorne music theory.

Both mother and son were pleased with Mrs. Benjamin's offer but neither looked with particular excitement on the prospect of Lorne going to London.

"I'd like to see Lorne stay on this continent," Mr. Munroe said. "We'd like to have him go to some musical centre in the United States. I don't want to stand in his way but he's pretty young to be on the other side of the Atlantic from his family.

Neither mother nor father made any statement whether they would permit the boy to go to London should the opportunity materialise.

"It would be lonely, all right," was Lorne's only comment on the suggestion he study overseas.

Lorne does not find long hours of practice tedious. A sturdy, quiet and self-possessed boy, he likes to play his chosen instrument.

SPORT REPORTER
By KEN EDWARDS

Ho Hum! Some people get all the breaks. If they're bad they turn out good, anyway that's what Hank Greenberg found out.

It appears Detroit Tigers' slugging first baseman broke a wrist at the start of last season and drew his full salary all year from the bench.

This year Hank was taken south on $1,000 contract, his wrist undergoing many tests before he was signed at his old salary.

It's a fact that in 1924 that Babe Ruth led the American League for his first and last time by batting .378, not a good average for the Babe, many times he has exceeded this mark.

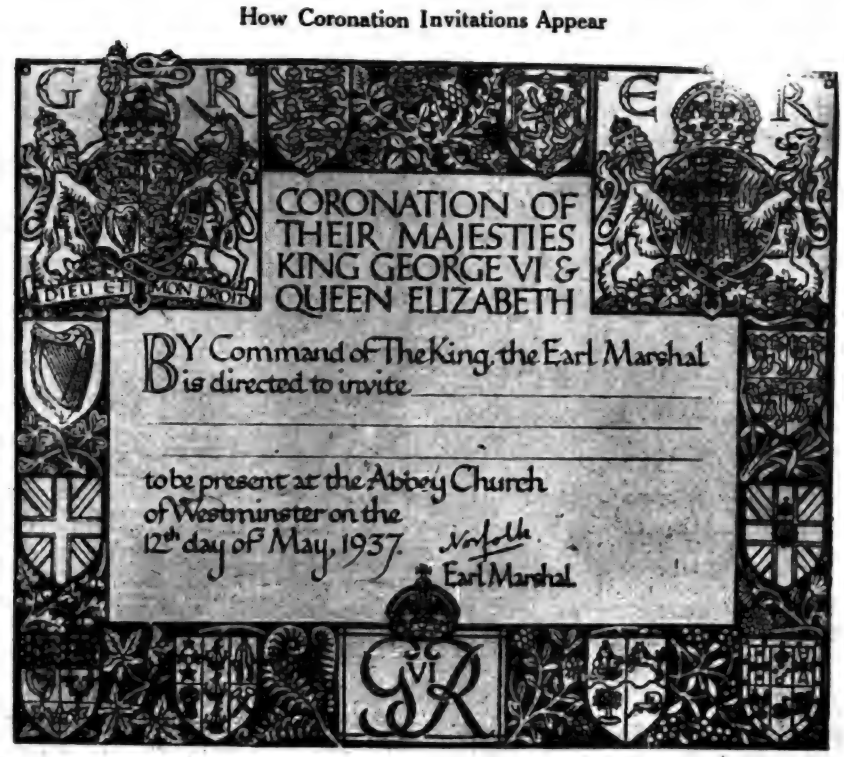
This human fellow who is worshipped by every kid who owns a baseball, bat or glove, holds the life time home run record with 729.

Next to Ruth comes Ty Cobb, one of the greatest players that ever graced a diamond. Cobb is the holder of an all-time record of 12 batting championships.

It sure looks like the cows and chickens have been neglected out at the Feller farm. Anyway young Bob will be able to fatten them up now with a $10,000 baseball contract under his arm, thanks to his pappy's coaching.

Coming back to Toronto we hear that Rudy Dusek, the man who drinks and eats while suspended in mid air with rope encircling his huge neck will be back in Toronto doing a "Dusek Special" for Jack Corcoran in a few days.

Says Coronation Will Be 'Dreadful'



Woman Biographer Left England In Order to Avoid Event

NEW YORK. — Joan Haslip, 27-year-old biographer of "Parnell" was in New York today on her first visit to North America and on her arrival she said her main idea was to get away from London for the Coronation.

"It's going to be dreadful," Miss Haslip said. "I never saw London look so dreadful, with all those stands built up, and thousands of Australians all around. It seems absurd to me that they're running the Coronation this way. The King is supposed to a King of all the people, but with the prices they're charging for seats, certainly few of the working people will even get a look at him."

Miss Haslip was the second British literary figure to come here this week to avoid the Coronation. On Monday Aldous Huxley arrived on a similar journey and said so.

How Coronation Invitations Appear

Herewith is a copy of one of the 7,700 invitations to attend the Coronation which are now being issued. They bear the signature and cost-of-arms of the Duke of Norfolk, Earl Marshal. The invitations are printed on cards, 10½ by 8¼ in black.

The SNAPSHOT GUILD
Fascination of the Miniature Camera

The original negative of this picture is about the size of a postage stamp. It was snapped from the second row of a theater on ultra-fast film with the lens at f.2, the exposure 1/25 second at a moment of slight pause in the action.

THE frequent appearance in magazines and newspapers of striking "off-guard" snapshots of prominent persons, such as society folk dining in a restaurant, or "series shots" of the changing expressions of an after-dinner speaker, prompts from many readers the question, "How were these pictures taken?" The answer in the case of many of these pictures is the high-speed, large-lens miniature camera and the new ultra-fast film, which in combination often make possible snapshots at night without extra illumination of the subject.

The use of miniature cameras, not alone for "off-guard" photography but for daytime portrait studies and "scenics" of which they are also highly capable, has grown with startling speed. Films are available that are especially suited to this kind of work. These pocket-size but powerful, precision-built cameras seem to have for many the fascination of the high-powered automobile and are bought despite their higher cost, because "you can go places with them."

Just what is a high-speed miniature camera? Essentially it is a very small roll-film camera with a very large aperture lens such as one rated at f.2. The exposure required with an f.2 lens is only 1/9th of that needed for the f.6.3 lens which is considered a "fast" lens on the ordinary amateur camera.

Without going into the technical reasons, it is possible to use a much larger and consequently much faster lens on a miniature camera than would be practicable on the average size camera. The small size, the ultra-fast lens combined with new extra-fast film, make it possible to snap pictures under conditions which are difficult for larger cameras with slower lenses.

You can carry a "minnie" around in your pocket and whip it out for any occasion. With good judgment for correct exposure you can make snapshots on the stage of a theater, in a night club, at a prize fight or at night on a brightly illuminated street.

Miniature camera negatives must, of course, be enlarged to obtain prints satisfactory to look at. Some miniature cameras use 35-mm. motion picture size film and give up to 36 pictures to the roll; others use somewhat larger sizes, 8 or 16 pictures to a roll. Owing to the relatively low cost of the small-sized film, the expense per picture for average-size enlargements is not much greater than a contact print from the larger film used in a camera of ordinary size.

The technique of taking pictures with a miniature is not much different from that with the ordinary focusing camera, but there is a valuable point to remember. Because of its light weight and small size, it is more difficult to hold a miniature camera steady. Since sharp negatives are essential in this work, steadiness is of prime importance.

131 John van Guilder.

MY VISIT TO THE ROYAL WINTER FAIR

Composition—M. Quennell

As is was the day set to go to the Royal Winter Fair, we were to leave the school at twelve-thirty o'clock in the afternoon and we arrived in the grounds at about one-fifteen. We had the honour of having Chief George Guthrey and some other provincials escort us into the exhibition grounds. We separated from the cars and waited till the drivers parked them.

When they returned we all went together up to see the dogs and puppies. Really it was very interesting to see them al with their different looks and attracting actions. As it happened there were dogs from Streetsville which added to the interesting scenes. There were all different kinds, some of them being Great Danes, Police Dogs, Wire-haired Terriers, Hounds, Fox Terriers and Bull-dogs.

Nobody has any idea how interesting and wonderful the horses and ponies are until they have really seen them. What caught my eye was the Quintuplet ponies. Their names were: Diana, Anna, Blue-belle, White-mark, and Curly-tail. There were horses from the southern states and many other parts of the world. Some had very sweet faces and others were not so sweet, but it was of great education to see them.

Another item of special interest was the cattle. It will be of great interest to know that a head of cattle was brought from Mr. Beath's farm in Colbourne, Ontario, which was formerly raised on His Majesty King Edward the VIII's ranch in Alberta. This was a beautiful brown cow which looked as though it might have had a permanent wave. There were others of interest, such as those of Bull's, Brampton.

On entering the coliseum our eyes beheld a wonderful array of flowers. Nothing could have been more beautiful than the way those flowers were arranged so that the colours blended in lovely. Dales, the world wide known florists, had a great display of flowers, the roses being mounted on a circular pedestal which kept turning to show all the different kinds blending from white to dark red. They were much admired by everyone and more-so by Peel County residents, as Dales reside in Brampton.

We do not realize how lucky we are in this country until we see such a wonderful display of fruit and vegetables which was on the second floor. The first prize apples looked lovely and juicy and red. You know it is as the slogan is, "An apple a day keeps the doctor away". The tomato juice stand was very interesting. The use of tomato juice is increasing as its nutritional value becomes known. In 1926 it was unknown. In 1931 it was used a little. In 1934 better known and now it is considered almost a necessary drink.

Another feature which must not be overlooked is the fire rangers tent which is used in the far north. This was a small tent which the rangers use as a camp. It was surrounded by pine boughs which were on the floor and cedar trees. An axe, pick, and portable hand pump were attached, being used for forest fires. I think nearly all of us were interested in the swine as Mr. Featherstone, one of our local farmers, is famous for his Yorkshire swine.

On entering the arena our eyes beheld some wonderful decorating of mauve and yellow. The lights were covered with yellow drapes and there were mauve curtains with yellow frills all the way around. In the centre was a large platform and printed on the side was "Youth in Agriculture" which is the slogan this year and which means to encourage the young people of today in agriculture. The horse races in the afternoon were of great interest and also the jumping.

The cars and coaches were of great interest. First came some Indians with drags and carrying canoes. There was a skirmish and the firing of guns. This was followed by a gig driven by a lady and gentleman dressed in old fashioned costumes. Then came a small coach and a large one behind with a bride and groom. Next came three cowboys who did some clever riding and tricks and lastly the stage coach driving four in hand.

We met and started out for home at about ten-thirty o'clock. We discussed the scenes we had seen and four or five sleepy heads drooped but all said what a lot of work it must have been for those who started it. And to think that one of the most respected and honoured men of our town, Mr. Couse helped establish it in 1917.

Letter from Manitoba

285 Langside St.,
Winnipeg, Man.,
April 20, 1937.

Dear Editor:

I see my last letter is dated Jan. 18. I can hardly believe my eyes, time has passed so quickly and happily. I expect the nice weather had a lot to do with time passing. March was a perfectly wonderful month, for it both came in and went out like a lamb. April has been damp so far; the 12th rained all day; 13th snowed all day; today it is raining and snowing all day.

I told you of my old friend, Mrs. Hinton, being hurt on a street car. She just came out of the hospital on the 10th of April; nearly four months in. She is able to get about with a cane, but she will never be as smart on her feet any more. She is very thankful she can get about at all. At one time it was thought she never would walk again. Her son in Toronto came out to see her. All winter there has been a lot of sickness and a large number of deaths, especially amongst the old.

We have had quite a number of surprises lately. Two weeks ago, when I came in from church, one of our neighbors and a friend of his, from Clanwilliam, had called in to see us. Mr. Harry Madill and his friend, Ben Hopkins. On Monday they came in for dinner, and it was good to hear all about our good neighbors. He said there was very much snow and roads blocked. Just after they left, Mr. and Mrs. Hyndman from Gladstone came in, and the other day Mr. Frank Grice from Carragane, Sask., and his friend, Mr. Hagen, called. So you can see I was kept busy (talking). Our family circle has been enlarged by another grandson and another great-granddaughter. The little son has come to gladden the home of Mr. and Mrs. Bruce Shaver, Bengough, and the little girl came to Mr. and Mrs. Patterson, Winnipeg.

I had the privilege to listen to a blind man, Mr. Kallenback, preach. He told us the story of his life. His parents died when he was quite small and his grandmother raised him. At one time she was wealthy, but she lost most of her money, he said. Sometimes they did not have enough to eat. He would say to his grandma, "You are not eating very much, grandma; are you sick?" She would say, "No, I am not sick." He found out she did not eat so that he might have plenty. When he found that out he made a vow he would earn enough money to give her plenty to eat and to wear. He was clever in school, and soon was earning money and was very athletic. So time went on. When he was twenty-one he went shooting with a friend; a bird flew up between them; his friend shot, and the shot entered his face, lungs and lower bowel. He was taken to hospital and was there two years, and when he knew he would never see again he prayed, 'Oh God let me die, I do not want to live and be blind'—But now he says, 'Oh God I am glad I am blind'. He is thirty-one now. He worked his way through college, and has a splendid record from the colleges. One young woman was a wonderful help to him and not long ago they were married and one evening she was reading to him and all at once she started to cry. He said, whatever has happened? She said, I am blind. The pity of it, he had a doctor and she was under a special eye doctor for some time. Now she can see with one eye. A real life story, and his sermon sank deep into many hearts. More young people have joined the church in the last three months than have done for many years.

Mr. McFarlane, from St. Paul, preached last Sunday. He told us of some of the wonderful work being done in his city the last few months.

Well, parliament has been and is closed for another year, and the work seemed finished in better feelings than usually happens at the end of their term.

Robberies are the highlights at present. Seem to plan and get away with it so easily.

And after nine years the bones of little Julia Johnson have been found in an old boiler.

What saith the Scriptures?

The Lord said: My spirit shall not always strive with man—Gen 6:3

Bowlers Have Big Event

The Oddfellows' Hall was packed to the doors last Thursday night for the Coronation Party held by the Ladies' and Men's Lawn Bowling Clubs. Forty tables of Euchre were engaged. Mr. Hugh Burns, president, took a prominent part in the event and was ably assisted by other members. Mrs Vic Johnston was the high girl for the ladies in euchre and Bill McMillan the high boy. They received nice prizes and were suitably crowned. Prizes were also won by Mrs Archie Price and Mr L Ramsay. Then Mr. E. F. Redick delighted his hearers with a reading which, we would say, was remarkably well rendered. Omar Turney enlarged upon the advantages of being a member of either bowling club. It is $4 for men and $2 for ladies, and just think of the pleasure you would have on the green. The Burns Bros. asssisted wonderfully in the musical line. A vote of thanks was tendered to the ladies for a nice lunch and to Mr. Burns and his boys for their help. Then there was some community singing with Mr Heck Graydon at the piano. Mr. Burns handed out more prizes. Six people found "13" pasted on the bottom of their chairs, and six people got a prize. Every chair was turned up to look for the lucky 13. All who did not get a prize paper bag were called to the platform and received a nice little gift. We believe some of the prizes were donated by local citizens.

Mrs. Wm Couse, a past president was then presented with a lovely gift by Mrs. Geo. Jourdan, on behalf of the Lady Bowlers, in recognition of her visit to the Coronation. Mrs Couse made a very graceful reply and thanked the ladies for their kindness. She stated that Streetsville had the first Ladies Bowling Club in Canada

Mrs. R. H. Greig won an electric toaster, and bashful Ted Cook was presented with a beautiful doll to adorn his dresser.

Lorimer Watson won a nice pair of scissors—and if you didn't win anything, you will just have to go to the next Bowlers' party and try again.

Then big carboard boxes were opened and dozens of horns were given away. Those who did not get a horn were given a kazoo—and did the audience make a noise— we say they did!

People were present from many parts of the County—and Gordon Graydon M.P. came all theway from Ottawa so he wouldn't miss it.

The party was a glorious success and the Bowlers are to be heartily congratulated upon their efforts to please their patrons

It was the best evening we have seen in Streetsville in a long time and everybody will be waiting for a repeater.

The National Anthem closed this successful event.

Local Items

Bernard Pope was taken to a Toronto hospital for treatment this week

Mr. Thos. Learmont has returned to Streetsville after a very pleasant sojourn in Florida

Streetsville merchants will start the first Wednesday in May to take their weekly half holiday

Special Coronation Service in St Andrew's Presbyterian Church, here Sunday afternoon, May 9th, at three o'clock D.S.T.

Mr. and Mrs. J.C. Shearer, and daughter, from Kemptville, visited with Mr. and Mrs. C. G. Quennell this week

Probabilties: Next week will come in quite cool, but weather will be warmer by the end of the week. You may look for thunderstorms about May 10, 11 and 12.

A new adjustable Oak Pulpit and Communion Table will be dedicated on Sunday, May 2nd, in Meadowvale United Church, by Rev. G. Murray Chidley. This was a legacy left by the late Miss Lucy Kerney

The next issue of The Review is to be our Coronation Number—one whole page —on the inside—will be given to a profusely illustrated story of the Crowning of King George VI. Be sure to read it. It will be well worth keeping for reference.

Wor. Bro. H. W. Hope, W. M and a number of officers and members of Streetsville Masonic Lodge visited Humber Lodge Weston last Friday night, also Kingsway Lodge Toronto, Monday night, Then on Sunday afternoon they attended the annual service of Mississauga Lodge Port Credit.

Mr. Timothy Shawcross, Toronto, a former resident of Streetsville, who has spent the winter with his daughter, Mrs. John Howard, in Toronto celebrated his ninetieth birthday a short time ago. He went for a walk recently, fell and broke and dislocated his right shoulder. He was taken to a hospital, where the shoulder was set. He is now confined to bed.

United Church

The Womens Association of the Streetsville United Church intend holding a Coronation Evening on Thursday May 6th. Please reserve the date.

Donald Wins Gold Medal

At the Peel Music Festival on Saturday, Donald MacArthur, aged 10, a pupil of Miss Hicks, Streetsville won the gold medal in piano. There were 20 contestants in this under-twelve class. Miss Hicks is to be congratulated on the high standing of all her pupils.

For Combined School

Another joint meeting of the High and Public School Boards was held Tuesday night at the Public School. Three members of the P. S. B. and six of the High were present. Rev. Mr. Fraser was chairman. Some progress was made. It was decided to build a combined school. Messrs A. E. Graydon and C. G. Quennell were appointed to interview David Wilson, County Clerk, about grants and to visit other schools to get ideas. Another meeting will be held next Monday night to hear the committee report—and other business

Hannah Devine

Miss Hannah (Courtenay) Devine passed away at the House of Providence, Toronto, on April 26th. The funeral took place this Thursday morning, with Mass at St. Joseph's R.C. Church and interment in St Joseph's cemetery. Deceased spent most of her life on the Devine farm Town Line, Trafalgar, two miles west of Streetsville and was quite a familiar figure on our streets

Mr. and Mrs. T.W. Beamish, the Kingsway, Toronto, visited with Mr. and Mrs. W. F. B. Switzer this week.

Two Bring Honors to Streetsville Pub. School

Brenda Redick and Donny Mac Arthur, were successful in winning a gold and silver medal at the Peel Music Festival at Port Credit last week. Donny won gold medal for piano and Brenda silver medal for reading. Two years ago Brenda won the gold medal and this year out of 35 got second marks of 84(the winner 86). Congratulations.

YOUR OLD SEED DRILL WILL SOW FERTILIZER TOO!

WITH A PRESTON FERTILATOR

Modernize your old seed drill and save money. Merely by attaching an efficient Preston Fertilator—you can make it a combination seed and fertilizer drill. The Fertilator is all steel, and can be attached easily to standard makes of seed drills. It sows any grade of fertilizer, is positive in action, and places the fertilizer down the spouts *with the grain!* Write for complete details.

THE JAMESWAY OIL-BURNING BROODER

Reliable, economical, well-made. It's Jamesway all through. The Jamesway Oil Burning Brooder will save you money and time, gives you stronger, healthier chicks.

NOTICE

Due to the fact that this whole page, next week, will be devoted entirely to the Coronation, we are including next week's Sunday School Lesson in this issue.

SUNDAY SCHOOL LESSON

LESSON V.—May 2
ABRAHAM A MAN OF FAITH
(Genesis 11: 27—29; 18.)
Printed Text—Genesis 12: 1—9; 13: 14—18.
GOLDEN TEXT—By faith Abraham, when he was called, obeyed to go out unto a place which he was to receive for an inheritance. Hebrews 11: 8.

The Lesson In Its Setting

Time—Abraham was born B.C. 2003 and reached Canaan about B.C. 1928. He separated from Lot four years later and rescued Lot B.C. 1921. Sodom was destroyed B.C. 1904.

Place—Tht City of Ur was in southern Chaldea. Haran was in Mesopotamia; Shechem in central Palestine; Sodom at the northern end of the Dead Sea; the plain of Mamre, which is Hebron, is located twenty miles south of Jerusalem. Gerar was nine miles southwest of Gaza.

"Now Jehovah said unto Abram"—The name "Abram" means "high father." Later in the narrative we shall find the name changed to Abraham (17: 4, 5). "Get thee out of thy country, and from thy kindred, and from thy father's house, unto the land that I will show thee." This is undoubtedly the second call in Abram's life. The first one he had only partially obeyed (Acts 7: 2—4). God knew that Abram had come to an hour when he was ready to more fully obey God's commands. God never tells us to give up anything that is dear to us unless, at the same time, he gives us a promise of something even more precious that he will bestow upon us. (See Phil. 3: 4—14).

"And I will make of thee a great nation"—The Jews have been a great nation numerically, and are greater today than probably ever before. They have been great in commercial life; they have been greater in arts and sciences, but they have been supremely great in their spiritual influence, in giving us the Holy Scriptures, and the Son of God. "And I will bless thee, and make thy name great; and be thou a blessing." Abraham was blessed in being the father of the Hebrew people, in the privilege of walking with God, in receiving mighty promises from God, in being the father of the faithful; throughout all the ages he has been honored by Jew and Gentile, by Christians and Mohammedans. His place in Christian truth may be judged by the fact that he is mentioned more than seventy times in the New Testament.

"And I will bless them that bless thee, and him that curseth thee will I curse: and in thee shall all the families of the earth be blessed."—(See Zech. 14: 16—19):— Abraham bestowed a blessing upon the world in being the first great character of the true God. Through him came that whole race of people who have so mightily blessed humanity by their Scriptures; through him came the Lord Jesus Christ.

"So Abraham went, as Jehovah had spoken unto him; and Lot went with him: and Abram was seventy and five years old when he departed out of Haran. And Abram took Sarai his wife, and Lot his brother's son, and all their substance that they had gathered, and the souls that they had gotten in Haran; and they went forth to go into the land of Canaan; and into the land of Canaan they came." Canaan is supposed to mean "merchant." See, e.g., Isa. 23: 11, the margin.

"And Abram passed through the land unto the place of Shechem." — This is the place where Abram first erected an altar. Shechem lay in the pass which cuts through mounts Ephraim, Ebal, and Gerizim, about twenty-five miles directly north of Jerusalem, in a valley which A. P. Stanley has called "the most beautiful, perhaps it might be said, the only very beautiful spot, in central Palestine."

"Unto the oak of Moreh. Moreh refers to the owner of the oak grove. "And the Canaanite was then in the land. This simply implies that the land was not open for Abram to enter upon immediate possession of it without challenge. It also intimates or admits of the supposition that there had been previous inhabitants who may have been subjugated by the invading Canaanites.

"And Jehovah appeared unto Abram, and said, Unto thy seed will I give this land: and there builded he an altar unto Jehovah, who appeared unto him."— Here, for the first time, occurs a phrase that is to have such great significance throughout the Old and New Testaments. 'the Lord appeared.' How he actually appeared to Abram we are not told, and it is vain for us to speculate. We can be confident that God appeared in such a way that Abram knew that it was God who was speaking with him. Though the promise of the land was given to Abram, he himself never possessed Canaan: this was left for his seed, to follow some hundreds of years later (see Acts 7: 5).

"And he removed from thence unto the mountain on the east of Bethel, and pitched his tent, having Bethel on the west, and Ai on the east: and there he builded an altar unto Jehovah, and called upon the name of Jehovah. And Abram journeyed, going on still toward the South." —Bethel means 'the house of God,' and is to be identified with the modern town Beitin. It played a most important part in the life of Abram's grandson, Jacob (Gen. 28: 11). Why Abram continued to move southward we are not told: probably God would have him traverse the entire land which he had promised as a possession for his descendants.

"And Jehovah said unto Abram, after that Lot was separated from him, Lift up now thine eyes, and look from the place where thou art, northward and southward and eastward and westward. For all the land which thou seest, to thee will I give it, and to thy seed for ever."—This is the second promise Abraham has been given regarding the ultimate possession of Canaan, only this time the promise has a greater sweep, and its eternal aspect here first appears. God does not tease us by giving our souls visions of ultimate accomplishments, desires for service, but he leads us, and schools us, and equips us for the attainment of that which he has unveiled to our souls; one vision to one and another to another.

"And I will make thy seed as the dust of the earth: so that if a man can number the dust of the earth, then may thy seed also be numbered"—For a fulfillment of this promise see Num. 23: 10; Duet. 1: 10; 10: 22; 28: 62. In Gen. 15: 5, Abraham is promised a seed as numerous as the stars of the heaven, and it has been suggested that the promise that his seed should be as the dust of the earth refers to his posterity according to the flesh, and the promise that his seed should be as numerous as the stars of the heaven, refers to his seed according to the Spirit, Gal. 3: 29; Heb. 2: 16).

"Arise, walk through the land in the length of it and in the breadth of it; for unto thee will I give it. And Abram moved his tent, and came and dwelt by the oaks of Mamre, which are in Hebron, and built there an altar unto Jehovah."—Acting immediately, as the heavenly voice directed, Abram moved his tents to the plain of Mamre, who later became his friend and ally (14: 13, 24), near Hebron, twenty-two miles south of Jerusalem, on the way to Beersheba, a town of great antiquity. Here he built an altar to God. It is not said anywhere that Lot ever built an altar to God. Erecting an altar for the worship of Jehovah in every place where Abram journeyed may be compared to Christian people immediately seeking a church home when they move to a new city; or a travelling man attending divine service every Lord's Day no matter how far from home he might be; or Christian people not allowing themselves, in strange cities, and when living in hotels, to fall asleep at night without hearing the voice of God from the pages of Holy Scripture.

LESSON VI.—May 9.
ABRAHAM A MAN OF PRAYER
(Chapter 18.)
Printed Text Genesis 18: 17—32.
GOLDEN TEXT— The supplication of a righteous man availeth much in its working. James 5: 16.

The Lesson In Its Setting

Time—Abraham's intercession for Sodom occurred B.C. 1904.

Place—Hebron, about twenty miles south of Jerusalem.

"And Jehovah said, Shall I hide from Abraham that which I do; Seeing that Abraham shall surely become a great and mighty nation, and all the nations of the earth shall be blessed in him?"—God always knows what he is going to do in every circumstance concerning every individual and every nation. Some of these purposes he has revealed to us in his Holy Word, indeed thousands of them. Often by prayer and abiding in the will of God we come to know God's specific purposes for us at specific times, as we face certain circumstances. Our knowledge of what God will do strengthens us, encourages us to greater fervency in Christian work, delivers us from fear, and creates in us a hope that nothing can ever take away.

"For I have known him, to the end that he may command his children and his household after him, that they may keep the way of Jehovah, to do righteousness and justice; to the end that Jehovah may bring upon Abraham that which he hath spoken of him."—As it was only by obedience and righteousness that Abraham and his seed were to continue in God's favor, it was fair that they should be encouraged to do so by seeing the fruits of unrighteousness. So that as the Dead Sea lay throughout their whole history on their borders, reminding them of the wages of sin, they might never fail rightly to interpret its meaning and in every great catastrophe read the lesson, 'Except ye repent, ye shall all likewise perish.' They could never attribute to chance this predicted judgment.

"And Jehovah said, Because the cry of Sodom and Gomorrah is great, and because their sin is very grievous; I will go down now, and see whether they have done altogether according to the cry of it, which is come unto me; and if not, I will know."—There, far down the valley, lay the guilty cities, still and peaceful. No sound travelled to the patriarch's ears. Quiet though Sodom seemed in the far distance, and in the hush of the closing day; yet to God there was a cry, the cry of the maiden, the wife, and the child. These were the cries which had entered into the ears of the Lord God. Each sin has a cry. 'The voice of thy brother's blood crieth unto me.' We must not conclude from the phraseology of these two verses that God did not know the actual condition in Sodom prevailing at this time: such expressions as we have here are used to indicate God's absolute justice in all his decisions, and to inform us that God never punishes any being or any community in wrath, but that he is fully justified in so doing.

Gen. 18: 22—23. "And the men turned from thence, and went toward Sodom: but Abraham stood yet before Jehovah. And Abraham drew near, and said, Wilt thou consume the righteous with the wicked? Peradventure there are fifty righteous within the city: wilt thou consume and not spare the place for the fifty righteous that are therein? That be far from thee to do after this manner, to slay the righteous with the wicked, that so the righteous should be as the wicked; that be far from thee: shall not the Judge of all the earth do right?"—This prayer of Abraham's arose from Abraham's knowledge of Gods purposes towards Sodom, and from Abraham's own love for Lot, and his feeling of deep responsibility for the son of his deceased brother, with whom for so many years he had lived and labored. Furthermore, Abraham knew God. He had absolute confidence in God as one who heard prayer, who always acted reasonably and justly, and to whom he could fervently pour out his heart's desires.

"And Jehovah said, If I find in Sodom fifty righteous within the city, then I will spare all the place for their sake."— God accepted the test proposed by Abraham, though not necessarily thereby acquiescing in the absolute soundness of his logic; God said he would spare Sodom if fifty righteous could be found, not as an act of judgment, but as an exercise of mercy, because of the claims upon his mercy which grace admits the righteous to prefer.

"And Abraham answered and said, Behold now, I have taken upon me to speak unto the Lord, who am but dust and ashes. Peradventure there shall lack five of the fifty righteous: wilt thou destroy all the city for lack of five. And he said, I will not destroy it, if I find there forty and five." — Abraham must have known the city of Sodom intimately, and he probably was convinced in his own heart that fifty righteous could not be found within the circumference of that city. He himself certainly never heard of fifty righteous men being there. Yet his heart is moved with pity for his own flesh and blood, who certainly would be destroyed in such a judgment as is about to descend upon this city. Accordingly, he asks God if he would not spare the city if only forty-five righteous could be found, and God answered his second petition as he had answered the first. It should be noticed that, in this second petition, Abraham appears even in deeper humility than in the first peition, as though he had no right to ask God anything, being but dust and ashes himself—he is dust at first and ashes at last.

"And he spake unto him again, and said, Peradventure there shall be forty found there. And he said, I will not do it for the forty's sake. And he said, Oh let not the Lord be angry, and I will speak: peradventure there shall thirty be found there. And he said, I will not do it, if I find thirty there."—Twice again, continually reducing the number of those who, if found, would lead God to spare the city, does Abraham approach God on behalf of a doomed community. Here is true persistence in prayer, not letting go of God until our whole heart has been poured out before him, pleading with his as a man would plead with a friend. How wonderful for a mere creature to be on such terms with God as Abraham is here revealed to have been, and yet every Christian believer in Jesus Christ has an even greater right to exercise in entering 'into the holy place by the blood of Jesus, by the way which he dedicated for us.' (Heb. 10: 19, 20).

"And he said, Behold now, I have taken upon me to speak unto the Lord: peradventure there shall be twenty found there. And he said, I will not destroy it for the twenty's sake. And he said, Oh let not the Lord be angry, and I will speak yet but this once: peradventure ten shall be found. And he said, I will not destroy it for the ten's sake."—Twice again, still clinging to God for Sodom, does Abraham plead that God might not destroy this wicked city, once asking that it might be preserved if only twenty righteous should be found, and, finally asking if God would preserve it if only ten righteous should be found. And both times God answered Abraham in the affirmative. We are not told that God demanded that Abraham cease his intercession for Sodom: we may assume that Abraham simply thought he dared not ask God for more than he had already requested, and that to do so would be to presume upon the mercy of Jehovah. Abraham "felt that he had reached the limit of that liberty which God accords the believing suppliants at his throne."

Movie-radio gossip

By DOROTHY

As a fitting salute to Spring, Warner Brothers have released "The King and the Chorus Girl," and United Artists have put out "History Is Made at Night." They are both giddy and romantic and have set everyone to arguing over who is the greater matinee idol, Fernand Gravet or Charles Boyer. They are both grand romantic heroes. 'The King and the Chorus Girl," is something of a nine day wonder because it is a Warner Brothers musical without a big production number to interrupt the gaiety. And "History Is Made at Night," is completely baffling because it mixes spectacular scenes and grim tragedy with farcical situations.

Talent scouts from the motion-picture studios are suspected of doing their hunting nowadays in nurseries, for suddenly all of Hollywood is in a dither over the child prodigies. If you did hear Betty Jaynes, the fifteen-year-old opera star on Bing Crosby's program a few weeks ago, just before she started work for Metro-Goldwyn-Mayer, you may have marveled at her talent. She is practically middle aged, compared to their newest discovery, for the new contract player is Suzanne Larson, aged ten, who will be featured in a musical "B Above High C," which gives you an idea of her voice range.

Bing Crosby

ODDS AND ENDS — Freddie Bartholomew stayed up past his bedtime to see the preview of "Captain Courageous," the screen version of Kipling's immortal novel and the lad's greatest picture since coming to Hollywood. — Franchot Tone recently celebrated his birthday with a party at a popular Hollywood night club. — In her current picture, "When Love Is Young," Virgina Bruce wears a dress that required 310 yards of material. — "Anthony Adverse" got a cool reception when it was given its premiere in Paris recently. The Parisians were not at all pleased with the way Napoleon was presented in the picture. — While Gloria Swanson's return to the films has hit a temporary snag, those in the know say all the present difficulties will soon be ironed out — Deanna Durbin is about the busiest young lady in Hollywood. Just as soon as she completes "One Hundred Men and a Girl," she will go into production on ano her picture.

Things Every College Girl Ought to Know

ST. LOUIS—Walter B. Pitkin, author and member of the faculty of Columbia University, asserted in an address here "we aren't properly preparing people for life when a girl leaves college with so little practical knowledge she goes out and electrocutes herself with a curling iron by making an improper electrical connection."

Farm Problems

Conducted by
PROFESSOR HENRY C. BELL
with the co-operation of the various departments of Ontario Agricultural College

QUESTION: "Regarding fertilizers, what conditions call for a 20% phosphate? I was wondering if it was the price that was in its favor. We would like to sow grain again on land which had grain last year. Last year's dry spell has thrown our rotation out of order. Our land is sandy and gravel loam. Would you recommend sowing 20% phosphate alone? How would it be in conjunction with a light coat of manure, or would you recommend one of the regular fertilizers?" — J. R., Wentworth County.

ANSWER: You say that you would like to sow grain again on land which had grain last year. You also say that the land is sandy and gravelly loam. Chances are the level of available Nitrogen, Phosphoric Acid and Potash will be fairly low in this soil for this year's crop. If you can spare it, a light coating of manure, I believe it would be good. In addition, I would recommend that you apply 250 lbs. per acre of 2-12-6 or 2-12-10 fertilizer. I would prefer the latter although it would cost a little more.

2-12-10 has given excellent results in our demonstration tests over the province, giving increases of 10 to 15 bushels per acre over unfertilized. 2-12-10 fertilizer at the rate I mentioned will cost you approximately $3.30 and 2-12-6 will cost $3.00 per acre. 20% Superphosphate would cost you $2.50 per acre, but it will not add anything but Phosphoric Acid. This is the kind of plantfood which hastens ripening. 2-12-6 will add Nitrogen which gives straw growth and Potash which promotes the filling and healthiness of the crop. In our demonstration tests, we have found that both Nitrogen and Potash pay well under conditions which you mention, especially if you are seeding down with alfalfa or grass mixture. Best application of this fertilizer of course, is through the fertilizer section of the combined fertilizer and grain drill. The analysis of the soil would of course help us in reaching definite knowledge of the fertility levels of your soil, but since you say it was in grain last year, and since it is sandy a gravelly loam soil, I believe you would be safe in following the suggestion that I have given.

Set To Fight at Drop

Woe betide the intrepid raindrop that should venture beneath the umbrella sheltering this English bulldog, truculent entry in Melbourne show.

Target of Dynamiters

Lawrence Dwyer, 72-year-old United Mine Workers organizer, telling Senate Civil Liberties Committee in Washington of attacks made on him in Harlan County. Three Kentucky mountaineers told of dynamite attempt.

300,000 People Now Living Will Be Murdered

Although dimly aware of the facts before, because of its mathematical definiteness, we find something sharply arresting in the statement of a Department of Justice official that 300,000 persons now living in this country will some day be murdered, comments the Detroit News.

This means that, in spite of all the education, the moral and religious training, the attempts to improve those social conditions which may incite to violence, and the likelihood of punishment for murderous acts, one out of every 400 of us is almost certain to be shot, stabbed, poisoned, choked or blackjacked, and that approximately another one of each 400 is destined to be the instrument of our unexpected and unpleasant demise.

Besides provoking a shudder at the thought of our own danger when walking home in the dark, these figures should inspire some very sober thought. Just what stage of growth and evolution have human beings reached? Evidently it is a discouragingly low one.

We talk much of prosperity, of liberty, of culture, and so on, but it appears that there are deeper problems to be met than these about which we daily raise such argumentative hullabaloo. What of the fundamental ethical sense which is supposed to be an attribute of civilized man? That also is sadly lacking.

In a part of our work for the elevation of the race we must still go back to the elementary stages and strive to make ourselves just simply moral. Many of us, it seems, are only emerging from savagery, if not from unbridled animalism, and have a long climb ahead before we can properly be called civilized men.

Insuance Ethics

The London Spectator comments. Some of the Coronation insurances raise ethical rather than legal problems. That interested parties, notably persons or institutions with seats to let, should have taken out policies against loss incurred by any postponement of the Coronation is natural enough.

But the policies are not all of a standard type. Some were so drawn as to involve the underwriters in the payment of a specified sum " if the Coronation of King Edward VIII does not take place on May 12th, 1937."—or words to that effect.

The language appears to have been a mere matter of form. No one, that is to say, was intentionally making provision for the possibility that King Edward might not be crowned on May 12th, but another King might. And there is obviously no fear that seats will be left empty because the central figure is to be King George. But claims have been made under the Edward VIII policies — and paid.

One of the great hospitals, I believe, has so benefited, and it may possibly be argued that a hospital is justified in raising funds by any legitimate expedient. But is, for example, a West End club? The question has arisen in connection with at least one of them, and the committee is, or was, divided. But the principle seems clear—no loss, no idemnification.

Chief of Staff

Commissioner John McMillan, chief of the Salvation Army in Canada, has been appointed chief of staff of the organization, second only to General Evangeline Booth.

FORMER CRIPPLE NOW PLAYS TENNIS

Rheumatism in Feet Relieved

Here is a story of a young man who had almost given up hope of taking part in active sports with his fellows again. He tells how he tried one remedy after another and how finally a former sufferer put him on the way to recovery:—

"Two years ago I started with pains in the feet which gradually got worse. I tried 'everything under the sun' but to no effect. Whilst waiting for treatment one evening, another patient advised me to try Kruschen Salts. That was twelve months ago; the relief was not sudden, but the pain and swelling gradually left my feet, and in six months I amazed my friends by taking long walks into the country. This year I have played a good deal of tennis, a thing which I had begun to think I should never do again."—C.W.

Rheumatic pain and swelling is frequently caused by excess uric acid accumulating in the body. Kruschen contains two ingredients which are notable for their work in dissolving uric acid deposits. Other ingredients in Kruschen assist the internal organs to expel this dissolved acid from the system.

Discovery Made In Purifying Food

Pulverized Carbon Attracts Unwanted Tastes and Odors

CHAPEL HILL, N.C. — The gas masks of wartime have resulted in the discovery of a "magnet" that extracts the bad tastes and flavors and unwanted odors from food and drink.

The taste magnet, described to the American Chemical Society to-day by John W. Hassler of the West Virginia Pulp and Paper Co.(Tyrone, Pa., uses the same kind of carbon as gas masks

The carbon is "activated", that is it is given an unusual power of attraction. This is done by pulverizing the black material into particles so fine that the carbon is virtually all surface. In that condition it acquires the electrical forces common to the carbon atoms that form one of the basic substances of all the living world.

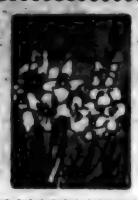
Use of the taste magnet is limited to food which can be temporarily reduced to a liquid or a gas during the treatment. It is also limited to the tastes and odors due to impurities.

"For example," said Hassler, "it is not possible to make quinine less bitter by treatment with activated carbon, because bitterness is a physiochemical property of quinine. However, if a liquid happens to contain quinine, then activated carbon will remove the bitter taste by actually absorbing the quinine and removing it from the solution."

He said that the carbon magnet takes unwanted flavors out of sorghum, cane and corn syrups, pineapple juice, vinegar and various drugs. It is particularly good, for cleaning up alcoholic liquors, wines, glycerines and water.

It has worked out well on lard and sugar. In the case of gelatin, the carbon removes virtually all traces of animal odors.

Wart Cure Given



A method of absorbing warts, which he said may be of use in some cancerous or pre-cancerous skin conditions, was reported by John R. Caldwell of Ohio State University, now with the Tennessee Eastman Corporation.

The water is first treated like the proverbial boy who swelled up because he drank water after over-eating dry apples. Sodium hydroxide is place on the wart, which thereupon fills itself full of water and becomes abnormally swollen.

"If," said Dr. Caldwell, "a wart swollen by the action of sodium hydroxide is immediately treated with diluted alcoholic hydrochloride acid, the proteins in the wart are coagulated. A portion of the wart comes off after a day or two. By repeating the process at suitable intervals the wart may usually be removed painlessly and with very little scar."

Some of the troubles of hay fever sufferers who fail to get relief from proteins whose injection is intended to immunize them, can be avoided by a discovery reported by five New Yorkers.

There has been trouble, they said, because proteins sometimes deteriorated after preparation. They found the enzymes always present with the proteins are responsible. The scientists kill the enzymes by heat or formaldehyde, and report that this in all cases leaves the hay fever proteins unchanged.

GARDENING

By GORDON L. SMITH

It is a good plan to use started annual flowers plants secured from any seed store, greenhouse or florist for planting among tulips and others of the Spring flowering bulbs which will be past their best in a few more weeks as these hide the dying foliage. Then again, quick-growing annuals will always be useful for filling in any blind spots in the perennial beds where Winter has been unusually severe.

AND PERENNIALS TOO

It is not too late in most parts of Canada to order and plant perennial flowers and even shrubs and vines. Often towards the end of the season prices are lower and while the selection is not as wide as earlier, there should be a good choice.

THE NEW LAWN

Unless the ground was thoroughly cultivated and then allowed to lie idle the year before the lawn was sown there is bound to be a good deal of weed seed in the soil, and some of this will germinate after the lawn is sown. Such weeds should be removed constantly, especially in the earlier stages. A good lawn fertiller every year will push the grass along sufficiently to choke out most of these offenders. The first cutting of the grass in the spring is made with a very sharp mower to avoid pulling out plants when the ground is soft. Frequent rolling is also advised at this time.

For permanent lawns of deep green colour and fine texture, good quality package seed is advisable.

KITCHEN GARDENS

It is advisable of course, to keep a plentiful supply of salad material like leaf and head lettuce, onions and possibly celery in the kitchen garden. The latter is set out in the garden as well started plants usually after all danger of frost is over. For Fall storage, planting takes place in June or even July.

HAVE YOU HEARD

Many a child gets a whipping because he took after his father.

The young salesman, travelling for the first time in the backwoods section of the country, came down to the proprietor of a country hotel, after a wakeful night, with a complaint.

Young Salesman — "I saw two rats fighting in my room last night."

Landlord — Well! what do you expect for a dollar — a bull fight?"

Love and a budget are the two most important factors in a successful marriage, says one well-known woman. In other words, the mating and the estimating.

A few fellows have been conducting a sit-down strike for years. They are not asking to be unionized. They have just been striking against all labor in general.

It is good to dream — it is far better to dream and then work to turn your dreams into realities. Faith is mighty, we are told — but faith plus action is irresistible — Desire must be backed by the sterner virtues before achievement is possible.

Fond Mother (as her son was starting off to join the navy) — "Now my son, remember to be very punctual in rising every morning, so you will not keep the captain waiting breakfast for you."

Experience teaches many things we would rather not know.

Rastus — "What do you think of my new gal, Sambo?"

Sambo — Dat girl's all right, sho' nuff, but her figger jes' don't rhyme, dat's all.

Someone said an old maid is like an electric bulb without the current on.

Teacher (in geography class) — Now can anyone tell me where we find mangoes?"

Knowing Little Boy — "Yes, miss, wherever women goes."

Hard work and no play may create a dull boy but, very likely he will have some money in the bank.

Wife — "The paper says the man was shot by his wife at very close range.

Husband — "Then there must have been powder marks on the body."

Wife — "Yes, that's why she sot him."

The man afraid of his fingers never drives many nails.

Jeweller — "Did your watch stop when you dropped it?"

Customer — "Well, it didn't go all the way through the floor."

A man's first attempt to hold a girl on his knee might be called a trial balance.

Tourist — "The climate here is salubrious, isn't it?"

Native — "Say, friend, just write that word down for me, will you? I get tired of swearing at this climate in the same old way. That's a new one."

It is a great deal easier to talk ourselves into trouble than out of it.

First Glue Factory Employee (emerging from factory) — "What is that funny smell?"

Second Glue Factory Employee — "It's the fresh air."

Thinking to stop would prevent a lot of stopping to think.

Patient — "Nurse! Nurse! I believe my breath is getting shorter!"

Nurse — "Just take things easy, the doctor will soon put a stop to that."

The colder you treat some people the hotter it makes them.

He Didn't Want This Printed

There are people who are anxious to have something put in the paper. There are others who take exactly the opposite attitude, and this article has to do with one of the latter. At the risk of trouble later on we begin by giving the man's name—W. R. Parker; he is in the Customs Office and resides at 522 Charlotte Street. That, we believe, identifies him so there can be no error.

Mr. Parker plants bulbs and he does it so carefully and thoroughly that they seldom fail to grow and bloom. When they come to the stage of blooming they seem to enjoy it so thoroughly they bloom for a long time. His daffodils look like young sunflowers, and he grows tulips and hyacinths. He searches for the fertilizer he wants; he cuts and prepares the earth he prefers, and in the Fall he spends entire evenings working with his bulbs. During the Winter he keeps them in pots, cool and dark and moist, and insists they get well rooted before bringing them to the light. This year he had in all 225 pots filled with flowering bulbs.

We do not believe Mr. Parker will object to anything which has been so far written, but we must continue to the point where he insists that nothing be printed. He does not sell his flowers, but gives them all away — and he has been doing that for 17 years.

The Examiner first heard of it from a man outside the city who was in hospital here. He knew no person and found the days rather long until Mr. Parker arrived with a pot of flowers. How many sick folk and shut-in people have been treated similarly during all these 17 years we do not know, but the number would find totality only in a long and impressive list.

The idea seemed to be so entirely wholesome that the Examiner felt it was right that Mr. Parker's request that nothing be said about it should be put to one side for the moment. Living as we are, in an age when a good many folk are given to thinking of themselves it seemed right and just that the devotion of an ideal which Mr. Parker has held for 17 years (and perhaps longer) should be brought out in the open. So there it is and we believe our readers will agree that our judgment in this case was correct.—The Peterborough Examiner.

Issue No. 18—'37

Holstein Sales In Canada at New High

That live stock conditions throughout Canada are showing marked improvement, particularly in the movement of pure bred cattle is evidenced by the sharp increase in revenue as shown by the quarterly statement by George M. Clemons, Secretary-Treasurer of the Holstein-Friesian Association of Canada.

From the latest figures, recorded sales of this breed for the first quarter of the current year have reached a new all-time high of 5,725, a gain of 31.9% over sales for the corresponding period of 1936.

Export trade in breeding animals, which is chiefly with the U.S.A., shows a 47% increase over January, February and March of 1936 — this being the highest 3-month period in the history of the Association.

Registration total 10,293, a gain of 18.7% in the number of animals recorded; while Association receipts, derived from registrations, transfers and memberships, are up 13.7%.

Forest Tree Breeding

The tree planter is beginning now to pay more attention to the pedigree of his stock. Much of the bad plantations that we have are due to the fact that we have been planting trees of the wrong kind or "race." There are quite obviously trees of bad form and trees of good form, in any forest, and the trees of bad form have been found to remain trees of bad form no matter how carefully they are tended and managed.

Goldfish Require Still Water to Swim Around In

KETCHIKAN, Alaska —Even fish get seasick, and sometimes the malady is fatal. Passengers and crew of the coast guard cutter Cyane testified upon arrival two goldfish died and others became ill en route. Not until they were taken from their glass bowl and placed in a pail suspended from the beams did the other fish recuperate.

Benny Eats Old Cars

Just now junk has a new status in the world and now we shall know what to do with our old automobiles. The piles of ungainly, rusty car parts and bodies have been eyesores in many cities in the past few years. If they can be removed by the mere demand for scrap iron the civic outlook and community pride will be inspired.

If we lived in Buffalo, N.Y., we could attend quite decent obsequies of our faithful old cars and see how machinery deals with junk in the mass. The trouble with old automobiles has been the great loss if the car bodies were pitched into a crucible porcess or furnace for reconditioning. Buffalo has a giant auto-smashing machine, quaintly called "Big Benny." It saves the loss. It crushes old car bodies and bundles them into neat packages to cast into the steel furnaces to reduce more profitably.

This powerful auto-cruncher wolfs down 30 car bodies in an hour. The operator pushes a button, a magnetic crane lifts a car body, stripped of glass, wood, engine, wheels, chassis, and dumps it into a pit.

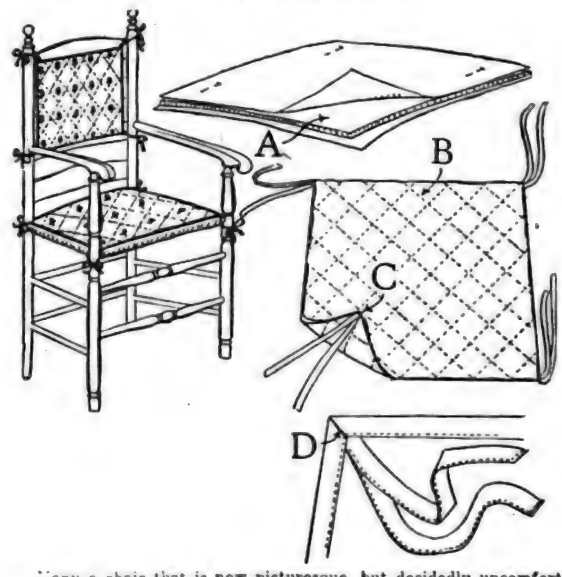
"Benny" grinds his teeth and the sides of the pit come together. Under terrific pressure, a heavy ram moves forward against the rasping metal. "Benny" backs off, and the once sleek auto comes out of the pit squeezed into a lump of metal about the size of an orange crate. The ponderous mechanical monster also relishes bed springs, oil barrels, old wastepaper baskets or any sheet steel graded as No. 2 heavy melt.

Green England

The returning traveller from any extra-European zone must rejoice in the exceeding greenness of England. There is no evergreen that can compare with grass. What immense areas in other lands are surfaced with sand, rubble, rock and scrub. What grass there is often enough resembles the starved stuff described by Robert Browning in "Childe Roland to the Dark Tower Came." It may be daintily starred with dwarf flowers, like a quaint golf course by the old Dutch settlement of Swellendam in Cape Colony; but the greens which demand real grass have to be made of grit.

How pleasantly the grass in most English fields north of Southampton, as elsewhere, snuggles up to the hedgerows. We are forced as agricultural theorists to condemn grass as the thinnest, the least intensive form of cultivation, yet what natural wealth is in it! It is a widow's cruse, it stores wealth; and while the capital increases, the dividends, if small, are never intermittent.

It is a free gift. What pleasant treading as well as feeding for stock; and Bottom, a true Englishman, though temporarily an ass, was right enough in his panegyric: "Good hay, sweet hay hath no fellow"; and in the newest form of haymaking the trussed hay remains as green as the growing crop. Yet the greatest of all gifts given by the grass field and common is to the eyes. While grass grows the inhabitants of this island will live in a green, and therefore pleasant land.—London Spectator.



Difficult English

The nine words below are considered the most difficult in the English language:

1. Honorificabilitudinitatibus.
2. Transubstantiationalists.
3. Inanthropomorphisability.
4. Disproportionablenesses.
5. Interconvertibilities.
6. Histomorphologically.
7. Interdifferentiation.
8. Supersensitivenesses.
9. Hypersensitivenesses.

QUILTED CHAIR PADS LEND A QUAINT TOUCH

By RUTH WYETH SPEARS

Many a chair that is now picturesque, but decidedly uncomfortable, might gain both in comfort and quaintness with the addition of quilted chair pads. Our great grandmothers used such pads on ladder-back chairs, and chose the gayest of chintzes both glazed and unglazed for them.

Today we can use duplicates of those fine old chintz patterns, and what charm they add to our room color schemes! Even the old quilt block designs of colonial days, with all their gay calico patterns, are reproduced in chintz now. You might like to use one of these for your chair pads, and if you do I suggest that you let your quilting follow the outline of the quilt block pattern in the chintz instead of using the diagonal quilting shown in this sketch.

You will find that in making such small things as chair pads the quilting may be done very efficiently on the sewing machine. Few people have time to do hand quilting any more, and decorators are using machine quilting for many purposes.

The pads shown here are made with one layer of sheet wadding between two layers of chintz. The edge bindings and ties are made of bias tape. Cut the three layers of the pad material exactly the size and shape you want them to be when finished. Place the sheet wadding between the two layers of chintz, as shown here at A. Either pin or baste in this position and then quilt as shown at B. Make the ties by stitching the lengthwise edges of the tape together and then tack the ties to the corners of the pad before it is bound, as shown hre at C. Now, bind the edges of the pad as at D, sewing the ties right in with the binding.

NOTE:—Mrs. Spears' new 48-page book of illustrations and directions for making curtains, slipcovers, dressing tables, and numerous other items for the home will be sent upon receipt of 14c, (10c plus 4c postage). Ask for SEWING, for the Interior decorator. Address: Mrs. Spears, Room 421, 73 Adelaide St. W., Toronto.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Nerves at Breaking Point

NO need for girls or women to suffer from periodic pains, headache or sideache. Many find that Dr. Pierce's Favorite Prescription is a very beneficial tonic. This is what Mrs. J. Limmore of 569 First St., Niagara Falls, Ont., said: "Years ago I was in a run-down, weakened condition, my nerves were at the breaking point, the least little thing irritated me and I could scarcely eat a thing. I had constant headaches, dizzy spells and felt so weak I just had to drag myself around. I took Dr. Pierce's Favorite Prescription and picked up steadily. I gained weight, my appetite improved and the headaches, and other troubles disappeared." Buy now!

for BURNS

Mix equal parts of Minard's and sweet oil, castor oil, or cream. Spread on brown paper. Apply to burn or scald. Before long the painful smarting stops

- World's Greatest Plague Being Overcome

Not so many years ago, consumption was the world's greatest scourge. It is still a deadly menace but not so potent because of the effective means which have been taken for its prevention and cure.

The physician, the dietitian and the sanitation expert have all combined and with the aid of the sun and fresh air and rest, have materially checked the great inroads which tuberculosis made upon our population.

The National Sanitarium Association operates the Muskoka Hospital for Consumptives, the Toronto Hospital for Consumptives and the Queen Mary Hospital for Consumptive Children, which combined have a total capacity of just over 1,000 beds. They are thoroughly equipped and have all facilities for the modern treatment of this disease, and it is largely through their efforts that the death rate from consumption has been so greatly reduced.

These hospitals are not operated for the well-to-do but are maintained solely for the poor who are afflicted with tuberculosis and are without means to pay for their treatment and care.

It requires a great deal of money to operate these institutions, far more than they can hope to receive from statutory allowances, and it is only with the co-operation of many generous friends that they can continue to carry on.

Many thousands of dollars will be needed to cover the shortage on operating this year. Will you please assist by sending a contribution to the National Sanitarium Association, 223 College Street, Toronto 2.

BENEVOLENCE

"Benevolent feeling ennobles the most trifling actions."—Thackeray.

"The human affections need to be changed from self to benevolence and love for God and man; changed to having but one God and loving him supremely, and helping our brother man."—Mary Baker Eddy.

"He who wishes to secure the good of others has already secured his own."—Confucius.

"Those who scatter with one hand, gather with two, not always in coin, but in kind. Nothing multiplies so much as kindness."—Wray.

"He only does not live in vain, who employs his wealth, his thought, his speech, to advance the good of others."—Hindoo Maxim.

"Genuine benevolence is not stationary, but peripatetic: it goes about doing good."—W. Nevins.

SNIDER'S

Mrs. G. Sitter, Oakville, is visiting her sister, Mrs. A. Fish.

Miss Winnie Pickering has returned from a visit of several weeks with her sister, Mrs. W. C. Andrew, Streetsville.

Mr. F. A. Forster visited last week at the home of his daughter, Mrs. E. P. Lunau, Oakville.

Mrs. Page, Toronto, is visiting her daughter, Mrs. Walker Royle and Mr. Royle.

Mr. and Mrs. Cecil Fish, Norman, and Miss Phyllis Fish, visited on Sunday at the home of Mrs. Fish's sister, Mrs. W. G. Duke, Mono Mills.

With a choir of ten voices, Snider's School (S.S. 4) was awarded 2nd place, thereby winning the shield for rural choirs (Max. 15 voices) for their singing of "Cornish May Song" in unison, in the Halton County Music Festival. The shield, donated by the Mountain Union Women's Institute, was received by the teacher, Miss Alice Maxwell, on behalf of the school. Three other schools have held it previously, one for two years. Out of 36 entrants, Phyllis Fish was awarded 81½ marks, gaining the silver medal, 2nd prize, in class for rural solos (girls), in the singing of "Old Fashioned Town". Shirley and Eva Pickering, Barbara Royle, Eleanor Hutton and Donald Albertson entered in classes for younger pupils and received very satisfactory marks. The pupils of Snider's School and the school section in general are greatly elated over the success from the first year of musical instruction and their first attempt at entering the Festival. Great praise on attaining such splendid results from his teaching of the past year is being accorded Mr. Ralph Kidd, music instructor.

Mr. and Mrs. Gordon Post were guests on Sunday of Mr. and Mrs. S. Lister, Walmer Road, Toronto.

Mr. and Mrs. Lightfoot, Toronto, have purchased the Geo. Burgin, Jr. house and land on the Ninth line and are now living there.

The members of the school choir, No. 4, were in Milton last Thursday at the Halton Musical Festival. Besides the choir entrant, there were individual vocal entrants. They were accompanied by their teacher, Miss Maxwell. Some of the mothers also attended. Mr. Ralph Kidd is the vocal instructor.

The April meeting of Wesley W.M.S. was held in the Sunday school room. The few members present quilted a quilt for the supply bale. A short program was given. Previous to the meeting, the church auditorium received its spring cleaning.

Mr. and Mrs. R. K. Gibson were guests recently at the Gladys Shibley-Mitchell recital at the Royal York, to which their daughter, Miss Helen M. Gibson, contributed dramatic numbers. Mrs. E. F. Wilson was also a guest.

We regret illness of Miss E. Telfer, a sister of Mrs. H. T. Post, who is now in Galt hospital. Miss Telfer, whose home is in Milton, is well-known here, as she has been a frequent visitor at her sister's home. Mrs. Post went to Galt on Sunday to see her.

PAINT UP

With the considerable increase in painting activity this Spring it is interesting to observe the very decided trend towards satin finishes for interior decorating. One of the advantages claimed for a satin finish is that while it has a high light reflection value, the reflected light is evenly diffused over the whole surface and there is no eye-straining glare.

A tremendous impetus was given to the vogue for satin finishes by the introduction this year of Semi-Lustre, a washable satin enamel made by Sherwin-Williams. This was used most effectively in House & Garden's "Model Home", Woman's Home Companion's "Mystery House" and other famous model homes.

In this connection we notice that Bert. Root is putting on a 10-day introductory sale of Semi-Lustre, which offers an excellent opportunity to obtain Spring requirements of this famous satin-enamel at a great saving in cash.

Children

Members of Deer Family Fierce at Mating Time

Immediately following the perfect development of new antlers, says an authority in the Detroit News, male deer, elk, caribou and moose sometimes become as savage as whelp-robbed tigers. The neck swells far beyond its natural size, the eye pits distend, and the buck goes stalking about with ears laid back and nostrils expanded, fairly spoiling for a fight. Stags that were mild and gentle during eight or nine months of the year suddenly transform into murderous demons, ready and anxious to stab to death any unarmed man who ventures near. The loving pet of May readily becomes the dangerous, fury-filled murderer of October, and a man not fully armed has little chance with it.

This change in the disposition of an otherwise "gentle" animal is well known by most hunters. It occurs during their rutting or breeding season and also accounts for many of the fatal encounters between two bucks, fighting for supremacy. Naturalists agree that during this period there is no more dangerous animal, and they are not to be trusted under any circumstances. Most of the serious and fatal accidents that occur in zoos, in which members of the deer family are involved, happen during this period, and the well-trained attendants take no chances with them.

History of Slavery in New World an Ugly One

The history of slavery in the New world is an ugly one, replete with stories of the inhuman cruelty which was often inflicted by slave-owners upon the unfortunate wretches who, through accident of birth, were doomed to a life of servitude. Probably nowhere were slaves more harshly treated than in the British-owned island of Jamaica in the West Indies, declares a writer in the Philadelphia Record.

During the early days of the colony, thousands of negroes were seized in Africa and imported to work on the large plantations. The sufferings of these unfortunates is almost indescribable. They were packed like cattle in the pitch-dark, reeking holds of the slave ships, chained hand and foot to the walls and floors. Often pestilence broke out among them, and they were allowed to die and rot by the crew, who, fearing to catch the disease themselves, lowered food and water to them through an opening in the deck. The ship resounded with the moans and prayers of the dying . . . the screams of a mother clutching a dead baby in her withered arms.

Cayman Islands

The three islands forming thto Cayman group lie in the West Indies, west-northwest of Jamaica, of which they are a dependency. Grand Cayman, the largest island, is completely surrounded by coral reefs and is 17 miles long and varies from four to seven miles in width. Here are situated the main towns, Georgetown, the capital, and Boddentown. Little Cayman and Cayman Brac lie 70 miles to the northeast of the main island. The most important occupation of the people is catching turtles for export to Jamaica. However, the phosphate deposits and coconut growing also are important.

Hobbies

Hobbies are as old as civilization. In fact, they have been ridden for the past 5,000 years, both figuratively and literally, when it comes to horses. Archeologists exploring the tombs of ancient Egypt have found hobby horses with which children played more than 50 centuries ago, notes a writer in the Cleveland Plain Dealer. These toys are crude affairs roughly carved out of wood and mounted on four disk wheels of the same material. They were painted in various bright colors. Many of them still show the marks of rough handling.

Thug Long in Evidence

Up until about a century ago a thug was a person to be avoided at all costs. They composed bands or a confederacy of professional murderers who worshiped the Hindu goddess, Kali Ma, and with them assassination was a religious duty. Thugs were said to trail a victim for several hundred miles if necessary. Wealthy persons were the most likely victims. Part of the loot was sacrificed to Kali and the remainder kept for "expenses."—Pathfinder Magazine.

Mysterious Red Spots on Bread

In Europe during the Middle ages, whole cities were stricken with terror at times when red spots mysteriously appeared on bread, writes Jean R. Damon, Towson, Md., in Collier's Weekly. Much religious significance was attached to this supposed manifestation of impending evil until the color was discovered to be caused by a red micro-organism (Bacillus Prodigosus) which, at that time, appeared in epidemic form during warm weather.

Sugar Beet Once Grew Wild

Where the sugar beet originated is a matter of some uncertainty, but most authorities are agreed that it was first found growing wild in southern and middle Asia, and it is known that it was cultivated by the ancients in southern Europe and northern Africa. It was rediscovered in semi-modern times growing in vineyards and old fields along the shores of the Mediterranean sea.

SPECIAL INTRODUCTORY OFFER

Sherwin-Williams Semi-Lustre Satin Enamel Introductory Offer
Cash Savings Certificate
Good for 10 Days Only - April 28 to May 8 inclusive.
When properly filled in and presented to the local Semi-Lustre dealer this certificate entitles
of
to the undernoted cash savings on the purchase of Semi-Lustre Satin-Enamel.

The Open Column

We are gonna start a crusade for the emancipation of the male. For more than a score of years, now, the world has been stuffed to the gills with the emancipation of woman. 'Way back, around the end of the 19th century, woman wasn't emancipated, you will remember. She stuck to her home, and, if her husband was reasonably well off, lived a life verging on idleness.

Well, recently the female of the species traded this lack of emancipation for the privilege of crawling out of the hay in the early hours of the morning, and riding a crowded streetcar or subway to an office, where she was emancipated from nine to five, or thereabouts. Then she rode another crowded car home again, and continued being emancipated by allowing some deluded male to entertain her all evening.

This hypothetical dame, being emancipated, got it through her skull that, because she could be self-supporting, she was entitled to something mighty special in the way of support from a husband. Probably, this idea was a good thing, in a way, for a lot of young lads who had marital ideas had to get out and hustle to provide a love-nest sufficiently enticing to lure his prospective bride away from her job.

But, if our observations are correct, quite a few femmes who were a bit unfortunate in their employment, having to work in factories or less congenial surroundings than an elegant office, tossed their jobs back in the can for an easier thing in the way of a meal ticket, and married boys who were making a living, but not much more.

At the same time, these females, being the deadlier of the species, kept the fact that they had once been self-supporting as an argument to make their husbands' lives miserable when they didn't get a new fur coat, or something of the kind. "I was doing all right until I married you," they would remark. Their dispositions went sour because their husbands failed to furnish the Rolls Royce or chinchilla on which they had their hearts set (in a figurative sense, of course) and their husbands 'dispositions also suffered by having to listen to that sort of thing.

It used to be, many years ago, that a guy got married, and his wife trotted off with him to take on whatever job fell to their lot. Some of the pioneers borrowed a shoe string and moved into the wilderness. Their wives went along, and suffered hardships that would take the permanent out of the locks of our modern damsels, and raised a darned sight larger families while they were suffering, too. Probably, they complained about it, but we doubt if they complained as loudly or as long as the modern bride. For one thing, they were too busy to have much time for complaining.

But anyway, our modern women suffer frightfully if they fail to get an electric mangle, or this, that and the other. They point out how well off they were before they got married, but they decline to mention just why they accepted the marital responsibility if they were doing so well. We have a sneaking idea that they don't get married so much on account of love as they did in the old days, or they'd be willing to put up with a bit of discomfort, now and then for the sake of the guy they married. But anyway, they crab, or grouse.

So the beginning of our crusade is going to be an approach to the Federal Government for an act whereby a husband may haul off and dot his wife one on the chin (where the mark won't show much) if she reminds him more than once a day how she has to suffer because he isn't doing as well by her as she thinks he ought to. If we can get that concession, it will be a great start towards the emancipation of the male, and will also tend to produce a hardier race, as, confronted with a proposition like that, only the females who can take it will marry.

LET US SMILE

The old negro parson had called his flock together during a drought to pray for rain. Entering the pulpit he gazed sadly upon his congregation.

"De faith of some of you is deplorable," he began. "Here we are gathered together to ask de Lord to send us rain, and not one of you brought an umbrella."

ENGAGEMENTS

The engagement is announced of Emma Roberta, eldest daughter of the late Mr. and Mrs. Robert Andrews, to Mr. Lawrence Reginald Whitehead, son of the late Mr. and Mrs. Robert Whitehead of Malton, the wedding to take place in High Park Avenue United Church June the fifth.

The United Church, Streetsville, announces that the services next Sunday will both be of a specially interesting character. In the morning there will be a Parents' Day Service and in the evening a Coronation Service.

CHILDREN'S AID SOCIETY

The Second Annual Meeting of the Children's Aid Society of the Counties of Peel and Halton was held in the Court House, Brampton, on Wednesday afternoon, April 28 with the President, J. M. Denyes, B.A., in the chair.

In spite of unfavourable weather, there was a good attendance of interested members and citizens from the two counties.

Reports were given on the year's activities by the President, as Chairman of the Board of Directors, the Treasurer, and the Superintendent, showing a year of real progress in the care of neglected children.

Owing to illness, the expected guest speaker, Mrs. J. S. Driscoll, Director of the York County Children's Aid Society, was very ably represented by Mr. Stewart Sutton of the same Society. Mr. Sutton gave a very interesting talk on the work being carried on by their own Society, stressing in particular the Child Protection Work being done in the homes in an endeavour to keep the families intact, rather than removing the children.

Guests from neighbouring societies were present from Toronto, Hamilton, Orangeville, and Guelph.

The officers for the ensuing year were elected as follows: Hon. Presidents, T. W. Duggan, Brampton; J. M. Denyes, B.A., Milton; Hon. Solicitors, W. I. Dick, K.C., Milton; A G. Davis, K.C., Brampton. President, Amos Mason, Acton; 1st vice-pres., A. W. Thompson, Brampton; 2nd vice-pres., Austin A. Buck, Milton; Hon. sec.-treas., J. J. Jamieson, Cooksville; Executive members, Mrs. R. B. Colloton, Lorne Park; Mrs. W. J. Hood, Brampton; Mrs. W. A. Dorrington, Alton; Mrs. G. C. Atkins, Bronte; Miss A. Blain, Milton; Dr. F. R. Watson, Georgetown; County Council Representatives on the Board: E. D. Maguire, Port Credit; D. W. Moran, Streesville, R.R. 3; George Currie, Georgetown, R.R.; Victor Hall, Hornby, R.R. 2.

District News

Florence Watt, aged 31, was drowned in the Trent Canal at Campbellford on Sunday, May 2nd, when the auto she was riding in ran into the water. Interred at Orangeville.

William Samuel McClure, son of the late James McClure, Brampton, passed away at Lynn Creek, B.C., on April 30, 1937.

Buddy Watson had a tonsil operation at his home in Streetsville Saturday. Dr. G. A. Montemurro was in charge.

Douglas Raine was rushed to a Toronto hospital on Saturday for an operation for appendicitis.

William Mains, of the second line west, Chinguacousy, who has been on the sick list for some time, is feeling much better.

Isabel Harkiss, Erindale, won second place for vocal solo for girls under 14, at the Music Festival at Port Credit.

Norman E. Ianson, of Scarboro, has moved onto the W. F. B. Switzer property at Creditvale.

Mrs. W. D. Lindsay was appointed Librarian of Streetsville Public Library at the last meeting of the Board.

Mrs. B. D. McKinney, of Toronto, who passed away on May 2nd, was buried in Orangeville on Tuesday. Her maiden name was Lucy Ellen Montgomery.

A son was born last week to Mr. and Mrs. A. L. Jones, nee Margaret Sudale, in Toronto.

Mr. W. J. Dunlop, Deputy Grand Master of the Grand Lodge, A.F. & A.M., of Canada, in the province of Ontario, and Mrs. Dunlop, were among the worshippers at Trinity Church Sunday morning. This was the day that the new Rector, Rev. E. S. Ottley, took charge of the Parish. There was a good congregation.

The H. T. Sterne & Sons Co., manufacturers of electrical medical equipment, will locate in Brampton shortly, and will occupy the "whitewear" factory, Queen Street east.

Brampton Girl Guides collected $119.00 for the Canadian Institute for the Blind on Saturday.

Considerable work has been done on the Cooksville-Fair Grounds, which offers better facilities for drainage and parking of cars near the buildings.

When the wall of a well he was digging on the property of Robert Cooke of the Burnhamthorpe Road caved in on him, Allen Pratt of Weston was badly injured and was removed to a Toronto hospital for treatment.

Miss Ann Sinclair and Donald McArthur, Streetsville, took part in the closing concert of the Peel Music Festival at Port Credit Saturday night.

OBITUARY

Passing of Mrs. Chester Featherston

Sunday, April 25th, between the night and the morning a messenger came to Chester Featherston's home for the wife and mother to take that mysterious journey we all must take sometime, to understand. The door was on the latch in this home, for they knew the medicine that so often cured this suffering one, could not always balk the tomb.

In this farm home sabbath morning,
Came a gentle voice divine,
And said unto this patient suferer,
Lay your feeble hand in mine.
All your pain on earth is ended,
Lay your cares, and burdens down,
For your room in heaven is ready,
You must come and wear your crown.
Then she folded her hands meekly,
Spake with friends on earth no more,
Went to join the waiting army,
Reckoning from the other shore.

In the beautiful Bethel church where she loved to worship, friends from Hamilton, Toronto, Brampton, Dundas and the surrounding country came to pay their last tribute of respect to her who was loved by every one who knew her. The Rev. B. Eyre officiated, choosing for his text these words of our Saviour's "In this world you shall have tribulation, be of good cheer, I have overcome the world." The choir led the singing with her favourite hymns, "Nearer My God to Thee", "Jesus lover of my soul" and "Rock of Ages". The congregation joining with them. She was laid to rest in the lovely God's acre beside the church.

On these solemn occasions, when we are in the church or beside the open grave, the living beside the silent form of the departed one, we think all of our desires are contained in the verse in an old song:

There is a future, oh! thank God,
Of life this is so small a part,
'Tis dust to dust beneath the sod
But there, up there, is heart to heart.

And with great pleasure we turn over many of the pages in Mrs. Featherston's life. She was in possession of the most precious gift anyone could desire, a talented musician, and when we wander back to the days of her childhood we see this happy girl, Lou Ford in her home practising her music lessons, on the family organ. And the first hymn she learned to play was:

Shall we gather at the river,
The beautiful, the beautiful river,
Gather with the saints at the river
That flows by the throne of God.

And this hymn always had such a charm for her, there and all the rest of her life that her soul was lost in love in that happy land above. And she was beside the saints joining in that hymn of praise. Then when the congregation were singing the hymns she always loved so much, in our imagination we could see her beside the saints at the river in that choir around the throne.

Do our loved ones way up yonder,
Gather 'round sometimes to ponder,
Do they often muse and wonder,
Was their life work all a blunder.
When the storms of life are blowing,
Blighting good seeds they were sowing,
They know loved ones, left behind them.
Sometimes, somewhere, prayers will find them.
When the minister with praises ringing,
And choir and congregation singing,
We know our loved one now in glory,
Still repeats the old, old story.

The first link in the Featherston home was broken and the husband, one daughter, Irma, school teacher in Welland, one son teaching at Kitchener, three sons at home, one brother in California, and one on the Ford homestead, are left to mourn the loss of a faithful wife, mother and sister. Carlyle and Ralph, the two youngest sons, were unable to attend the funeral on account of shock. Their Pentecostal friends from Hamilton and Brother and Sister, Cromsberry, were present at the church service.

SANDY.

The Junior Conservative Association met Tuesday evening at the home of Mr. A. E. Graydon for the transaction of business. Addresses were made by Gordon Graydon, M.P., Col. T. L. Kennedy and others. This is a very active organization and many meetings are being held because it won't be long now until the next provincial election, and this organization will give a good account of themselves.

Diamond Jubilee Masonic Lodge

On Tuesday evening, May 4th, River Park Lodge, A.F. & A.M., No. 356, G.R.C., celebrated its Diamond Jubilee in a most auspicious manner. Wor. Bro. H. W. Hope, W.M., presided.

The principal guest of the evening was Most Wor. Brother A. J. Anderson, Grand Master of the Grand Lodge of Canada, in the Province of Ontario, whose home is in Toronto. He was accompanied by Most Wor. Bro. R. B. Dargavel, Past Grand Master, and about fifteen other Grand Lodge officers.

The Grand Master was given a royal welcome and presented with a beautiful travelling bag as a memento of his visit. The presentation was made by Wor. Bro. Fred Maas, in a few well-chosen words on behalf of the lodge. The Grand Master thanked the lodge for the very useful present, also for a lovely bouquet of roses sent to his wife.

After lodge closed, refreshments were served in the hall downstairs, and every chair was taken. The Wor. Master was toastmaster, and the toast list was as follows:

The King—God Save the King.
Grand Lodge—
Proposed by W. Bro. J. W. Drennan.
Response by Rt. Wor. Bro. P. F. Hopkins, D.D.G.M.
Grand Master—
Proposed by Wor. Bro. S. Cordingly.
Response by the Grand Master.
Our guests—
Proposed by Bro. R. Langmaid.
Response by Most Wor. Bro. R. B. Dargavel Past Grand Master; R. W. Bro. Peter Grant, R.W. Bro. Dickson, R.W. Bro. McDermott, R.W. Bro. Geo. Guthrie and others.

A history of River Park Lodge, which was organized in 1877, was given by R.W. Bro. H. W. Gerhart, P.D.D.G.M., and proved very interesting.

Entertainment was furnished by, and under the direction of, Miss Pearle Carter, Toronto, and included recitations, vocal and instrumental music.

A large number of rising and past masters of other lodges in the district, and members, were present.

A beautiful birthday cake, made by our local baker, was cut by the Wor. Master, and then passed around.

Mr. W. H. Watson, W.M. of Grand Valley Masonic Lodge, a former Streetsville resident, and Bro. W. Buchanan, who was C.P.R. station agent in Streetsville, fifty-one years ago, were visitors at the 60th anniversary of River Park Lodge, here, Tuesday evening.

School Boards Meet Again

The joint Boards of the High and Public schools met again Monday night at the public school with a good attendance. Rev. J. Y. Fraser occupied the chair.

Messrs. A. E. Graydon and C. G. Quennell gave a report of their interview with Mr. D. Wilson, County Clerk.

A committee was appointed to go to Cooksville for the purpose of obtaining information regarding the boundaries and assessments of that part of Toronto Township which is included in Public School Section No. 18, with a view of asking the County Council to pass a by-law declaring the same area a High School District for the Streetsville High School.

It is the intention of the Joint Boards to do away with both the old schools and, erect a new combined school of about ten rooms.

There are now about 140 pupils attending public school, and 65 at the high.

There was a fire Monday night about 10.30 at Buck's garage, caused by a short circuit in the electric wiring system. Fortunately it was discovered and extinguished before much damage was done.

The Women's Association of the Eden United Church was entertained at the parsonage Wednesday afternoon.

Stopped "Too Fast"

The man in the car behind wrote the department of highways asking for the cancellation of the permit of the driver of the car ahead. " His brakes were out of order because he stopped too fast."

Another man had a clear road to go ahead. He passed four or five cars easily, then found another approaching and had to get back into line. It was a case of get out of the way or a collision, but one of the drivers in line refused to make room and an accident was narrowly averted. Then he sent in a complaint to the department.

The famed beggar on horseback now rides in a motor car. Officials of the department of highways receive hundreds of complaints. Those that have merit, even if suspension does not result, are filed against the driver's record. But character and bad temper are revealed in many a letter, and truth often is hard to find.

Yet, when a man's brakes are out of order because he stopped too fast, somebody is entitled to laugh. — Stratford Beacon-Herald.

Beautiful Boat

People interested in the Great Lakes and its ships will be glad to learn that the steamer Manitoba is again to be seen in Port Arthur this season. It is a good many years since the Manitoba, built at Owen Sound, to replace the wrecked Algoma, one of the three brought across the ocean from the Clyde for the Lake service of the C. P. R., first appeared in these waters. Never since has there been a boat constructed with as beautiful lines or deemed more seaworthy than the Manitoba and there are many Port Arthur people who have fond recollections of happy trips, in some cases honeymoons on this fine vessel. Her new route will include the beautiful north channel and island section of Georgian Bay and should prove popular with travellers.—Port Arthur News- Chronicle.

Settlement Centres

The idea of forming little centres surrounded by the farms of the inhabitants, is, of course, nothing new. It was the system throughout Europe and especially in France all through the Middle Ages, a system enforced by perilous times and affording the maximum of protection to the farmer. Traces of the same agreement still survive in this province, although the comparatively quick and easy settlement of the country did not make it so necessary. We should be surprised if the settlement centres idea, if it is given a fair tral over a period of time, did not help a lot in keeping people on the land. If it does it will have accomplished a very great deal. In far too many of our colonization schemes "back to the land" has been merely a preliminary to "abck to the city again." — Montreal Star.

Capital Punishment

In discussion before committee at Ottawa of capital punishment and methods it was pointed out that in Britain, where capital punishment was rigidly enforced, only one person out of every 634,000 committed murder, whereas in United States, where seven states had no capital punishment and throughout the Republic there was not the same certainty of conviction, one person out of every 12,000 committed murder. Comparisons are not, however, to be accepted of face value. United States' population is made up of a different mixture of nationalities brought together under conditions which are not as conducive to law observance as in England. — Port Arthur News-Chronicle.

Exploded

While the civil war in Spain may be ruining a country and a nation, it certainly is proving one thing — and that is that all the stories we have heard about the "annihilating" effects of the modern apparatus of war are without very much foundation. In other words, the machinery of war to-day would appear to be very much what it was during the Great War — deadly enough and destructive enough, but certainly not "completely annihilating" by any means. —Halifax Herald.

Scottish Revival

The broad wave of business revival that started in England has extended to Scotland. Ship-building, engineering and other capital industries are sharing in better times, and a shortage of skilled labor is reported in a number of these and other industries. Coal mining enjoyed an increasing market last year, and the textile industries were active. There leading Liberal, but of late owned and published by Fred B. Davies, son of Rupert Davies of the Kingston Whig, has been bought by Arthur Rogers, Jr., owner of the News, and has also been a notable decrease in the number of persons drawing public relief. — Calgary Herald.

Courtesy Defied

Courtesy is the thing which will reduce the number of accidents. It is a mark of good breeding. It commands respect. It is polish that welcomes the customer, cheers the fellow-worker and makes the day easier for everyone. Courtesy is a recognition of the rights of others. It is that we all want for ourselves. To be courteous, therefore, is to practice the Golden Rule. — Chatham News.

Another Newspaper Amalgamation

Kincardine, the last two in Bruce county to have two newspapers, has become a one weekly newspaper town by the amalgamation of the Kincardine Review-Reporter and the Kincardine News. The former, once published by the late J. J. Hunter, the two papers have been merged. Political antagonism is dying in all parts of Ontario, and merchants, when counting costs, cannot longer see the advisability of advertising in two newspapers in their territory, particularly when one gives them complete coverage and service, any more than they would want to support two post offices, or two telephone systems in the same trading area. There are very few places left in Ontario where business men support a dual system and dip down into their pockets for sentimental persons.—Amherstburg Echo.

Home Improvement

As the Home Improvement Plan gets under way in Canada, it is interesting to note what a similar movement has done in the U.S.A. Properties improved under the proceeds of insured notes since the plan was started in the summer of 1934 include nearly 1,000,000 homes, 250,000 two-family houses and apartments and 150,000 other properties, including business and industrial buildings, hotels, orphanages, colleges, churches and farms. In addition, Federal Housing Administration officials estimate that their better housing campaign has generated over $2,000,000,000 worth of modernization and repair work which does not show in its own records.

In the Spring

Smiths Falls Record-News — The spring training season is here. Police Chief John Lees told the Record-News this week that local bluecoats have been very busy dashing about town at the request of various householders to halt street baseball games in all part of the town. The combined lure of warm weather and dry streets proved too powerful for local lads to resist and as a result hard-fought baseball and softball games were being run off on the pavements in the various parts of the town. Police advise the youngsters to play their ball on the fields provided, pointing out that serious accidents may result out of the street games.

THE EMPIRE

Stronger Than Ever

Belfast Telegraph, — This will be the first Coronation of a British King to take place since the Great War. When we look back to the time before that world tragedy we are impressed with the fact that the British Monarchy has, if anything greatly strengthened its hold on the people. Great empires have fallen into ruins, Germany, Russia, Austria-Hungary and Turkey. Once-despotic rulers have been hurled from their thrones and driven into exile, happy to escape with their lives, but Britain retains her old institutions. In fact, the recent changes have made her citizens realize more than ever the value of a Constitutional King in a world where dictators strut across the stage and issue dictates which none dare to disobey in matters affecting the inner lives of their subjects. When the Coronation of King George V took place at Westminster Abbey in June, 1911, it could not have been foreseen that such a tempest of war would have swept all over the world as that which befell between 1914 and 1918. Yet it did not shake the solid structure of the Throne.

Store Stylist Voices Opinion

NEW YORK.—Here's what Rene Long, department store stylist, told the Long Island Federation of Women's Clubs:

"A lovely girl is an accident but a distinguished woman is an achievement."

Adapting dress and coiffeur to personality, she said, spells distinction.

News in Review

Merger Confirmed

OTTAWA. — Senator Raoul Dandurand, Acting Prime Minister, confirmed that negotiations between the Dominion and British Columbia Governments over the Yukon Territory, have reached an advanced stage.

At the conclusion of a Cabinet meeting Senator Dandurand said the statement made in Victoria by Premier T. D. Pattullo, was substantially correct. At that time Premier Pattullo said British Columbia would acquire the Yukon, agreement with the Dominion having been reached. Negotiations were conducted by Premier Pattullo and Mines Minister Crerar, now on his way to London for the Coronation.

Senator Dandurand said the agreement would be approved formally by the two governments before ratification by Parliament. This would mean a year's delay before administration of the territory would be transferred.

Under the agreement, the Dominion will retain Federal services like Postoffices, Indian Affairs and Customs.

Dairy Fined 16 Times

MONTREAL. — Sixteenth conviction in a year was registered this week against Laiterie Perfection for selling milk below the price set by the Dairy Commission Act. The dairy was fined $200 for selling three uarts and two pints of milk for forty cents, two cents below the set price.

Married Half Century

BRAMPTON. — This week marked the golden wedding anniversary of the wedding of Mr. and Mrs. James Stephens, who, since their marriage at Newcastle, England, have been residents of Brampton. Both were born near Liskeard in Cornwall, and both are 79.

As a young man working near Newcastle, Mr. Stephens became dissatisfied with the wages he was receiving, and decided to leave the Old Country for Canada. Mary Ann Husband joined him. They were married and left within several days for Brampton, where the groom's elder brother had already found himself a home.

Plant 25,000 Trees

ALTON. — A large gang of workmen started work planting 25,000 trees on the farm of G. R. E. Grange, 31, Chicora Ave., Toronto.

The property, which was puchased by Mr. Grange last summer, is used by the owner for a summer home. It is divided by the River Credit and is situated just east of the C.P.R. station.

The work of planting this young forest is under the direction of W. H. Martin, who for some years had charge of the Government nurseries at Midhurst. The trees being planted are of a large variety and each species is picked to suit the soil on which it will grow. Scores are plowed six feet apart and the young trees are planted in holes made by a shovel. The large number of trees, which were brought here by truck, are heeled in so that the roots are covered with damp soil to keep them from dying out until the time for planting arrives. An area of from 19 to 20 acres will be planted. The species used will consist of black locust, black cherry, Norway spruce, Japanese larch, elm, red oak, soft maple, red pine, hard maple, butternut, white ash, walnut, red cedar, Scotch pine, white cedar.

160-Foot Trestle Built in 18 Hours

TORONTO. -- The C.N.R. main line between London and Toronto is open again after having been blocked by a washout and train wreck at Beachville which took the lives of the train's engineer and fireman.

Working at top speed to clear the line, railway construction crews accomplished the surprising feat of building a trestle 100 feet long in 18 hours. It replaces the washed out section at Beachville.

After the trestle was erected 50 carloads of cinders were dumped in to make a 12-foot fill.

Over this trestle the Chicago-Montreal train, due in Toronto at 3.45 a.m., passed in safety and the main line traffic resumed.

Market Plans Ready

REGINA. — Almost immediately Canada will set up a marketing organization in England, with headuarters in London, it is announced here by Hon. J. G. Gardiner, Federal Minister of Agriculture.

The organization, Mr. Gardiner said, will be under supervision of A. M. Shaw, formerly of the University of Saskatchewan and new head of the marketing division of the Federal Department of Agriculture.

Mr. Shaw will not be stationed in England, though he probably will have to make periodical trips across. The Government is now negotiating with a man who will be in direct charge of the organization.

The person selected to take charge of the London office, will have the title of "Agricultural Products Commissioner." He will gather all possible information as to requirements of British buyers of Canadian products, relaying that information back to Canada.

Complete Last Link World Air Service

HONGKONG.—A 30-year dream of round-the-world air service became reality with the arrival of the Hongkong Clipper from Manila on the first regular flight between the two cities.

The Clipper, bridging the last 700-mile gap in the North America-Asia service, placed the final link in an airplane chain whereby it is possible to encircle the world in less than a month, using scheduled commercial planes.

The craft brought 2,500 pounds of cargo, including 100,000 letters and newspapers.

Duke Completes Plans to Move To France

ST. WOLFGANG, Austria.—The Duke of Windsor has completed plans to leave for Paris and Monts, France, to join Mrs. Wallis Simpson as soon as her final decree of divorce is awarded.

Scotland Yard men who have guarded the Duke here have been instructed to accompany him and remain at the Chateau de Cande, where Mrs. Simpson is staying.

The Duke has promised to advise newspaper correspondents when he decides to leave. Villagers of St. Wolfgang are arranging a farewell "fest" in his honor.

Symptoms in Pupils Reveal Mental Cases

SMITHS FALLS.—Addressing an audience of more than 200 here, Dr. F. A. Jones, principal of the Ottawa Normal school, declared that much of the mental illness existing today might be averted, through the recognition by teachers of symptoms in the pupils in their classes.

Dr. Jones mentioned the seclusive pupil as an example. In these cases steps should be taken by parents and teachers to investigate conditions. Otherwise, he said, the child might eventually become a suicide.

The speaker said boys and girls of today were fully as wholesome and as intelligent as their parents. He spoke of education as "big business", pointing out that 140 million dollars was spent annually in Canada in teaching the young.

Walks Miles to Learn How to Cook

HALIFAX.—The old saying, "If she could only cook," won't be popular here if Nova Scotia women retain their apparent eagerness for training in domestic science and home economics. In four of the short courses sponsored by the Provincial Department of Agriculture, attendance reached the 500 mark. In one district, women walked seven miles to attend.

Quits As McGill Head

MONTREAL.—Arthur E. Morgan has resigned as Principal of McGill University, it was announced this week because he considered it "in the best interests of the university." He assumed the post a year ago last Sept. 1.

The announcement, made after a meeting of the Board of Governors and the Senate of McGill, said the reasons for the resignation were best explained in letters exchanged between him and Sir Edward Beatty, Chancellor of the university.

"For some time," said one letter to Sir Edward, "it has been apparent that you and other members of the Board of Governors did not see eye to eye with me in regard to the relation of the Principalship to the Governors.

"We have had several talks on the subject during the past year, and it now seems clear to me that it would be in the best interests of the university for me to ask you to convey to the board my request to be relieved of my office from May 31 next. I gather from you that this course would be acceptable to the board."

NEW IN REVIEW—Willard Apr 29

Plan to Move Farmers

REGINA— No wholesale movement of farm population is contemplated under the Federal Prairie rehabilitation plan, Hon. J. G. Gardiner, Federal Minister of Agriculture, announced here this week.

Plans are not far enough advanced to determine definitely whether there will be any movement at all, and in any case it would only possibly apply to a small fraction of the entire population in the entire area involved, he said.

If any migration was undertaken, the Government would not undertake to move the people and provide them with the new land, the Minister said. It would be a question rather of the people moving themselves, possibly through a co-operative plan.

With surveys for the rehabilitation plan practically completed in four areas, a meeting will be held early next month at which will be represented the Governments of the three Prairie Provinces, mortgage and loan companies, banks, railways, municipal organizations and the Hudson's Bay Company.

Information to be supplied to the conference will include soil condition, rainfall, crop returns and ownership of the land, Mr. Gardiner said.

60 p.c. of Those On Relief From Building Trades

Home Improvement Plan Is Expected to Put Many of Them to Work

It is estimated that between 50 and 80 per cent of the men on relief in Canada are attached directly or indirectly to the building trades, and one purpose of the Home Iprovement Plan, in conection with which a local committee has been formed, is given a stimulus to building which will help to put these men to work.

H. M. Purser, district representative of the Plan, says that it is hoped that as a result of the work now being undertaken some 60,000 of those men will be off the relief rolls and in jobs by June 1st.

That in itself will be quite an achievement but in accomplishing it the further result will be that many homes will be made more attractive and more comfortable, more really deserving of that peculiarly Anglo-Saxon title "home."

The plan enables the home owner to secure a loan which will permit him to rearrange the rooms of house, make repairs and additions, install new electrical, plumbing or heating equipment, do painting or paperhanging, or fix up the yard.

The plan is only getting started so far as the Sault is concerned but in other places a large number of loans have already been made. 389 in Toronto, for example, and 271 in Montreal.

There is an opportunity in it for Sault contractors and Sault home owners.

Will Be Shooting In The Dark

There are still a large number of men who seem to believe that the mere fact of a bull's being pure-bred will insure high producing daughters from him, but thousands have found out to their sorrow that there are a great many "black sheep" among the pure breds. Until every dairy farmer selects his bull on the basis of performance of his near ancestors or of his daughters he will be "shooting in the dark," so far as the improvement of his herd is concerned.

Quirks of the Flood

Anticipating the collapse of the Thames Street bridge in Ingersoll, a South Side baker made extra deliveries to the North Side Tuesday on night. In the middle of the night the bridge was swept away and his competitors were cut off from their customers in the morning.

In flood-ravaged Tillsonburg, where damage was estimated at $100,000 and waters surged through the business streets, Robert Hambleton, a theatre manager, took out a $25,000 building permit. He planned to erect new stores and apartment houses.

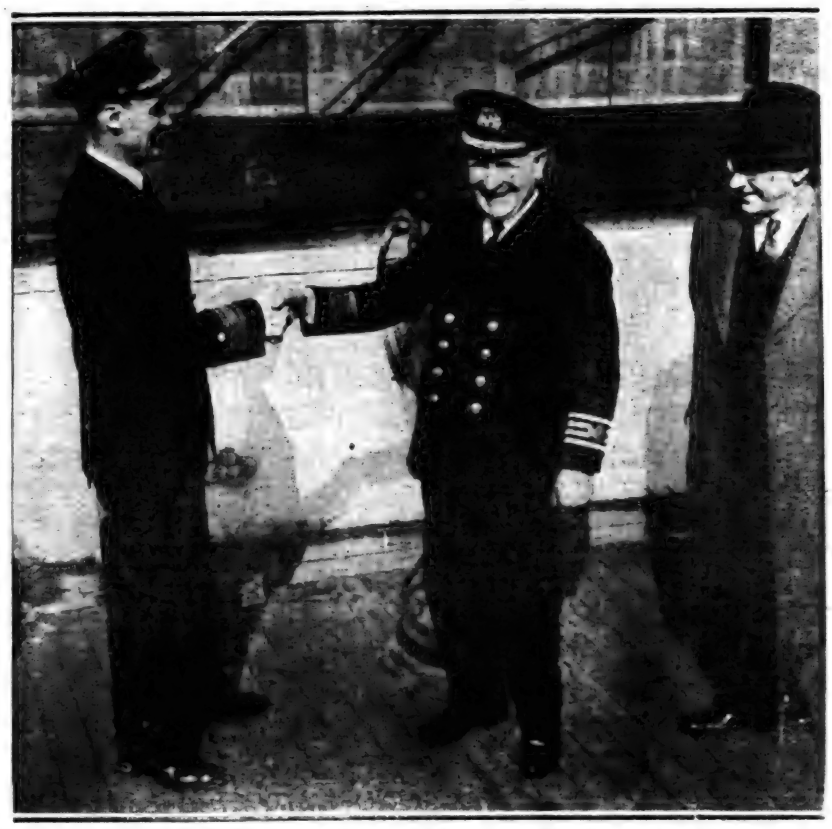
Forty-eight thousand eggs in a chick hatchery were spoiled at Dunnville when high water interrupted the Hydro power. The eggs were in electric incubators.

This Cow a Climber

GRANT'S PASS, Ore.—O. B. Cox bought a cow and locked her in his barn. She was missing the next day and the barn was still locked. The mystery remained unsolved until Cox went to his hay loft. The cow had climbed the steep steps and was contentedly munching hay. Cox used a block and tackle to take her down.

Hamilton Firm Given $150,000 Kingston Job

KINGSTON — Contract for the erection of the new Craine biochemistry building at Queen's University, to cost about $150,000, has been awarded to the Frid Construction Company of Hamilton. The new building is made possible by the bequest of the late Dr. Craine of Smiths Falls, one of the first women medical graduates of Queen's, who willed more than $300,000 to the university.



Pact Is Signed

TORONTO— After two extended sessions Louis Fine, chief conciliation officer of the Ontario Department of Labor, announced that an agreement had been reached between McKinnon Industries, St. Catharines, and the company's employees. This agreement is substantially along the general lines of the Oshawa and Windsor General Motors' agreements, with special provisions as to wages and hours for the St. Catharines plant.

Mr. Fine sat in at two sessions during which the terms of the agreement were reached. It now awaits approval of a general meeting. The company was represented at the hearing by Harry Carmichael and W. A. Wecker, general manager of the plant. The employees were represented by J. L. Cohen and a negotiating committee.

So strong is the wing of a swan that a blow from it may break a man's leg.

Australian Coronati on Leader Arrives

First of the Dominions' commanders of Coronation military contingents to arrive in London is Gen. Sir Henry George Chauvel, commander of the Australian contingent, who is here shown, at the left, being greeted by Field Marshal Lord Milne.

Love Huntress

By H. GLYNN-WARD

Claudia Townsend meets Dick Whalen at a hockey game in Seattle one night. Her interest in Dick intensifies Wallace Bornell, rich young lumberman, who wants her to marry him. To get Dick out of the way, Wallace offers him a job in one of his lumber camps in British Columbia. Meanwhile, Claudia has found a job for Dick in Seattle. Bornell, however, manages to keep this news from Dick. Dick goes to the lumber camp, and there discovers that Bornell company is stealing timber. He asks for an explanation, but Braddock, the boss, puts him off and next day leaves for Seattle. The following day, Claudia stops in at Bornell's office and, by chance, overhears Bornell and Braddock plotting to do away with Dick. She decides to go to Burns Lake herself to warn Dick, but Braddock sees her on the boat, and manages to arrive at the camp before she does.

CHAPTER VII

When Braddock arrived at the camp, he immediately sent for Jenkins, the overseer. Jenkins reported that everything had gone on quietly during his absence.

"I want to see Moriarty," Braddock said. "Tell him to come to my office now, at once."

Moriarty was the man who had been scaler before Whalen had ousted him from the job.

Braddock sat down at his desk to wait. He took up a cigar, lit it, then felt in the drawer at his hand for the revolver that he always kept there, loaded. The man who was coming in had a black past.

Moriarty opened the door and peered into the room.

"Come right in, man!" said Braddock.

Moriarty came in, leaving the door ajar behind him.

"Shut the door," Braddock ordered. "Lock it—I want to speak to you!"

"What's all this about, boss? I ain't done nothin'——"

Braddock laughed.

"Sit down. Seems to me you're afraid o' something, Mister Moriarty?"

"You're wrong!" said the man quickly, dropping into a chair. "I'm afraid o' nothin! What's the game?"

"Maybe I'd act that way, too, if I expected to see a cop round every corner, remirding me o' my past history!" said Braddock.

"What d'you mean?" Moriarty sat forward belligerently. "If you're jokin'—well, you're jokin' wi' the wrong party, see!"

Braddock smiles.

"Moriarty—or I might say Murphy!"—he watched the other man start—"was you ever in Boise, Idaho?"

"How come you know anything about Murphy? And Boise?"

"Hm! Let me tell you that there ain't much Braddock don't know about the men he has working for him!"

Moriarty was cornered, and he knew it.

"Well, what are you going to do about it?"

"Nothing!"

Moriarty stared at him, astonished.

"I'm a great man to mind my own business, Moriarty! If another man feels it best to take a change of air—and a change o' name along with it—why, I'm not interefering. But—I expect him to be grateful enough to do me a favor once in a while!"

"Favor?" said Moriarty gruffly. "What's your price?"

"I'm thinking,' Braddock said slowly, "of sending you along with that fellow Whalen to look over some timber we got at the east end o' Tchesinkut Lake—"

"Whalen! But I hate the sight o' him——"

"You hate him? Well, that'll make it easy—" Braddock leaned forward over the desk. "That's the favor I'm asking—you come back alone!"

The other man's face changed. A sinister smile twisted his mouth.

"So that's the game, eh? Well, if I put him where he rightly belongs, what do I get out of it? I take all the risk!"

Braddock frowned. "Well," he said. "I'll give you a thousand dollars and your time when you come back and report to me here."

"One thousand——"

"That's all you'll get! Now then—let's get down to brass tacks . . . This thing has got to look like an accident, see? We'll have to report his death at once. Mustn't be no gun-play, mind! Keep him out all night and get him in his sleep—or something! Report frozen to death, or smothered, or—well, I leave it to you. You come home and report it to me in great excitement. I'll give you a thousand in notes and your time. You quit. Clear out for Japan or the South Sea Islands, where it's a bit cooler than here!"

"When do we go?"

"I'm coming to that. You'll go bright and early tomorrow morning. Now then, Moriarty, go back to the bunkhouse, without saying a word to anybody about seeing me. In a few minutes I'll send the night-watchman to fetch both you and Whalen here. I'll tell you both I want you to go out on business for me, scaling timber, see? You haven't heard nothing o' this before I tell you in front of him, get me?"

"I get you all right."

"Now off with you!"

Ten minutes later Whalen was aroused from sleep by the night-watchman with a message. He was wanted in the office. Hastily throwing on some clothes, Dick ran across to Braddock's office.

The manager greeted him pleasantly.

"Where's that other fellow, Moriarty? I need the two of you to do a bit of timber-cruising for us . . . . While we're waiting for him, Whalen—Mr. Wallace Bornell told me he'd write to you himself about that other little matter."

Moriarty came in, hair rumpled.

"I went South," Braddock began, "on the question of opening up a camp in the Spring on some timber limits we got down near the east end o' Tchesinkut Lake. They want figures down in Seattle right away. I want you to start at dawn or before—round four o'clock, so that you can be back here at night. The earlier you start the better. Better get back to bed now and get some sleep, all you can."

If Dick felt surprised he didn't show it, nor did he let either man see how distasteful to him was the company chosen for him. It was all in the day's work, he supposed.

"You best take charge o' the maps, Moriarty seeing at you know the lie o' this part o' the country better than Whalen."

Dick went back to bed without feeling much curiosity or even interest. The trip would relieve the monotony. The fact that they had picked him for the job showed, he thought sleepily, that he might have been wrong in his former suspicions. Otherwise they would never have trusted him to find new timber limits and size up their value for them.

When Claudia Townsend reached the inn at Burns Lake, she immediately asked the way to the Bornell lumber camp. She was told that it was quite impossible for her to get there before the next morning.

She chafed at the delay. If Braddock had gone straight out there, Dick was in immediate danger. But there was nothing to be done about it. She was tired from her long journey so she decided to get a good night's sleep and ordered a sleigh to call for her at dawn.

"You expected at the camp?" the inn-keeper asked her.

"Ye-es," said Claudia.

"There ain't, as you might say, any sort o' preparation for women down there! No women in that camp at all."

U. S. Newspapers Gain In Ads

Survey Reveals Increase of 12.5 Per Cent In 1936 Reported

NEW YORK, — Reporting that 44 cents of each advertising dollar spent in 1936 went to newspapers, the Bureau of Advertising of the American Newspaper Publishers' Association asserted that greater promotion will return greater benefits to the newspaper business.

"Newspapers have the greatest medium and the largest present-day volume of advertising," said the report, signed by Chairman Edwin S. Friendly. "This volume will grow if we are willing to promote it on a scale equal to the efforts of competing mediums."

Newspapers generally, he said, are more nearly conscious of this opportunity than ever before.

Newspapers received approximately $188,000,000 in revenue from national advertisers in 1936, Friendly said, as compared to $167,000,000 in 1935, a gain of 12.5 per cent.

Dividing the average advertising dollar, he said newspapers received 44 cents, magazines 33.6 cents, car cards 5-10 of a cent, chain broadcasts 14 cents and outdoor advertising mediums 7.9 cents.

The bureau reported to the A. N. P. A. the admission of 15 new newspapers to membership in 1936 and the resignation of 10.

Belgium Seeking More Trade With Canada

OTTAWA.—Canadian trade with Belgium, which totalled $30,000,000 last year, will be more than doubled it is believed, as a result of the forthcoming visit to Canada of some twenty or twenty-five representative businessmen from Belgium. Under the guiding hand of Baron Silvercruys, the enterprising young Belgian Minister, who came to Ottawa at the New Year, the party will visit Toronto, Montreal and other industrial centres of the Dominion. The purpose of the mission is to lay the foundation for enduring relations between the two countries and Baron Silvercruys sees no reason why an annual two-way trade of $70,000,000 should not be established.

For Stamp Collectors

Stamp collectors will be interested in this special offer of the Colonial Distributors Limited, Toronto, of Coronation Souvenir stamps — sixty—all different for 25c. All engraved in four colors.

The set contains stamps showing crowning of King Harold in 1066; William the Conqueror, King George the IV. Also portrayals of the King's champion, Members of the Royal Family and Historical Points of Interest.

Be a "Dream Girl" In Lacy Cape of Laura Wheeler Crochet

Pattern Number 1463

Crochet this cape of mercerized cotton, and see how easy it really is. A wide pattern—each row is ¾ inch—it goes quickly. And it's just the thing for dress-up on cool evenings. Pattern 1463 contains detailed directions for making the cape shown; illustrations of it and of all stitches used; material requirements.

Send 20 cents in stamps or coin (coin preferred) for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Write plainly Pattern Number, your Name and Address.

Moscow Bans Old Automobiles

MOSCOW.—A new step to spruce up Moscow before the Summer tourist season was announced with banishment of all old automobiles from the streets of the capital. The decree which becomes effective July 15, was issued by the Council of People's Commissars. Old cars are to be sent to the provinces. Owners will be required to exchange their old automobiles for a new model and the decree extends credit for two years to individuals and state organizations to

Jelly Comes to the Rescue

Perhaps you have always thought that quick-setting jelly could be used only to make glowing dessert dishes or, in a pinch, a molded salad. We are out to dispel that idea and here are some recipes which prove that quick-setting jelly has an infinite variety of uses which will endear it to the hearts of busy homemakers. These packages of jelly in bright colors and various flavors can come to your rescue on numerous occasions when you feel you just can't make a meal out of what is left over and yet you can't throw the scraps away.

Here are two delicious recipes that can form the main course of any meal, company or otherwise, and yet they are so cheaply and easily prepared that it will astonish you. But once you have tasted them, it won't astonish you to find that the family will want them again and again.

Piquant Tongue Mold

1 Package quick-setting lemon jelly, 1 pint warm water, 2½ tablespoons vinegar, 1-8 teaspoon salt, 1 teaspoon scraped onion, 3½ cups boiled tongue—finely chopped, ½ cup dill pickles—finely chopped, ½ cup mayonnaise.

Dissolve jelly in warm water. Add vinegar and salt. Chill until cold and syrupy. Place in bowl of cracked ice or ice water and whip with rotary egg beater until fluffy and thick like whipped cream. Fold in onion, tongue, pickles and mayonnaise. Turn into loaf pan. Chill until firm. Unmold. Garnish with crisp lettuce and radishes. Serves 10.

If you have had chicken on Sunday, then here is the perfect dish for Monday:

Molded Chicken Loaf

1 Package quick-setting lemon jelly, 2 cups warm chicken stock, free from fat, 1 cup chicken—cut in small pieces, ½ cup celery—finely chopped, ¼ cup green pepper—finely chopped, 1 teaspoon scraped onion, 2 tablespoons pimento—finely chopped, 2 tablespoons vinegar, ¼ teaspoon salt, ¼ cup stuffed olives—chopped, dash of cayenne, dash of Worcestershire sauce.

Dissolve jelly in warm stock. Chill. Combine remaining ingredients. When jelly is slightly thickened, fold in chicken mixture. Turn into loaf pan Chill until firm. Unmold. Serve in slices. Or mold in ring mold and serve as salad garnished with mayonnaise. Serves 8.

The Tempting Omelet

There is nothing terrifying about attempting an omelet.

Omelet-making is not an overcrowded profession, and any one showing marked gifts in that direction is credited with a skill amounting almost to wizardry.

Catch hold of this frying pan. It is a thick iron one and is kept exclusively for the making of omelets. It is not washed after use, but is simply wiped clean with a cloth or tissue paper.

Its bottom is perfectly flat so that it cannot reel about on the gas-ring or over whatever hot flame the omelet is going to be cooked. The flame must be hot and the pan must be hot, because speed is the essence of good omelet-making.

Slow cooking means toughness. For this reason, do not put more eggs into the pan that will form a thinnish layer on the bottom.

A Plain One

Since the plain omelet is the basis of a thousand others, we will make one.

Let the pan get hot, and place in it a piece of butter, which, when melted, will do no more than just cover the bottom of the pan. Three eggs is a handy number to start practice on. Break them into a basin, and beat them just enough to mix the yolks and the whites, adding a seasoning of pepper and salt.

A teaspoon chopped parsely may also go into the bowl. Pour the eggs into the pan and let them spread evenly over it.

Shake the pan very gently to prevent sticking, and when the under part of the omelet starts to set, lift up its edges with a thin knife and let more liquid, upper part run down below.

Serve at Once

Before the middle has quite set, fold the omelet over with the knife, and carefully slide it out of the pan onto a hot dish.

Serve it instantly. Commit any other faux pas you like, but never keep an omelet waiting.

After all, it has not kept you waiting, for an omelet is quick magic. Two or three minutes does the whole trick.

"There is still one place in the world where we can find peace—the heart of a child."

—George Jessel.

TRINITY CHURCH NOTES

Eleven members of Trinity Church Girls' Auxiliary attended the annual meeting in St. Paul's Church, Bloor street, Toronto, last Friday evening, April 30th. Reports were given, and the Camp Skits were much enjoyed. Mrs. Wilkinson, a missionary home on furlough from India, was the special speaker, and her address on mission-ary work in India was most interest-ing. Miss Ruby Sheppard and Mrs. Ives received their Missionary Study Badges, and Miss Hilda Haddon ob-tained the Chevron. Short addresses were given by Diocesan officers, and the meeting closed with the Benedic-tion pronounced by the diocesan pre-sident, Dr. M. Cartwright.

Similar meetings of the Diocesan W.A. are being held throughout this week in various churches in Toronto, and senior members of the W.A. of Trinity Church are attending some of these meetings.

The fifth annual Peel deanery & dis-trict local council banquet and dance was held in Trinity church on Wednes-day evening, May 5th. A goodly number was present from the different pa-rishes in Peel Deanery. The hall and tables were appropriately decorated for Coronation Year, and also in the A.Y.P.A. colours. A very appetizing dinner was provided by the ladies of the church. The programme at the banquet table consisted of community singing, led by Dorothy Elston, of Brampton. The toast to the King was proposed by Howard Pallet, the coun-cil president. The toast to the church was proposed by Mr. Tom Goudge of Islington, and Rev. R. K. Purdue, of Lakeview, responded. Miss Rena Giles, of Brampton, proposed the toast to the A.Y.P.A. and Mr. Mancel Ketchem, of Lakeview responded. Rev. Ottley, the newly-appointed Rector of Trinity Church, welcomed the mem-bers of the council to the parish. Mr. Norman Holliss, of Brampton, intro-duced the guest speaker, Miss Sybil Bennett, the only lady barrister in Peel County, who gave a very interest-ing address. A vote of thanks was tendered the speaker by Mr. Chas. Guy, of Brampton. Awards were pre-sented to the branches winning them, in the various activities of the council during the past year. Canon Allen pronounced the benediction. Dancing was then enjoyed with music provided by members of the New Harmony Orchestra.

SERVICES NEXT SUNDAY

Sunday, May 9th: Morning Prayer and Sermon at 11 a.m. In the even-ing at 7 p.m. a special pre-Coronation Service will be held in preparation for the Coronation of their Majesties King George and Queen Elizabeth on May 12th. Rev. E. S. Ottley will be the preacher.

Wednesday, May 12th: As a cor-porate act of Prayer and Dedication, a special Coronation Service will be held at 10.30 a.m. in Trinity church. Everyone in the community is urged to attend this service, which will be con-ducted by Revs. T. D. Jones, J. Y. Fraser, and E. S. Ottley.

Horticulture

The Horticultural Society of Streetsville is getting away to a good start and bundles of plants, bushes and trees have been received for local planting. Among the interesting acti-vities of this alert society this spring will be the planting of the front area of the old cemetery beside the Presby-terian Church. This place instead of being a place of beauty in honor of the dead appears as a desolation and a waste. No one seems to care for the cemetery. The grave stones are almost all askew, tumbling, and the graves are overgrown with rubbish.

To interest the public in beautify-ing the plot within, the Horticulural Society has plans for a frontal plant-ing which when completed calls for the expenditure of considerable energy and money.

Why not transform the plot also. Grave stones of the flat type could be laid down flat and made level with the ground, permitting lawn mowing while the whole place could become a gar-den for rest by the installation of a few benches and a few trees of the smaller varieties.

The SNAPSHOT GUILD
Snapshooter! Spring Has Come!

The family news photographer records the start of the spring baseball practice of a great team. The speed (?) ball was "caught" at 1/250 second at f.6.3.

NOW comes the time of year when according to the poets, "Spring unlocks the flowers to paint the laughing soil," when "The joyous book of Spring lies open, writ in blossoms," when "Spring is in the world and all things are made new."

In the Spring, according to the meteorologists, the sky grows bright-er, the sun stronger, According to the psychologists, the human urge for action also waxes stronger, and, according to the astrologers, Spring is an auspicious season.

Add these all up and the answer is that it is a grand time for picture taking. Beauty, light, action and omens of good luck—all fresh and new—what more promising condi-tions can an amateur photographer ask for?

So, if that camera has been hiber-nating in the closet all winter, get it out, dust it off, clean the lens, load up and start shooting. With even half an eye at what you are shoot-ing at, you are bound to get pictures that will bring you lasting satis-faction.

Pretty backgrounds of flowers and foliage are waiting. Children are out playing, always good subjects for story-telling snapshots, including the young Babe Ruths who are whacking 'em out once more on the sandlots. The season for hikes and auto excursions has begun with op-portunities for beautiful scenic pic-tures of nature in her new dress; also for picnics which simply compel the presence of a camera; also for parades—ta-ra-ra! Have you a good picture of a drum major in your album yet?

And once more along comes the circus where, "under the big top," with extra fast film and an ultra fast lens, you may capture thrilling snap-shots of that young man on the flying trapeze, not to mention revealing close-ups of the bearded lady and, as the circus press-agent would say, perfectly paralyzing portraits of the ponderous pachyderms.

Soon, too, school and college com-mencement celebrations will be with us, and June weddings—outstanding occasions for taking memory pic-tures, always to be cherished.

It's true. Snapshot time is here again. It's Spring! New pictures everywhere! Arise and shoot!

tree is the most useful tree in the world, states a correspondent in Pearson's Weekly. The coconut palm has been established in the island for hundreds of years. Each palm yields from 40 to 100 nuts a year for 70 or 80 years. Copra comes from the dried kernel, and is exported in large quantities for the manufacture of margarine and soap, etc., and desiccated coconut, coconut oil, and coir-fiber, made from the husks of the nuts, are also exported.

But to the Ceylon villager, his coconut trees are not merely his source of income, but his mainstay.

With the wood he builds his hut, and his fishing boat is a trunk hollowed out. His simple furniture is made from the same wood, and his drinking cup is a coconut shell. His lamp is a shell filled with coconut oil, the mat on which he sleeps, his broom and his ropes are made of coir-fiber.

The fresh juice of the young nuts forms his drink, and the soft kernel gives him a staple dish; it's a delicious, jelly-like substance.

Grated coconut eks out his meal of rice, and from the coconut flowers are made arrack and toddy, potent spirits, much appreciated at village festivals. Jaggery, a kind of brown sugar, is made from the juice of the trunk. The beautiful cream-colored blossom, and the tender young leaves are used in every form of decoration in this land of sunshine.

The Tree Is Classed as Favorite of the Forests

There is something knightly about a pine tree. It raises itself on sturdy trunk into the atmosphere, great arms sweeping the air, and shoulders its stalwart bulk against the elements. It can be among the most quiet of trees, producing an utter forest stillness, a breathless hush, or, when roused, among the most tempetuous. It is a communal tree, observes a writer in the Rural New-Yorker, pitched in encampments, marching in mighty armies, but is also to be seen riding along some barren wind-whipped hillside or lonely lake shore. It is somber, dignified, with a protective strength about it.

It is one of those trees that have a personality, not graceful like the white birch, nor domestic like the maple, but a thing of the wild, a little aloof, serene, fearless, with a certain majesty, but the majesty of a strong man of the people rather than of courtly places.

That the pine is a favorite among trees is small cause for wonderment. It can be gentle, as a true knight should be, murmuring low words of consolation and comfort, it has about it something of gloomy romance and mystery, the spirit of moat and castle, in battle its war song rises high on the blast and its great body, assembling all its forces, struggles mightily with the enemy, the grim conflict showing wild against the storm clouds of the cky.

Meaning of "Layman"

The first part of the word "layman" is derived from the Greek "laikos," meaning "of or from the people," and "layman" is most generally applied to the people in general who are not members of the clergy; in other words, to members of the laity. Thus in various churches we have lay deacons, lay preachers, lay elders, lay readers, etc., persons who perform such church duties and continue with their outside occupations. In religious orders lay brothers and lay sisters are occupied chiefly with domestic or manual work. Apart from church usage, the term "layman" is applied to outsiders or non-experts in relation to some profession, art or branch of knowledge, especially with reference to law or medicine.

Discoverer of Eucalyptus

Sir Joseph Banks fitted out a vessel at his own expense and accompanied the famous Captain Cook on his first voyage around the world in 1768, and when they touched the shores of Australia (then called New Holland), Sir Joseph was the first man to see and describe the Eucalyptus which grow by the millions in California. He called them "Gum" trees because of the exudations of gum on the trunks and Gum trees they still remain to us. The Araucaria was first introduced from the Society Islands in the Pacific and named by him, while the same is true of the famous "Bird of Paradise," Strelitzia, which he introduced from South Africa and named in honor of his friend Queen Charlotte Sophia of Mecklenburg-Strelitz.

Rheumatism in Stone Age

Even in the Stone age, some 4,000 years ago, Britons suffered from rheumatism. This was shown by the skeleton of a Stone age man dug up at Notgrove long barrow, in the Cotswold hills, in the west of England. This Stone age veteran showed extensive signs of osteoarthritis, indicating that when alive he was crippled with rheumatism. Experts take this as a sign that the climate of these isles was chillsome in winter.

St. Mark's Decorations

According to the ancient laws of Venice, every merchant trading in the East was required to bring back material for decorating St. Mark's, and every successful general or admiral returning from an Eastern campaign was expected to carry some offering for it. "Not one of the hundreds of columns and capitals within or without the church was originally built or constructed for St. Mark's," writes Arnold Lund in "Venice."

Local Items

Mrs W. E. Watson is visiting with her mother in Toronto

Special Coronation Service in St Andrew's Presbyterian Church, here Sunday afternoon, May 9th, at three o'clock D.S.T.

Come to Streetsville on Coronation Day and help to honor our new King and Sovereign Geo. VI. Something doing all day. Program starts at 10.30 a. m.

Dr. J. B. Wilkes of Toronto wishes to announce that he will open a Dental Parlor in the Bakery Block Streetsville, about May 10th, and will become a resident of our town.

The next regular meeting of the Erindale U.F.O. Club will be held at the home of Mr. Alfred Adamson Monday, May 10th, for which Mrs. H Lee is preparing an interesting program. You are invited to attend.

Probabilities—Getting warmer. May be thunderstorms next Monday or Tuesday —clearing by Wednesday, Coronation Day.

Mary Agnes, widow of the late Percy A. Breakey, passed away in Toronto on Tuesday and was buried in Mt. Pleasant Cemetery this Thursday afternoon. She was a daughter of the late William H. and Mary Jane Wilson of Streetsville, and a sister of Mr. T.H. Wilson, Base Line Trafalgar

Mrs. Harry Rutledge fell at her home and suffered a fracture of one of her legs.

Miss Ruth Sheppard was taken to the Peel Memorial Hospital this week.

Carrol Evans caught the first grass hopper of the season.

The winners at the Euchre Party at St. Josephs Parish Hall last week were Mrs James Farrell and Mrs Pettibone, the latter taking the place of a man.

Mr. and Mrs. Thomas Farrell were at Waterdown last week attending the funeral of Mrs. Lanford who was formerly a Miss O'Connor of the Ninth Line, Trafalgar.

Next Wednesday Coronation Day

Everything is ready for the big Coronation Celebration in Streetsville next Wednesday. The whole program appears on the front page and will provide a whole day's entertainment. The committee has spent a lot of time on the preparation of the program and deserve much credit and congratulation. Be sure and turn out on Wednesday and show that you appreciate their work on our behalf.

GOD SAVE THE KING

Juniors

The Streetsville and Bolton Juniors gave their plays in the Oddfellow's Hall, here, last Friday night when there was a good attendance. Mr. C. D. Graham, Brampton, presided. The program consisted of solos by Allie Sinclair & Doris Waite., guitar selections by Joe Burns : songs and recitations, Anna Sinclair : skits by Joe Lyons and Wilmer Chown, solo Beatrice Jones. Miss Mary Crozier presided at the piano.

Next meeting of the Juniors is to be at the home of Gladys Lambe on Tuesday, May 11th

Outstanding Achievement

Last week we reported Donald MacArthur the winner of the Gold Medal in piano at the Peel Festival. Since then he won the Gold Medal in the twelve year old boys' vocal class heading 28 contestants from all over Peel County. He won the silver medal last year. Considering that Donald is not yet eleven, his double victory marks him as a promising and versatile young musician. He performed creditably at the Final concert at Port Credit.

Coronation Service Sunday Afternoon

A special Coronation service will be held at St. Andrews Church Sunday afternoon at 3 o'clock. The Session of the Church has extended invitations to the Village Council, Public School Board, High School Board and the Streetsville Branch of the Canadian Legion. A cordial invitation is extended to all citizens of the community to join the members of St. Andrews in this fitting service. Mrs. Robert Greig will sing and the address will be given by the minister Rev. John Y. Fraser. 200 service forms have been ordered, containing a reproduction of the service to be held in Westminster Abbey at the Coronation on Wednesday. A copy of this service form will be given to each who attend, and may be kept as a souvenir.

There will be no evening service at St. Andrew's this Sunday.

"Gone With The Winds'

Speaking of books, the other day we asked our worthy Reeve Mr. S. H Foster, how he liked the new books on fiction recently added to the local Library. Well, he said, they may be alright, but there is one entitled "Gone With the Winds," which I have started to read, and have gone far enough with it to know it is not a fit book to be in circulation. I made a motion at the last meeting to have this book banned, and have left the matter for the Book committee to report on at next meeting. The book will be with held for the time being or until the Board decides on its disposal. In many cases books are purchased on the recommendation of certain persons, and the purity of the mind of any person can easily be judged by the class of books he reads. Of course we do not expect the book committee to read all the books in the bookshop before they decide which ones to buy. But the morals of our young people should be protected.

Would Determine Man's Ability

Toronto Professor Believes Psychological Tests Would Find Right Vocation.

WINDSOR, — Not far distant is the time when every child, youth, man and woman will be psychologically tested to determine their abilities, Professor J. H. Levy, of Toronto, industrial psychologist, told members of the Windsor branch, Engineering Institute of Canada.

When that time comes he said, there will be fewer round pegs in the square holes because individuals will know for what vocations they are the best suited, the things they can do best, and the type of occupation they will be happiest at.

"Purpose of the psychological test is not to find out how much you do know," he said, "but to find out how much you are capable of knowing and doing. The thing is to find out what vocation an individual is fitted for. These days too many people are doing what they should not be doing."

For example, he said, a great number of children who take college courses should never go to university. They should be taught instead to work with their hands. As it is now, parents are puzzled to determine just what vocations they should encourage their children to follow, when the whole question can be cleared up by certain proved tests.

Professor Levy explained that there are three methods of determining the capabilities of an individual, the first is to size up the individual by sight, judging him by facial and bodily characteristics. The second is the anthropolical method. Use of measurements of the head and body. The third is the only scientific method, he said, and that is the psychological method. A man's walk is revealing of his make-up, he continued.

"If you see a man who walks with a strut, probably with his thumb that is hooked in the corner of his vest, that means he has a peculiar amount of conceit and pride. The criminal classes have a peculiar walk. They have a slouching walk with a knocking of the knees," Professor Levy said.

Statistics show that 50 per cent of the male students of American colleges and 25 per cent of the female students are working their way right through school.

GARDENING

By GORDON L. SMITH

In the smaller types of easily grown flowers are the alyssums. They are white and dainty and useful for edging. These will grow in partial shade and make excellent edging plants. Portulaca is also recommended. It is a spreading plant with bright yellow, red and pink wax-like flowers. It thrives in dry soil and bright sunshine, and requires little care. In the latter category also come nasturtiums, marigolds, calendulas and petunias.

Zinnias

Zinnias, giant, medium or dwarf size, offer a range of bloom that the busy person can plant with certain satisfaction of a big display of bloom These, except for the tiny affair with close buttonlike flowers, are large plants. The bigger ones will make a height of 18 inches to two feet or more. Colors cover a wide range from dull red, bronze and yellow to bright red and pinks. The blooms somewhat resemble the rose. They grow well in almost any part of Canada.

Unusual Vegetables

Experienced gardeners often make it a rule to try at least one new variety of vegetables every year.

For the "greens" enthusiast, a few plants of Swiss chard will provide an abundance of meals. It is worth investigating as is also broad beans, which come along about midsummer and later. Brocolli, a sort of refined cauliflower, Koli Rabi, a refined turnip, and red cabbage and yellow tomatoes will lend interest to the regular types and provide a slightly different flavor. In many places egg plants and peppers can be grown and will be appreciated. They must be started early indoors. The red type of the latter can be produced in a surprisingly wide area of Canada; there is also the little individual Acorn or Table Queen Squash which is a big improvement over its rather watery ancestors. Leeks add variety to the onion family. Tender white radish lengthens the season for this vegetable, and some of the extra early bantam type will do the same for corns.

HAVE YOU HEARD

One of the encouraging signs of the times is the decline in oratory.

• • •

Marry for money and repent in poverty.

• • •

man.—Do you believe in luck?

Friend—Well, I should say I do. See that fat woman in the big hat and the red dress? Well, I once asked her to be my wife.

• • •

Just because a sleeping man mumbles, "Come kiss sweet Daddy," does not mean he is very fond of children.

• • •

Man—That man Fiddler can talk by the hour on capital and labor.

Friend—That's strange. He has no personal acquaintance with either.

• • •

"A loafer who loafs around loafers is not as bad as the loafer who loafs around business men." Correct.

• • •

Teacher—Tommy, name 5 things that contain milk.

Tommy—Butter, cheese, ice cream and two cows.

• • •

Hope is a fine diet when freely mixed with hard work, prunes and codfish.

Note from teacher on Betty's report card: "Good worker, but talks too much." Note from father over signature on back of card: "Come up some time and meet her mother."

• • •

Leonora—Poor Marian! She is so afraid that George is marrying her for her money.

Lettie—Then why doesn't she pretend she's lost it all?

Leonora—Because she is afraid that he might believe it.

• • •

According to the Wall Street Journal, a certain clergyman reminded his congregation that Eve did not realize she lacked clothing until she ate the apple. "And," he suggested, "it might be a good idea for some of the ladies in my congregation to eat an apple too." Wonder what he meant?

• • •

A gossip is a person who talks to you about others;

A bore is one who talks to you about himself;

A brilliant conversationalist is one who talks to you about yourself.

• • •

Madam — Why do you insist on leaving me after you have been here for thirty years?

Cook—Well, you see, it is this way, ma'am. I don't like to get in a rut.

• • •

The man who is always waiting for business to turn up is a squash.

• • •

The Kid—Father, how soon will I be old enough to do as I please?

The Old Man—I don't know nobody has ever lived that long yet.

DO YOU NEED A BUILDER?

WHEN you are miserable and perhaps in need of a good tonic, weight below normal, and you feel tired out and weak, follow the advice of Mrs. H. M. Rhame of 141 Briscoe St., London, Ont., who said: "For a general run-down condition, nothing did more for me than Dr. Pierce's Golden Medical Discovery. Mother gave it to me and it certainly did help me. My complexion and color were bad, I lost weight and had poor digestion. After taking a few bottles of the 'Discovery,' my appetite and digestion were much improved and I gained in every way." Buy now! New size, tabs. 50c.

Glass Houses

They's Coming Soon With All Accessories to Match

DETROIT. — If you would be different, buttons now can be sewed with glass thread; eggs can be boiled in glass pots and fancy sweaters can be knit of glass. For the home there are beautiful glass curtains.

Guaranteed to catch the eye are a new spring "cravat" for the gentleman, a new glass tablecloth and a set of glass dishes that won't break when they slip from your hands.

These latest developments in the glass manufacturing industry were revealed by Dr. William W. Shaver, research expert of Corning, N.Y., in a speech before the American Institute of Electrical Engineers.

"Years of laboratory research is proving today that there is no end to the multitude of industries in which glass can be adapted," he said.

"Two new processes already have been discovered for the home. They are now on the market. The first is the construction block made of glass which not only may outlast the old type of brick block but allows for more light," he said.

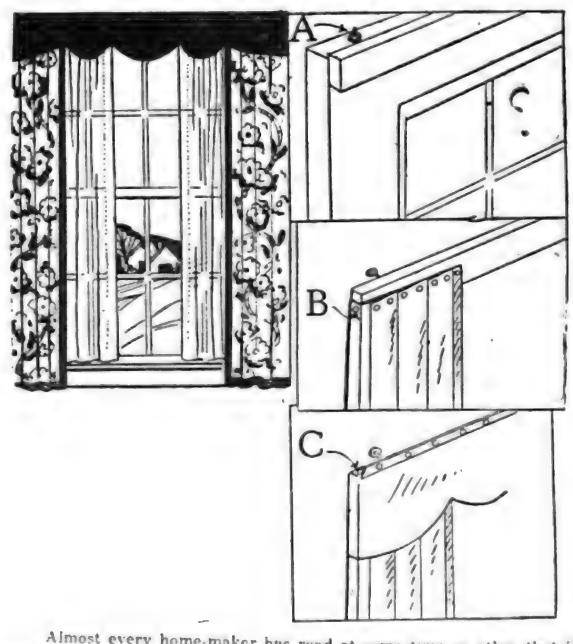
"Then there is glass 'wool'—similar in appearance to cotton — which is used for insulation purposes. It resists all types of weather."

He explained a fibrous glass process which has produced thread, yarn, rope and cloth.

"The glass is melted in huge tanks then drawn out through chutes and finally made into fine fibres one ten-thousandth of an inch in diameter, approximately four inches in length and possesing exceptional strength.

Although the housewife today may be averse to the use of glass pots and pans, glass curtains and draperies already are in some homes and theatres as a fire precaution, Shaver said.

Of special interest, he added, is the development of glassware which does not break when dropped. He demonstrated this by dropping several exhibits from a height of five feet.



Now cellophane-wrapped to keep it factory-fresh. With the easy-opening ribbon for your convenience.

THUMBTACK YOUR DRAPERIES TO A BOARD

By Ruth Wyeth Spears

Almost every home-maker has read at some time or other that if one wishes overdrapes to have a tailored appearance a valance board must be used. Then there follows a description of a complicated valance board that must be especially made to fit each window and one immediately becomes discouraged at the thought of the expense and trouble. Yet, the idea of a valance board is a good one and you can obtain a very smart and finished effect for your drapes by using a straight one by two inch board as long as the width of your window frame.

A small finishing nail in the top of the window casing near each end, and screw eyes placed near the top of the back of the valance board, will hold the board in place as shown here at A. It is very easy to lift the board off the nails when you wish to dust or shake the curtains.

In making draperies, you will find it a joy to be able to fasten them to the valance board before the board is hung up. Plaits and fullness may be arranged just as you wish with the curtains stretched out on the table which is certainly easier than climbing up and down a ladder to do it.

You will need several boxes of tacks to fasten the drapes to the board. First arrange the side drapes in flat plaits and tack them to the ends and across the front of the board as shown here at B. Now, fold the end of the valance clear around to the back of the board so it cannot possibly show from the front and tack the valance to the top of the board as shown here at C. In tacking, the valance should be stretched just tight enough so that it is perfectly smooth. The valance shown here is made of glazed chintz and matches the glazed chintz border that faces the edges of the side drapes. The glass curtains may be hung just inside the window frame or to the bottom of the valance board.

NOTE: Mrs. Spears' new book "SEWING, for the Interior Decorator" contains 47 other fascinating things to make for the home. Now ready for mailing upon receipt of 14c (10c plus 4c postage). Address: Mrs. Spears, Room 421, 73 Adelaide St. West, Toronto.

Nursery Stocks Proper Handling

By observing a few simple rules in the handling of trees and shrubs as they are received from the nursery, many losses from newly planted nursery stocks would be avoided.

Nursery stocks are packed so as to reach the customer in good condition, and as soon as the box or bundle is delivered it should be opened. Packed snugly together as they are, the plants often overheat. Delay of a day or two during a farm Spring spell may cause severe injury from this cause. This is particularly true of roses and strawberries. If because of delay in transit or for other reasons the stock is shriveled, the stock may be restored to freshness by soaking in water for several hours or overnight by planting, or by burying both roots and tops for a short time.

If the stock can be planted at once, so much the better, but if it cannot, it can be held in good condition by "heeling in," that is, by digging a shallow trench in some sheltered spot and setting the plants at an angle, and covering the roots with soil. A common method is to throw the dirt on the far side when digging the trench. The stock is placed, slantwise in the trench, with the tops against the shoulder of fresh dirt. Then the roots are covered by digging a second trench parallel to the first, this time throwing the dirt ahead on to the roots. The plants may be left in this condition for weeks until the ground is ready to receive them.

During the planting operations, undue exposure of the stock should be avoided. A piece of burlap or a shovelful of earth thrown over the roots will help materially in reducing the losses from drying out of the roots.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A sure bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

When ENGLAND CROWNS the SIXTH GEORGE

God Save The King!
Long Live The King!

FROM THE moment he enters Westminster Abbey, wearing robes of red and Cap of Estate, to the time he leaves, clad in royal purple and wearing the Imperial State Crown, the King is the centre of a great religious service, which were developed at the Court of the Byzantine Emperors, who ruled from Constantinople, after the division of the Roman Empire.

His first act is to kneel in private prayer. Hir second to face his peoples so that they may express their willingness to accept him as their King. Not until, "with one accord of heart and voice," they have cried "God Save King George," signal that they wish him as their ruler, can he be crowned.

He must face them all. Four times he is "presented" to his peoples as he stands erect, bareheaded, close to the Coronation Chair. At each presentation he faces a different direction, showing himself "to the people at every of the four sides."

He must promise, too, to abide by the laws and the customs of those he is to rule.

For the first time, Canada will be referred to in the Coronation Oath. Since George V ascended the Throne, the dominions have attained full nationhood, and the oath has been amended so that George VI will:

"Solemnly promise and swear to govern the people of Great Britain, Ireland, Canada, Australia, New Zealand and the Union of South Africa according to their respective laws and customs."

At a given signal the guns from the Tower of London broadcasts the news that the King has been crowned.

Prayer follows, the Archbishop of Canterbury saying, "God crown you with a Crown of Glory,'" and the choir follows up with that memorable hymn, "Thou has set a Crown of Pure Gold upon His Head."

The King is addressed by the primate: "Our gracious and noble King, we present you with this Book. Here is wisdom . ." and present him with the Bible.

The Bible returned, the Benediction is sung.

The King then leaves the Coronation Chair, and ascends to his Throne, surrounded by his Lords and Officers of State.

The words then spoken: "Stand firm, and hold fast from henceforth the Seat of State of Royal and Imperial Dignity."

And a great silence reigns in the Abbey.

Then comes the Royal Procession —the King, carrying his Sceptre, passes through the door on the South of the Altar into Sir Edward's Chapel.

At the same moment Queen Elizabeth descends from her Throne and enters by the door on the opposite side.

Before St. Edward's Altar King removes his mantle and Sacred Vestments, and is clothed in his Robe of Purple Velvet.

The Coronation Crown then changed for the Imperial State Crown, since St. Edward's Crown is used for the Coronation only.

Queen Elizabeth, carrying the Septre with Cross and an Ivory Rod with Dove, passes to the West Door of the Abbey.

Together in stately, awe-inspiring procession along the route arranged for Coronation Day, the King and his Queen passes towards Buckingham Palace.

The Muse of Monarchy

The English sovereigns fare none too badly as versifiers. Henry VIII was a fluent lyric-writer, and the poems by Elizabeth and James I do credit to the royal ears. Inspiration seems to have deserted our monarchs after the seventeenth century.

Princess Elizabeth, heir-presumptive to the British Throne, who recently celebrated her 11th birthday, will wear her own special coronet on May 12th.

"Vivat Regina Elizabeth"
"God Save The Queen"

AND AS SHE passeth by the King on his throne she shall bow herself reverently to His Majesty.

Not until the King is on his throne does the coronation of his Queen commence. When it is ended she ascends to her own throne at the King's left hand, two steps lower than that of His Majesty's.

She does not pay homage to her liege lord, as all others have done by the time she ascends her throne. Princes and dukes and the representatives of each and every degree of nobility have kissed her husband on the left cheek as token of their fealty.

She, his wife and queen, is called upon only to "bow reverently."

With him she heads the procession into the abbey, robed in purple and wearing a circlet of gold. With him her first act is to kneel in prayer at a faldstool before her chair or state on the south side of the altar. From this chair of state, which she does not leave until she kneels at the altar for prayers before her own coronation, she sees the anointing and crowning of her husband as he sits in King Edward's chair.

Her anointing and crowning take place on a faldstool set between the coronation chair and the altar. Four peeresses hold a rich pall of gold over her while she is anointed on the head, the Queen's ring placed on the fourth finger of her right hand, and the crown placed on her head. Her crowning is the signal for all the peeresses to put on their coronets.

She kneels beside the King at the altar for communion, and like him offers up an oblation of a pall or altar-cloth, and an ingot of gold. The gold is a "mark-weight," approximately eight ounces.

One more the King and Queen are separated before, side by side, they leave the abbey to meet the loyal cheers of their subjects. As they enter St. Edward's Chapel to prepare for the state drive to the palace, the Queen crosses before the altar to use the door on the north side while the King enters the door on the south side. They meet inside the chapel. The separation is of seconds only.

The Abbey

The present Abbey, was consecrated in 1065 but there was a church on its site long before that. According to tradition in the reign of the Saxon King Sebert some fishermen on the Thames saw a bright light appearing on the Lambeth side. Going over to investigate they saw a venerable old man who asked to be conveyed over the river. When he landed where the Abbey now stands, the locality became illuminated with a celestial glow of great splendour, while a host of angels descended.

The stranger marked out the site of the future church with twelve crosses, then said to the fishermen: "I am Peter, Keeper of the Keys of Heaven. Tell your King and your Bishops what you have seen".

The church built by Sebert was destroyed by the Danes, but was rebuilt by Dunstan. In 958 it became a Benedictine Abbey, but it was Edward the Confessor who really founded the splendid structure we know today. Unfortunately the saintly, if weak-willed King was too ill to attend its consecration in 1065 and died that year after building for himself a magnificent Royal palace on the site of the present Houses of Parliament.

Edward the Confessor, the last of the Anglo-Saxon kings was the first monarch to be buried in the Abbey His tomb is still a great attraction. His tragic successor, Harold, was the first monarch to be crowned at Westminster.

THE CORONATION THRONE

Coronation Sonnet

By John Masefield

You stand upon the highway of the sea,
Wherein the ships, your children, come and go
In splendor at the full of every flow,
Bound to and from whatever ports may be.
Through this beginning reign, for years to come,
May fortune set your lot in happy times;
Your seamen saint still marking, with his chimes
Daily, some ship of yours returning home.
Though you are changed from what I once beheld;
Though your remembered hulls are with the coral;
I can not think upon your might unstirred.
O sacred city of the lost sea-bird
May wealth, out-ransoming the ports of old,
Be yours, with spiritual gold and holy laurels.

Princess Elizabeth Will Participate

The Princess Elizabeth, her 11th birthday only a few weeks behind her, has her part to play on Coronation Day.

A special coronet, small as befits her years, has been made for her.

A lesson this, from the last Coronation, when the princess royal, then 14-year-old Princess Mary, to her consternation felt her coronet tumble from her head as she entered Westminster Abbey.

Princess Elizabeth will have enough to do to negotiate the train she will wear without having the added worry of balancing a full-sized coronet. In addition to train, she will wear a velvet robe of scarlet, edged with ermine, the whole over a frilled white dress. White gloves will cover her arms as she raises them to don her coronet, with the remainder of the peeresses, when her mother, Queen Elizabeth, is crowned.

She has no oath to take nor homage to pay. Her uncle, Duke of Gloucester, has that duty. As the remainder of the princes of the blood royal put off their coronets and kneel in their places, he advances to the throne and, kneeling before his brother, the King, swears:

"I, Henry, Duke of Gloucester, do become your liege man of life and limb, and of earthly worship; and faith and truth I will bear unto you, to live and die, against all manner of folk. So help me God."

Then, led by him, each of the princes of the blood touches the crown on His Majesty's head, as sign they will uphold it, and kisses the King on the left cheek in token of fealty. On no other occasion within the Empire does ritual call for man to kiss man.

The pomp and fanfare that go with the crowning of a British king. . . . A view of the procession down the Strand at the coronation of King George V, in 1911.

Six-Hour Wait To See Spectacle

Thousands of people who witness the Coronation procession will spend six hours or more in their allotted seats and take breakfast and lunch on the route.

Similarly, because of the long wait and the length of the ceremonies, members of the 8,000 congregation in the Abbey will be permitted to carry with them—as unobtrusively as possible—sandwiches or other light fare to sustain them till they can return home.

Peeresses will carry lunches in embroidered satchels, matching their Court gowns and concealed beneath their robes. Nor will flasks be forbidden.

Every effort is to be made to save spectators from the endurance tests that were imposed by the long hours of waiting before and after the Coronation of King George V, and Queen Mary, and it is believed that a speeding up will be found practicable.

Experience in handling crowds in recent years shows that great numbers of people can be moved more quickly than in 1911, and that there is no advantage in attempting to close all sections of the route at or about the same early hour.

Sightseers whose positions are on the return route will not be required to assemble so early as on last Coronation Day, when the much shorter route accentuated the traffic problem.

On the route, too, the scheme of arrivals will be flexible, and will allow different sets of ticket-holders different times of arrival, so that the filling of the stands may proceed smoothly and the final clearance of the route be deferred till the last possible moment.

STREETSVILLE REVIEW

Sport Fishermen Ready for Season

Canadian fishermen, bored to tears after telling each other all winter about the big ones that got away, will soon be able to make a fresh start. Spring brings the opening of fishing seasons throughout Canada, and indications from inquiries from sportsmen and information from guides pouring into the offices of A. O. Seymour, general tourist agent, Canadian Pacific Railway, Montreal, are that game fish are going to have a hard time of it.

More people are planning early vacations to take advantage of the fishing while it is at its best. Reports from Canadian Pacific Railway hotels in the Maritimes and Quebec, the Devil's Gap and French River Bungalow Camps in Ontario, and bungalow camps and hotels in the Canadian Rockies, as well as favored fishing centres on Canadian Pacific lines indicate that sportsmen are on the move again. The number of Canadians travelling within Canada and of Americans visiting this country especially for fishing will run into many thousands. In a country the size of Canada, and with its variety of fish and conditions, opening seasons vary widely in the different provinces, a fact shown in fishing booklets obtainable from all Canadian Pacific Railway agents.

HOPE

"The good man's hope is laid far far beyond the sway of tempests or the furious sweep of mortal desolation."—H. K. White.

"To calculate one's life-prospects from a material basis, would infringe upon spiritual law and misguide human hope."—Mary Baker Eddy.

"You cannot put a great hope into a small soul."—J. L. Jones.

"We do not raise our hands to the void for things beyond hope."—Rabindranath Tagore.

"The worldly hope men set their hearts upon turns ashes—or it prospers; and anon, like snow upon the desert's dusty face, lighting a little hour or two—is gone."—Omar Khayyam.

"No affliction nor temptation, no guilt nor power of sin, no wounded spirit nor terrified conscience, should induce us to despair of help and comfort from God."—T. Scott.

District News

Cooksville Juvenile Choir, thirty voices, took first place in the contest at the Peel Musical Festival at Port Credit in class 144. Cooksville School, six rooms and under, won first in class 140. Huttonville School took first for schools of three rooms and under. In piano sight reading, Phyllis McFadden, Cooksville, won a silver medal, and Edna Kee, Cooksville, a bronze.

David C. Graham, Brampton, was sentenced to six months in the Ontario Reformatory by Magistrate L. J. C. Bull, on a charge of stealing coal.

There are now only fifteen families on relief in Milton, which indicates that things are improving in Halton's County town.

Hon. Duncan Marshall, Minister of Agriculture for Ontario, addressed a meeting of Shorthorn breeders in Milton last Saturday afternoon.

James McDowell, age 70, passed away at Hornby last week. He is survived by his wife, formerly Mary Boyd, and one son, two sisters and five brothers. Funeral took place to Milton cemetery.

PINECREST CAMP NEWS

Boys' Camp—Sat., July 3—Mon., July 12.

Girls' Camp—Wed., July 14—Thurs., July 22.

The Pinecrest Camp Committee are again making plans for camp this year. Any boy or girl of Peel County, who is between the ages of 12 years and 16 years, may come. No one over 16 years or under 12 years will be eligible.

The cost will be the same as before—50c registration fee and $4.50 for board. Campers outside Peel County may attend for $1.00 extra board cost.

Pinecrest Camp has been successfully operated for 8 years. All precautions are taken by the Camp Committee to ensure the boys and girls a healthy beneficial holiday. Milk and water are tested before camp opens. The grounds, kitchen, etc., are kept clean and are well disinfected every day. The tents are in good condition and do not leak. The leadership consists of a Director, Nurse or First Aid Man, Swimming Instructor, Sports Director, 5 Group Leaders to teach Bible Study and Interest Groups, 3 experienced women to look after the meals, and for the girls' camp a night watchman. The night watchman is a new innovation to be tried out for the first time this year, and we are confident that it will be a great improvement.

We are making an appeal to the parents to take advantage of Pinecrest Camp, Norval, and send your children to it for a real holiday this year.

Michigan Jack Pine Does Not Mature for 80 Years

Considerable has been said in the past regarding the large amount of mature jack pine that may be found on state-owned lands, particularly in state forests. Most of these reports emanate from those who would like to see this timber harvested for commercial purposes, writes Albert Stoll, Jr., in the Detroit News.

A careful check of the state holdings would reveal that there is very little, if any, so-called mature jack pine on these holdings. What undoubtedly is meant is the merchantable jack pine. Under the most favorable growing conditions jack pine matures in Michigan at about eighty to ninety years of age. It is conceded, however, that before this period much of this forest growth becomes merchantable for pulpwood, box wood, railroad ties and the like, but it is by no means mature. Even after reaching maturity, if fire and disease are eliminated from these stands the trees may persist for many years longer without deteriorating.

Reforestation in Michigan did not begin until 1904, and even the oldest of our jack pine plantations are far from being mature today. It is quite true that some of the land which reverted to the state did contain a fair stand of natural jack pine which is approaching close to maturity, but there is so little of this that the state would be unwarranted in attempting to harvest it.

The jack pine tree of northern Michigan, while not as valuable commercially as other species of pines, or hardwood, has gone far in covering the lumbering and fire scars of the past generation and has a distinct recreational value.

Commodore Hull's Sword Rests in U. S. Academy

The sword that signaled "Cease Firing!" at the end of one of the United States navy's most important victories rests at the United States Naval academy, at Annapolis, Md., notes a writer in the Washington Post.

The sword was that of Commodore Isaac Hull; and the victory, that of the United States frigate Constitution, called Old Ironsides, over the British frigate Guerriere in 1812.

The Constitution encountered the Guerriere of Halifax, Nova Scotia, August 19. In less than an hour, the British man-o-war was a total wreck.

This victory was the first major triumph for the infant United States navy and established out nation as a ranking sea power.

When Commodore Hull, then a captain, returned to shore, his native state, Connecticut, presented him a new sword in token of his achievement.

He gave his old sword to Lieut. Stephen Decatur La Valette, an officer on the Constitution, whose descendants donated it to the Naval academy.

Origin of Word "Cop"

There have been advanced a number of stories as to the origin of the word "cop," as applied to policemen. The word cop is supposed to be derived from the Old English verb to cop, meaning to catch, to get hold of, to nab. This meaning is retained in the slang expression to cop off, meaning to grab; to make away with something sought by others. In England, a policeman is often called a copper, that is, one who cops or catches offenders. As applied to a policeman, the word cop dates back to 1859. The verb cop, as used in dialect English, has been traced back to the Seventeenth century. There is no evidence that cop was originally the abbreviation of constabulary of police. Another story of the origin of the word is connected with the following: In 1829 Sir Robert Peel organized the first modern police force in London. Members of the police force wore blue uniforms with very large copper buttons. These buttons gave the police the name copper, shortened to cop.—Literary Digest.

Born in February

Among famous Americans born in February besides Lincoln and Washington, there are Horace Greeley, born on the 3d, in 1811; Aaron Burr, on the 6th in 1756; William T. Sherman, February 8, 1820; William Henry Harrison, ninth President, February 9, 1773; Samuel J. Tilden on the same date in 1814; Thomas A. Edison, February 11, 1847; Daniel Boone, the same date in 1735; Elihu Root, February 15, 1845; Edgar Allan Poe, February 19, 1809; James Russell Lowell, February 22, 1819; "Buffalo Bill" Cody, February 26, 1846, and Longfellow, February 27, 1807.

Home of Mongol Peoples

Mongolia is the home of the Mongol peoples, who have, at various times in history, overrun neighboring territories and established military empires. The largest of these was the Mongol empire, which dominated Asia and part of Europe in the Thirteenth century. Mostly tribesmen, says the Washington Post, they live in felt tents called yurts, depending on vast herds of sheep, horses and camels for their living. Nearly a third of the men are Lama priests.

Saying, "How Do You Do?"

The Anglo-Saxon's "How do you do?" is the German's "Wie geht es Ihnen?" (How does it walk you? How do you progress?) the French equivalent for "How do you carry yourself?" "How do you dress yourself?" and the Latin's "Comme sta?" (How do you stand?) The Arab, whose religion leads to war, will never salute a Christian with "Salaam-Alelkum" (Peace be with you).

FOR FLETCHER'S
CASTORIA

The Open Column

"There is a spirit of unrest in the land—". Time and again those words have been fired from the platforms of political meetings at the heads of gullible crowds. And now, by Heaven, there is a spirit of unrest in the land, and still the political moguls of the country are talking, talking, talking.

The more observant of the voters are disgusted. Hepburn took a firm stand against the C.I.O. The biggest and most solidly independent Conservative paper in the country, The Evening Telegram, gave credit where credit was due, according to its policy, and endorsed his attitude to foreign agitation.

Whether the Premier's stand on the C.I.O. was a matter of honest conviction, or a foxy political move to upset the Conservative applecart, would be difficult to say. But the latter eventuality has developed. Col. Drew, the most forthright man under the Conservative banner, has withdrawn from the party, while his leader, Hon. Earl Rowe, is shouting that the Canadian workman shall have the right to organize when, where and how he shall see fit.

The Conservative party is wasting unnecessary breath in support of this supposition. The Canadian workman has had that right as long as he has had the franchise, subject to Section 98 of the Criminal Code, which section of the Code was waved as a glorious banner by the Conservative party in an election not long past.

But Mr. Rowe and his henchmen, apparently, cannot support an act or policy originated by the Liberals, and must to a quick 'bout-turn to retain their appeal to the voter. Or so it would seem. Bennett stood against a march on Ottawa, yet Rowe insists that workmen must be allowed to organize as they see fit. Undoubtedly, a platform embodying the principles of both of these policies would be fitted together by an astute political leader. But we are of the opinion that it would be a very shaky platform, and that the leader who stood upon it would have to fill his chest with the lightest of "gas" to make it buoyant enough to support him.

At the same time, the Liberal provincial administration found the unemployment question too much for them. In many cases they handed back administration of relief to municipalities, unable to cope with the incessant demands of the unemployed for greater and greater concessions. Thus, both of the old-line parties are unable to handle the situation, and we have a flock of new political faiths springing up, offering to run the country. But it is noticeable that each and every one of the parties, old and new alike, cater first to the unemployed, and then to the taxpayer. "We cannot let our citizens starve" is the universal slogan, rendered with various degrees of unction by the political seekers.

Meantime, communism is gaining a more firm hold of the Dominion every day. Not necessarily communism sponsored and directed by the Soviet government, but the spirit of sharing communal wealth without working for it. At a recent meeting of the Toronto Township Council a single unemployed man was protesting the action of the council in cutting off his relief voucher. He was told that, within a week, he and his fellows were to be given steady work for the summer. Without pausing to draw another breath, he immediately began to protest against the scale of wages to be paid on the job which had been obtained for him.

Day after day, throughout the summer, during the past three years, men who have been on relief have turned down farm jobs. They have been receiving a better living at the expense of their fellow-citizens than they would obtain if they took work on farms. And yet, without ceasing, they have claimed that they are being starved, and have asked for greater allowances of this, that and the other.

There is little or no need to mention the fact that the farmers, who pay a considerable portion of the taxes of the province, by reason of their large holdings of land, are fighting with their backs to the wall. Last year's drought, and the current wet spring are bringing predictions of food shortages this winter. But will the unemployed get out and dig in gardens to provide their own vegetables for the winter? Not many of them.

So, there is a spirit of unrest in the land—. An educated man of our acquaintance predicts that the answer to the situation will be a sudden, determined organization of Fascism in Canada. And should the country come under the dictatorship of a Fascist party, the lot of the suffering "reliefee" will become one of sorrow—and toil.

Craig Reid, Norval, has been elected president of the Halton Holstein Club and Archie Gates, Milton, secretary.

Mrs. Elizabeth Ritchie Carroll passed away in Toronto on May 9 and was buried at Port Credit. Her husband, John Carroll, survives.

McLEAN—WATSON

A quiet wedding took place at the home of the Rev. N. D. McKinnon, Toronto, late pastor of the Norval United Church, when Miss Clara Dorothy Watson, daughter of Mrs. Watson and the late Robert Watson of Norval, became the bride of Archie D. McLean, of Tottenham, son of Mr. and Mrs. Douglas McLean, Mono Road. The bride, who was unattended, wore a frock of pale pink crepe, with matching hat, and bouquet of deep pink roses. Following the service, the bridal couple left immediately for Tottenham, where they will make their home.

The bride, during the week prior to her wedding, was tendered showers by the Friendly Helpers' Class of St. Paul's United Church, Brampton, and by ladies of the Norval district. She was also the recipient of a presentation from the Melody Boys' Orchestra of Norval United Church.

District News

Adrian Disher Pointer, aged 57, passed away in Toronto. Funeral took place to Churchville cemetery Saturday afternoon. Deceased was a native of Churchville.

The Executive of the Peel-Halton Ex-Wardens' Association met at Brampton Saturday afternoon and decided to hold a banquet in the fall, at Milton, instead of the usual picnic.

Orlo Wilson of Lakeview was sent down for 30 days for stealing an auto by Magistrate Bull at Brampton, last week.

The funeral of the late Katharine Brown, Port Credit, took place to St. Mary's R.C. Cemetery, Monday morning. She is survived by two daughters, Clotilde Brown and Mrs. Agnes Grix.

Charles Taylor, who died in Toronto on May 6th, was buried in Palermo cemetery, Halton County.

A coronation service was held in Cooksville United church last Sunday evening, conducted by the pastor, Rev. G. M. Chidley.

Peel Women's Institute annual convention will be held in Brampton on May 25th.

Cooksville Intermediate Softball Girls' team has been entered in Highway Inter-Church Softball League. Miss Beulah Tommey is the secretary.

William Scaife died in Toronto on May 8 and was buried in the Anglican Cemetery, Port Credit. He was in his 89th year. One son and one daughter survive. He spent many years in Port Credit.

Mr. and Mrs. Art Lymer, Brampton, and Mr. and Mrs. Stook, of Tavistock, visited at the Turney home over Sunday.

3500 spruce and elm trees have been distributed to pupils of Halton County schools. They are known as coronation trees and were planted around the homes of the pupils.

ENGAGEMENTS

Mr. and Mrs. James D. Soules, of Oakville, announce the engagement of their daughter, Peggy, to Mr. Ralph Richardson, son of Mr. and Mrs. S. J. Richardson, of Toronto. The wedding to take place on June 15th.

The engagement is announced of Irene Eleanor Bentley, youngest daughter of Mrs. Godfrey Bentley and the late Mr Godfrey Bentley of Streetsville, to Reginald Norman Broadbear of Brampton, youngest son of Mr. and Mrs. Frank Broadbear of Streetsville.

Mr. and Mrs. George H. King of Kingsholm, Oakville, announce the engagement of their eldest daughter, Mary Elizabeth, to Rev. Hugh Grant Cleghorn, Hanover, son of Mrs. J. O. Cleghorn and the late J. O. Cleghorn, Guelph. The marriage will take place on June 12, in Knox Church, Sixteen.

At a dinner meeting at Port Credit on Friday night attended by Lions from Toronto, Brampton, New Toronto and Newmarket, the Credit Valley Lions Club was founded and officers elected for the year. B. L. Cope, Port Credit, was named president with W. G. Denison, ex-reeve of Toronto Township, and Reeve E. D. Maguire, Toronto Township, and William McCord, Clarkson, vice-presidents; Paul Sayers, Cooksville, secretary; L. R. Whiting, Cooksville, treasurer; C. B. Haney, Port Credit, Lion tamer; R. Victor Thorne, Cooksville, tail twister.

LET US SMILE

Heard in a Glasgow bus.

First Passenger—I see another airman has flown to Australia.

Second Passenger (unimpressed)—Uh.

First Passenger—Yes, in two days and four hours. It's amazing.

Second Passenger—Oh, I dunno. It's a' doon hill.

Coronation Day Well Celebrated Here

Streetsville did herself proud in the celebration of the Coronation of their Majesties King George VI and Queen Elizabeth, on Wednesday, May 12.

The program opened at ten-thirty in the morning with a special service in Trinity Anglican Church, conducted by Rev. E. S. Ottley, Anglican; Rev. J. Y. Fraser, Presbyterian, and Rev. T. D. Jones, United Church.

About one o'clock the school children assembled on Queen St., near Trinity Church, and were presented with Coronation medals by Reeve S. H. Foster, and others.

Then the parade was formed under direction of Chief F. J. Elderfield and Mr. James Lacey, in which school children, municipal officials, Great War Veterans, members of various lodges and citizens took part. There were decorated cars and bicycles and many artistic floats. The parade passed along Queen St. to the United Church, to Victoria Ave., to the Presbyterian Church, and then up to the cenotaph, where Reeve S. H. Foster acted as chairman, and addresses were given.

Then the sporting events took place on the public school grounds—with baseball games, races, etc.

A big attraction of the day was the parade of elephants, camels, llamas and donkeys, kindly loaned by Mr. A. W. Miles of Toronto, who sent along a number of trainers to take care of them. We believe Mr. W. C. Arch and the veterans were instrumental in securing the circus for the event. Everybody, from the oldest to the youngest, took great delight in watching these animals.

In the evening there was a lacrosse game and a street dance. Motion pictures were shown

about nine o'clock, and later there were more motion pictures and community singing. There were fireworks on the public school grounds and a large number enjoyed a dance in the Odd Fellows' Hall.

Everything was free and everybody had a good time. In fact, we believe that they enjoyed themselves better than if they had gone to England to witness the coronation itself.

The committee in charge of the celebration consisted of Len Lee, chairman; W. Potts, Ross Evans, Fred Noble, Wm. Arch, Jim Sinclair, Frank Reid, C. P. MacArthur, R. Langmaid, H. Q. Burns. They all worked hard to make the event the big success it was, and deserve a large amount of credit and congratulations.

The village was well decorated for the occasion. There were flags galore on the streets, on business places, public places, etc., and business people had their windows nicely decorated. Many exhibited pictures of the new King and Queen and a great spirit of loyalty and patriotism was exhibited generally. The churches also took a prominent part and held special services on Sunday.

It was a day long to be remembered and everybody expressed the wish that our new King and Queen may long be spared to enjoy their exalted positions.

GOD SAVE THE KING

SNIDER'S

A combined Mothers' Day and Coronation service was held at Wesley Church Sunday.

Lloyd Pickering is recovering from a severe attack of the flu.

Mr. D. Turner visited at the home of his nephew, Gordon Turner, Montreal, over the week-end.

Miss Grace Fish and Miss Mary Shea attended the meeting of the Junior Institute at the home of Miss Jean King, Sixteen, last week.

The public school was closed on Monday owing to the illness of the teacher.

The members of the G.T. Club held a special party on Thursday evening at the hospitable home of Mrs. Gordon Post, in honor of two of their members, Mrs. Norman Campbell and Mrs. Gordon Levack, who are leaving the district. The evening was spent in card playing. Mrs. W. Dent received the prize for the highest score. On behalf of the members Mrs. Post and Mrs. Elmer MacLean made the presentation of a handsome piece of glassware to each of the two retiring members, and expressed the wishes of all for a prosperous future. The ladies responded graciously and a social time was enjoyed until early morning.

COMMUNITY CLUB

The meeting on April 20 was held at the home of Mrs. W. Atkinson, with a good attendance. Mr. T. D. Jones gave a very interesting talk on the Communist situation. Mrs. Greig favored us with a solo. The last meeting was held at Mrs. M. Hamilton's. After the business a game of euchre was held, taking the place of a program. The prize winners were Mrs. Sanford and Mrs. Williamson, consolation. Next meeting will be held at Mrs. Durant's on May 19.

Work of paving the Middle Road, from Centre Road, west, has been started.

Mrs. Bamfield, Toronto, was the special speaker at a Mothers' Day Service held in Malton United Church last Sunday evening.

Mr. T. Wilson has sold his farm on the base line, Trafalgar, to Mr. A. G. Crozier, Cooksville, R.R. 1.

Mr. F. L. White and Mr. Norris, from the Milton Champion, visited the editor of The Review last Thursday.

Port Credit tax rate for 1937 has been set by the village council at 57.25, over ten mills higher than Streetsville.

HIGH SCHOOL REPORT

In April, students were examined in all subjects. Individual reports show the pupils' weak subjects if any. These are to be signed and returned this week. The standing and average mark to the nearest percent is given for each Form:

Form I.—Ed. Schnurr 77, Norma Rundle 74, Bob Fielding 71, Alan Trimble 70, Margaret Quennell 66, Hazil Aisthorpe 65, Clive Green 64, Betty Reed 62, Bill Crane 61, Betty Earl 61, Evelyn Wilson 60, Ruth Sheppard 59, Bill Millar 59, Jean Rice 59, Bill Evans 54, Mary Curran 53, Maurice Workman 50, Loretta Rutlege 50, Isobel Workman 49, Grenville Reed 48, Luella Wolfe 44.

Form II.—Eleanor Steen 73, Frank Reid 70, Orville Schnick 69, Ilah Featherston 64, Mildred Stephens 64, Jim Lumbers 59, Wilma Hamilton 56, Harry Hollingshead 55, Jack Fellows 54, Marion Steen 53, Lorrine Beattie 50, Lois Rundle 44, Margaret Gresche 44.

Form III.—Mary King 76, Verna Dowling 62, Dorothy Durie 60, Muriel Mason 59.8, Kathryn Reid 59, Roswell Arnott 59, Hugh Lamb (pt. II) 58, Jack Rice 55, Beatrice Jones 54, Ferne Crozier 54, Jack Trimble 53, John Hamilton 49, Gladys Lamb 48, Richard Gresche 47.

Form IV.—George Schnurr 72, Elma Sparling 71, J. Herb. Fellows 67, Frances Noble 66, Herb Wilson 64, Verna Sparling 62, Ruth McGill 58, Marjorie Trimble 57, Doris Waite 56, Lloyd Hope 54.

Further tests at the end of the month will be given to determine recommendations and promotions. Departmentals start here on June 16th.

C. P. McARTHUR,
Principal.

H. S. BOARD

Streetsville High School Board held their regular meeting Monday night, with five members present. O. R. Church presided.

Mr. Craig, architect, Toronto, addressed the board re proposed improvements in the school accommodations for the village.

It was decided to purchase a lawnmower for use of the caretaker.

Some accounts were passed.

Owing to the uncertainty of the school situation, the board felt it advisable, in the best interest of all concerned, that the present staff be asked to tender their resignations, to take effect at the end of June, 1937.

COOKSVILLE

Joe Kapolka is in the Peel Memorial Hospital with severe lacerations about the head, John Stchynski is at home nursing similar but less serious head injuries, and Alex Fransizyn is in Brampton jail, facing a charge of assault occasioning grievous bodily harm and with a lacerated right hand, while Toronto Township Constable Sid Belford is left with the difficult task of finding the meaning of it all. The injuries and charges resulted from a brawl on the Dundas highway near the township offices Sunday evening.

Kapolka was taken by ambulance from the scene of the miniature riot to the Peel Memorial Hospital, where he was attended by Dr. Oliver Steen of Streetsville. Constable Belford and Provincial Traffic Officers Fraser Bell, Cooksville, and Ray Hodgson, Brampton, broke up the crowd which collected about the scene of the fight, and then Belford traced Fransizyn to his boarding house and arrested him on a charge of assault. A pair of blood-stained pliers were found by the side of the highway.

Residents of Cooksville were startled by the report that a man had been killed in the brawl, and one man, thought to have been Stchynski, was seen staggering from the fray with blood pouring down his face. Enquiry at the Peel Memorial Hospital later elicited the information that Kapolka's injuries were apparently not serious, but that he was being kept under observation.

The fight was the climax of a busy day for police officers of the district. Earlier in the afternoon an elderly man who refused to identify himself to Traffic Officer Bell was struck by a car in charge of Wm. McHugh, R.R. 1, Hornby. He was attended by Dr. Harold Sutton, and appeared to be suffering from a hip injury. He was removed to St. Joseph's Hospital in Toronto.

Cure for Floods

As has been pointed out many times by expert engineers these floods can be prevented only by carrying out extensive schemes of reforestration, together with the construction of works that will hold back flood waters and fill swamps and low places with water. Schemes of reforestration, while these will be valuable in years to come, provide no immediate remedy. This can be done only by the construction of dams and retaining basins at strategic points. The need extends over the entire province, consequently there must be cooperation between provincial and municipal government if these works are to be carried out economically and effectively. There must be some well planned comprehensive scehme. The recent warning, with its widespread damage, destruction of bridges and other property, together with much human suffering, should not pass unheeded. Without any doubt these floods will become more destructive from year to year.—Brantford Expositor.

Best Friend

A recent nation-wide pole conducted by the Institute of Public Opinion, marking the twentieth anniversary of the United States entrance into the World War, indicates that Great Britin is the most liked European nation among the American people by a wide margin.

Great Britain heads the poll with a fifty-five percent vote, with France second and Germany third. The vote in favour of Great Britain was five times greater than accorded France and almost seven times greater than for Germany. The vote by percentages was as follows:

Britain 55, France 11, Germany 8, Finland 4, Ireland 4, Italy 3, Switzerland 3, Belgium 2, Norway 2, Sweden 2, Denmark 1, Greece 1, Holland 1, U. S. S. R. (Russia) 1, all others 2. — Calgary Herald.

No First Aid

"Because no one knew how to apply a tourniquet," a boy in Sherwin township, 70 miles from Sudbury bled to death from an accidental rifle wound. That incident points forcibly to its own moral. — Kirkland Lake Northern News.

96 Years on One Farm

The oldest resident of Tilbury East Township recently celebrated her ninety-sixth birthday at the farm where she has spent practically all of her life.

In a day when a restless urge impels families and individuals to move at frequent intervals, a life spent in the same spot may seem singularly lacking in what the majority consider most worth while. It may appear secluded, uneventful, dull. But there is another side to the picture.

The old lady of Tilbury has known no other life than that of the farm. She has become part and parcel of her environment. Its interests are hers. The neighbours are her friends. The church, the school, the rural activities, have for nearly a century claimed her thoughts and her time. She has made countless friends and has played an interesting part in the development of the community. — Kitchener Record.

Our Funny Clothes

What will some citizen of the future—draped perhaps in the long and free and flowing robes which the Greeks wore, and sitting in some chromium-plated hades of a room — what will he think of us and our clothes?

The women with their funny bits of pancake perched precariously on their marcelled heads! The men with their stupid dull suits and their intricate collars!

We tremble to think what the verdict of posterity will be upon some of our magazine covers, with those lop-sided, simpering girls, with their hips out of joint and their heads larger than their bodies. That, these people of the future will imagine, was our idea of beauty!

No, the knife cuts both ways. The only thing to do is to live in the present, get what pleasure we can out of looking at our women, with their funny hats, abjure clever younger writers and struggle through the task of collecting echoes of the past, with mental blinkers on. — Hamilton Spectator.

The Return of the Beaver

Of all countries in the world Canada should be interested in the preservation of the beaver, the little animal which was largely responsible for the development of the Canadian north-west, whose pelts were at one time common currency in the territories ruled by the Hudson's Bay Company, but which has been decimated by greedy trappers attracted by the value of its fur. — Fort William Times Journal.

Means Business

Anyone who doubts that Britain is in dead earnest about rearming has only to look at the tax load the Britishers are willing to carry these days.

Before Neville Chamberlain, chancellor of the exchequer brought in his new budget, with its higher rates, the British taxpayer was shelling 22½ per cent of his income to the government in a direct tax. Beyond that he was carrying a load of "nuisance taxes whose weight can be appraised by the size of those affecting motorists.

British motorists have been paying taxes of 16 cents on each gallon of gasoline. They also pay a horsepower tax on their autos, so set up that a man who owns a 25-horsepower car must pay $125 a year for his license.

When a nation that is paying taxes at such rates submits to still heavier taxes for the sake of re-armament, it must be admitted that such a nation is decidedly in earnest about its preparedness program. — Kitchener Record.

The King's Birthday

June 9th, instead of his natal day, December 14, is to be observed in Canada as well as in the United Kingdom as the birthday of King George VI.

We out here and many papers in the East had hoped with The Ottawa Journal the Government would set May 24 for official observance of the Sovereign's birthday. For, May 24th has the appropriateness of royal associations, marking the advent of Summer, coming for Canadians as the first outdoor holiday of the year and at a season when our countryside is fresh and lovely — Victoria Times.

THE EMPIRE

Handbook for Teachers

Being issued by the Board of Education is a six hundred page handbook for teachers.

Points of the Board's new system are that good music is an essential of a child's education, that a girl should begin by learning household duties, such as ironing, cleaning silver and cooking.

Under the new regime, both boys and girls are to learn gardening, embarrassing questions about the child's personal reactions to the sentiments of a poem are to be cut out, are labelled as hypocrisy and sentimentality breeders.

Left out of future history lessons will be details of Henry VIII's matrimonial quibble, intricate policies of modern times. Children are to hear more of swashbuckling heroes like Drake and Raleigh.

Relief to the non-mathematical is that dreaded, long and complex fractions are to disappear. — London Calvacade.

Englishwoman Goes To Court Rather Than Tell Her Age

Bases Refusal on Contention That Plaintiff Would Have to Prove Her Liability

Miss Leslie Hamer, of the May Fair Hotel, London, W., was summoned at Oxford Police Court recently for neglecting to attend a summons under the seal of the Minister of Agriculture and Fisheries. She pleaded "not guilty" and conducted her own defence.

It was stated that Miss Hamer had owned land in Surrey which was subject to a quit rent. The Lord of the Manor had applied to the Minister of Agriculture to have the quit rent abolished and compensation paid, for which, as it was based on the expectancy of life, it was essential that Miss Hamer should give her age. She had refused to do so, and had also refused to attend an inquiry at Oxford when she would have been asked to give her age.

Miss Hamer, in evidence, said her contention was that she was not liable for quit rent on the land and that if she gave her age she would have to prove she was not liable, whereas, at present, the Lord of the Manor had to prove she was liable. She said she did not attend the inquiry at Oxford because the day before she went to the Ministry of Health, and saw an official, and as a result of the conversation she understood that she would try and settle the matter with the Lord of the Manor himself. Miss Hamer said she still refused to give her age.

The summons was dismissed. The case, it was stated, was the first of its kind in England.

Quints Thriving

Gained in Height and Weight During Past Month

CALLANDER, Ont., — Just a month from their third birthday the Dionne quintuplets stepped on the scales and laughed up at Dr. Allan Roy Dafoe as he marked up their weights and measured their height.

Three of the quints have gained in height during the past month and four of them put on weight. Yvonne had a slight cold for a few days and dropped half a pound, but she could well afford it.

Marie, smallest of the quints, produced a tooth, a quarter inch of height and four ounces of weight. She and Emilie lead the teeth parade with 17 each now. The others have 16.

The gain brought Marie's height to 34 inches, the same as Emilie's. Cecile gained half an inch to reach 34¾ inches. Annette put on an eighth of an inch to hit 34 5-8, and Yvonne remained at 34½.

Here are their weights in pounds and ounces with the gain from March 28th:

Yvonne, 30 lbs, 8 ozs. loss 8 ounces. Anette, 31 pounds, 8 ounces gain of 12 ounces; Cecile, 31 pounds, gain of 16 ounces; Emilie, 30 pounds, gain of 16 ounces; Marie, 27 pounds, gain of 4 ounces.

News Parade

By Peter Randal

LABOR MARCHES

There was a touch of summer in the air. Perky little suits and hats bobbed along Yonge Street as their owners attended to the usual Saturday morning shopping. The last strokes of twelve rolled heavily from the City Hall tower and men in new uniforms swarmed down University Avenue. Quiet little knots of people linked into a procession, each recognizing his neighbor by the little red ribbon of organized labor. Workmen, factory hands, shopgirls all formed part of Toronto's annual May Day Parade. There were speeches in Queen's Park and the evening newspapers reported all quiet on the labor front.

But was all quiet? There are those who sense a subtle difference in this year's labor parade. They say it was better organized, larger, while many of the banners carried the letters C. I.O. Mr. Hepburn is one of those said to have sensed the difference. A conference was held with the leader of the Conservative opposition and the subject of discussion hinged on the possible formation of a coalition government to face this new force in the land. The Honourable Earl Rowe is said to have had hurried conferences with Mr. Bennett, who was about to sail for the Coronation, and other members of the Conservative campaign division and the answer, if there was any, was no.

It may well be that the powers had reason to think seriously. Federal authorities estimate a C.I.O. membership in Canada before the end of the present year. Organizers are even now at work in five industries including the automobile industry, the rubber industry, the mining industry, the textile industry and the steel industry. Danger signals have begun to fly all over the industrial map of Eastern Canada. Settlement of the General Motors strike at Oshawa, though not a C.I.O. victory, was far from a definite defeat and the readiness with which the auxiliary divisions of the industry have signed agreements based on the terms of the Oshawa peace pact is ample evidence of the new found power of this organization.

Will labor be satisfied with the meeting of its industrial demands? The actions of government leaders and the opinions of many leading Canadians seem to foreshadow the entry of a new and stronger labor party into politics.

AND THERE

In England they are really kicking about the income tax and with a far bigger reason than the average Canadian. Under the new budget announced by Neville Chamberlain the prosperous Englishman must pay the government one dollar out of every four he makes. There were kicks from without the Conservative fold but also from within. These were the most important as having a possible bearing on Mr. Chamberlain's elevation to the Prime Ministership on the retirement of Mr. Baldwin. But Mr. Chamberlain shrugs his lean shoulders and explains that his "soak the rich" policy is only one means of attempting to raise the price of Britain's rearmament program. $7,500,000,000 is a lot of money but in these precarious times, John Bull thinks it none too much.

FLOODS AT HOME

But Western Ontario had more to worry about than mere economic unrest in the past week. The forces of nature rebelled and the strongest government can do little against rivers which rise twenty-eight feet above their normal levels in the course of a single night. A train was wrecked, houses were dashes to pieces, dams and bridges were swept away. Five people lost their lives, ten thousand were driven from their homes and the repair bill is variously estimated at from $3,500,000 to $5,000,000. Chairman E. V. Buchanan of the London Public Utilities Commission says it will be a year before the damage to the city water system has been repaired. So high has been the loss that a plebiscite on a proposed addition to Victoria Hospital, long a cherished project, has been dropped. According to insurance companies, few people carried flood insurance. For years they have thought of Ontario as a haven of security out of which they might peep at the devastation of flood, famine and dust storms so characteristic of the United States of the Middle West. Now it is a different story. Many are suddenly realizing that these visitations are not acts of God but the results of civilized greed. If Canada has been spared until now, it is only because our capacity has not allowed us to keep up with our American contemporaries. Too many forests have been cut down. Too many swamps have been drained. Some system of water storage must be devised to take the place of these natural distributors. Already engineers are studying the possibilities of controlling the rivers of Western Ontario and it is to be hoped that the results will bear fruit in something more concrete than academic discussion.

BLOCKADE RUNNER

Things are happening so swiftly in Great Britain that it seems almost too much for one government to handle. Many think it is too much and that the present government leaves a good deal to be desired. For instance there is a very indefinite British foreign policy in regard to Spain. For weeks British freighters were forced to lay with rotting cargoes in French ports while thousands of civilians starved in beleagued Bilbao. It wasn't the British navy that took the situation into its own hands, in an attempt to break the blockade of the insurgent Spanish fleet, but Captain David (Potato) Jones of the Seven Seas Spray. With typical bulldog determination, Potato Jones defied the blockade, helped a little it must be admitted, by the presence of a great British battlecruiser which rolled, as if by accident, into the Spanish line of fire. Other food ships have followed the example of the Seven Seas Spray and the blockade is ended. General Franco is said to be plenty angry about it and back in London, Potato Jones is the hero of the hour.

TAX HEADACHES: HERE

There were a great many headaches last week and it wasn't only the stock market. Income tax returns had to be filed. To most of us, a few dollars would look like prosperity but one London, Ontario, man had so much of it that it cost him $4,000,000 in government tribute. An Irishman would say that it almost pays to be poor.

HUMANITY TAKES A HAND

The storm signals are up at Bilbao and the pilots of several Eureopean ships of state are wondering just what will happen next. Last week, the insurgents massacred 800 civilians at the ancient Basque capital of Guernica. The operation was carried out, it is charged by Loyalists, by German planes and directed by German officers. Great Britain and France have determined that such a death shall not come to the 300,000 civilians, mostly women and children, now in Bilbao. Ignoring the protests of General Franco, arrangements have been completed for their evacuation to places of safety on French and British soil. On the heels of this action comes word that Hitler and Mussolini intend to ignore demands that they withdraw their troops from Spain.

POMP AND CIRCUMSTANCE

The war in Spain must take a back seat to the great Coronation pageant to take place in London next week. From far off India, fabulous princes are even now on their way to the centre of the Empire. But the common people of India will not be there. They are protesting against the new constitution imposed upon them by British diplomacy or lack of it. From every Empire country, in fact from the whole world people continue the movement toward London. Great plans have been made for their reception. Hotels are booked to capacity. Seats along the coronation route are selling as high as $200. The parks will be thrown upen the night before the big event for those who want to sleep on the ground. All in all, Great Britain expects to make approximately $30,000,000 out of the big show. But behind the scenes things are not moving as smoothly as they might. 25,000 busmen have seized upon the opportunity to strike for a seven and a half hour day knowing that their demands must be met before the Coronation if traffic is not to become hopelessly jammed. The strike is now on and no settlement in sight.

A KING—RETIRED

In a sleepy little courtroom at Ipswich, a job lot of divorces were made final this week. Workmen were hammering on Coronation decorations outside as the famous divorce case of Simpson was finally closed. It was distinguished from many others of its kind only by a different cypher. A young man in St. Wolfgang, Austria hastily packed his bags and began a dash across Europe. It was soon ended at the Chateau de Cande in France. They say Edward smiled for the first time in months. Wedding plans are in the air and the Empire awaiting the crowning of his brother can but wish him the happines which he gave so much to obtain.

News In Review

North Bay Plans Licenses For All Tourist Homes

NORTH BAY. — Steps to license homes catering to summer tourists were taken by the North Bay City Council last week. Second reading was given to a by-law providing for zoning the city for this purpose, with fees ranging from $10 to $20.

Alderman C. Tremblay was outspoken in his objection. "The rates," he declared, "were unreasonable in fact, the by-law is uncalled for."

Ontario Revenues Soar $2,000,000 Over Estimate

Jumps to $9,313,000 — Actual Surplus Makes More Certain Reduction in Motor License Fees, Announces Premier Hepburn

TORONTO.—This week, Premier Hepburn forecast an actual surplus of $9,313,000 in Ontario Government revenues, instead of $7,343,000 as estimated in his March budget speech.

He attributed the increase from succession duties and stated further that the Lands and forests Department would make "a little more certain" the reduction of license fees for passenger motor vehicles.

In his Budget speech the Premier hinted strongly that the reduction granted commercial vehicle users might be extended to include owners of passenger cars if finances warranted such action. No other cuts in taxation are planned for the immediate future. The savings based on to the taxpayers already total $9,600,000, it was revealed.

Soaring revenues in various Government departments had been responsible for the two-million dollar addition to the surplus, the Premier declared, revealing also that his Government had been able to keep within his forecast of a reduction of $33,000,000 in gross provincial debt.

Rumors of an impending election were groundless, Mr. Hepburn stated. He did not believe, he said, that there was any public demand for an election.

North Gets Planes

SAULT STE MARIE, ONT., — The Ontario Air Service will have twenty-four airplanes for forest fire suppression and detection work this summer, Director George Ponsford has announced. Two new planes are being manufactured at the hangar here.

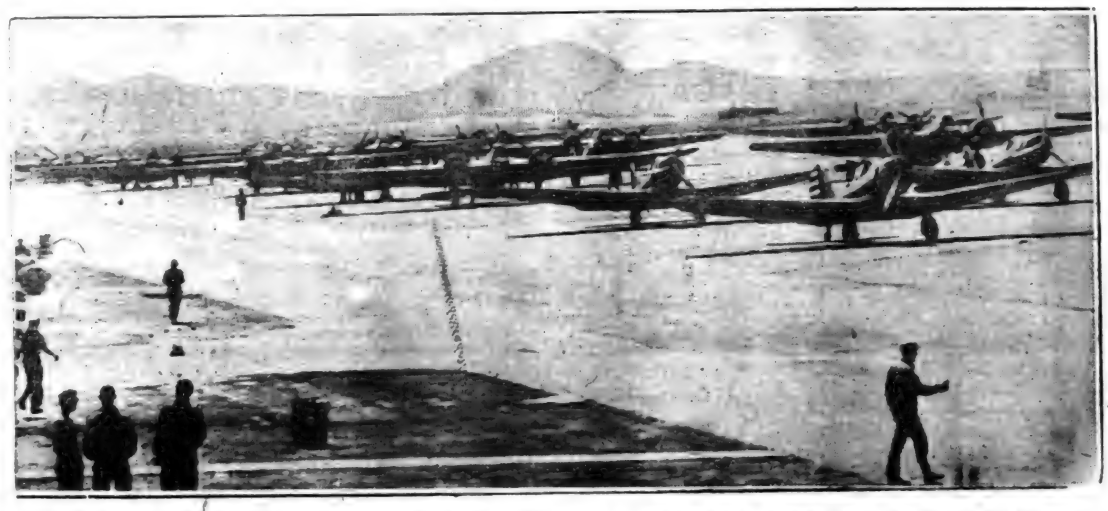
One of the new planes ordered will be placed at Port Arthur and the other at Sioux Lookout. Both are of the semi-transport type, making them available for both suppression and detection flying. They are equipped with two-way-voice radio.

Two aircraft were built in the hangars here last year. The engine is now in a third, while the fourth will not be ready until June.

Canada — Haiti Pact

OTTAWA. — A commercial agreement between Canada and Haiti giving most-favoured nation treatment in tariff matter has been signed Hon. W. E. Euler, Minister of Trade and Commerce announced this week. The pact was signed on April 23rd on behalf of Canada by the British Minister of Port-au-Prince, Haita.

The agreement provides for the extension of most-favoured-nation treatment in tariff matters by each country to the products of the other for a period of one year, but will remain in force thereafter until denounced on six months' notice before being given by either party.



The new commercial agreement assures that Canadian goods imported into Haiti will be granted the benefit of the minimum tariff of that country, in place of the maximum tariff, which is double the minimum tariff.

The chief products exported from Haiti-Canada to Haiti are flour, salted and smoked fish and rubber tires, while imports consist chiefly of sisal, istle and tampico fibre.

B. C. Newspaper Classed Among 11 Best Weeklies

VERNON, B.C., — The Vernon News, published by W. S. Harris, in this town 200 miles west of Vancouver, has been included in the "all-star 11" of American weekly newspapers, chosen by Professor John Casey, the head of the School of Journalism, the University of Oklahoma.

War Game Bombers

A squadron of huge army bombing planes make a picture of deadly beauty as they line up at Murdoc Dry Lake, Cal., before taking to the air for war games.

KEPT IN BED BY BACKACHE

Now — Thanks to Kruschen — Not a Trace of Pain

This woman's life was made a misery by the pains of backache. Then her father, who had proved the value of Kruschen himself, advised her to try it. She did, and here is her grateful letter:—

"For years I have been suffering with pains in the back. At times I had to stay in bed for days. I could not walk, or even stand. My father was using Kruschen Salts for the same thing. He, too, used to suffer badly, and Kruschen relieved him. He advised me to try it. I did so, and did not get a pain for three years. I then neglected my daily dose for about six months, and two months ago the pain returned. I tried another remedy—it failed, so I again started Kruschen. Now I have not a trace of pain, thanks to Kruschen."—(Mrs.) H.R.

Pains in the back are usually due to impurities in the blood — waste products which the internal organs are failing to expel from the system. The numerous salts in Kruschen assist in stimulating these organs to healthy, normal activity, and so help them to keep the system free from harmful waste matter.

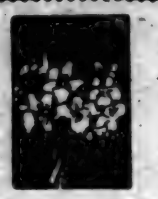
Three New 1937 Cream Separators To Be Given Away In Contest

The manufacturers of the Anker-Holth Cream Separator announce a novel contest in which the company will give away three of its 1937 streamlined Chief Models with stainless steel discs and White Duco finish. Those who participate in the contest need not buy anything to enter—it is open to anyone except Anker-Holth dealers and their employees and employees of Anker-Holth Manufacturing Company.

Each contestant is to state in his own words, as many or as few as he likes, why he wants his next cream separator to have a self-balancing bowl and be guaranteed in writing to be self-balancing. That is all there is to it. To each of those sending in the three best answers, the manufacturer will ship, all charges paid, one of these new 1937 models.

Poultry Keepers

A Bargain For You



The last 100 complete sets of the famous Cold-Belt Poultry Course—to be cleared at a sacrifice. Discontinuing the Course. It will not be reprinted.

Here is an opportunity of a life time to get a real, practical, authoritative Course in Poultry Farming for a mere song—a Course taken by hundreds of successful Poultry Farmers. It consisted of 30 lessons and instructions by correspondence. Now we are discontinuing the Course and offer the 30 lessons only, bound neatly in a book form, for only $5.00. There are about 100 sets left and we are clearing them out quickly. Send firstly only 25c to cover postage and handling. We'll send you the complete set of 30 lessons. Keep them 10 days and if they are not all we claim them to be, just mail them back. If they please you, keep them and send a further $1 every month for 5 months. That's fair enough.

GARDENING

By GORDON L. SMITH

During the early part of the season, a little cultivation every week will help plants along wonderfully. The purpose is two-fold. Unsightly weeds are killed and valuable moisture is conserved. Growth is hurried along. Later on as the flowers or vegetables develop it will not be necessary to cultivate so often. Sometimes a mulch of short straw or grass clippings is used to retain moisture during the Summer. It keeps the underlying soil moist, open and free from weeds.

Seed as a Foundation

The importance of good seed is impossible to over-emphasize. Other factors may be beyond control, but the gardener has absolute check over this foundation. Weather, soil and location may be ideal, but without good seed, especially selected to suit Canadian conditions, the garden is going to be a failure. There is no guarantee that a flower which has given wonderful results in Great Britain or the Southern States will do equally well in this country, and because of this the average gardener is well advised to secure his seed and nursery stock from a reliable Canadian source.

Flower Points

Many fine points can be considered when laying out a flower garden. Certain shades blend well together and often a whole bed will be selected with this blending in mind. Of course, for this sort of thing all the plants must bloom during the same period. Fragrance should be taken into account as there are some spicy things like Evening Scented Stock, Nicotine, Mignonette, Sweet Sultan and Verbena which, while rather plain as plants, fill the whole garden with a delightful incense, more especially in the evening. In shaded quarters, Tuberous rooted Begonias, Pansies and wild flowers will do well. In fact they prefer this location to any other. In partial shade nearly every annual can be grown. On poor soil Portulaca is a favorite, as well as Alyssum, Sweet-scented Stocks, Linum, Calendulas, Calliopis, Sunflowers, Schizanthus, Salpiglossis, Marigolds, Petunias, and many others. These will also successfully resist dry weather.

There were two bidders for the dog offered by a New York youngster. One, a visiting English lad, offered $5. The other, a boy from Philadelphia, offered only $3, but his offer was accepted.

English lad (afterwards)—I say, old ahing, who did you sell the dog to that other chappie for less money?

New York Youngster (grinning eagerly)—The dog can walk back from Philadelphia, but he would have a heck of a time swimming the Atlantic ocean.

All the seasons in Malay have the same temperature, and the sun rises and sets at the some hour the year around.

A very bashful young man was invited to a dinner party. He sat next to a charming young lady, but could not think of a thing to say to start the conversation. At last he ventured:

Young man—Do you like cheese?

Young lady—No, I despise it.

Young man—Does your brother like cheese?

Young Lady—I have no brother.

Young Man—If you had a brother would he like cheese?

History does not record the lady's answer.

Will the Passing Years Lead Us This Way?

A little more tired at the close of day;
A little less anxious to have our way;
A little less ready to scold or blame;
A little more care for another's name;
A broader view and a saner mind;
A little more love for all mankind;
A little more charity in all our views;
A little less thirst for the daily news;
A little more leisure to sit and dream;
A little more real the things unseen;
And so we are faring a-down the way
That leads to the gates of a better day.

Jamison — I used to sell underthings to nudist colonies.

Jackson—What kind of underthings?

Jamison—Cushions

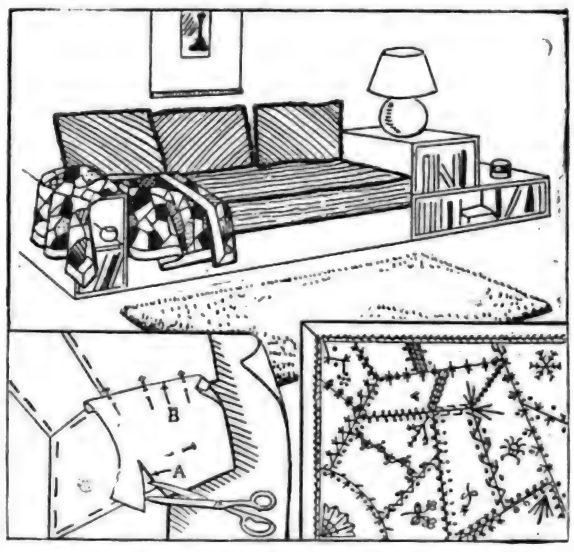
Trial Tests Of Root And Vegetable Seeds

A comprehensive scheme for an extension of trial tests of field root and garden vegetable seeds is to be put in operation at Macdonald College, Quebec, Manitoba Agricultural College, Winnipeg, the University of British Columbia, Vancouver, B.C. and Vineland Station, Ontario. Horticulturists at these stations have now agreed to co-operate in the tests, setting aside for this purpose at least 1½ acres of land. They have also agreed to supervise the necessary work of preparation, the sowing and the cultivation. An undergraduate or graduate will be appointed by each station for a period of at least six months to take direct charge of the trials.

The Seed Branch and the Experimental Farms Branch, Dominion Department of Agriculture and the Canadian Seed Growers' Association are co-operating with these stations in the tests. This extension of tests is partially the outcome of the discussion and resolution by the Horticultural Plant Breeders Committee of the Canadian Seed Growers' Association the idea of the Committee being that, if all parties interested in this work were to co-operate and the trials extended to stations nearest the wholesale see dcentres, information of inestimable value to all would be secured.



The extending of the purity of variety tests is also intended as an alternative to the licensing of new varieties of field roots and garden vegetable seeds being omitted when the Seeds Act comes up for revision in Parliament during, it is hoped, the present session of Parliament. The working out of the details of the program have been tentatively agreed upon, the Horticultural Division of the Experimental Farms Branch being delegated to collect approximately 50 samples of new recommended varieties for merit tests, and the Canadian Seed Growers' Association having about 100 samples of Canadian-grown registered seed stocks for verification tests. These samples will be forwarded to the office of the chief of the Seed Division, Dominion Department of Agriculture, for entry and transmission to the trial grounds.

After allowing for these tests, also there will be more room at each of the trial grounds for about 150 samples of garden vegetables taken by the Seed Branch from the trade for purity of variety, tests to check the truth in advertising under Section 10 of the Seeds Act.

HOW TO SEW

By RUTH WYETH SPEARS

Crazy Patchwork at Home in a Modedn Setting

The crazy patch is the oldest of quilt patterns yet there is something amazingly modern in its angular lines. So whether your living-room is traditional in style or newer than tomorrow you will be interested in the revival of crazy patch work for what our grandmothers and great grandmothers called a "slumber throw".

A corner of one of these old silk crazy quilts is shown here at the lower right. The pieces were small—many not more than 1½ inches wide or long. A variety of embroidery stitches join the pieces. Both plain and figured silks were used, the plain patches often being embroidered with flowers, fans and other amusing motifs—not the beetle embroidered on one patch. Several colors of silk embroidery thread were generally used but in the most artistic of these quilts one color predominated in the embroidery.

Larger patches with simple feather stitch and herring-bone stitch at the joinings also give a good effect. The pieces are sewed to a foundation of some firm soft material. Outing flannel or an old wool blanket are good. Pin a piece in place over the space to be filled, trim the edges to the right shape, as at A, allowing enough to turn under, as at B, where the patch laps over the one next to it. Baste the turned edges down, as shown. When a number of patches have been basted in place, sew them down to the foundation with the embroidery stitches and then remove the bastings. The backing is tied to the front with silk embroidery thread as comforters are tied. Little or no padding may be used and a plain band around the edge is effective.

NOTE:—Mrs. Spears' new book, "Sewing For The Interior Decorator," contains 47 other fascinating things to make for the home. Now ready for mailing upon receipt of 14c (10c plus 4c postage). Address: Mrs. Ruth Wyeth Spears, 73 Adelaide Street West, Toronto

New Drug Eases Faster Walking

Scientists Hear of Hormone Which Aids Physical Exertion

MEMPHIS, Tenn., — A drug which increases the ease of fast walking by about 14 per cent and which upsets theories that in the human body normal perfection cannot be improved upon was reported to the Federation of American Societies for experimental biology.

This scientific surprise was furnished by cortin, a hormone produced by the adrenal glands, two small cap-shaped bodies above the kidneys. Some of this hormone, obtained from the glands of beef, was given to eight men and three women by Fred A. Hitchcock and R. C. Grubbs of the department of physiciology, Ohio State University.

The effects were measured in the changes in their breathing while lying down, standing and walking rapidly. In all cases their bodies required less oxgen and breathing was easier. This was noticeable when they walked at a speed of nearly four miles an hour. In that case there was an average decrease of oxygen that was breathed of about 14 per cent.

Building During March in Canada

TORONTO, — Building contracts awarded in Canada during March as compiled by MacLean Building Reports, Limited, totalled $16,058,100 as against $8,728,800 in February and $10, 289,100 in March 1936. Total value of contracts for the first three months of the year was $31,409,100 as compared with $32,127,200 last year.

Ontario's contribution to the March total was $8,875,600.

Among large construction contracts was the international bridge at Ivy Lea, Ontario, $2,500,000.

Thinks Children Like Discipline

BOSTON, — Dr. W. Linwood Chase well-known educationist, lecturer and author, thinks children like discipline. They like the security that comes from [illegible] who take responsibility and make demands upon them. They may object vigorously at the time, and [illegible] but they like parents who take [illegible] and demand [illegible].

Dr. Chase [illegible] with the kind of [illegible] that [illegible] or the kind of discipline that countenances unwise freedom, for he thinks that the boy must then suffer the inevitable consequences of such treatment.

If a child's behavior irritates an adult, it may only be the symptom of a real conflict that the child himself is engaged in when he tries to do what is expected of him. Until this conflict is understood, little can be accomplished in settling the child on the path of adjustment to things all about him.

Dr. Chase also believes a happy atmosphere at school is essential.

40 Carpenters Build A House In One Way

PORT ARTHUR, Texas.—Speaking of speed: As a courtesy to Mrs. Ivan Vick, widow of a fellow union member, the Carpenters' Union built her a four-room house in a day's time. Construction was begun at 8 a.m. and finished by nightfall. Forty carpenters did the work.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas rises up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

The **SNAPSHOT GUILD**
VIEWPOINT IN LANDSCAPES

The house in the lower right nicely balances the composition and accentuates the height of the mountains.

NOW that nature has once more been adorned with the verdure of spring and a new season of outdoor picture taking has begun, it is appropriate to consider landscape pictures.

Good landscape subjects are, at least, easy to find. One can travel scarcely anywhere without encountering pleasing vistas of woods and fields, hills and valleys, stream and lake, country cottages, old farmhouses, tree-canopied roads, flocks of browsing sheep, herds of cattle, and all that makes for beauty and interest in landscapes.

What should we do to capture these lovely scenes with our cameras? Such views may seem easy to take as they meet the eye, but here, as in all photography, indiscriminate snapshooting usually results in jumbled composition. A little thought, a little planning, a little effort, if you please, to *make* the picture—not merely to take it. This means care in selecting a viewpoint which makes the composition essential to an artistic picture. You cannot shoot on sight and be lucky every time.

Beginners are often satisfied with any picture at all as long as it is clear. They are delighted merely to have obtained the correct exposure. But he who takes pains to locate a viewpoint which gives in his finder a well-balanced arrangement of the objects in the scene generally gets pictures that are not merely photographically clear but artistic.

Are you willing to climb a fence, toil up a rugged hill, wade a brook, to get that viewpoint? Many an enthusiast has taken real risks for a viewpoint and been amply rewarded. Remember that the viewpoint should be such that the picture balances both vertically and horizontally. Generally there should be a large mass, the main object of interest, near but not at the center, balanced by several smaller objects or masses on the other side, or by a single smaller one farther from the center, or in some cases slightly above or below the center.

Take time to move around from spot to spot and in each place experiment with the scene as it appears in your viewfinder. Be satisfied that you have this balanced composition before you let the picture into your lens. Choosing the best viewpoint is what the landscape painter does before he sets up his easel to *make* his picture. Remember that in the same way you, too, with a camera, can *make* a picture.

UNITED CHURCH

A Parent Day service was held in the United Church Sunday morning. A large congregation gathered for worship in memory of parents whose service is cherished and honored. The sermon, based on Ephesians 6: 1-3, called attention to the fact that parents are indisolubly one. Both have their contribution to make to the beauty and success of the home. Parenthood is honored when it is accepted as a sacred trust; it is also honored when it is accepted as an opportunity. No material with which man works responds more wonderfully to his craftmanship than the child. The story told to the children during the service proved very interesting. It dealt with a family in which no one was compelled to do anything when they discovered how much they lost by such an arrangement and made up their minds that in the building up of a home disagreeable tasks had to be done as well as pleasant ones. A solo by Mrs. Reid, duet by Mrs. Bond and Mrs. McIlwrick was splendidly rendered, and the service led by a choir of mothers proved very helpful.

—o—

The coronation ceremony in London, England, is capturing the imagination of the United Church folk in Streetsville as it is that of the people generally throughout the Empire. Certainly the past few days have been full of inspiration and instruction concerning the meaningfulness of the Empire. First a coronation social held last Thursday evening following an unusual design laid the foundation for further research. In this successful social the first number was a contest in which pictures were pinned to the coats of gentlemen and in couples a guessing contest was held as to who all these fine looking persons were. After a few minutes study it became evident that they were all men and women who will figure largely in the coronation ceremony or prominent statesmen of the Empire. Then a program of speeches, brief and illumining intermixed with the spice of humor and music was enjoyed. These speeches dealt with parts of the Empire. Mr. J. B. Ross dealt with Canada, the Rev. T. D. Jones with England, the Rev. J. Y. Fraser with Scotland, Mr. J. H. Atkinson with Ireland, Dr. Montemurro with New Zealand, Mr. R. Langmaid with Australia, Mr. McArthur with British possessions, Dr. Steen with India, Mr. Herb Hersom with Africa. It soon became evident with the picture growing before the mind that the Empire is a vast League of Nations working in harmony and unselfish interest.

The musical numbers included solos by Messrs. G. S. Jourdan, G. Steen and Bruce Bunt, violin numbers by Messrs. Jas. Steen and M. Angelo, a mandolin selection by Mr. Angelo and a pianoforte solo by Mr. Dingwall. A dainty lunch was served at the close of the program and a wonderful evening ended with the National Anthem.

The pre-coronation service held in the United Church, Streetsville, proved a great attraction and it was certainly worth while. The service was arranged by the headquarters staff of the General Council and was a fitting ceremony guiding worship and prayer. The music by the augmented choir was singularly appropriate. Miss Ann Sinclair sang a solo from a modern collection of gospel songs, "Crown the King of Kings," and very effective was the appeal. The choir rendered "The King, O God, His Heart to Thee Upraiseth," from Gevevan Psalter; Mrs. J. H. Hare sang the Recessional by Rudyard Kipling; and Misses A. Sinclair and D. Waite sang to an old Irish melody, "My own dear land." Every number was well sung, the effect being cumulative. A number of the members of the Eden choir joined the Streetsville choir for this service.

The sermon was based on II Samuel 16: 16, "God Save the King." The minister after speaking for some time upon the wonder of the Empire and quoting the words of a Japanese statesman that "the British Empire is the supreme creation of man on earth," said that with such a mighty league of nations, with such diverse interests, with such different peoples working together, the office of the king is a vital necessity. He had many times heard people question whether this office was needed in this age, but he said when one once studies the situation it becomes evident that a president elected periodically could not meet the needs of the situation. How would he be elected? Who would vote? Would not such a method of government involve considerable confusion? For the present at least the Empire needs a unifying agent and that agent is best provided by a ruler whose character is sound and whose sympathies are wide. We believe we have such a king in His Majesty King George and with his gracious consort and family we have a ruling house we can look up to with respect and confidence.

Notes on the Big Celebration

Milton Band (20 pieces) enlivened the proceedings with choice music and assisted wonderfully in the parade.

Reeve Foster welcomed all to the celebration, when a stop was made at the cenotaph, and Rev. John Y. Fraser gave the Coronation address.

250 medals were presented by the Reeve to the children and still there were not enough for all who came.

List of Prize Winners

Best organized unit in parade—Canadian Legion Branch 39
Decorated Float, 1st, Oddfellows and Can. Legion
Decorated Car, C P McArthur—G S Jourdan.
Decorated Bicycle, C. Whaley, D McArthur, H Lepofsky, B Burns B Rice, J McClintock, B Graydon R Stewart—all given prizes

RACES

Girls 5 yrs, J Woodruff, E Pope A. Wilson
Boys 5 yrs, M Bond, D Sheppard H Lepofsky
Boys 6 yrs, J Noble, R King, L Stewart.
Girls 6 yrs, M Moore, G Hollings head, N Brown
Boys 7 yrs, B Watson, B Moore C Arch
Girls 7 yrs, N McMillan, R Sheppard, R Jourdan
Boys 8 yrs, A Amos, B Nixon, R Ellis.
Girls 8 yrs, E Lepofsky, I Coulson P Culbert
Boys 9 yrs, B McArthur, L Town drow, B Noble.
Girls 9 yrs, E Lepofsky, V Moore J Portiss
Boys 10 yrs, H Bond, B Graydon McArthur
Girls 10 yrs, B Redick, R Lee, M Crane
Boys 11 yrs, H Bond, B Graydon B Charlton
Girls 11 yrs, R Lee, B Redick, L Pettibone.
Boys 12 yrs, J Williamson, H, Bond B Graydon
Girls 12 yrs M Jackson, M Crane B Edwards
Boys 13 yrs, B Lovatt, J William son, H Bond
Girls 13, F Charlton, J Holliday M Jackson.
Boys 14 yrs, R Walker, J William son, B Lovatt
Girls 14, F Charlton, J Halliday M Jackson
Girls 16, L Beattie, J Rice, J Holi
Boys 16, C Charlton, B Lovatt, C Amos
Girls 16, L Beattie, I Halliday, J Rice
Boys 16, G Schnurr, L Harmer J Halliday.
Married Ladies, Race, Mrs Ross Evans, Mrs Estall,
Married Men, H Beattie, H Burns F Noble
Donkey Race, J Evans, R Stewart H Arch
Lucky No. Draw, Mrs W King
Baseball game, Orange 23, Masons 15

The day passed off with only one casualty. Mrs. F. Lepofsky fell over a bicycle left lying on the ground at the fireworks, and was slightly bruised.

The winners of the Veterans' Draw were: 1st Mrs W Milligan, who got Coronation Arm Chair: 2nd James Sinclair: 3rd Mrs (Dr) Smith.

Everything was going nicely, when about 4 o'clock it started to rain and the ball games etc could not be completed. The big event was finished about midnight after dancing and motion pictures had been enjoyed.

We think it was the biggest and best celebration ever held here..

Local Items

Mr. T.H. Wilson, Lot 2, Base Line Trafalgar Township, near Streetsville will have an auction sale of Farm Stock, implements etc. on Tuesday May 25th, at 1 p.m. D. S. T. See advt in this paper and bills

Mrs Thomas Farrell has received word of the death of her brother James Barry, at Royal Oak, Mich. He was buried at King City, in York County

Reeve S. H. Foster has received a letter from Mr. T. H. Goodison who is staying with his daughter, Mrs S. C. Ferguson at London, Ontario. He was confined to bed for several months and suffered a stroke. He is able to be out again and is getting stronger. He would be glad to have any of his old Streetsville friends write to him.

Mr. and Mrs. Jordan from Toronto visited with Mrs. James Irvine, and Miss Ada, yesterday. Mrs. Jordon is a cousin of Mr. Alex Hammond and a daughter of the late Rev. Walter Wright, pastor of the St. Andrews Presbyterian Church from 1863 to 1867

Mrs. A. Bullock of Toronto has moved out to her summer cottage on George St, east side

Art McCaugherty of Stratford is visiting at his home here

J. M. Bastedo passed away on May 11th and was buried in Milton cemetery.

Mr. Earl Gibson, Toronto, visited with Mrs. D. Lindsay on Sunday.

Mrs. D. Ross has just returned after a pleasant visit with her nephew Mr. Charles D. McGregor, of Kingsway, Toronto

Mrs W. H. McGill and Mrs John Hardy, Erindale, and Mrs Lindsay Streetsville, attended a birthday party for their cousin, Miss Milly Peacock, Milton.

Clarence Rutledge of Georgetown was home on Sunday.

Mrs. F. J. Elderfield, and daughter Thora, have arrived safely in Old England. Mrs Elderfield stood the trip well but Miss Thora was sick a couple of days.

Rev. John Y. Fraser has completed three successful years as pastor of St. Andrew's Presbyterian Church Streetsville. He was inducted May 15, 1934, and is the senior resident minister

Mrs. Marks, of Amherst, Nova Scotia, is visiting her aunt, Mrs F. C Broadbear.

Peel County L.O.L. will attend divine service in Streetsville the first Sunday in July. Rev. Mr. Blodgett of Toronto has been invited to preach the sermon. This year is the 100th anniversary of the starting of an Orange Lodge in Streetsville.

Mr. and Mrs. A. Prior and family of Waterloo, visited Mr. and Mrs. J. A. Temple on Sunday. Mr. Prior has a position similar to that of Mr. Temple.

TRINITY CHURCH NOTES

Services on Whitsunday, May 16th as follows—

10 a.m. Sunday School
11 a.m. Morning Prayer
7 p.m. Evening Prayer

The Rector, Rev. E.S. Ottley

Mrs. N. W. Brown

Mrs. Nat Brown passed away at Galt and was buried in the Streetsville cemetery this Thursday afternoon. She was a sister of Mrs Gill and formerly lived here. Two other sisters, Mrs. W. Denison, Sr, Cooksville, and Mrs Alex Grieve of Toronto, survive. There are two half-sisters, Mrs. Arthur Ward, of Churchville, and another in Tonawanda. Besides the husband, three daughters survive, one at Hamilton, one at Galt, and one at Cobalt. One son was drowned in Streetsville in 1892. Mr. and Mrs. Brown had been married 52 years on April 12th last. Service was conducted in St. Andrews Church, here, by Rev. Dr. Smart of Galt, assisted by Rev. J.Y. Fraser

EDEN CHURCH

A very enjoyable afternoon was spent at the United Church Parsonage on May 5th when Eden Women's Association met to hold their regular monthly meeting. Mrs. E. Waite presided.

A devotional talk was given by Rev. T.D. Jones, choosing as his theme "Faith and Its Obstacles." Mrs. E. May gave a paper on "The Coronation." A piano solo by Miss Muriel Mason and a duet by Misses Allie Sinclair and Doris Waite were much enjoyed

At the close of the meeting a delicious lunch was served by Mrs Jones. The Association deeply appreciate the hospitality shown them by Mr. and Mrs. Jones.

The June meeting will be held at the home of Mrs. McKeown.

Love Huntress

By H. GLYNN-WARD

Claudia Townsend meets Dick Whalen at a hockey game in Seattle one night. Her interest in Dick infuriates Wallace Bornell, rich young lumberman, who wants her to marry him. To get Dick out of the way, Wallace offers him a job in one of his lumber camps in British Columbia. At the camp, Dick accidentally discovers that Bornell's men are working stolen timber lands. He asks for an explanation, but Braddock, the boss, puts him off and next day leaves for Seattle. The following day Claudia stops in at Bornell's office, and, by chance, overhears Bornell and Braddock plotting to do away with Dick. She decides to go to Burns Lake, herself, to warn Dick. Braddock recognizes her on the boat going north, however, and he manages to reach the camp the day before she arrives.

This might be awkward, but Claudia had come too far to worry about conventional difficulties. She went to bed and slept like a log, waking in the morning at the tattoo of the inn-keeper on the door to tell her the sleigh would be there in half an hour.

As Whalen had done, Claudia left her grips at the inn and took with her only her mountaineering haversack with night-things, a small silver flask of brandy, and a sturdy clasp-knife that she carried with her always on outdoor expeditions. Taking up her skis, she climbed into the front seat of the sleigh.

The driver looked at her with interest. Her brown felt hat fitted close to her head and turned back over the ears in two wings that gave her the look of a Mercury. She wore a red scarf, a short blown beaver coat, dark corduroy knickers and boots up to her knees.

Her dark eyes were alight with interest as she took in the vast immensity of the country and asked all manner of questions of the driver. The sun rose, turning all the snows about them to a rosy pink, and Claudia exclaimed at the beauty of it all.

"Pretty enough, pretty enough to look at," agreed the driver, "so long's a person don't have to be out in it."

They heard the jarring screech of the saw-mill long before they reached the camp. When the sleigh pulled up near the office-cabin Claudia was chilled through. The men about camp glanced at her curiously. Whom should she ask about Dick?

But Braddock was waiting for her. He came out of the offijce, gave hed a smiling good-morning and asked what he could do for her.

"I want to speak to Mr. Whalen. Is he here?"

Whalen's out at work. He'll be back along about tea-time."

Claudia got down out of the sleigh and followed Braddock inside. There was a roaring fire in the closed stove and she held out her hands to the warmth.

"Is there no way I could reach Mr. Whalen now?" she asked.

"Say," said Braddock with easy familiarity, "it sure must be important to bring you all this way to see him!"

Claudia knew Braddock had recognized her on the boat. Did he suspect her of having overheard his talk with Bornell. If so, he was double-crossing her, She must find out where Dick was from someone else—and find out at once.

"Young Mr. Bornell a friend o' yours too?" Braddock was saying. "That's like a pretty girl, to have two strings to her bow!"

Claudia regarded him icily. "If you won't tell me how to reach Mr. Whalen then I must go and find someone who will."

"Just a moment," said Braddock. "I'll be right back." He went out.

"I don't understand why you should take it upon yourself to dismiss my driver," she said as Braddock came up.

He feigned surprise.

"Poor chap couldn't wait here all day. You said you wanted to wait for Whalen so I paid the driver and told him he could go. When Whalen gets back, you can go in with one of our teams. . . . Looka here. I'll go over to the cook-house and tell the Chink to fix you something to eat. He'll bring it over."

She followed him out.

"I'll come over to the cookhouse and get it."

Anything to escape from this man and get a chance to speak to someone who might give her some information about Dick.

"Ho, Ching!" she heard Braddock shout. "Ho there, Ching!"

The Chinese came running from the kitchen door.

"Get this lady a cup o' hot coffee and something to eat. I got to go across to the mill, but I'll be back in a minute."

Claudia watched him make his way across the snow to the mill. If she went outside to speak to any body now he would see and intercept her at once.

"One velly cold day, yes? Missee dlink up coffee, be hot!"

The cook's kindly invitation recalled her to the fact that he had set food and drink on the table for her.

She thanked him and began to pour out a cup of coffee. Suddenly it struck her that he might know where Whalen was.

"You know every man in this place, Ching?"

"Sure, I know all. Missee look for someone?"

"Yes," she said impulsively, "I'm looking for Mr. Whalen, do you know where he is?"

"Oh, Missa Whalen. He one velly good man! He savee my life one time!"

"Yes, he's nice. I know, but can you tell me where he is?"

'He go out in woods today, velly early in morning. Go 'long with Moliarty, they come get lunches to take, so maybe far 'way they go. Moliarty, he one velly bad man!"

Claudia was horrified by what Ching told her. Somehow she trusted Ching. He had said that Dick was "one velly good man" so he was probably correct about the other man—Moriarty. And Dick had been sent out alone with him!"

The words she had overheard in the Bornell office came back to her clearly. "Get rid of him somehow and quick," Wallace had said. "Easy enough, there's aplenty up there with a grudge against Whalen. Specially one fellow, and as it happens I've got something on him . . ." This Moriarty must be the man Braddock had meant!

(To be Continued)

Design for Living Should Be Goal Of All Education

Ever-Increasing Need to Direct Life Along Lines of Fitness and Influence

TULSA, Okla. — Education for the task of modern living was held up today as a goal of thought and action for the General Federation of Women's Clubs.

"There seems to be," said Mrs. Roberta Campbell Lawson, national president, in her presidential address prepared for delivery to the yearly council meeting, "an ever-increasing need for education in living.

"It is a need for the sort of education that will direct our living into the realm of calm and quiet self-analysis of our personal fitness and so checkup on the influence we radiate to those about us."

The national president used that theme to direct the delegates' attention to the foremost matter before the federation, a resolution taking a stand on President Roosevelt's plan for reorganization of the United States Supreme Court.

"Education for living would be a sham without real knowledge of the framework of our government," he said.

Spring Fever

I am yearning now for a summer day
And a lonely woodland trail
That leads me to a hallowed spot
In a cool, sequestered dale
Where the whisp'ring of a lazy stream
Befits my wanton mood
And bids me shed my worldly cares
Ere I enter Nature's quietude.

I love this enchanted valley,
For 'tis a mystic, magic place
Where bird-songs and echoes mingle
And zephyrs and pines embrace.
And blossoms of exquisite beauty
Perfume the very sod,
And I linger with deepest reverence,
For I know that I'm near to God.

Montreal. —E. Anne Pomeroy.

"Don't Eat With Knife" - 1837

Part of Deportment For Fair Sex of Century Ago

LONDON, Eng., — Have customs and manners changed considerably since the Coronation of Queen Victoria in 1837?

A deportment handbook of that date, "Dedicated to The Fair Sex of Great Britain," makes amusing reading nearly 100 years after its publication.

Miss 1837 had to remember that the good table manners were essential to social success. She was implored by the author never to "convey food to your mouth with your knife — it is only to be used as a divider."

The art of being a good listener was also included in a young lady's social education. Evidently there was nothing "so brutally shocking, nor so little forgiven, as a seeming inattention to the person that is speaking to you."

A debutante of 1837 was not encouraged to make casual friends. "Ladies usually have a proper sense of their own importance," one chapter states, "and therefore it is hardly necessary to say that if a gentleman presumed to recognize you in the street, from the circumstances of his having danced with you at a public ball, you will not return his salute, but will cleverly avert your head, so that he will receive due cognizance of your rebuke."

Why Do Teeth Decay?

Why teeth decay is still an unsolved problem to dentists. The search is being constantly carried to find some factor that may be held responsible but without any definite success. The most recent test is that made at Harvard Dental School where Dr. Paul K. Lorsch, instructor in operative dentistry, and Dr. Fred W. Morse, assistant professor of oral medicine, made a detailed study of 110 cases of children who came under their observation for caries or tooth decay. These investigators found statistical evidence that boys suffer more than girls from tooth decay. Examination of ninety-eight cases showed that fifty-one girls, with an average age of 7.8 years, had an average of 8.1 cavities an individual, while forty-seven boys, with an average of 6.0 years, had an average of 13.7 cavities an individual. Twenty cases including the five best and five worst among boys and girls showed that the high caries among boys average 32.2 and among girls 16.8, and in the low caries group the boys averaged 2.6 while the girls had no cavities. Heredity, diet and a large number of other factors were studied without finding any positive correlation with tooth decay. The only item that seemed to have any connection, as causes, were childhood diseases involving prolonged fever, the presence of ecidiuric bacilli in the mouth, and to a slighter extent rickets in early childhood.

Queer World!

Putting Back the Clock: Every German university man must henceforth defend his honour by sabre duels. "An affair of honour," it is officially stated, "may deal with love, money and reputation of self, family, or Fatherland." The sabre is 3 ft. long with a quarter-inch rounded tip, razor-sharp.

Aftermath: It is nearly twenty-three years since the war started and yet last year fourteen new cases were admitted to St. Dunstan's—all those of men who have now gone blind as a result of having been gassed. During the last five years nearly two hundred new cases have been admitted.

Expensive Buttonhole: An English carnation valued at £1,000 caused great interest at a display in New York. The high price is due to the fact that only the first plant of the new variety can be used, as the seeds seldom breed true. It takes about five years to develop.

Don't Want Money: Nearly 80,000 unclaimed accounts exist in the Post Office Savings Bank. They range from a few shillings to hundreds of pounds the average working out at about £16.

YOU CAN EAT AND EAT THEM
. . . they're so delicious!

Crisp, dainty little circles of melting joy that actually make soups, salads and snacks taste better.

Tobacco Men Get More Pay

New Agreement in Quebec Also Cuts Work Week To 48 Hours

MONTREAL, — Chairman Gustave Francq of the Quebec Minimum Wage Board announced last week a conference of workers and employers in the province's tobacco, cigar and cigaret manufacturing industry approved new wage rates ranging from one to four cents an hour higher.

The new agreement, effective August 1, cuts two hours from the industry's 50-hour week and provides that at least two-thirds of all employees, instead of only 50 per cent, as at the present, must receive a $12.50 a week wage, paid workers with two years' experience.

Beginners' wage will be $7 a week. Wage scale are slightly lower outside Montreal district.

About 4,000 women workers are affected by the new schedule.

A car that is streamlined perfectly for a speed of 30 miles an hour is not streamlined perfectly for a speed of 60 miles an hour.

Woman's World

By Mair M. Morgan

Cookies For All Occasions

Unlucky the child of four or forty who lives in a house without a cooky jar. And unlucky the cook who never knows the thrill of making a variety of fancy and very tasty cookies. There are so many occasions when you will be glad that the cooky jar is full. These lovely spring days, for instance, when the children come home from school ravenously hungry—give them cookies to eat. They can take them outside and eat while playing. Long, sunny afternoons bring many of your friends to your door while strolling and with a host of dainty cookies on hand, you need have no hesitation in asking them in for a cup of tea, accompanied of course, by any of the cookies for which the recipes are given below. These dainties well made, which necessitates using the finest and best cake flour on the market, will establish your reputation, not only among your adult friends but among your younger acquaintances.

Cookies for parties—cookies for every day—cookies for high days and holidays—all can be made from these recipes with the aid of a few fancy cutters and a little imaginative decorating.

Nut Florentines

Two cups sifted cake flour, 1 teaspoon baking powder, ½ teaspoon salt, ½ cup butter or other shortening, 1 cup sugar, 2 eggs, well beaten, ½ teaspoon vanilla, ½ cup nut meats, chopped, ½ cup brown sugar, firmly packed, ½ teaspoon vanilla, 1 egg white, stiffly beaten.

Sift flour once, measure, add baking powder and salt, and sift again. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add eggs and vanilla, and beat well. Add flour gradually, beating until smooth. Spread ¼-inch thick in three greased pans, 8 x 5 x 2 inches. Sprinkle with nuts.

Beat brown sugar and vanilla into beaten egg white, and continue beating until mixture thickens a bit. Spread thinly on surface of dough. Bake in slow oven (325 degrees F.) 30 minutes, or until done. When entirely cool, cut into strips, 1½ x 3 inches. Remove from pan. Makes about 3 dozen cookies.

Coconut Cream Jumbles

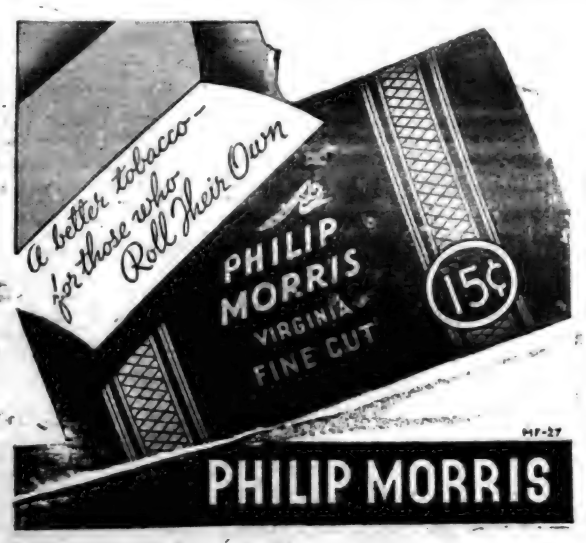
Three cups sifted cake flour, 3 teaspoons baking powder, ½ teaspoon soda, 1 teaspoon salt, 1½ cups sugar, 2 eggs—well beaten, 1 cup heavy sour cream, 1 teaspoon vanilla, 2 cups coconut, premium shred.

Sift flour once, measure, add baking powder, soda, and salt, and sift again. Beat sugar into beaten eggs. Add cream, vanilla and coconut and mix until blended. Add flour and mix well. Chill thoroughly. Roll ¼ inch thick on slightly floured board. Cut with floured cooky cutter into 3-inch circles. Place far apart on ungreased baking sheet and bake in hot oven (400 degrees F.) 12 to 15 minutes, or until done. Makes 30 cookies. (One cup sweet cream may be substituted for sour cream and soda in this recipe.)

Swedish Cookies

Four cups sifted cake flour, 1 cup sugar, 2 cups butter, 1 egg — well beaten, 1 teaspoon vanilla.

Sift flour once, measure, and sift again. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add egg and beat well. Add flour, a small amount at a time, mixing thoroughly after each addition. Add vanilla and blend. Shape into 2 rolls, 1½ ins. in diameter, chill overnight, or until firm enough to slice, and cut in thin slices. Or press dough through cooky press. Bake on ungreased cooky sheet in hot oven (400 degrees F.) 4 to 5 minutes, or until done. Makes 5 dozen cookies.



These rich cookies are especially dainty for refreshments. When sliced, they may be decorated attractively with bits of candied cherry, angelica or citron, chopped nuts, colored sugar, or decorettes.

For your SEEDS and GARDEN SUPPLIES
Remember that: "You find the best at PERRON'S".

"I've got to scrub out the toilet bowl and how I hate it."
"Better use GILLETT'S LYE and flush off the stains."

No need to rub and scrub

Use Gillett's Pure Flake Lye once a week . . . it takes off yellow stains in a jiffy . . . keeps clogged drains running freely . . . banishes unpleasant odors. Use Gillett's Lye in solution* for all kinds of heavy cleaning tasks. It just washes the dirt away. Saves you hours of hard work. Always keep a tin handy.

* Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet tells how to use this powerful cleanser for dozens of tasks. Send for free copy to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont.

SUNDAY SCHOOL LESSON

LESSON VII—May 16

THE FORBEARANCE OF ISAAC

(Genesis 21: 1—25; 18; 26: 1—33.)
Printed Text —Genesis 26: 12—25

GOLDEN TEXT— Blessed are the peacemakers: for they shall be called sons of God.—Matthew 5: 9.

The Lesson In Its Setting

Time.—Isaac was born probably in B.C. 1903. He was offered as a sacrifice by his father, B.C. 1879. He was married in B.C. 1864. His father died in B.C. 1828. The dispute about the wells took place probably one year later.

Place.—Beer-sheba was 27 miles southwest of Hebron and Hebron was 20 miles south of Jerusalem. Mt. Moriah was one of the hills of the City of Jerusalem. Haran was a city of Mesopotamia. Gerar was nine miles southwest of Gaza.

"And Isaac sowed in that land, and found in the same year a hundredfold: and Jehovah blessed him. And the man waxed great, and grew more and more until he became very great" —This marked divine blessing, following soon after his deliberate sin, is at first sight, a difficulty, for we naturally ask how God's favor could possibly rest upon him so quickly after the discovery of his grievous error. The answer may be found in a somewhat frequent experience of the people of God, who are often permitted to receive publicly a great measure of the divine blessing, when they may not be, in private, fully faithful to the divine will. As Richard Cecil once said: "A minister of Christ is often in highest honor of men for the performance of one-half of His work, while God is regarding him with displeasure for the neglect of the other half."

"And he had possessions of flocks, and possessions of herds, and a great household: and the Philistines envied him. Now all the wells which his father's servants had digged in the days of Abraham his father, the Philistines had stopped, and filled with earth. And Abimelech said unto Isaac, Go from us; for thou art much mightier than we. And Isaac departed thence, and encamped in the valley of Gerar, and dwelt there."— In the Orient such conflicts as found here often have disastrous results, and Oriental people are not quick to yield to such a request as was here made. Yet, throughout Isaac's life we find him a man of peace, always willing to go more than half way for the sake of harmony and good will among those with whom he lives and does business.

"And Isaac digged again the wells of water, which they had digged in the days of Abraham, his father; for the Philistines had stopped them after the death of Abraham: and he called their names after the names by which his father had called them. And Isaac's servants digged in the valley, and found there a well of springing water. And the herdsmen of Gerar strove with Isaac's herdsmen, saying, The water is ours: and he called the name of the well Esek, because they contended with him."— Water is, in the Orient, especially in such a country as southern Palestine, almost the first thing that must be found if one is to abide permanently in any one place. A good well is priceless: when one is found, success begins, and the envy of others may be expected. Again, however, there being a dispute between the herdsmen of Gerar and the herdsmen of Isaac, the well was given up.

"And they digged another well, and strove for that also: and he called the name of it Sitnah. And he removed from thence, and digged another well; and for that they strove not: and he called the name of it Rehoboth; and he said, For now Jehovah hath made room for us, and we shall be fruitful in the land."— This third well was probably situated beyond the boundaries of Gerar. The name Rehohoth, which means "ample room," indicates that now, by the guidance of Jehovah, he had come to a wide open region, thought by many to be identified with Ruhaibeh, about eight and one-half miles from Beersheba, where the main roads leading to Gaza and Heron separate from each other.

"And he went up from thence to Beer-sheba. And Jehovah appeared unto him the same night, and said, I am the God of Abraham thy father: fear not, for I am with thee, and will bless thee, and multiply thy seed for my servant Abraham's sake." —At last Isaac is back in Canaan, the Land of Promise, from which he should never have departed. Notice that the Lord appeared unto Isaac the same night in which he returned, by which "it is evident that Isaac was at last in line with God's will. This is the first time that we have the now familiar title "the God of Abraham." When God's servants get right with Him, they are said to receive His true revelation of truth and grace. "The secret of the Lord is with them that fear Him, and He will show them His covenant." (Ps. 25: 14).

"And he builded an altar there, and called upon the name of Jehovah, and pitched his tent there: and Isaac's servants digged a well." —Four stages are to be discovered in the restoration of Isaac's spiritual life at this time—the altar, with its thought of consecration; prayer, with its confession of need; the tent, a testimony to Isaac's confession that this was his permanent home; and the well from which came water for his own refreshment, and for the needs of his cattle and crops.

The last episode in this chapter is quite remarkable, namely that Abimelech, who had previously asked Isaac to depart from the land of Gerar, now comes all the way up to Beersheba, not alone to visit his friend, but to assure him of his own high regard for him, and his consciousness that God was blessing him, and to ask for his continued friendship. When we are out of the will of God, we are at the same time so often out of fellowship with men. When we are in the place in which God wants us, we are a blessing to those same men to whom, formerly, we have been a trouble and a burden.

"No formal eulogy is bestowed upon Isaac, either in Genesis or in the rest of Scripture. He is, like his son, Jacob, 'a plain man' (Gen. 25: 27). He has many virtues and graces—faith (Heb. 11: 20), obedience (Gen. 22: 6—9), affectionateness (Gen. 24: 67; 25: 28; 27: 27, 33), conjugal fidelity, gentleness; but he is not among the foremost of the Bible saints. His goodness is passive rather than active, draws forth our sympathy rather than our admiration. Still, there is something peculiarly touching and attractive about his character. Self-effacement is perhaps the most succinct form in which to express it. That was an extraordinary characteristic for the times in which he lived, when men fought on the merest pretext, and Isaac was strong enough to fight. He taught the men of that time a deep and abiding lesson, which perhaps only a man of his temperament could teach, viz., that the servant of Jehovah, the God of Abraham, was not a fighting man, taking things from other people without their consent, brow-beating and coercing, living in their land whether they would or not —armed with Jehovah's power to conquer and oust men. The servant of Jehovah was meek and gentle, blameless and harmless."

A—:

Plans for Ontario Relief Program

$1,000,000 For Youth — Road Building Will Be New Means of Attack on Unemployment

OTTAWA. — Road building all throughout Canada will be a new means of attack on unemployment this year. Agreements between the Dominion and the Provinces will involve a Federal contribution of about $7,200,000 for that purpose, it was learned on Thursday at the Labor Department.

Agreements with the Western Provinces have been worked out. Details are withheld until all Provinces have completed negotiations with the Dominion Ministers.

It became known, however, that the agreement with Manitoba involves contribution by both Governments to purchase of building materials to be purchased in municipal works. This is a new development, as in the past the Dominion has contributed only to labor costs and not to materials. An increased relief allowance will be made for men who go to work on such municipal works. A man now getting about $40 a month would probably get about $45 if he accepted employment.

PLAYGROUNDS AND PARKS

The municipal works are expected to be chiefly playgrounds and parks.

When relief agreements are disposed of, Mr. Rogers will turn his attention to the question of youth training, for which $1,000,000 was voted in Parliament at the past session. Several recommendations have been made to the Minister by the National Employment Commission for coping with the problem of young people deprived of an opportunity to learn the trades on account of unemployment.

Movie-radio gossip

By DOROTHY

Gail Patrick, the only survivor at the Paramount studio among all the girls who won in their "Panther Woman" contest a few years ago, has at last attained real recognition. Not only will she be featured in "Artists and Models" with Jack Benny, she will get one of the best dressing rooms on the lot. It was built years ago for Pola Negri and was later occupied by Clara Bow.

—•—

Every time Sam Goldwyn spends a few days away from the studio, he catches up on all the newest national fads and promptly arranges to use them in pictures. Recovering from a cold at Tuscon, Arizona, a few days ago, he was impressed by a trailer camp. Promptly he bought a story called "Heaven on Wheels," and he cast Barbara Stanwyck for the lead.

Fred Astaire

Fred Astaire is so determined to have Carole Lombard in the first film that he makes without Ginger Rogers that he is postponing production until she is free. And also James Stewart is so determined to play opposite Ginger Rogers in her solo starring vehicle that he is pleading with the M-G-M to release him from working in Luise Rainer's next. It is so much fun working with Astaire or Rogers that players are willing to give up better roles in order to be with them.

—•—

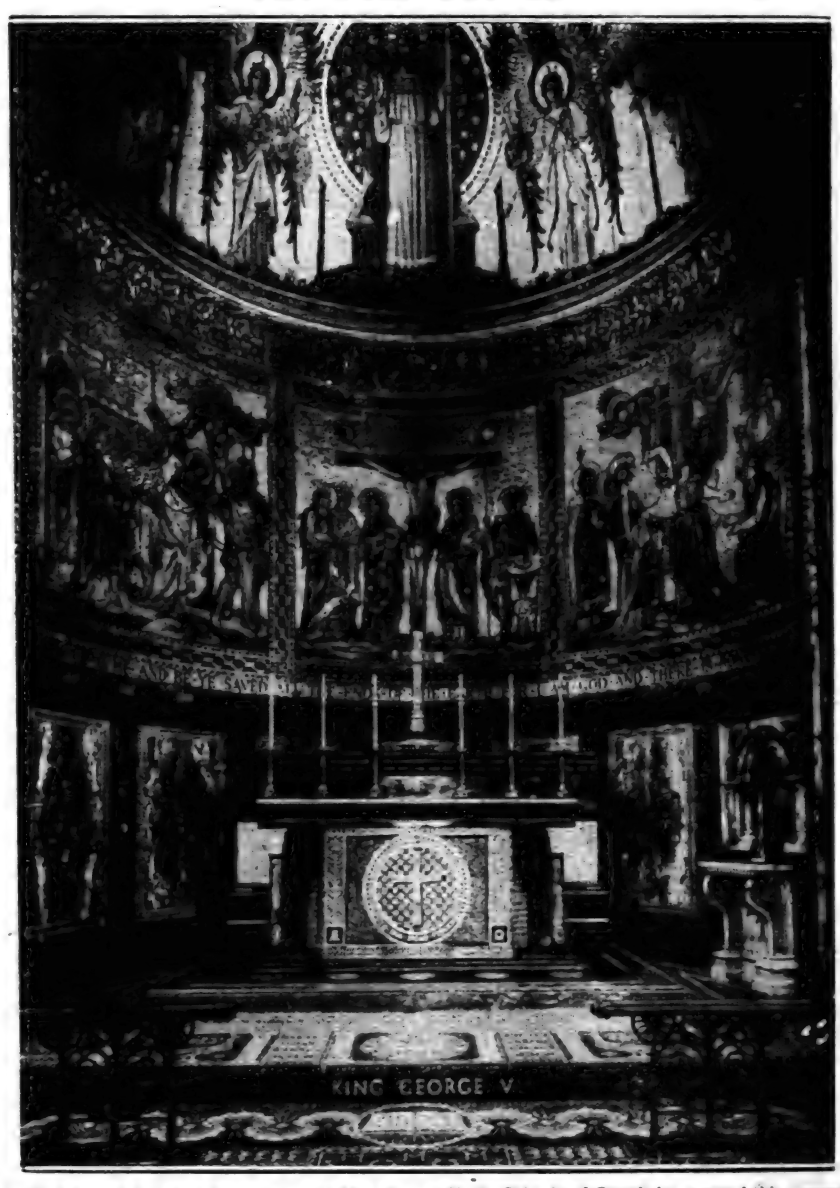
ODDS AND ENDS — Dick Foran won't finish any more pictures with an embrace. It seems that the juvenile audiences who so enjoy his pictures shrieked in derision when he went romantic — M-G-M has thwarted Elissa Landi's plan to ride in the hunter's trials at Palm Springs. They won't let her risk her neck while she is making "Thirteenth Chair" for them. — Claire Windsor, too long absent from the screen, will return in support of Constance Bennett in "Topper — Luise Rainer has dyed her hair bright red for "The Emperor's Candlesticks" and likes it so well she is going to leave it that way —Whenever 20th Century-Fox needs Wallace Beery for scenes of "Slave Ship" they page him at the circus. Ever since the days when he travelled with a circus, as elephant valet, he has loved hanging around the sawdust tent.

Farm Problems

Conducted by
PROFESSOR HENRY C. BELL
with the co-operation of the various departments of Ontario Agricultural College

Question:—"Will you please be good enough to give me the analysis of Soft Coal Soot, as pertaining to its value as a fertilizer for the farm?" R.R. M., York Co.

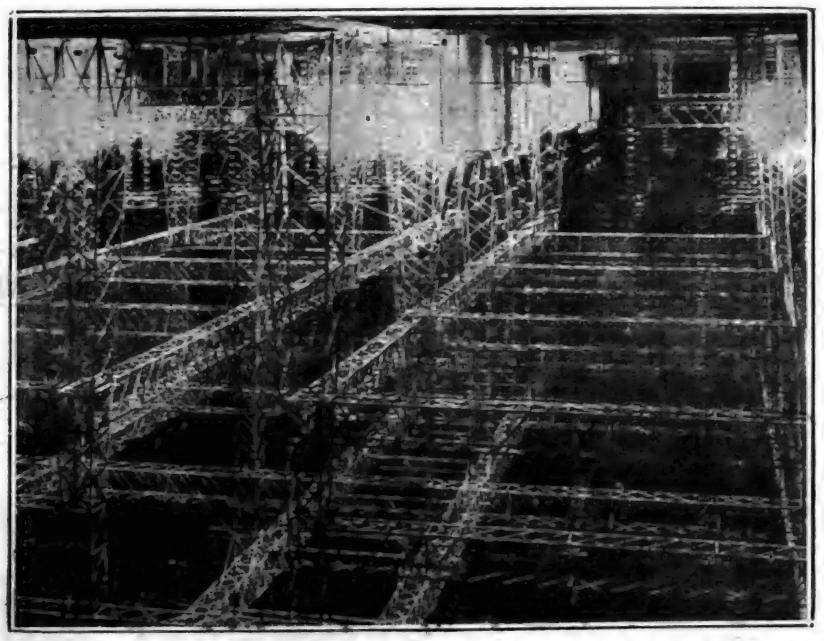
Answer:—Soot ranges from .5 to 6 per cent. nitrogen, 3.2 per cent. being the average of a large number of analyses. It acts very much the same as ammonia salts, i.e.—the nitrogen probably being of the ammonia form has to undergo change to the nitrate form which it quickly does in warm soil. Being of a very dark colour, it hastens the absorption of heat from the sun. It is successfully used as a spring top dressing in wheat and other grain, much the same as one would apply Nitrate of Soda, although it is only about one-fifth the strength in nitrogen of this salt (Nitrate of Soda). It tends to lighten the texture of surface soils and is repellent to pests such as snails, etc.



Question:—"Would a fine spreading of hardwood ashes, worked in ploughed clay loam, be beneficial for the growing of barley, when there is no other fertilizer for said field? If it would pay to haul the ashes from syrup camp, how many loads per acre do you recommend?"

Answer:—Wood ashes applied to clay loam soil for barley would serve a very good purpose, as the barley prefers an alkaline reaction of soil. The wood ashes contain approximately 30 per cent. lime, hence would tend to produce this reaction in the soil. Then, too, the lime will improve the crumb of the clay soil. In addition, barley benefits from additional potash, hence the 4-6 per cent. carried by the ashes will be a distinct benefit.

In our opinion, it would pay you well to haul the ashes from the syrup camp. A load of ashes would weigh approximately 1000 lbs., which would mean, if this was applied to the acre, you would be applying about 40 lbs. of potash in each load. This would be the same as buying 40 lbs. of potash, and 300 lbs. of lime. This would be a suitable application of potash for barley and should give you good results.



Experimeots in air conditions in hospitals in San Francisco proved a distinct aid in the treatment of patients suffering from acute bronchitis, asthma, hay fever and allergic skin conditions.

Guards' Tribute To Late King

As their own tribute to the memory of King George V, the Brigade of Guards has erected this memorial altar, which has just been unveiled in the Guards' Chapel at Wellington Barracks. Richly and beautifully made, the altar has a front inlaid with a mosaic of semi-precious stones. On the top can be seen the memorial inscription.

Power Etches Strength Against Darkness

The high-voltage switching yard at Boulder Dam at night etched against a black desert sky. Power from generators on top of Dam is switched from this station to Los Angeles.

Step With Society

Hollywood Robin, driven by George H. "Pete" Bostwick; Hollyrood Audrey, with Mrs. Robert McKim driving, and Saytag, Hambletonian Stake hopeful, with Seymour Knox up, (L-R) step out at the Aiken, S.C., trotting track.

As at March 31, 1937	38,000,000.00
Reduction in Treasury Bills for the Year	$12,000,000.00

CERTIFIED TRUE AND CORRECT

Provincial Auditor

In pursuance of a promise made during the Third Session of the Nineteenth Legislature of the Province of Ontario, I take this opportunity of publishing, for the information of the citizens of Ontario, the above financial report, together with this announcement as to the plans of the Government for passing on to the people certain benefits made available by reason of the surplus of $9,313,938.54, realized last year;—

MUNICIPAL DRAINAGE AID AND TILE DRAINAGE DEBENTURES

A reduction in interest on Municipal Drainage Debentures and Tile Drainage Debentures effective April 1, 1937, from 5 per centum to 4 per centum.

PASSENGER MOTOR CAR LICENSE FEES

A substantial reduction in passenger motor car license fees will be announced before October 15 next.

LICENSE FEES ON COMMERCIAL VEHICLES

Effective on November 1, 1937, when the 1938 permits will be available, there will be a reduction of 25 per cent. in the fees to be charged for the registration of all farm trucks and all other commercial motor vehicles and commercial trailers.

The approximate annual saving will be $1,000,000.00 to the operators of commercial vehicles.

PROVINCIAL SUBSIDY

The Provincial Government will pay, by way of a grant, to every city, town, village and township of the Province a sum representing the equivalent of one mill on the dollar of their respective assessments for general municipal purposes. This grant is made unconditionally but in the expectation and with the intent that the amount shall be passed on to the taxpayers of every community by a reduction of one mill in the general municipal tax rate. This subsidy will amount, in the aggregate, to the sum of approximately $3,000,000.00.

ROAD SUBSIDIES TO TOWNSHIPS

The 313 Townships which have in the past received subsidies of less than 50 per cent. will enjoy an increase to 50 per cent.

The annual benefit to the 313 Townships will be approximately—$300,000.00.

OLD AGE PENSIONS AND MOTHERS' ALLOWANCES

To further take the burden off real estate, the Provincial Government will assume the municipalities' share of Old Age Pensions and Mothers' Allowances.

This will enable the municipal councils to reduce their taxation by approximately $3,500,000.00 per annum.

PENSIONS FOR THE BLIND

The Province will assume the municipalities' share of the cost of this social legislation. It is estimated that the municipalities will therefore save approximately $100,000.00 per annum.

AMUSEMENTS TAX

Effective June 1, 1937, the Amusements Tax will be totally abolished. As over 80 per cent. of the amusements tax is collected from admissions of 25 cents or under, the benefit, largely to citizens of lesser means, will amount to $1,500,000.00 for the year 1937.

Prime Minister and Provincial Treasurer.

ADVERTIZING PAYS—TRY IT!

Eastern Star Instal Officers

Peel Chapter No. 96, O. E. S., held its installation of officers in the Odd Fellows Hall, Streetsville, Monday evening May 17.

A banquet, under the direction of Mrs. Elma Couse and her committee preceded the meeting, with about 100 members and guests present.

Visitors came from Toronto, Mt Dennis, Oakville, Brampton and other Chapters.

Mr. Sam Cordingley was toast master. Following was the toast list
The King—God Save the King.
Grand Chapter—
Proposed by Mrs. Atkinson
Response by Dr. J. M. Cation
Visitors—
Proposed by Mrs. Dunn
Response by Mrs. Stewart, W. M Primrose, Toronto
Newly-Installed Officers—
Proposed by Mrs. M. Bunt.
Response by Mrs. P. Drew and Mr. S. Cordingley.

Installation ceremonies were conducted by Sis. Sarah Robertson, P.G. M., and Bro. J. M. Cation, P. G. P., assisted by Sis. L. Davidson, Sister J. Elliot, Past Matrons of Peel Chapter, and Past Matrons and Patrons elect of various Chapters. The following officers were installed:

Mrs Phyllis Drew, Wor. Matron
Mr. Sam Cordingley, Wor. Patron
Mr. Geo. Bonham, Assoc. Patron
Mrs L. Cook, Secretary
Miss E. Reid, Treasurer
Mrs. E Beattie, Assoc Conductress
Mrs. E. Bonham, Chaplain
Mrs. E. Morris, Marshall
Mrs E. Couse, Organist
Mrs. L. Shied, Adah
Mrs. M. Scott, Ruth
Mrs. A. Kaiser, Esther
Mrs. E. Price, Martha
Miss V. Copeland, Electa
Mrs. M. Brown, Warder

Assoc. Matron and Conductress were in England for the Coronation and will be installed at some later meeting.

Mrs. Florence Wolfe, retiring Matron, was presented with a P. M's jewel by the W M., Mrs. Drew, as a gift from the Chapter, and several personal gifts.

Mr. O R. Church, retiring patron was presented with his Past Patron's Jewel. He was also presented with a fountain pen, a gift from the Chapter, also with a gift from the retiring Worthy Matron.

Mrs. Drew, the newly installed W. M., received from her husband a bouquet of carnations, an Eastern Star Electric Emblem was presented to her by Mrs. Hillis, a gift from Mr Hillis and Mr. Drew. She also received a gift from the retiring Wor Matron, and other personal gifts.

Gifts and expressions of appreciation were also tendered and extended to Mrs. Robertson, Dr. Cation and others who assisted in the ceremony of Installation.

It was a colorful and most enjoyable evening, one that will be long remembered by all present.

The Chapter is in a flourishing condition and the new officers have the best wishes of all the members. Several new members were received during the past year and more are coming in this year. They always have a good time at the Eastern Star meetings, which are improving every year.

Vocal selections were rendered in excellent voice by Mrs. McNeil of Toronto, accompanied on the piano by Mrs. Pearl McDonald, Weston

The Chapter room presented a beautiful appearance with the lovely decorations and made one feel it was surely a pleasure to be present to witness the colorful ceremony of Installation, performed in a most commendable manner by a set of competent officers.

Membership in the Eastern Star is open to Master Masons, their wives, mothers, widows, daughters sisters, who have attained the age of 18 years.

The Open Column

The Hon. Earl Rowe says that the Conservative party is marching up the middle road with a fair deal for everybody, and still there are murmurs of discontent from staunch members of his party, chiefly farmers who have to work for a living, and who believe that people who eat the produce of their farms should also work for a living. The middle of the road, we fear, may prove a dangerous place for Mr. Rowe and his followers. He and his cohorts are in danger of being run down by the traffic.

Yet, after all, the whole question of labor organization and the C.I.O. should be an unnecessary issue, so far as provincial politics and administration are concerned. Hon. T. L. Kennedy has declared that the workers of this country are entitled to a minimum yearly wage, as well as to a minimum hourly wage. That is to say that, if a worker is employed by a firm, he should be given sufficient employment, throughout the entire year, to support his family.

Col. Kennedy's pronouncement, in our opinion, is the only board of the Conservative platform that will bear the weight of the party. Until quite recently, such a premise would have been considered the affair of the Federal Parliament, rather than of the Provincial Legislature. It would be highly impracticable, to say the least, to provide a certain yearly standard of pay in Ontario while, in Quebec, workers were receiving substantially less for doing the same work. Yet that condition exists at the present time, even though the Ontario standards are lower than the trade union believe they should be.

Therefore, it would seem to be a matter for the House of Commons to legislate upon. It would be folly to expect Ontario manufacturers to increase their wage scales and still meet sweat-shop competition of Quebec. Yet it has been ruled that the establishment of a standard wage scale across the Dominion is beyond the powers of the Dominion Parliament, and that the establishment of such wage scale rests with the Provinces.

Hon. R. B. Bennett has suggested that there must be a complete revision of the British North America Act to meet these conditions. We entirely agree with that suggestion. And we believe that the Hon. Earl Rowe had better agree with it. At the present time, Mr. Rowe is floundering, feeling his way from day to day, without a single substantial policy to offer his supporters. At Caledon East, a week ago, Mr. Rowe announced his "middle-of-the-road" policy in a few halting words, then devoted the remainder of a lengthy address to vituperating Premier Hepburn's administration.

Party brands on voters are beginning to fade, we believe. Not so many of us, these days, will vote Conservative or Liberal because our fathers were Liberal or Conservative. Some of us vote for the policy. Others, who have studied political promises more thoughtfully, vote for the man. An article in McLean's magazine, last week, gave little hope of the survival of the Conservative party as a Federal force. We see little hope of its survival as a provincial power unless, with the very near future, a strong, hard, definite policy and platform is evolved.

No matter what Premier Hepburn does or says, T. L. Kennedy has suggested a sound beginning: all-year-round security for the working man. According to the latest ruling, legislation to that effect is within the power of the Provincial Legislature. Actually, such legislation on the part of the Ontario Government would be worse than useless. Then let Mr. Rowe and his followers fight for a revision of the British North America Act, and a proper redistribution of the legislative duties of the Dominion and the Provinces. There is too much government in Canada as it is. At least our various legislative bodies should have definite knowledge of their powers and limitations. Too much time and oratory have been wasted "passing the buck". Mr. Rowe stands an excellent chance of losing the next provincial election by his "middle-of-the-road" policy. If he can place the responsibility for administration of labor disputes where it should lie, and remove the question of labor from the provincial battle-field before the coming election, he should be the next premier. But he must do something other than walk in the middle of the road. People who did that on a provincial highway would be arrested for obstructing the traffic.

The engagement is announced of Sarah E. Petch, of Caledon, to Stafford J. Imber, Brampton.

Mr. and Mrs. A. B. Bruce, Mr. J. B. Ross, Mr. Ronnie Bruce and Miss Mildred Quennell, visited with Mr. and Mrs. Reg. Bruce last Sunday.

William Hume, of Milton, passed away last week at the age of 84. He is survived by his wife, formerly Pernina Sherwood.

TRINITY CHURCH NOTES

The Girls' Auxiliary of Trinity Church assembled in the Parish Hall on Monday evening for the closing meeting of the season. The meeting was in charge of the President, Miss Gladys Dadd. After the opening session Miss Margaret Geische read a virtuous poem on 'Prayer'. After all business was transacted, the leader, Miss M. Castle, spoke to the girls, and left with them some beautiful ideals to think about during the summer months. The remainder of the evening was spent in games, and Miss Lorretta Rutledge and Miss Jean Hammond were the winners. Lunch was served, and Rev. Mr. Ottley closed the meeting with prayer. We hope all the girls have a pleasant holiday season, and that you will give your continued support to the organization next season.

The Peel Deanery and District Local Council will meet next Tuesday night, May 25th, at St. Agnes' Church, Long Branch. All reports will be given, and the election of officers for the coming season will be held. We hope that representatives from this Church will attend this meeting.

On Wednesday evening, May 26th, the A.Y.P.A. of Trinity Church will have its closing social for the summer months. It is an open meeting, and the members of the Sister Churches have been invited. An interesting programme is being arranged. A full attendance of our own members is requested for this occasion. Don't forget to sign your paper—re the summer outing!

Services next Sunday, May 23rd:
10 a.m.—Sunday School.
11 a.m.—Morning Prayer.
7 p.m.—Evening Prayer.

Village Council

Streetsville, May 17, 1937.

Council met this evening at 8.00 p.m. in the Council chamber. Present, Reeve S. H. Foster, Councillors J. E. Bailey, Wm. Potts, C. E. Cantelon. The reeve presided.

Minutes of the previous meeting were read and adopted.

Communications were read as follows: Canadian Red Cross Society re campaign for funds for the London flood area. Toronto Township relief department re a certain family asking Council to issue relief to this family and charge it back to Toronto Township.

The appeal from the Red Cross was laid on the table to be considered later; the clerk was instructed to issue relief to the above family.

Mrs. Dudley waited on Council and asked that the sidewalk in front of her property be repaired. The Road Committee advised Council that it would be necessary to put in a whole new walk in order to make a satisfactory job of it. The Committee decided to prepare estimates on the cost of the work and report back to Council.

The matter of repairing the fence near the Credit River, on the Caslor sideroad was discussed and the Road Committee asked to visit the spot and look over the work to be done.

The following accounts were presented and passed for payment: Bell Telephone Co., $7.68; Streetsville Review, $36.10; Firemen's Allowances, $6.00; F. McClintock, teaming, $25.20; W. Leslie, labor, $5.25; H. Culbert, labor, $10.00; G. Duller, labor, $4.00.

Mr. L. Lee, chairman and Mr. C. P. McArthur, treasurer of the Coronation Committee presented to council a report showing in detail the receipts and expenditures for the Coronation Day celebrations and reported a deficit of $7.05 over their estimates.

Moved by Wm. Potts, seconded by C. E. Cantelon: "That the Treasurer be authorized to issue a cheque to the Coronation Committee for $7.05 being the amount of the deficit in the celebrations." Carried.

Moved by C. E. Cantelon, seconded by J. E. Bailey: "That the Committee in charge of the Coronation Day celebrations be complimented and that the Clerk express to them the sincere thanks of the Municipality for the very excellent and satisfactory manner in which the entire program was planned and carried out." Carried.

Moved by Wm. Potts, seconded by J. E. Bailey: "That the Clerk write a letter to A. W. Miles expressing the thanks of the Municipality for his generosity in loaning his animals and attendants for the Coronation Day celebrations." Carried.

Council adjourned to meet May 7, at 7.30 p.m.

Norval—Seven persons were injured Sunday when a car driven by E. F. Binsell, Brampton, and one driven by Clarence Wilson of Guelph, collided on the highway one mile west of Norval. Binsell suffered several fractured ribs and body bruises, while his wife and daughter, who accompanied him, suffered from cuts and bruises. Wilson had severe scalp cuts and shoulder injuries, while three passengers in his car escaped with minor injuries.

Snider's

The May meeting of the "Brighten the Corner" Mission Band was held last week at the public school. The leader, Mrs. E. F. Wilson, conducted the worship service. The members continued their journey on the "Greybird" to India. A letter from the band to their missionary, Miss M. Scrimgeour, Trinidad, was also written. During the work period the girls dressed dolls and the boys made fretwork. Mrs. Wilson was helped by her assistant, Miss Eileen Pickering.

Mr. and Mrs. Emory Sibbald, Miss Lillian and Miss Barbara Sibbald, of Norwich, visited on Sunday with Mr. and Mrs. Cecil Fish.

Mr. and Mrs. Ross Lunau and Miss Viola Lunau attended the graduation exercises of the 1937 graduating class of the Training School for Nurses of Guelph hospital, on Friday evening. Their daughter and sister, Miss Evelyn Lunau, was a member of the class.

Owing to the Coronation on Wednesday, the W.M.S. held their meeting on Tuesday in the church auditorium. The president, Mrs. Roy Fish, conducted the worship service, assisted by Mrs. J. McSparran. Readings were given by Mrs. A Fish, Mrs. W. Thomas, Mrs. L. Fish and Miss M. Pickering. In accordance with the emphasis being laid on missionary readings this year, the president distributed several books to the members. Miss A. Marshall gave a report of the Conference Branch meeting at Niagara Falls. Mrs. E. F. Wilson contributed a piano solo (a fantasy on National Airs) and the meeting closed with the singing of the National Anthem.

The sympathy of the community is extended to Mrs. A. G. McNab and Mr. T. H. Wilson, who have been bereaved by the death of their sister, Mrs. Percy A. Breakey, Toronto, and who was well-known in this district.

Among the piano pupils of Miss Grace Johnstone who assisted at her recital in Milton on Tuesday evening last were Miss Dorothy Post and Miss Muriel Smith.

In common with all public school pupils throughout Halton County, each pupil of Snider's School received two small trees, a spruce and an elm, to plant. This is to commemorate the Coronation and will help also in the drive towards reforestration of the county.

SNIDER'S

(Received Too Late For Last Issue)

A special Mother's Day service was held at the session of the Sunday School at Wesley on Sunday afternoon. At the church service following, the form of Divine Service commended for use in the United Church for the Sunday preceding the Coronation was used.

Many of the Wesley people were guests on Saturday evening at a shower tendered Mr. and Mrs. Harold Biggar (formerly Isabel Levack,) of the Munn's appointment. The shower was given by Munn's Church and the young people of Sheridan and Wesley at the home of Mr. and Mrs. W. H. Biggar.

Miss Thomas, Toronto, was a visitor on Sunday with her mother, Mrs. Thomas, Sr.

Several beautiful baskets of flowers and flowering plants were placed in Wesley church on Sunday in honor of Mother's Day.

The special Coronation service at St. Peter's Church, Erindale, on Sunday evening was attended by residents of Snider's community.

Lloyd Pickering is recovering from a severe attack of the flu.

Miss Ruth Clifton was a guest for the week-end with Miss Alberthia Conover.

Mr. and Mrs. Percy Barnstaple and son, Clarkson, visited on Sunday with Mrs. Barnstaple's parents, Mr. and Mrs. W. Greensides.

Appropriate numbers for Empire Day and which are timely for the Coronation are being taught the public school scholars by the music instructor, Mr. Ralph Kidd. The selections are "Land of Hope and Glory", by the British composer, Elgar, and "O Canada".

It might cost you ten dollars and costs to do any shooting in Peel County on the Sabbath Day.

Departmental examinations in High Schools will begin on Monday, June 14th, and will be completed on June 29th. High School entrance exams will commence Friday, June 25th.

Dr. R. K. Anderson, ex-M.P. for Halton, lies seriously ill in Hamilton General Hospital with heart trouble.

Mr. Jennings, Inspector, from Toronto, visited our High School on Monday!

The next public holiday will be Monday, May 24th.

CORONATION DAY

The committee in charge of the day's doing, report a generous response on the behalf of all citizens and the council. No less than forty-six subscribed $57.50 to assist the council grant of $107.05 to make Streetsville Coronation day the best in the district. The expense approximately included, medals, $15; fireworks, $31; bands, $25; loud speaker, $10; awards for sports and contests, $20; orchestra, $20; decorations, $25; advertising, printing, telephone, etc., about $20. The day was voted a huge success, and the committee-in-charge and subscribers deserve hearty approval.

The success of the day was in no small way due to the contribution of Mr. W. C. Arch and the Legion boys in staging the circus parade. Every citizen also joins in heartily thanking Mr. A. W. Miles for the loan of all his animals with their trainers, entirely without charge. Mr. Miles is developing a magnificent recreational centre on his farm near Erindale. Mr. W. C. Arch is in charge of the construction of buildings, and during the summer this attractive park will be the mecca for the kiddies of the district.

The prize winners were announced in this paper last week. The Coronation Day will surely go down in Streetsville's history as a red letter event.

District News

Malton-Palestine Conservative Club has elected the following officers for the ensuing year: President, Leslie Lawrence; 2nd vice, Allen Cook; 3rd vice, Luetta Lawrence; secretary, Florence Stevens; treasurer, Albert Stevens.

Mr. and Mrs. T. D. Switzer and family of Toronto visited with Mr. and Mrs. W. F. B. Switzer on Sunday.

Mr. and Mrs. H. W. Hope and Mr. and Mrs. Fred Maas motored to London on Saturday and visited Mr. T. H. Goodison.

Mr. and Mrs. "Bay" Pinkney, of Toronto, visited with Mr. and Mrs. W. C. Andrew on Sunday.

Byron Smardon, of Weston, aged 12, was killed on Sunday, when a motorcycle his brother was driving collided with an auto.

Priscilla Hume, widow of the late William A. Dixon, died in Nelson township on May 16th, and was buried in Milton cemetery.

Two carloads of Streetsville Odd Fellows motored to Oakville Sunday morning and joined their brethren there in their annual church parade, to the United Church, where a splendid sermon was delivered by the pastor, Rev. G. H. Gallagher.

The Streetsville Horticultural Society has been busy making improvements to the Cemetery plot next to the Presbyterian Church. This plot has been an ungainly blot on the fine landscape for some time past. Weeds, ill-placed stones and chaos suggested abandonment rather than cherished memories and a few local residents felt that something must be done though they have no personal interest in the site to make the approach to the property look decent in the hope that somebody will lead a foray into the interior of the plot and make it a garden of delight. Some $40 was spent in plants and shrubs and much work done, so that now we expect to have a beauty spot at the cemetery gate and along the fence.

The editor of a country newspaper received from a subscriber the query, "Can you tell me what the weather is likely to be next week? In reply he wrote: "It is my belief that the weather next week is likely to be very much like your subscription." The inquirer puzzled his head for an hour over what the editor was driving at, when finally he happened to think of the word "unsettled." He sent a cheque the next day.

AUTO ACCIDENT

There was a head-on collision Saturday night between two cars on Dundas St. Cooksville, near the brick yards. It seems a Winnipeg car cut out to pass another car and collided with a car driven by Norman Rutledge, who, along with a girl friend, Miss Annie Adamson, was badly bruised, and shaken up. The young couple were taken to Peel Memorial Hospital for treatment, and are getting along nicely now.

SUNDAY SCHOOL LESSON

Sunday School Lesson—Willard m 10
LESSON VIII.
THE WEAKNESS OF ESAU
(Genesis 25: 19—34; 26: 34, 35; 27: 1—46.)

Golden Text—Every man that striveth in the games exerciseth self-control in all things. 1 Corinthians 9:25.

The Lesson in its Setting

Time—The generally accepted date for the birth of the twins, Esau and Jacob, is B.C. 1844. The selling of the birthright took place 18 years later, and Esau was married about B.C. 1805. Facts given about Jacob's years of service (Gen. 31: 41) and his age and his children's would place his flight from home about B.C. 1784.

Place—The twins were born probably at Beer-lahai-roi (Gen. 24: 62; 25: 11), about 50 miles south of Beersheba. Later events in the lives of these two men took place near either one or the other of these two cities.

Gen. 25: 27—34. "And the boys grew: and Esau was a skilful hunter, a man of the field; and Jacob was a quiet man, dwelling in tents."— He was full of the manliest interests, occupations, and pursuits. He was a very proverb of endurance and success in the chase. His hand was always full of skill, and strength, and success. He was the pride of all the encampment, as he came home at night with his traps, and his snares, and his bows, and his arrows, and laden to the earth with venison for his father's supper.

"Now Isaac loved Esau, because he did eat of his venison: and Rebekah loved Jacob."—Persons of quiet and retiring disposition like Isaac are often fascinated by those of more sparkling and energetic temperament such as Esau. Mothers, on the other hand, are mostly drawn towards children that are gentle in disposition and home-keeping in habit. We are probably not wrong in discovering in these words an indication that there were some jealousies and prejudices in the home of Isaac and Rebekah.

"And Jacob boiled pottage: and Esau came in from the field, and he was faint. And Esau said to Jacob, Feed me, I pray thee, with that same red pottage, for I am faint." Pottage was a kind of thick broth made by boiling lentils or other vegetables with meat or suet, usually in water, but sometimes in milk. "Therefore was his name called Edom." The word for red is the word "adom," quite similar to the word "adam." The propriety of a particular name may be marked by two or more totally different circumstances, and its application renewed on each of these occasions. It is pretty certain that Esau did receive the secondary name of Edom from the red complexion of skin even from his birth, but the exclamation "that red," uttered on the occasion of a very important crisis in his history, renewed the name, and perhaps tended to make it take the place of Esau in the history of his race.

"And Jacob said Sell me first thy birthright." —The birthright seems to have included temporal and spiritual blessings. It carried with it a double portion of paternal inheritance (Duet. 21: 17; 1 Chron. 5: 1, 2); it gave the holder precedence as head of the family or tribe. Above all, it constituted the possessor priest and spiritual head of his people.

"And Esau said, Behold, I am about to die: and what profit shall the birthright do to me?"—Of course he was not about to die. No man would die simply because he had not had food for perhaps 12 or 14 hours; moreover, supper would normally be prepared for Esau within less than an hour. He simply exaggerated the importance of the demands of his body. Oblivious of everything but his hunger and his food, so it is always with the man who has fallen under the power of sensual appetite.

"And Jacob said, Swear to me first; and he sware unto him: and he sold his birthright unto Jacob. And Jacob gave Esau bread and pottage of lentils; and he did eat and drink, and rose up, and went away: so Esau despised his birthright."—In Hebrews 12: 16, Esau is spoken of as "a profane person." Profane is a Latin word which means "before the temple," and "refers to that plot of ground just in front of the temple which was common to everyone as being outside the sacred enclosure. Gradually the name came to mean that which was purely earthly and common, as opposed to that which was sacred, consecrated and dedicated to God." Esau's life was entirely earth-bound. He was intent only on present gratification and set no value on the divine gifts. To him future blessings were intangible and unreal. Everything about the present was real to him, while everything about the future was unreal, vague and misty. To him this world was everything and God nothing.

"And Esau hated Jacob because of the blessing wherewith his father blessed him: and Esau said in his heart, The days of mourning for my father are at hand; then will I slay my brother Jacob."—Of all the parties in this transaction, none is more to blame than Esau. While he so furiously and bitterly blamed Jacob for supplanting him, it might surely have occurred to him that it was really he who was supplanting Jacob. Inconstant as he was, he could scarcely have forgot the bargain by which he had sold to his younger brother all title to his father's blessings. Many that care very little for God's love, will seek his favors; and every wicked wretch who has, in his prosperity, spurned God's offers, will, when he sees how he has cheated himself, turn to God's gifts, though not to God, with a cry. Like many another sinner he wanted to eat his cake and have it.

"And the words of Esau her elder son were told to Rebekah; and she sent and called Jacob her younger son and said unto him Behold thy brother Esau, as touching thee, doth comfort himself, purposing to kill thee. Now therefore, my son, obey my voice; and arise, flee thou to Laban, my brother to Haran. And tarry with him a few days, until thy brother's fury turn away. Until thy brother's anger turn away from thee, and he forget that which thou hast done to him: then I will send, and fetch thee from hence: why should I be bereaved of you both in one day?"— It was from Haran that Rebekah herself had come at the request of Abraham's servant to be married to Isaac. She intended her son to be absent only "a few days," but they proved to be 20 years (see 31: 38). It is not probable that Rebekah ever again beheld her favorite son, which was a sinful chastisement for her sinful ambition for and partiality towards Jacob. — Rebekah seems not to have been aware that she herself was the cause of much of the evil and of much of the misery that flowed from it. All the parties of this affair are pursued by a retributive chastisement.

Pasteur and Pasture

The farmer-milkman was much annoyed with a temporary resident in the village who complained of the price he was charging for milk.

"I am entitled to charge the same price as in the city," he assured her.

"But that's nonsense," she insisted. "The milk I get in the city is pasteurized."

"Pasteurized! Pasteurized!" he retorted. "I'd like to know anybody's cows that are pasteurized more than mine. Come down to my place any hour of the day or night and you'll see my cows pasteurizing in the fields."

Is John Lewis slipping? He permits President Roosevelt to fraternize with nonunion fish. — Chicago Daily News.

"If I lived a thousand years I would still be a Virginian."

—Lady Astor.

"Conservation will continue to be of transcendent concern to the human race so long as we have to depend upon this earth for our food, clothing, shelter and our pleasures."

—Harold L. Ickes.

New Coronation Standard

Combining all the national emblems of the Do minions and Colonies, this special flag was designed for the Coronation ceremony.

Just Sawing Wood

Paul Searles, champion sawyer, gives himself a real workout on a huge log as he sharpens up his arms for the contest in which lucky lumbermen will be selected for the honor of sawing giant redwood at opening of Golden Gate Bridge.

Even As You And I

Jackie, the well-known movie lion, makes no bones about his feelings toward dental work. Dr. S. James Vamuas, dentist at the Los Angeles Zoo, waits for his chance to make his semi-annual inspection as Superintendent Melvin Kountz tries to spread Jackie's jaws.

Boarding Houses Coming Back?

Miss Irma Berger, executive secretary of the Association to Promote Proper Housing for Girls in New York, told the association members at their annual meeting the other day that the old-style boarding houses are regaining their popularity. An increased demand for such accommodation has sprung up recently, she said, and the number of boarding houses, as distinct from rooming houses, has been decreasing for years and such accommodations have often been hard to find.

Clubs, apartments and studios grew more popular about the time the "bachelor girl" came in. While many "old folks" clung to Victorian boarding houses, young people of both sexes, revolted in favor of modern accommodations. Can it be, now, however, that the old-fashioned boarding house (although more likely it will be new-fashioned) will renew its appeal for comfortable, homey, protected living?

Perhaps not all the rooms will be back rooms. And could wash-bowls and pitchers enough be recovered from the limbo into which they vanished, to refurnish a modern city-size boarding house? It is doubtful, too, whether enough prints of the "Stag at Eve" or the "Gardens of Versailles" could be found to furnish many rooms. And bric-a-brac of the William McKinley decade is scarcer.

Boarding houses gone? Of course no. Miss Berger is right: "You can't keep a good boarding house down." The world has not outgrown home cooking, and maybe there is still a lonesome country boy or girl in the city who wouldn't mind being "mothered" at times. And parlors may sometimes be as pleasant to entertain callers in as a movie palace.—Christian Science Monitor..

Famed Baths azed

The blazing ruins of the famous Castle Baths on the boardwalk at Long Beach, N.Y., as firemen raise a wall of water to prevent spread of flames to adjoining building. Ballroom where Irene Castle once danced and rows of both-houses were a total loss.

Movie-radio gossip

By DOROTHY

You never can tell what an actor will be asked to do down at the Metro-Goldwyn-Mayer studio. You'd just think they'd be satisfied to have Clark Gable and Robert Taylor the romantic idols of half the population, but never satisfied they are making the lads sing in their new picture.

Doris Nolan was not too pleasant over her role in "The Top of the Town" because it seemed to her that she never had anything to do. She felt that she was all but lost among the fancy sets and big musical numbers, which just shows you that actors are usually wrong about what a picture will do for them. Sam Goldwyn took one look at "Top of the Town," and imediately started negotiations to borrow Miss Nolan for a prominent part in "Dead End." Meanwhile Miss Nolan had gone off on a motor trip with her sister, to take a look at the cherry blossoms in Washington, to dash over the skyway in Shenandoah Valley, and visit relatives in North Carolina. The good news reached her en route.

All the studios are re-making successes of other days, having failed to find new stories as good. M.-G.-M. has cast Jean Harlow and Jimmy Stewart in "The Shop-worn Angel," which was one of the best pictures ever made when Gary Cooper and Nancy Carroll played it. And Lily Pons will play "Carmen" with operatic flourishes, which was not so good when Mary Pickford played it years ago.

Lily Pons

ODDS AND ENDS — Erin O'Brien Moore, who was so good in "Black Legion," is going to play Nana in "The Life of Emile Zola," a part that dozens of prominent actresses had tried out for — Pathe's two-reeler — "A Day With the Quints," proves definitely that the world's most famous three-year-olds grow more charming and obstreperous every day. They achieve an almost Donald Duckian rage when anyone addresses them by the wrong names — When Ann Sothern returned to the R.K.O. studios, she found an exquisite reindeer on her dressing table, a gift from Una Merkel who had occupied her room during her absence — Don Wilson of the Jack Benny program is making his picture debut in R. K. O.'s "Missus America." — Albert Colfs, famous Belgian portrait painter, says the most beautiful of all the film stars are France Farmer, Merle Oberon, Luise Rainer, Jean Harlow, Norma Shearer and Kay Francis.

'SALADA' TEA is delicious 201

Love Huntress

By H. GLYNN-WARD

Claudia Townsend meets Dick Whalen at a hockey game in Seattle one night. Her interest in Dick infuriates Wallace Bornell, rich young lumberman, who wants to marry her. To get Dick out of the way, Wallace gives him a job in one of his lumber camps in British Columbia. At the camp, Dick accidentally discovers that Bornell's men are working stolen timber lands. He asks for an explanation, but Braddock, the boss, puts him off and next day leaves for Seattle. The following day, Claudia stops in at Bornell's office and, by chance, overhears Bornell and Braddock plotting to do away with Dick. Claudia goes to the camp at Burns Lake to warn Dick. At the camp, she learns from Ching, the Chinese cook, that Braddock, who has arrived first, has sent Dick off on a long trip, with a man, Moriarty, who hates him. Moriarty has instructions to "Come back alone!"

CHAPTER IX

Claudia sat staring in front of her. Dick Whalen had gone out to his death this morning! In answer to her thoughts, there came a nervous chuckle from Ching Lo.

"I t'ink maybe Moliarty kill Missa Whalen!"

"Oh, no!" she gasped. She gulped down some coffee to steady herself. She must keep her brain clear, think quickly.

"Do you know which way they went?"

"Sure, sure! Look outa window and see 'em go—that way, far 'way from others. Cross lake by east. Find 'em by snowshoe track!"

"Is there any man here, Ching, who would come and help me look for them?" she asked pleadingly.

He shook his head violently.

"No, no! All man velly 'flaid of bossee-man in this camp."

What could she do? Go alone after them? Was Ching Dick's only friend in this place?

"You are Mister Whalen's friend, Ching. Would you do him a big favor?"

"Sure, sure," he nodded, smiling. "Ching Lo do anything for Missa Whalen."

"Then—"

The cook-house door opened and Braddock stood there. At the same time the siren blew for the dinner hour.

"You better come over to my office, Miss!" he said. "The boys are just coming in."

She saw men now making for the cook-house door from all parts. Some of them, she noticed, went across to another building first.

"What's over there?" she asked.

"That's the store," Braddock told her. "We have to keep a supply o' necessities on hand."

"I'll go over there," she said. "I want some cigarettes."

* * *

She walked quickly to the store. There might be someone there who could tell her of Dick.

The man at the store seemed surprised. "Why, no, I've not seen Mr. Whalen since last night. Guess he'll be back for supper." She saw the man's eyes go over her head.

She turned and saw that Braddock had followed her.

As she walked slowly out of the store, she told herself sternly that she must control her wits as well as her motions. She must disarm suspicion! Already Braddock had been allowed to see too clearly that she suspected him. She must pretend to be an innocent fool, a silly girl just out for a lark.

"Where is the lake?" she asked, smiling up at him. "Do show me the camp!"

Claudia forced herself to make inane conversation as they walked to the top of the hillock and looked across that vast expanse of snow-covered ice that was the lake. Eagerly she strained her eyes for signs of tracks to the left — Ching had said those two had started east. She thought she could discern them. How could she follow? She couldn't go alone— perhaps find herself unprotected with the fiend who had been sent out to murder Dick!

Ching was her only friend. She might do worse than to take him with her. She must get in touch with him again.

* *

Back in the office, she held up her skis for Braddock's inspection.

"Have you ever tried skiing, Mr. Braddock? Often Mr. Bornell and I have been out on long trips on Mt. Rainier. I'd hoped he'd come up here with a party. My skis are terribly dry, they have to be kept well-oiled, you know. Do you think that funny old Chinese cook would give me something to oil them with?"

"Why sure!" said Braddock, a little puzzled by her seeming friendliness. "I'll take 'em over and tell him to oil 'em."

"Oh, don't trouble, I'll go!" She picked up both skis and ski-poles and started across to the cook-house. Already the men had dispersed from dinner.

Braddock, of course, accompanied her. He saw that Ching had the right kind of oil, saw also that she had no one else to talk to just then, so he left her for a minute.

"Ching!" she whispered quickly, "will you come with me to look for Mister Whalen?"

"Sure I come, Missee! Better not go till dark!"

"Ching, I'll pay you lots of money if you come! I'll leave my skis here now by the door, and I'll come as soon as I can get away after dark. You be ready. Can you snow-shoe?"

"Sure! Go like wind. I be ready . . . bring plenty food. . ."

So Claudia sauntered back to the office.

* * *

"Tell you what, Miss Townsend," said Braddock. "There's one of our teams leaving right now with an empty sled on its way to where the gang is working. How would you like to go along with them to find Whalen?"

"That's clever of him," she thought. "He's sending me in the opposite direction." Still there was a chance of meeting somebody who was a friend of Whalen's. She agreed to go.

The splendid team of horses crossed the lake at a heavy trot, but the two men driving were stupid, and too amused at the idea of their unusual freight to answer questions sensibly. Claudia grew uneasy. Another team was coming towards them, pulling a heavy sled full of lumber. She determined to stop and ask the drivers if Whalen was at work where they had come from.

"Whalen? No we haven't seen him at all today."

"Then—will you please take me back to the camp with you. I can sit on top of the poles, I don't mind a bit!"

It seemed an endless journey back again, terribly cold, and the light was beginning to fail when at last they reached the camp. Soon she could make her escape with Ching—

She got down from the sled and walked slowly towards the office.

Braddock came out with a beaming smile.

"Just as well you got back home when you did," he said. "There's a pleasant surprise waiting for you in there—"

She looked at him wonderingly. He opened the door for her, shut it sharply behind her.

She stood confronting Wallace Bornell!

Brain Operation Is Found Cure For Physical Ailment

WASHINGTON— A brain operation has returned to health a patient completely bed-ridden for two years, Dr. James W. Watts and Dr. Walter Freeman of George Washington University said last week.

They told the Medical Society of the District of Columbia that the operation, which previously had been found effective in treating serious mental disorders, also had remedied a physical disorder.

The woman on whom the operation was performed had been unable to walk for two years and suffered almost continuous intense pains in the back. Her symptoms indicated rheumatic heart disease and arthritis, the surgeons said.

She had averaged one operation every six months for five years without growing any better.

Almost as a last resort Dr. Freeman and Dr. Watt performed the operation. It consisted of boring two holes in the skull just below the hair line and cutting 12 cores about the size of marbles in the pre-frontal lobes of the brain, just behind the forehead. The cores were not removed, but their connection with the surrounding brain tissue was severed.

The bed-ridden patient was able to walk again three days later, and in the intervening five months has not been in bed for a single day. Her intense pains were said to have been reduced to only a slight tenderness of the back.

Jiu-Jitsu Being Studied by Women

NEW YORK.—Women are studying jiu-jitsu today—for self-protection.

Five women have enrolled for instruction under Prof. K. Nakae, whose "shingle" reads:

"Jiu-jitsu — "Self-defense taught privately to men or women by native authority."

"Every woman should know jiu-jitsu," said the professor. "Men should be glad to see their women studying it. I sometimes think women live a more hazardous life every year."

The modern girl or woman is capable of looking out for herself when dealing with gentlemen, said Nakae, but "unfortunately not every man is a gentleman."

A woman who finishes a course knows how to knock a man out, if need be.

Farmers Want Share

With the rising cost of living becoming a serious matter in the Irish Free State the farmers of the country are complaining to the Dublin government that they are paying their share of the rise in foodstuffs but are not receiving any. They protest that the tariff problem is aggravating their troubles. The dairymen point out that Australian butter is being sold in the Free State at 30 cents a pound while Irish butter commands only 20 and 25 cents across the water. Entrance of New Zealand butter into the country has just started another protest. Farmers have joined with the dairymen and declare they are determined to make their claims heard by the Government.

Bees do not get honey from flowers. They get nectar, which they transform into honey by adding certain enzymes. These convert the complex sugars of the raw nectar into simple sugars, known to chemists as dextrose and levulose.

Making a Chair Set Is Really Fun Laura Wheeler Tells How It's Done.

CROCHETED CHAIR SET PATTERN 1470

Something different in crochet — a chair or davenport set crocheted in strips! One strip makes an arm rest, three a chair back, five a davenport back. Once you've made one, just keep repeating—join them together and you're ready to work a transformation on your furniture! String works up quickly, and is durable. Pattern 1470 contains directions for making a strip 5¼ x 12½ inches; illustrations of it and of all stitches used; photograph of section of strip; material requirements; suggestions for a variety of uses.

Send 20 cents in stamps or coin (coin preferred) for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 Adelaide St West, Toronto. Write plainly PATTERN NUMBER, your NAME and ADDRESS.

A Right Royal Salad

There was a time when gold had to take a back seat. Many people sold their old gold settings and the demand was for the more silvery metals in jewelry. But the Coronation has revived interest in yellow gold because no other precious substance can compare with it in richness and beauty. This would seem a fitting time, then, to serve Golden Glow Salad. It will bring a regal air to your table and is a salad fit for a king.

Besides its attractive appearance, Golden Glow Salad will become a favourite because it is so easy to make. No one should have to suffer drudgery these lovely spring days and if meals are carefully planned to include all the necessities of diet, easily combined and served, there will be plenty of time left over for the housewife to enjoy the weather and enter into the holiday spirit that is abroad now.

The secret of successful salads is quick-setting jelly. This particular recipe calls for lemon jelly but there are so many flavours and colors of jelly on the market that you can always find one to suit the occasion.

Golden Glow Salad

1 pkge. quick-setting lemon jelly, 1 cup warm water, 1 cup canned pineapple juice, 1 tablespoon vinegar, ½ teaspoon salt, 1 cup canned pineapple, diced and drained, 1 cup grated raw carrot, 1-3 cup pecan meats, finely cut.

Dissolve jelly in warm water. Add pineapple juice, vinegar and salt. When slightly thickened, add pineapple, carrot and nuts. Turn into individual molds. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise. Serves 8.

DELICIOUS DESSERTS

Peach Bavarian

One package lemon jelly powder with half cup boiling water. When it is cool add 2 cups mashed peaches sweetened including juice. When partly set fold in ½-pint whipped cream, turn into mould and chill.

Apple Crumble

Slice apples in a buttered baking dish. Sprinkle with white sugar and nutmeg. Mix together 1 cup flour, 1-3 cup butter, ¼ cup brown sugar. Spread mixture over apples and bake until tender. Serve with cream.

Grape Frappe

4 Cups water, 1½ cups sugar, 3 cups grape juice, ¼ cup lemon juice.

Make syrup by boiling sugar and water 10 minutes. Cool, add fruit juice; strain; freeze to a mush; pack and just before serving, beat thoroughly.

Pudding Sauce

Yolk of 1 egg, ½ cup brown sugar, 2 heaping dessertspoons flour, 1 tablespoon butter. Stir this till smooth. Then gradually add—

2 Cups cold water, cook slowly until thick, but do not boil. Take off stove. Beat white of egg stiff and stir in with vanilla.

Some Cream.

1 Can crushed pineapple, drain juice and add ½ cup white sugar. Let simmer ten minutes; add to pineapple, put in deep dish and pour the following mixtures over it:

1 Pint milk, ½ box Knox gelatine dissolved in ½ cup water, ½ cup sugar, yolks of 4 eggs, ½ teaspoon salt. Cook in double boiler 15 minutes, when cool add egg whites beaten stiff. Serve with whipped cream.

Grape Sponge

1 Tablespoon gelatine, ¼ cup cold water, ¼ cup boiling water, 3 tablespoons sugar, 1 tablespoon lemon juice, 2-3 cup grape juice, 2 whites of eggs.

Prepare by softening gelatine in cold water. Make a syrup of boiling water, sugar and lemon rind. Boil five minutes. Pour over softened gelatine, stir until dissolved, add lemon and grape juice, and strain. Turn into moistened mould and stir occasionally.

Butterscotch Sauce

2½ Cups brown sugar, 1 1-3 cups corn syrup, 4 heaping tablespoons butter.

Put all in saucepan. Heat slowly and cook until a little dropped in cold water will form a ball. Remove from fire and add slowly 1¼ cups table cream, 1 dessertspoon vanilla and a pinch of salt. Cool and use on rice pudding, cottage pudding or ice cream. This makes about 1 qt. and keeps in refrigerator for weeks.

Radio Pudding

Mix 1-3 cup brown sugar, 1 cup flour, 2 tablespoons baking powder, pinch salt, ¼ cup raisins, ½ cup milk. Beat well, put in greased pudding or baking dish. Then take 2 cups boiling water, 1 cup brown sugar, 2 tablespoon butter, ¼ teaspoon nutmeg. Mix until sugar is melted. Pour over batter. Bake 1 hour.

Excessive Drinking Weakens Family Ties

Children's Aid Inspector Says Closing of Shelter Good Move

HOME LIFE BETTER

New Officers Elected at Peel and Halton Meeting Recently

Excessive drinking is one of the leading factors causing the separation of parents and the loss of interest in children, G. F. Thompson, supervisor of Children's Aid in Peel and Halton counties, told members of the Peel and Halton Children's Aid Association at their second annual joint meeting in the court house at Brampton on recently. Mr. Thompson made it clear that he was not making reference to legal separations, but to the weakening of marriage ties among fathers and mothers, thus bringing about a serious situation for the children involved.

Mr. Thompson said there was little change during the past year in the number of unmarried parents. With steady improvement in general conditions, he pointed out, more financial support is being received from responsible persons on the strength of court orders registered one or more years ago when no money was available.

The opinion was expressed by Mr. Thompson that the closing of the shelter at Milton last September was a good move. Wards have been placed in private homes and the boys and girls have adapted themselves surprisingly well to their new environments. Not only members of the family with whom they are living, but also neighbors are showing a genuine interest in the newcomers.

During the last year, it was recalled, there were 10 regular meetings, five in each county, with an average attendance of nine members. There was one special meeting in Brampton during June of last year.

Discussions of ideas which might lead to further improvement in the system of caring for homeless and neglected children produced the suggestion that a farm be instituted upon which as many as four or five delinquent children could be stationed. H. D. C. Crooks, director of Guelph Children's Aid Society, who was a visitor at the meeting, expressed opposition to such a plan, contending that it would remove children from their usual environment and would not tend to develop resistance to the type of temptation to which they are subjected normally and to which they would return in later life.

R. E. Mills, director of Toronto C.A.S., maintained that in most cases a good home influence could not be excelled as a means of bringing up children properly. Of course, he admitted, where boys or girls fail to respond to the direction received in a private home, it is advisable to send them to schools or homes where rigid discipline and regimentation prevails.

Stewart Sutton, director of York County Society, spent some time in praising the competent manner in which G. F. Thompson is looking after his duties in Peel and Halton counties. B. Beaumont, Hamilton C.A.S. director, also was a visitor at the meeting.

J. M. Denyes of Milton was succeeded by Amos Mason of Acton as president of Peel and Halton Society. Other officers are: Honorary presidents, J. M. Denyes, Milton and T. W. Duggan, Brampton; vice presients, A. W. Thompson, Brampton and A. A. Buck, Milton; honorary secretary-treasurer, J. J. Jamieson, Cooksville; executive committee, Mrs. W. A. Dorrington, Alton; Mrs. W. J. Hood, Brampton; Mrs. R. B. Collaton, Lorne Park; Mrs. C. Atkins, Bronte; Miss A. Blain, Milton; and Dr. F. R. Watson, Georgetown.

YOUR OLD SEED DRILL WILL SOW FERTILIZER TOO!

WITH A PRESTON FERTILATOR

Modernize your old seed drill and save money. Merely by attaching an efficient Preston Fertilator—you can make it a combination seed and fertilizer drill. The Fertilator is all steel, and can be attached easily to standard makes of seed drills. It sows any grade of fertilizer, is positive in action, and places the fertilizer down the spouts *with the grain!* Write for complete details.

Pinecrest Camp Notes

Boys' Camp—July 3-12.
Girls' Camp—July 14-22.
Cost—$5.00.

Are you thinking of camp yet, boys and girls? Any boy or girl 12 years to 16 years is eligible. Pinecrest Camp at Norval is an ideal spot. Send to Miss Irene Peacock, 77 Elizabeth St., Brampton, for folders giving all particulars.

Do you like camp fires, dramatics, first aid, music, plays, camp craft, picnics or hikes? We have all these at camp. And the most delightful of all is swimming. Send your registration fee of 50c and your application form as soon as possible as only a limited number can come.

OBITUARY

Mrs. Mary A. Breakey, widow of the late Percy A. Breakey, pioneer in the automobile industry, Toronto, passed away at her home 48 Maxwell Ave., Toronto, on Tuesday, May 4th. The late Mrs. Breakey was a daughter of the late Mr. and Mrs. W. H. Wilson, formerly of Streetsville, and during her early life attended the public and high school of Streetsville, and later taught school successfully at Derry West and Queensville. Preferring city life, she attended Shaw's business college and obtained her diploma, where she was asked to join the college staff. During the pastorate of the Rev. Dr. Taylor at Cooke's Presbyterian church she served as Deaconess for some time.

Mrs. Breakey possessed a bright, sunny disposition, with undaunted courage and perseverance and made many warm friends. She was one of those women of Israel whose memories are so much revered to-day. She was a silent worker with Miss Miller and Mrs. (Rev.) Stafford for the care of incomers to our land, thus helping to brighten their sojourn in this new country. She assisted with the management of her husband's automobile business until his demise, nearly four years ago.

The funeral took place on Thursday, May 6th, to Mount Pleasant Cemetery, Rev. Dr. McNicol taking charge of the service, assisted by Rev. Dr. Parks of Carlton United church, both of whom paid high tribute to the useful life of the deceased. Upon Dr. Park's last visit to her in hospital, he was deeply impressed by two things—one was her vivid personality, although in serious condition as we thought, she put up a cheerful conversation and could smile through it all and secondly, as she was partner with her husband in business, that missing link could never have been filled in since his demise

The numerous floral tributes from relatives, friends and former employees bore silent testimony of her esteem.

The bearers were four nephews of the deceased, namely Wilfred Ingham, Norman and Douglas Wilson and Chas. Jennings, also Mr. Lightfoot and Mr. Shaefer.

She is survived by three sisters, Mrs. J. Jamieson and Mrs. J. MacLennan of Toronto, and Mrs. A. G. McNabb, Hornby, and two brothers, Thos. H. Wilson of Streetsville, and W. J. Wilson, Toronto.

A cluster of loving memories
The fondest our hearts can frame,
We weave them into a garland
And place them around your name.
Oft we roam the paths of memory,
O'er the landscape of your past,
Dreaming of the sweet re-union
That we know will come at last.

LET US SMILE

Tommy was lingering over his dinner, and his mother wondered if anything was wrong.

"Why are you so long before eating your dinner, Tommy?" she asked. "Don't you like it?"

"Oh yes, Mummy," replied Tommy, "but I am waiting for the mustard to cool!"

Professor's Wife

"Hello; is that the police station?"

"Yes, what's the matter?"

"I just wanted to tell you that you need not search for my husband, I found him myself. He had forgotten to take off his overcoat, and I hung him in the closet by mistake."

ENGAGEMENTS

Mr. and Mrs. L. C. Alexander, of Oakville, Ontario, announce the engagement of their daughter, Joan Kathaleen, to James Arthur Munro, only son of Mr. and Mrs. Arthur Munro, Toronto. Marriage to take place early in June.

Mr. and Mrs. Harry T. Sterne, "Buena Vista," Brampton, announce the engagement of their younger daughter, Josephine Elizabeth, to Mr. Homer Adrian Newall, ony son of Mr. and Mrs. A. G. Newall, Toronto, the marriage to take place at St. Paul's United Church, Brampton, on Saturday, June 26th.

Mr. and Mrs. W. T. Pearson, Agincourt, announce the engagement of their eldest daughter, Olive Blanche, to Mr. Robert Moffatt, Brampton, son of the late Mr. and Mrs. Jas. Moffatt, formerly of Scarboro, the marriage to take place quietly late in May.

HOLINESS

"Real holiness has love for its essence, humility for its clothing, the good of others as its employment, and the honor of God as its end."—Emmons.

"We know that a desire for holiness is requisite in order to gain holiness; but if we desire holiness above all else, we shall sacrifice everything for it."—Mary Baker Eddy.

"The essence of true holiness consists in conformity to the nature and will of God."—Lucas.

"A holy life is not an ascetic, or gloomy, or solitary life, but a life regulated by divine truth and faithful in Christian duty.—It is living above the world while we are still in it."—Tyron Edwards.

"A holy life is a voice; it speaks when the tongue is silent, and is either a constant attraction or a perpetual reproof."—Leighton.

"Parents should teach their children at the earliest possible period the truths of health and holiness. Children are more tractable than adults and learn more readily to love the simple verities that make them happy and good."—Mary Baker Eddy.

ADVERTISE IN, THE REVIEW

The SNAPSHOT GUILD

CONCERNING BEAUTY

IT has been said that in photography "an artistic picture is a thing beautifully photographed, rather than a beautiful thing photographed."

Essentially true, but regardless of subject, it can't be done unless the photographer can perceive some beauty in the "thing." The "thing" may be just a piece of rope, a cracker barrel or an old shoe, but in certain surroundings and portrayed under the effect of the right lighting, it may truly reveal beauty and make an artistic picture.

There is no rule of photography for discovering beauty nor any fixed criterion of what is artistic. Fundamentally, it's "every man for himself" in those respects, but there are certain sound admonitions that must be obeyed if you wish to make a picture that will be generally acclaimed as artistic, unless, of course, you prefer to join the fancy-free surrealist school of art and take your chances. Briefly, these admonitions are as follows:

1. Provide every picture with a single, dominant idea that will easily be comprehended by anyone to whom the picture is shown. The idea should be expressed by a principal object. Avoid divided interest. Exclude elements that distract attention from the principal one.

2. See that the setting is in harmony with the principal subject and surrounds it with an atmosphere that contributes to emphasizing the main idea, or at least does not detract from it.

3. Work for well-balanced composition in your view-finder before you let the picture through your lens. Generally the dominant subject should not be in the center. Experiment with your viewpoint.

4. Study the light and shadow areas. Observe their relation to the principal subject. Consider the strength and sharpness of the shadow contrasts. Note especially the highlights. It is the effect of shadows and highlights that often gives beauty to an ugly object.

5. Allow ample exposure to bring out desired details.

The artistic effect in the case of many subjects often may be improved by the use of a color filter over the lens, or by a pictorial diffusion disk. Again it may be improved

How a rusty, old chain and anchor can reveal beauty—or what do YOU think?

in various ways in the process of printing or enlarging, such as "dodging" to heighten or subdue the lighting of certain areas, by masking portions of the negative, or by trimming the print. Also it may be improved by choosing a printing paper with a surface best suited to the subject.

In employing these devices it is again "every man for himself," but remember they will scarcely serve if there was no original beauty in the composition of the picture when it was framed in your viewfinder.

132 John van Guilder.

Brantford Boy First in Music

In the Annual Musical Festival of Brantford and Brant County, one of the winners was Master Campbell McLellan, son of Mr. Malcolm Mc Lellan, who was a former resident of Streetsville

Competing against a large number of competitors from Brantford, Paris and Brant County schools, Master Campbell secured first place in his class.

The test piece was: "Where the Bee Sucks," and the adjudicators were Mr. G. Roy Fenwick, Toronto, Mr. P. G. Marshall, Simcoe, and Miss Cora B Abrens, Stratford

The Brantford Musical Festival lasted three days and aroused considerable enthusiasm.

but... ask your friends.

You'll be surprised at the number of people who really want you to have a telephone. Many of them don't even know you but they're interested nevertheless because of what *your* telephone means to *their* service. Too few telephones curtails service and the value of each individual instrument as well. The more telephones in service, the greater the value to each user. From the viewpoints of both service cost and service scope, every farmer is interested in seeing that every other farmer has a telephone.

NEW LOW RATES
for farm telephone service
are now in effect!

In Your Garden

By GORDON L. SMITH

ARTICLE NO. 13

Several sowings of each vegetable are advised, otherwise all mature at the same time, and then there will be a feast or a famine. After all, with such things as radish, spinach, peas, corn or practically anything else for that matter, the time they are really worth eating is when they are fresh; that is, just mature.

PLANTING DEPTHS

Those who know all about the art of good gardening advocate as a good and safe rule, covering the seed to a depth equal to about three times the diameter. Now the beginner is not advised to procure a pair of calipers and work out the diameter of a great variety of seeds he or she hopes to plant. This is a rough rule only. With tiny seed like that of the poppy or the onion, seed about the size of a grain of sugar merely pressing into the soil will be sufficient. With large things like gladioli and dahlia bulbs or potatoes, this rule will call for depth of several inches. With peas, beans and corn it will mean about an inch.

MUST THIN OUT

Too much stress can hardly be laid on the necessity of thinning. After the plants come up, one is urged to stop, and consider just how big these are going to be in a few weeks. It may be only six inches, in which case the plants should need only to be spaced a few inches apart. But suppose it is the cosmos or the larger type of zinnias or marigolds that are being considered. These will reach from 18 inches to four feet when fully grown. Such things require much room on all sides if symmetrical and sturdy plants that will be both beautiful and storm resisting are to be the result. Crowded plants will invariably be spindly and weak in the stem. Experts advise allowing about half as much space between as the plant will be high, whether it be vegetable, flower or shrub.

HAVE YOU HEARD

ALL THE SYMPTOMS

These sit-down strikes of mechanic, clerk and weaver may be nothing at all more than that peaky old Spring fever!

Beggar — "Lend me a dime for my carfare home, will you, old fellow?"

Man — "I'm sorry, but all I have got is a half dollar."

Beggar — "Splendid! I'll take a taxi."

Brain competition is usually not very keen.

Bertha — "Well, I know one woman who thinks her husband is perfectly wonderful."

Beatrice — "So you've just come from a wedding?"

Some fellows leave the small town to go to the big city to get rich, but very few of them leave the small town, go to the big city and get happy.

Little Dora returned from her first visit to Sunday School.

Father — "What did my little daughter learn this morning?"

Little Dora — "That I am a child of Satan."

Read it or not — The titmouse is not any species of mouse — but a bird.

A local housewife who keeps a close watch and a firm hand on the family budget describes as downright contrariness the fact that her husband won't eat eggs when they are selling at 15 cents a dozen but he always wants three for breakfast when they are selling for 30 to 50 cents a dozen.

The one-ring circus was visiting a town in the hills. The folks there recognized all the instruments of the band except the slide trombone. One old settler watched the player for a while, then, turning to his son, he said: "Don't let on that you're watching him. There's a trick to it; he ain't really swallerin' it."

It always seems to take a pair of squeaky shoes the longest to get anywhere.

Golfer — "My, it rained all day, and at noon the greens were in a deplorable state."

Wife — "My, what a coincidence! The spinach I had was so poor I had to throw it away!"

When the pups are in the parlor,
And the cows are in the corn,
When the kids are in the pantry
And the table cloth is torn,
When the house is topsy turvy
And the hired man wears a frown,
You can bet you, oldage pension
Pa and Ma have gone to town

Boss to office boy who is half an hour late) — "You should have been here at eight o'clock!"

Office Boy — "Why, what happened?"

Asked to write a brief essay on the life of Benjamin Franklin, a little girl wrote this gem of a paragraph:

"He was born in Boston, travelled to Philadelphia, met a lady on the street, she laughed at him, he married her, and discovered electricity."

You seldom hear the man with a crop of callouses on his hand hollering for help of any sort.

Abie — "Nowadays everything is done by machinery."

Ikey — "Vell, I dunno, talking is still done by hand."

Praise is so cheap you would think there would be more of it.

Mother Inspires Child in Music

Adjudicator Makes Statement Before Women's Canadian Club

WINNIPEG.—Women do much to foster music, from the time they croon lullabys to their babies in the cradle to the later time when they "drag their husbands to concerts," Dr. Frederick Staton, adjudicator at the musical festival here told the Women's Canadian Club. His subject was "Music and Women."

Of course, the adjudicator admitted in an aside, men had their points: they were "more honest in their likes and dislikes," once they were at the concert, they didn't hesitate in "preferring Offenbach to Bach often."

"Women's first relation to music is as an inspirer. Who sits beside the child and encourages him to practise? Well, it wasn't my father who did—he tried to make me a medical man; it was only through my mother's efforts I was able to study music," Dr. Staton said.

As for choral societies, 70 per cent. of their members were women; most of the 11,000 contestants in the festival this year were girls and women; Toronto diploma classes and concert audiences both had an "enormous percentage of women."

London Children Most Unhealthy

Inspection Shows That Nearly Half Ailing in Some Way

"Nearly half the London children coming to school at the age of five have something wrong with them" said Somerville Hastings, chairman of the Hospitals and Medical Services Committee of the London Country Council.

"In many cases it is only teeth, but about 11 per cent have something wrong in addition," he told a Cambridge conference.

Referring to medical inspections in London schools, he said:

"My great criticism is that for the most part the doctors who do it have not enough time for the purpose.

"The average time spent in inspecting a child is six minutes. During that time the doctor must speak to the parents and fill in a form. In London the forms have 35 items."

Production Of Smut-Free Seed

Treatment That Offers The Only Method of Control

Freedom from seed-borne diseases such as smut is usually considered to be one of the important characteristics of registered and certified seed, and purchasers of this seed, relying upon its quality, frequently sow it without treatment. Yet, even seed of the highest quality, showing a trace of smut, may produce a smutty crop if sown under conditions favorable for smut infection. It is particularly important, therefore, that all registered and certified seed should be free from smut. Elimination of smut from such seed would prevent the spread of this disease with new varieties, and would help to improve both yield and quality in the commercial crop.

The treatment of wheat, oats, and barley has been greatly simplified by the recent introduction of organic mercury dusts such as New Improved Ceresan. This dust, when applied to the seed at the rate of 1½ oz. per bushel, effectively controls the smuts of oats, covered smut of barley, and bunt of wheat. It also improves seed germination. Tests are being made of other organic mercury dusts now being sold in Canada.

Wheat may be treated with copper carbonate dust (2 oz. per bushel) for the control of bunt, but this dust should not be used for grains such as oats and barley which have a coarse hull.

Copper sulphate, commonly known as bluestone, may cause severe seed injury, and should not be used for treating grain.

Formalin solution (1 lb. of formalin to 30 gallons of water) has long been used as a treatment for the smuts of oats, covered smut of barley, and bunt of wheat. This treatment, if well done, is effective, but it is likely to impair the germination of the seed, particularly of wheat, and reduce the yield.

Seed which is old, weathered, sprouted, frozen, hulled, or broken, or seed which has been shrivelled by rust or drought should be treated with a dust such as New Improved Ceresan rather than with formalin.

Making Use Of Proven Herd Sire

Unwise Not to Use Him to Fullest Extent

When a farmer is on the outlook for a bull to head his herd of cows he generally elects to buy a young, untried animal. The principal objection usually offered to buying an aged bull is that he may be ugly or is likely to become so. That is true, of course, but the advantages of using a proven bull are far greater than the expense of arranging equipment to handle him with perfect safety. Every breeder should have a bull paddock anyway with a breeding pen in connection.

The question of handling the bull is of little importance, compared to the advantage of the use of a herd sire of known ability to transmit desirable characteristics. Improvement in production must come largely through the herd sire and comparatively few even of the so-called well bred sires can be depended upon to transmit this quality. The most constructive breeders, when once they come into possession of such a sire, hold him practically priceless and would consider it very unwise not to make use of him to the fullest extent. One of the most careless practices among farmers and small breeders is the failure to make use of bulls in their community who have demonstrated through their daughters their ability to transmit production.

Sidewalk Clocks

Come, shed a tear for the sidewalk clock. One by one the Americana which yesteryear knew fade into the —well, no, we can't say "limbo of forgotten things," for even that expression must be passe by now. But anyway, they go. The watering troughs, the town pump, the gas lights, the mustache cups and shaving mugs, the pompadours, shirtwaists and Gibson girl hats!

And now it is the sidewalk clock, that elegant and useful example of the horologer's art which stood forth as the mark of the jewelry store. It enabled Lem, the grocer's boy, to know when to go home to lunch—only it was dinner in those days. It saved you the effort of pulling a bulky and turnip-shaped timepiece out of your pocket by a correspondingly massive chain, or if you must do that it gave you occasion for striking an impressive pose in your peg-top trousers and suit and speculating audibly as to whether it was your watch or Ed. Lowry's clock that was a minute off.—Christian Science Monitor.

Science Note: — A fish cannot live after it has been scalded. (Ah, but man can survive after he has been skinned many, many times).

Injurious Stages Of White Grubs

Their Presence For The Year Can Be Anticipated

The study of the white grub, the immature stages of the June beetles, has advanced to the point, at least in Ontario and Quebec, where their presence for the year can be anticipated. According to the Entomological Branch of the Dominion Department of Agriculture, in the Montreal area and northward in a zone between Joliette and Lachute white grubs are present in the injurious stages, and widespread injury can be expected, particularly on sandy land, as great numbers of June beetles were present and doubtless large numbers of eggs were laid in the summer of 1936. West of the eastern margin of Papineau Valley and including the Gatineau Valley little loss is expected as the insects are in the non-injurious stages, preparing for flight and egg-laying in 1938.

Throughout the greater proportion of Ontario, notwithstanding the fact that very severe damage was caused in 1936, little damage is expected from the grubs themselves throughout any part of Ontario in 1937. The absence of injury throughout Ontario is due to the insects being present in the non-injurious stages. The very severe outbreak in 1936 in Ontario, in Glengarry, Grenville, Peterborough-Hastings, the Lake Simcoe and Bruce County areas will continue to show in 1937 in the form of dead areas in pasture and meadow sod. These should be watched for carefully, and wherever replacement of this sod by weeds, particularly in meadows, is likely to occur, the killed out fields or spots should be cultivated and seeded down before the weeds establish themselves.

Just a Transient

"I guess you can call me a transient," said a bright young fellow of nineteen in the office the other day, where he had come seeking a job. He was clean and cheerful though he had been away from his home in Cape Breton for more than two years. In that time he had been as far west as Calgary and as far north as Cochrane. He was not begging but wanted a job and, given help, tried to insist on doing something in return.

Instead we invited him to answer questions. "Why did you leave home?" we asked. "Well," he said, "there were nine of us at home and dad doesn't earn very big wages and it was hard sledding, and I couldn't get a job of any kind, so I thought I'd take my appetite away." In the two years he has been as he rather sadly puts it, a "transient," he has had almost every possible kind of a job, but has not yet got one that he could call steady. He has worked on farms in the summer time and in factory and odd jobs in the winter. He wasn't begging and insists that though he often is given a meal, he would rather work for it.

There are thousands in like position, unfortunately not all of them like this young Nova Scotian, still with their chins up and still hopeful that somewhere there are niches they can fill. It is a great problem.

"Motion picture producers can get their money back, and a profit, only when the film appeals to the entire family.

—Samuel Goldwyn.

See Wally's House For Fifty Cents

Former Baltimore Home is Now Open to Public

BALTIMORE.—The one-time Baltimore home of Mrs. Warfield Simpson, fiancee of the Duke of Windsor, has been opened to the public at 50 cents a look.

There are five guides on hand to shepherd the curious. They are provided by "Two Hundred and Twelve East Biddle Street, Inc.," a slightly mysterious corporation that now has the destines of the old house in hand. Just what individuals compose the corporation evidently is to be a secret.

The first thing the cash customers saw was a hallway, very much like any other hallway, glistening with fresh paint. On the left is the parlor. Some Victorian bric-a-brac sits about. On the walls are enlargements, framed, of Mrs. Simpson, surrounded by friends and relatives. Also there are portraits of the former King Edward VIII in various regalia, and Mrs. Simpson in her court presentation gown.

On the second floor is a model of Fort Belvedere and grounds, the former King's private residence near London. A large front room is adorned with cartoons and contains copies of many different newspapers of the constitutional crisis period. The piece de resistance is saved for the last. It is Mrs. Simpson's bedroom on the third floor. It is roped off, so the customer may only peer from the doorways. A big double bed backs up to the east wall. It is not actually the bed Mrs. Simpson slept in, although the guide says a number of things in the house were there during her occupancy.

How One Mountie Got His Man

In the Star, published in far-away Johannesburg, we come upon a half-page story about the Royal Canadian Mounted Police under the caption, "The Mounties Always Get Their Man." It is supposed to be a true story written by "soldier of fortune," who once was in the Force, writes the Ottawa Journal.

This constable, as he tells the tale, one morning was called to the "chief's" office, told there was a hard job for him. "Lead me to it, Cap," replied the constable. "I've been in some hell-bent corners in my time and you've got my word to see it through." He was told he was to find one One-Shot Dick, bring him in. "Dead or alive?" queried the constable. Alive, he was told.

So the Mountie went out and found One-Shot Dick in a saloon—a surly brute, armed with a couple of guns; a drinking, gambling desperado who shot down before the constable's eyes a fellow who accused him of cheating at cards. Then the Mountie went into action. He fired "from the holster," blew Dick's gun from his hand. "Stick 'em," he rasped, "or I'll scatter you all about the floor." Dick stuck 'em, but, as he raised his arms, neatly drew an emergency revolver from under the back of his collar. The shoe then was on the other foot. The Mountie dropped his "hardware" and things looked pretty gloomy for the cause of the law and order. "You durned swine," roared the constable at the gunman, "I'll get you, jest see if I don't."

One-Shot Dick said he wanted to see the Mountie dance and began to shoot close to his feet. Bang, bang, bang. The constable danced, but counted the shots. Dick had but two guns, six-shooters. One was emptied, and then the other. Then came the chance.

"Bang. At the twelfth explosion I leaped higher than ever and as I came down, my feet shot up, one after each other. Dick's guns clattered to the floor. My left fist shot out, and caught the giant on the point of the jaw. A look of surprise flashed across his face before he fell a crumbled heap on the floor. . . 'Well guys,' I said to the now silent crowd, 'you've seen a Mountie dance.'"

It was, we agree quite the neatest trick in the history of the famous Force which, as is well known to all movie fans and fictious readers, always gets its man.

Business Women Meet at Niagara

Niagara Falls, Ont., has been chosen for the convention of the Canadian Federation of Business and Professional Women, taking place July 12-16. A variety of topics will find a place in the business discussions and reports, while the lighter side of the convention includes tours and sightseeing.

There will be a civic reception on the first night, July 12, in the Crystal Ballroom of the General Brock Hotel. On July 13, "international day" at the convention, following the afternoon business session, the delegates will be taken over the bridge to Niagara Falls, N.Y., where they will be guests of the local club at tea.

On July 14 the visitors travel across the whirlpool on the Aero Car and later have a buffet luncheon at Queenston. After a view of the country from Brock's Monument, they will journey along Lake Ontario, inspect the Welland Canal, then see the working of the Twin Flight Locks, and join the St. Catharine's Club for a tour of the city, dinner, and an evening program.

Canada and U. S. Almost Back To 1929 Production

Industrial production in Canada was 96-1 per cent. of the 1929 figure, in the last month for which comparative statistics are available, while that of the United States was 99.2 per cent. of the figure of eight years ago.

That indicates that this continent is now almost back to the production of the great boom year.

On the other hand, production in Japan is given as 172.4 per cent. of 1929's figure, Greece as 146.7, Sweden as 136 and the United Kingdom as 123. But none of these countries was in 1929 experiencing the boom that Canada and the United States were.

VOICE of the PRESS

CANADA
THE EMPIRE
THE WORLD AT LARGE

CANADA

Toronto's Chance

With the Duke of Windsor and his bride-to-be looking for a place to live, Toronto still has a chance to dispose of Casa Loma. — St. Thomas Times-Journal.

Stars Of Old

The halycon days of lacrosse are recalled in the following Ottawa Journal item from 25 years ago:

On the sport page were pictures of Newsy Lalonde and Billy Fitzgerald, called "two of the high-priced lacrosse players in the game," who were to play with Toronto. A Cornwall story, however, said Lalonde was going to Vancouver, would get something more than $5,000 for the season.

Players like Lalonde of Cornwall and the great Fitzgerald of St. Catharines shed a lustre on the national pastime, which today seems "gone with the wind." The great game is overdue for a big revival. — St. Catharines Standard.

Looking Backward

Human ingnuity is practically limitless. A counterpart to the well-known "prison whisper" — talking under the breath from the corner of the mouth — has been invented in Nazi Germany. It is spoken of as the "spy monocle." It is described as looking like an ordinary monocle, but containing a mirror which enables the wearer to see for himself if he is being too closely watched from the rear.

Such an invention must be a great convenience to the garrulous individual who, in the midst of his choicest bit of political gossip, is forced to glance over his shoulder to see if a Brown Shirt is listening. Of course, it will probably result in an order prohibiting altogether the wearing of the monocle in Germany, or at the very least, an order that all wearers must carry a permit for inspection on demand by the Nazi police.

In the meantime, however, the "spy monocle" has given temporary relief to much dammed-up conversation in Germany, and at the same time reminded the rest of us of the trend of life under dictatorship. — Winnipeg Tribune.

Tabloids

Tokyo has a daily newspaper for children. New York has a whole bunch of them. — Toronto Star.

The West's Hundred Days

The next hundred days will tell the tale whether Western Canada is to have a good, average or poor crop in 1937, and the percipitation during the period will be the controlling factor. The seed is now pretty well all in the ground, and there is nothing much more the farmer can do about it but let Nature take her course.

The West should be near the end of a seven-year dry cycle which began in 1930, following a period of better than average years during which we piled up a huge wheat surplus in the prairies of more than 200,000,000 bushels. Whether the drought will break this year or not is the question agitating the minds of the men on the land. — Lethbridge Herald.

Wants A Bigger Form

One cannot suppress a feeling of admiration for the mastermind, or perhaps, group of master minds, that conceived that model of much-within-small-compass, the income tax form, as it exists today. But one could wish nevertheless, that slightly more space was placed at the command of the taxpayer, in which to answer the series of intimate questions that are put before him at this time of year. — Brockville Recorder and Times.

Presence of Mind

Two Nova Scotian boys over the week-end took their places in the ranks of heroic and quick-witted rescuers.

In Yarmouth, Victor, aged twelve, son of Mr. and Mrs. Alex. LeBlanc, saved the life of Barbara McKenna, years old daughter of Mr. and Mrs. Lorimer McKenna. When Barbara's dress caught on fire from flaming grass, Victor beat out the blaze with his bare hands enduring a painful burning in the process.

At Amherst, Lloyd Leadbetter, 13, son of Mr. and Mrs. Howard Leadbetter, a Boy Scout, rescued two babes from death on the railway tracks. He pushed one from the path of an on-rushing freight train and carried the other to safety. A moment after he'd stepped from between the rails the locomotive crushed the toy the children had been hauling. — Halifax Herald.

Customs Change

Time was when a man was thinking of buying a house he asked how close were the church and the schoolhouse. Now he wants to know how far it is to the golf course. — Toronto Saturday Night.

Easy Money

"Easy money," says Henry Ford, "is never honest money." He was speaking with regard to boys and the need of doing something to better their condition in life. Ford's idea is that "the average boy is just mischievous and may do something the law will regard as crime, and if once convicted the lad is done for." There is more truth than poetry in the statement. The boy after his first mistake is generally hounded hither and thither — and if he turns out good, it's often in spite of the activities of those who want to reform him. — Guelph Mercury.

THE EMPIRE

British Film in Trouble

The reasons for American supremacy in films are not difficult to find. The American film industry was the first in the field. The American producer has a continent of varied scenery and favourable climate to play in; the American distributor has a market of 120,000,000 people on his doorstep. With these advantages, the American industry can and does afford to sell its products in Britain at prices which the native producer finds it difficult to meet. What is needed is a market for British films comparable to the market enjoyed by the Americans. The suggested reciprocal agreement for the exhibition of the British films in Britain would probably meet the case: and the British Government would no doubt be willing to give all assistance in securing such an agreement. It cannot, however, be reasonably asked to do so until the British film industry has taken recent official hints and put its financial house in order. — London Morning Post.

British Foreign Finance

The fertilizing flow of British capital has been for centuries one of the prime factors in world progress, and so far as the Empire is concerned it has played a predominant part. Britain should be approaching the stage when she will be able to resume her overseas lending without disturbing the era of cheap money, which the Government desires to continue. And when that day arrives, it will probably be found that Britain will seek to make loans serve her export trade, a department of her economy that is flagging and that she is anxious to stimulate. — The Auckland News.

Here's A Lady Who Wants to Be Fat!

Success and Fame Won't Change Mode of Living of Young Writer

ATLANTA. — Margaret Mitchell says she is "going to keep right on living as I always have lived," despite the fame and wealth won with her Pulitzer prize-winning novel, "Gone With the Wind."

Her creed for the future:

"I want to keep on being happy, doing the things I have always enjoyed doing. And I want to be fat and amiable!

"You see, I got down to 97 pounds last fall and I'm back to 110 now and I want to weigh 117 or so."

Miss Mitchell and her husband, John Marsh, young advertising executive, live in the same apartment they occupied last summer before the Civil War novel was published. The wealth that has come through sale of 1,300,000 copies of the book has made no apparent difference in their mode of living.

Some fan letters suggest that I ought to buy a 20-room mansion, take round-the-world cruises, and visit fashionable places," said the former Atlanta Journal reporter.

"I couldn't possibly use a 20-room house. A boat ride on a millpond makes me seasick, and I don't like resorts.

"I don't care for spending money like a drunken Indian, or for jewelry or furs.

"We did swap in our automobile, a 1928 model bought second-hand in 1929, for an inexpensive new car.

"And I could do with some new clothes. But I like to take time to buy my clothes, and I have little time."

She is "positively not" planning a sequel to her novel.

A monsoon blows toward the sea when the land is colder than the water, and in the opposite direction when the reverse condition of temperature prevails.

"It is a singular chara... ...ic of present-day democracies to ignore facts and realities."

—Adolf Hitler.

Lonely Future For Windsor Is Seen

Biographer Bolitho Pessimistic About Duke's Fate — Says He's Going Out Into Wilderness

NEW YORK.—Hector Bolitho, one time 'narrator" to the Prince of Wales, who now is the Duke of Windsor, makes pessimistic prophecy for his future.

Bolitho writes of Edward's "going out into a wilderness in which he will never know what it is to be other than alone," in the biography to be published soon as "King Edward VIII; an intimate biography."

"For his busy mind and his interest in life," continues Bolitho, "his sympathy and his training as a prince will never fit into the little space of desire."

Bolitho is known in England as an authority on the history of the present Royal Family, and a large share of his current book had been written before the affair of Mrs. Simpson became public property.

The only important departures from the standard history of the duke come in Mr. Bolitho's estimate of the value of the then Prince of Wales' long tours in the interest of British trade, and his charge that Edward's retrenchment on his personal estates amounted to parsimony, and made him "a piteous figure as he estranged himself from those who served him."

Bolitho describes the perturbation of Queen Mary and King George as tour followed tour, and how Edward was prevented by them from settling into the routine of a solid Briton.

"The prince ceased roaming the earth when he returned from South America," says Bolitho, "but more than ever he was a stranger to England, and it was not easy for him to change the tempo of his life.

'It was observed by those who traveled with him that there were hours of contemplation, touching on moroseness, when he was not facing a cheering crowd . . . the gap between father and son had widened, for they thought in different worlds.

"Rumor said that the prince's wish for freedom and the right to choose his own staff was so fierce that he wrote of his decision to renounce his rights and settle in one of the dominions if he was not allowed to follow his own way.

"His scattered experience of men had not taught him the value of quiet conference, and his restlessness and superficial view of human nature still debarred him from realizing the difference between popularity and respect."

They're Telling Us!

"Some people forget that, besides the noble art of getting things done, there is a noble art of leaving most things undone."

—Dr. Lin Yutang.

"There is nothing in the way of organizing life that the will of man, guided by the mind of man, cannot do."

—Salvador de Madariaga.

"Woman's World" Complains Prof.

Success Based Only On Rate of Wife's Spending, He Groans

UNIVERSITY, Miss. — Man was credited with little economic standing by Prof. R. L. Sackett here in a lecture treatise on "It's a Woman's World."

"A successful man," he said, "is one who can earn more than his wife can spend and a successful woman is one who can spend more than her husband can make."

"Women reputedly know the price of everything but the value of nothing. Most important of all, however, is the rapidly increasing control of wealth by women," he added.

Prof. Sackett, of University, is married.

News In Review

Scheme To Hatch Millions of Ducks

MOOSE JAW — Duck hunters will never be without their full bag if recently announced plans of "Ducks Unlimited," an organization that proposes to spend $3,000,000 on duck conservation and hatching, do not go astray.

A system of artificial incubator-hatching in Delta, Man., on Lake Manitoba, has met with much success that W. G. Ross one of the organization's four directors, announced that "there is no reason why each of the prairie provinces cannot hatch $1,040-000 ducks a year."

Installation of three large incubators, each with a capacity of 1,000,000 in the three Prairie Provinces, has been proposed. The incubators would be filled with the first setting of the eggs "stolen" from the nests. The ducks would be allowed to hatch her second famy, thus doubling the size of the brood.

Drug Stores To Pay For Sideline Sales

VANCOUVER. — The drug store that "sells everything except lawn mowers" long been a problem for the civic authorities to handle in connection with early closing is to be curbed by the city Council.

Acting on representations of the Retail Merchants' Association, council has decide that in granting business licenses, drug stores will be required to obtain, in addition to the necessary permit to sell drugs, "sideline" licenses if they are to sell other articles that are sold by stores not in the drug business.

These "secondary lines of business will cost $10 a year.

Promise On A Shingle Perfectly Good at Bank

ANNISTON ALA., — Those who hand out advice against letting somebody give you a wooden nickel aren't so smart after all. They probably would have accepted the cheque that Jeff McCord sawmill operator took from a customer last week. It was written on a wooden shingle.

McCord was attempting to collect a bill. The billpayer was short of the regular cheques, so he picked up a small shingle and wrote on it.

McCord endorsed the cheque and paid his electric bill with it. The power company presented it to the bank, and it was cashed and cancelled.

NEWS PARADE

Commentary on the HIGHLIGHTS OF THE WEEKS NEWS —

By Peter Randal

CORONATION COMMENTARY

Before you read this paragraph, the ink will have dried on thousands of other similar paragraphs in every country and every language in the world. Never, within the history of recorded time, has a pageant such as the crowning of George and Elizabeth been marked with such significance. Standing as his fathers did before him within the walls of the nation's shrine, a young man pledged his life as a priest might concentrate himself to a sacred service. His witnesses were not only the brilliant assembly of the world's great within Westminster Abbey, not only his subjects in the far corners of the world, but all peoples.

With pomp and circumstance, George VI became one of the few survivors of the kingly ideal. Yet, the true significance was not in survival but in the new interpretation of a king's consecration as the living symbol of the nation's unity. Here is no autocrat of old. Here is a priest-king dedicated beyond his own hopes and desires to the preservation of democracy.

Power without honour means fear and not freedom. That is why, in the other lands, where a house painter or a retired army sergeant hold sway, there is no democracy. These lands have deserted the ancient form of kingship without substituting something better in its place. We who do hold to the old forms have learned from our forefathers that freedom comes, not from the letter but from the spirit. Deep within these ancient rites, we have implanted a new conception of our destiny as a nation. "God Save the King," is more than a wish for the man, it is our prayer for the preservation and advancement of an ideal in government.

Economic Co-operation

Canada's great moment is to come after the Coronation at the forthcoming Imperial Conference. Prime Minister Mackenzie King will propose a three way economic treaty between Canada, the United States and Great Britain. Should the proposed agreement be favourably received, there is a possibility that it will be extended to include all Empire countries, thus cementing in common economic bonds, the interests of the entire English speaking world. The plan is said to have originated with President Roosevelt and Secretary of State Cordell Hull. While its implications are economic, students of world affairs feel that it may be the real key to continued world peace.

Death of a Nation's Pride

While one nation rejoices at the crowning of a new sovereign, another mourns a great disaster. Pamphlets and posters, still on display in travel agency windows carry the magic words, "Cross the Atlantic by Air". At Lakehurst, N.J., a blackened, twisted mass of girders marks the wreck of Germany's pride. The Hindenburg, queen of the Atlantic seaway has gone to join so many of her forbears in the Valhalla of ill fated ships. Thirty five people lost their lives, among them one of the greatest authorities on lighter than air craft, Captain Ernest Lehmann. Others lie in hospitals, still unaware of the terrible fate that may have come to their families. In spite of disaster, German faith remains true to the great zepplins. General Goering has announced that construction will be rushed on four great ships and this time, with the co-operation of the American Government, they will be filled with non inflammable helium.

Ontario Increases Employees' Pay

TORONTO. — Salary increases ranging from five to ten per cent will be ordered for the majority of the 6,000 employees of the Ontario Civil Service, Premier Hepburn announced this week. Increases were approved for several departments at the Cabinet meeting. Other departments will be surveyed and increases decided upon will be retroactive to May 1. Revision concern particularly employees in the lower salary brackets, the Premier said.

Storage of Water Help to Farmer

REGINA. — Saskatchewan's water storage capacity as a result of conservation propects under the Prairie Farm Rehabilitation scheme, during the past two years is now placed at 10,500,000,000 gallons.

The work is now just nicely under way, Hon. J. G. Gardiner, Federal Minister of Agriculture, said, and from 20 to 25 years of steady unremitting work would be required to properly rehabilitate all prairie lands in the three western provinces.

Small projects such as farm dug-outs, stock-watering dams and private irrigation schemes, accounted for 2,250,000,000 gallons, and larger storage dams made up the remaining 8,-350,000,000 gallons.

While water conservation has been the major activity, reclamation projects, regrassing, tree-planting, soil surveys and land utilization problems have not been overlooked, three land surveys being made in Saskatchewan this summer.

Fly Flags Properly Says Scout Officer

TORONTO. — "I don't believe any boy scout groups in Toronto have undertaken to advise citizens who are flying coronation Union Jacks upside down that they are unwittingly indicating that help is needed," Norman H. Saunders secretary of the Toronto Boy Scout association remarked recently when informed that scout patrols in Halifax were responding to the signals of distress.

"Most people take the trouble to see that the broad white stripe is uppermost," he said.

Grain Acreage Is Less

OTTAWA. — Of the 702,000 acres of fall wheat sown in Ontario last autumn, 56,000 acres or 8 per cent are estimated to have been winter-killed leaving 646,000 acres for harvest in 1937, as compared with a harvested area of 509,300 acres in 1936.

This is one of the features of the first crop report of the present season issued by the Dominion Bureau of Statistics.

More important perhaps, from the point of view of Canada's economic position is the Bureau's forecast about conditions in Western Canada, where many thousands of farmers in the drought area are in a serious plight owing to successive crop failures.

A decrease of half a million acres in the area sown to grain in Canada in 1937 is to be expected if the intentions of farmers are carried out, the report states. The intended area of spring wheat, upon which the fortune of Western Canada largely depend, is 24,367,800 acres, compared with 24,-779,700 acres sown in 1936, and more than two million acres less than in the peak year of 1932. The principal decrease will occur in Saskatchewan.

"The body has been divided into blood, cells and organs; the soul has been neglected in the analytical process."

—Dr. Alexis Carrel.

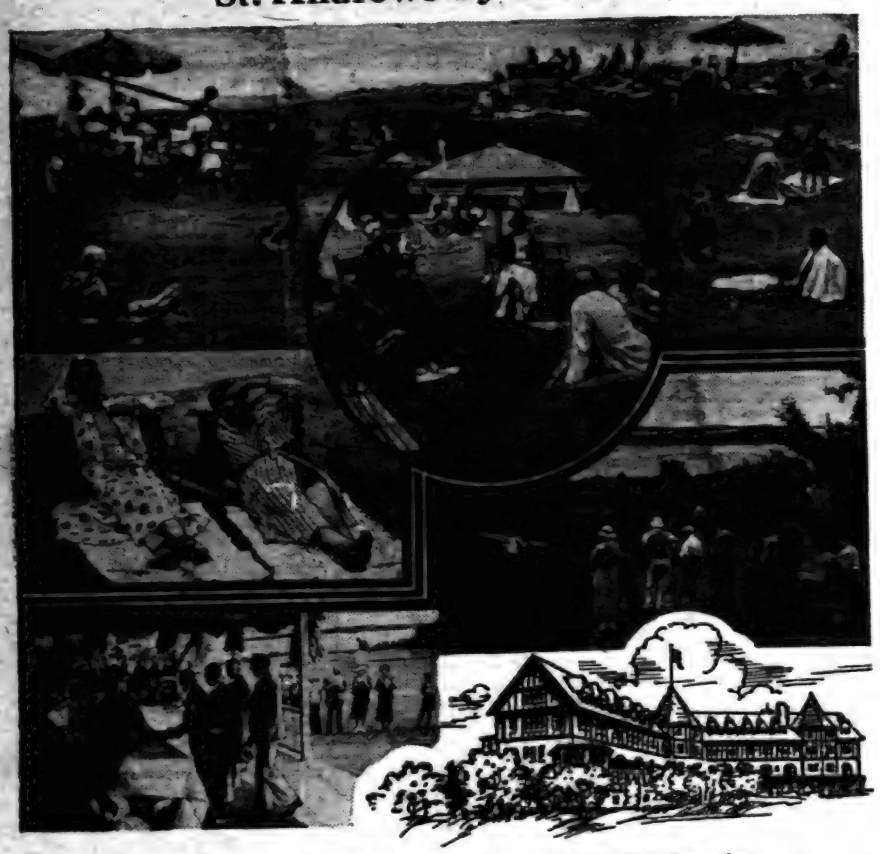
"Youth knows that it does not want, but it does not know what it wants."

—Isaac F. Marcosson.

A half ton of coal is required to start a freight train and bring it to running speed.

Pleasure that isn't shared with another loses half its power to please.
--Ottawa Journal.

Memorial to Late Viscount Grey



Rt. Hon. Stanley Baldwin, the British Prime Minister, is shown as he unveiled a memorial tablet to the late Viscount Grey of Fallodon, who was British Foreign Secretary at the outbreak of war in 1914, near the "Ambassadors' Entrance" to the Foreign Office, in London.

Renew Your Review To-Day

We MUST have the MONEY

St. Andrews-by-the-Sea

The growing popularity of beautiful St. Andrews-by-the-Sea, N.B., was shown this year by the great increase of visitors during July. Privileged vacationists from all over the world spent happy days at the Bay of Fundy resort golfing, swimming, fishing, sailing, playing tennis, dancing, or just lazing in the sun on the warm sand of Katy's Cove, sections of which are seen above in the top three pictures.

Several golf tournaments have been held already on the sporty 18-hole and 9-hole courses connected with the Algonquin Hotel, and famous golfers have pronounced the links in excellent condition for other matches that will be held before the hotel finally closes at the end of the first week in September.

The recent visit of President Roosevelt of the United States to the district has attracted great interest to his summer home at Campobello Island. Many American visitors have been at St. Andrews-by-the-Sea for the season.

Another popular spot has been the Casino, where dancing and picture shows provide entertainment.

Superintendant's Report Children's Aid Society

Following is the report submitted by Mr. Thompson at the meeting in Brampton on Wednesday:

"Another year has passed away, and again it is my pleasure to submit a report on the work of the Society as your Superintendent. This the eighth report prepared since taking over the work, and the second Annual Report of the Amalgamated Society of the two Counties. At the time of our Annual Meeting a year ago the newly appointed Directors had only shortly before taken over the active control of the affairs of the united Society. I would like here to express my personal thanks and appreciation to the Board members for their interest in the work and their willing co-operation at all times. The support of interested Board members gives your Superintendent real encouragement and more inducement to greater efforts.

"During the year a number of changes have been made in our system, the most outstanding being the closing of the shelter in Milton on September 1st, 1936, and the placing of the wards in boarding homes. This was a big undertaking and was not done without receiving the most serious consideration of all interested. I feel quite safe in saying, however, that to date the new program is proving entirely satisfactory. The children appear perfectly happy in their new homes, taking their places as members of the families, and also of the community, in Church, School and social activities. A marked change is noted in the children — not so much physically—but more in their general attitude towards life and the feeling that they actually belong in a certain home, and have some one directly interested in their personal welfare. A word of appreciation is also due the foster parents, the mothers especially. The interest that is being taken in the care of the children is very gratifying, and I feel is giving the children a greater chance to develop and eventually take their place in the world. While the Society provide the clothing, the purchasing is left to the foster mothers, but before making a major purchase the matter is discussed with the superintendent. It has been found also that with private placements, neighbours and relatives become interested in the children and make contributions towards their clothing, entertainment, etc.

Child Protection

"Under the Child Protection Branch of the work the statistical report shows a total of 156 cases handled;—89 new cases, 17 re-opened and 50 carried over from the previous year. It would be quite impossible to go into detail in regards to all of these cases, but I assure you it means a great deal of work and attention. While we are not able to do all that we would like to do in every case, there is the satisfaction of knowing that through our efforts the living conditions of helpless children have been improved, and a better future assured for them.

"One little lad, quite bright but with lack of parental supervision at home, was charged with theft on a number of occasions. Rather than send him to a Reform School he was placed in the care of the Society on a Temporary Commitment, and in turn established in a boarding home. A marked improvement has already taken place and with continued supervision there is every prospect of him becoming a real citizen. This is just one case of many, but it is quoted for the purpose of giving the Public some idea of the work being carried on.

"The separation of parents is one of the main factors leading up to the neglect of children. This does not mean legal separation, but simply that the parents drift apart with no apparent thought of the welfare of their children. These separations, in many instances, up lead up to common-law unions with other persons and so often raising a second family. It is a tragic situation today how easily some people forget their marriage vows, and what they owe to themselves and their families. Excessive drinking is also an outstanding factor leading up to child neglect.

"There is also the problem before us at all times of the mentally weak, totally incapable of supervising and providing for children, being allowed to marry and raise families. This subject is being widely discussed today, and I am sure every social worker feels that the day must come when there will be some means or controlling this situation.

Children Under Care

"At the end of the year there were 104 children under the care of the Society—15 less than a year ago. This difference is accounted for by the release from supervision of a number of non-wards.

"The Adoption Probation placements have increased from 5 to 16. The Ontario Adoption Act calls for two years' residence of a child in the home before legal adoption can be completed. This period of time gives both the adopting parents and the child time for adjustment, and assurance that all concerned are satisfied to proceed with the final adoption.

"The placing of a child in a good home with a view to adoption is one of the bright spots of a Children's Aid Worker. It has a double significance as both the new parents and the child are made happy and have something to look forward to in future. Ten legal adoptions have, during the year, been completed by our County Judges.

Unmarried Parents

"This branch of the work still takes a great deal of time and special attention. It is possibly not realized by all that every child born out of wedlock in Ontario is followed up by the different Children's Aid Societies, and assistance rendered for the care of the mother and child. The very young girls becoming mothers have been brought forcibly to our attention, also cases where the second and third child has been born.

"Every child born out of wedlock is potentially a neglected child, and, therefore, any assistance rendered by the Children's Aid Society in the early stages may off-set future ward action, and expense to the municipalities. In most cases the girl's parents are willing to co-operate and render their daughter all assistance in her trouble, but unfortunately some parents refuse to accept any of the responsibility, most especially in regards to the child. Our statistical report shows 104 cases in all that have been contacted during the year; 41 new cases, 7 re-opened and 56 active from the preceding year.

"In so many cases there is not sufficient corroboration to warrant taking any action against the alleged father, but during the year 5 formal Agreements, 7 Judges' Orders and 2 Variation Orders have been obtained. With a general improvement in conditions and more men in steady employment, a marked increase is noted in payments going through our office from putative fathers. Very desirable adoption homes have been found for a number of the children in these cases, the placements being supervised by the Society.

In closing I wish to thank personally all of the County Officials, Municipal Authorities, members of the Board, the Police, and private citizens for their continued support and co-operation. Thanks is also due to the Halton County Council in providing an office for the use of the Society in the Court House at Milton.

Children's Aid work is a very worthy and necessary undertaking and should have the support of all our citizens.

Respectfully submitted,
"G. F. THOMPSON,"
Superintendent.

Juniors Meet

Last meeting of the Juniors was held at the home of Gladys Lambe Tuesday night. The girls made hat covers of waxed wall paper. Refreshments were served. This will be the last meeting of the combined groups for the year.

The Jr. Girls will continue their meetings to conclude the wardrobe project. The next meeting will be at the home of the president, Helen Dingwall, to night, Thursday. It is under discussion whether the Juniors will go on a picnic, or a moonlight excursion in June..

W.P. Bull, K.C. Speaks, Hanover

HANOVER, May 11.—St. James Anglican Church was filled to capacity on Sunday evening to hear Mr. Wm. Perkins Bull, K.C., of Toronto, deliver his Coronation address. This well known Canadian based his talk on the exemplary life of the man who in his opinion was the greatest man who ever lived, the Prophet Moses, and when he compared King George VI of Great Britain with that great Prophet and declared that the coming Coronation procession would be second only to the world's greatest and most gorgeous procession, the burial of Moses, his listeners were thrilled with the spirit of loyalty and were proud that they were citizens of the great British Empire.

The service opened with the entrance of the gowned choir, followed by the various standard-bearers, the Girl Guides, Brownies, Rangers, under Mrs. William Ruttle; the Boy Scouts, Cubs, etc., under Mr. Alex. Brownlee; the I.O.D.E., led by the Regent, Mrs. John Mills, and the Municipal Council, headed by His Worship, Mayor A. J. Metzger. When these several bodies arrived and were ushered to the seats allotted to them, the entire congregation arose and sang the National Anthem, followed by the placing of the standards on the altar.

The reading of the Scripture lesson by the rector, Rev. W. C. Allison, was followed by the inspiring address of the speaker of the evening, Mr. Wm. Perkins Bull, K.C., who in his opening remarks declared that from the showing before him he was assured that the citizens of Hanover were just as enthusiastic and loyal to the Crown as he was. During the offertory a solo, "God Who Made Thee Mighty" was beautifully rendered by Mr. Gibbs. Following the service a reception was held in the Rectory to enable Hanover citizens to meet Mr. Bull.

In closing his address, Mr. Bull said:

King Edward hit the nail on the head in his abdication address when he said:

"This decision has been made less difficult to me by the sure knowledge that my brother, with his life training in the public affairs of this country, and with his fine qualities, will be able to take my place forthwith without interruption or injury to the life and progress of the Empire; and he has one matchless blessing, enjoyed by so many of you and not bestowed on me—a happy home with his wife and children."

George VI is like any great leader, whether of nations, of men, of animals, of birds. Quiet, strong and trustworthy.

Ever play at school, follow the leader? Given a leader worth following people will play that game throughout life.

Under George V, the imperial ship of state kept an even keel during storms of unprecedented violence. Right-thinking men and women throughout the Empire gave him loyal, active support.

George VI is fortunately blessed with his father's disposition and ability, and will do a similar job if you and I give him the same good measure of patriotism our fathers gave his.

Do not be half-hearted. Remember what St. Paul said about the lukewarm chap, and let our actions speak louder than our words.

"Right loyally we're singing
To all nations make it known
That we love the land we live in
With our King upon the Throne."

OBITUARY

Frank J. Jackson

The death took place of Frank J. Jackson, well known resident of the district last Sunday, who was in his seventy-second year. A native of York County, he farmed for many years in the Meadowvale district, moving to Brampton twenty years ago when he became Registrar in Peel County Court. He was a member of the Masonic Order and of the United Church of Canada, and survived by his widow, the former Annie Hornby; four sons, three daughters and two brothers.

The funeral took place on Tuesday afternoon to Brampton cemetery, after service at St. Paul's United Church. The service at the grave was conducted by members of River Park Masonic Lodge, Streetsville.

Local News

The first instalment of Streetsville taxes for 1937 will become due next Tuesday, June 1st.

Mr. and Mrs. J. C. L. Whaley spent the 24th with her father, Mr. Thomas Hunter, Georgetown.

Mr. J. McKee, teller in the local Bank of Nova Scotia, visited at his home in Perth over the holiday.

Mr. Geo. Wilson of Montreal visited his parents, Mr. and Mrs. T. H. Wilson, Base Line, Trafalgar, this week.

Mr. George O'Connor of Hamilton is assisting Mr. D. McGregor with his ranch on the Ninth Line, Trafalgar.

Mr. Ronnie Bruce has been successful in passing his final year in mining and engineering. He has been offered a position with the New Golden Rose mine, 85 miles north of Sudbury. We extend our sincere congratulations.

Mrs. J. Hardy, Erindale; Mr. and Mrs. J. Bentley, Sheridan; and Mrs. D. Lindsay of Streetsville, called on Mr. and Mrs. Albert McCurdy, Hornby, to visit their aunt, Mrs. James Hamilton, who observed her 85th birthday on May 24th.

UNITED CHURCH NOTES

The Young People's League of the United Church, Streetsville, conducted the morning service last Sunday and did it with charm and spiritual grace. Miss Edna Stevens read the announcements and gave a talk to the children about Sir Thomas Lipton, who began business as a poor boy working for three years for a small pittance and serving long hours but getting experience which was to serve him in good stead in later years. He learned that it was not good business to differentiate between customers, to show greater courtesy to the rich than to the poor, and made up his mind that should he ever have a store of his own he would treat all customers alike. His beginning was not easy but by advertising in unique ways he drew profitable trade so that within ter years he had saved a million dollars. His interest in sport, in yachting, was dealt with and Miss Stevens spoke specially of his undefeated spirit in spite of repeated defeats with his five yachts in competition.

Elmer Workman read the Scriptures. H. Hersom led in prayer and thanksgiving for the many blessings enjoyed in life. The choir, under the leadership of Mrs. Atkinson, sang the anthem "Praise to the Lord," and Chas. Hersom delivered an inspiring address with a winning smile. Charlie should go far as a speaker for he not only has good material to deliver, but special charm in delivery.

The Open Column

Victoria Day notes: Many Canadians celebrated at least a part of the holiday week-end in the States, the liquor laws being looser there. In Buffalo, Sunday, bar-keepers did a roaring trade, and the majority of the elbow-lifters were Canadians. The Buffalo burlesque show did a land-office business, and, to give the devil his due, the show there is a bit better, or worse, if you like them that way, than some of the New York dives.

Pacifists would have been horrified at the Cooksville celebration of the holiday. Two lines of youths took possession of opposite sides of the Dundas highway and showered each other with cannon crackers, much to the discomforture of the noncombatants.

The new speed law cut little ice in Peel. Speeds of more than fifty miles an hour were practically impossible on most of the main roads. There was too much traffic. There were two minor accidents and one fatality in this district on Sunday, but Monday was passed without accidents.

Brampton's fireworks drew a considerable crowd to Rosalea Park, but most of the citizens were disappointed in the display. The more observant, however, were tickled with the indications at the park that the town will, at last, have a decent athletic field. Some of the taxpayers, however, are protesting that the swimming pool under construction by the Lions' Club is too small.

Georgetown Pipe Band held a field day, but the performance fell short of their initial effort two years ago. The parachute jump and aeronautical manoeuvres were over before the crowd got there, and some of the athletic events were too slow to suit the crowd.

OBITUARY

William James Pinchin, son of Mr. and Mrs. J. H. Pinchin, Streetsville road, passed away on Thursday, May 20th, after a lingering illness, in his 23rd year. The funeral took place on Monday afternoon to Park Lawn cemetery, Toronto, and was largely attended. Rev. R. A. Spencer officiated.

George W. Broddy passed away at Brampton on May 21st, in his 78th year. Interred in Brampton cemetery. He was a native of the county town. For a time he was high county constable. He was a member of the United Church and a Conservative.

Evelyn McCracken Switzer, wife of James Tilt, passed away on May 22nd, at her home, Derry West, and was buried in Streetsville cemetery. Besides her husband, one daughter, Muriel Switzer, survives. Deceased, before her second marriage was the widow of the late Samual Switzer and resided on the Fifth line west, near Streetsville.

John C Cook, 75 years old, died in Esquesing township on May 21st, and was buried in Glen Williams cemetery.

BRAMPTON

Mrs. Emily Featherston celebrated her 90th birthday at the home of her daughter, Mrs. R. G. Edwards, Brampton, at a quiet party composed of her immediate friends.

Although she has entered the ranks of the nonagenarians, Mrs. Featherston is still vitally interested in the doings of her family and friends, and has been noted for years for her delicate needlework. Several years ago she presented the Anglican Church at Omagh, near her home at Drumquin, with an embroidered altar-cloth.

Her father, Charles Carlos Gibson, came from the United States to Trafalgar Township nearly 125 years ago and settled on the Dundas highway. Liking the country, he founded a homestead and his daughter married David Featherston, uncle of Joseph Featherston, one-time member of Parliament for Halton County. Mr. Featherston was a member of the Trafalgar township council for 25 years, serving most of the term as deputy-reeve.

When her husband died 13 years ago Mrs. Featherston retired to her home at Drumquin. She is a member of Bethel United Church and until a few years ago was active in the women's organizations of that church.

Friends and relatives from many points in this county attended the funeral of George Broddy to Brampton Cemetery Monday from the home of his nephew, H. R. Lawrence. Born here, son of the late William Broddy, he has resided here all his life.

For a number of years he was a high county constable. Until five years ago he was an official of the supreme court. He attended Grace United Church, Brampton, and was a member of the I.O.O.F.

He leaves two sisters, Mrs. William Rutledge, Brampton, and Mrs. Lillian Runyans of Hamilton.

Earl Wineholt, son of Mr. and Mrs. H. Wineholt, Brampton, received a fractured skull and scalp lacerations Sunday when his truck turned over in the ditch of the Streetsville road, north of the village. Wineholt was taken to the Peel Memorial Hospital by David Wilson, Brampton, who was passing at the time of the accident. He was attended by Dr. H. H. Hetherington.

Mr. and Mrs. Lorimer Watson have moved to Midland.

Mr. and Mrs. Geo. S. Jourdan went on a fishing expedition up north for the holiday.

Mrs. Philip Kelly and daughter of Toronto visited Mrs. David Ross on Sunday.

Mr. Hugh Brown of Toronto visited with his sister, Mrs. John Lindsay, on Sunday.

Mr. and Mrs. D. Hogle of Toronto visited with Mr. and Mrs. John Lindsay on Sunday.

ENGAGEMENTS

Mr. and Mrs. Geo. Elliott of Acton announce the engagement of their only daughter, Lilian Irene Flowers, to Mr. Clifford Thomas Hunter of Georgetown, son of Mr. Thomas Hunter.

Mr. and Mrs. William Frank, of Brampton, Ont., announce the engagement of their daughter, Muriel Lavina, to Mr. John George Gardner, son of the late Dr. and Mrs. J. G. Gardner, of Montreal, the marriage to take place in June.

Mr. and Mrs. George Earl Hyatt, Norval, Ontario, announce the engagement of their daughter, Marjorie Kathleen, to Mr. John Spencer Wilson, son of Mr. and Mrs. A. S. Wilson, Norval, Ontario, the marriage to take place early in June.

The engagement is announced of Grace Elizabeth Whitehead, youngest daughter of the late Mr. and Mrs. Robert Whitehead, of Malton, to William John Beatty Mellow, youngest son of Mr. and Mrs. Wilbert Mellow, of Bolton. The wedding will take place quietly early in June.

Mr. and Mrs. Thomas Clevely, Brampton, announce the engagement of their daughter, Eva May, to Mr. Percy James Grice, son of Mr. and Mrs. Clarkson Grice, Dixie. The marriage will take place early in June.

The engagement is announced of Thelma Jessie, only daughter of Mrs. Thomas H. Fraser and the late Mr. Fraser, of Brampton, to Mr. William Cecil Kitto, elder son of Mr. and Mrs. Frank Kitto, of Brampton, the marriage to take place at Grace United Church, Brampton, on Saturday, June 26th.

Mr. and Mrs. John Wesley Fleury announce the engagement of their daughter, Annie Doreen, to Warwick Russell Marshall, son of Mr. and Mrs. Robert Marshall, Brampton. The marriage to take place on June 24th.

COOKSVILLE

Cooksville public school children held a brief but interesting service Friday in celebration of the Coronation, under the direction of the principal, J. H. Breckenridge. Two acorns from Windsor Park were planted by Harry Duff, Norma Varley, Ross Garbutt and Frances Mary Smith.

Rev. G. F. Banks, of Erindale, was in charge of the ceremony of planting the acorns and a brief address on the British Empire was given by Rev. G. Murray Chidley, of Cooksville United Church.

The children gave a short tableau depicting the homage of the Dominions to the Crown, and the two prize-winning choirs of the school rendered several patriotic choruses. Patriotic recitations were given by Fred Chidley, Fionna Livingston and William Watson.

PORT CREDIT

Gordon Graydon, M.P. for Peel, has received a communication from Hon. Clarence D. Howe, Minister of Transport, to the effect that instructions have been given for the location of a spar buoy near the mouth of the Credit river, to indicate to fishermen and others the entrance to the dredged channel of the Port Credit harbor.

The Minister also intimated, Mr. Graydon said, that his repeated requests for the replacement of the lighthouse at the entrance to the harbor would have to wait until such time as the department of public works constructed a new breakwater at Port Credit.

25 Years Ago

From The Review, May 30th, 1912.

The announcement is made that the Toronto to Guelph radial railway will soon be constructed. It will run near Streetsville.

T. H. Goodison was elected Reeve of Streetsville on Monday, defeating John E. Dowling by a few votes. The election was to fill the vacancy caused by the death of Mr. Frank Morgan.

Mr. W. L. Nicolson, of Hamilton and Miss Josephine Gummerson, of Cooksville were united in marriage by Rev. Geo. Burry.

The barn on the farm of John Cook, Town line, was struck by lightning early on Tuesday morning.

Mr. F. P. McKinney has purchased the house owned by Mr. James Farrell.

Will Broadcast From Hornby

New Station will cover Fifty Acre Farm

No Radio Interference Is Guaranteed

"The 50,000 watt radio broadcasting station to be built at Hornby, near Toronto, will be the most modern in the world and based on the latest developments in radio transmission," the Canadian Broadcasting Corporation said in a statement, "We checked over the latest engineering designs in England, on the continent and in the United States, and ours should be an improvement."

The building at Hornby, will have one tower in the centre 645 feet high. It will be a basement and one-storey structure of white stucco and concrete, with a provision for a short wave transmitter to be added at a later date. The Hornby station will be ten times as powerful as CRCT.

It will be 100 feet long by 60 feet deep and its height at the highest point in the building proper will be 40 feet. A portion of the front in the centre off the main control room will have glass squares which will be illuminated at night, producing a picturesque effect. In addition to the main entrance, there will be a loading platform in the rear and a garage with accommodation for two cars.

"From 10 to 20 miles of underground wiring covering the whole 50 acres will radiate from the centre of the property in the form of a circle to the boundaries. The 50,000-watt transmitter will be of the latest design in radio transmission from the Northern Electric Company.

"Generally enriched services both as regards variety and specialization will be provided through the Hornby station. More British Broadcasting Corporation programs will be brought in; and more of the best type available from the United States. An opportunity will be provided to co-operate with the schools through the Ontario department of education and also in adult education with various organizations active in the province.

"The Hornby location is ideal, much superior to any portion of the Niagara escarpment. The ground level of the station will be 200 feet above the level of Lake Ontario. We made a very extensive field strength survey using our mobile field strength car and from the results obtained determined the ground conductivity in a radius of about 100 miles around Toronto.

Based on this survey the Hornby site was selected and it is considered excellent to serve most effectively 24 hours a day, without blanketing interference, in the Toronto-Hamilton-London area. More than 2,500,000 people will be served by this new powerful station, which will be midway between Toronto and Hamilton, and far enough removed from any town so there would be no danger of blanketing interference. The location has been approved by the civil aviation branch also as not being in the way of any projected airlines.

"The height of the location has nothing to do with determining the most favorable site. A good transmission point requires a flat surrounding country, and, if possible, with soil conditions that are likely to retain moisture, such as clay. Sandy, rocky or wooded country, is not the most suitable from a transmission standpoint and this becomes very apparent when making field strength measurements to determine ground conductivity in any area. The Niagara escarpment is in a rocky, wooded country, and would be much less effective for transmission purposes.

"With the modern highly selective receiving set, it is not expected there will be any undue interference with receptions in the Hornby area from other stations. This applies to both domestic installations and radios in automobiles passing the Hornby location.

"It is not expected that more than two dozen radio sets in the vicinity will be sufficiently close to the transmitter to be affected in any way. But before this new station goes on the air, arrangements will be made by way of suitable wave traps to eliminate or reduce signal strength from the Hornby station as desired by the listener. There will be no difficulty experienced by anyone living in close proximity to the Hornby station in getting any other station.

LET US SMILE

Old Salt: "Once in New Zealand I was caught in a terrible earthquake."

Visitor: "Were you frightened?"

Old Salt: "Not much; I can tell you the earth trembled more than I did."

Love Huntress

By H. GLYNN-WARD

Claudia Townsend meets Dick Whalen at a hockey game in Seattle one night. Her interest in Dick infuriates Wallace Bornell, rich young lumberman, who wants to marry her. To get Dick out of the way, Wallace gives him a job in one of his lumber camps in British Columbia. At the camp, Dick accidentally discovers that Bornell's men are working stolen timber lands. He asks for an explanation, but Braddock, the boss, puts him off an next day leaves for Seattle. The following day, Claudia stops in at Bornell's office and, by chance, overhears Bornell and Braddock plotting to do away with Dick. Claudia goes to the camp at Burns Lake to warn Dick. At the camp, she learns from Ching, the Chinese cook, that Braddock, who has arrived first, has sent Dick off on a long trip, with a man, Moriarty, who hates him. Moriarty has instructions to "Come back alone!"

CHAPTER X

Bornell had taken the first train north after he received Braddock's radiogram from the boat telling him of Claudia's presence and guessing at her destination. Wallace did not underestimate Claudia Townsend's wits, and he was sure now that she had overheard his talk with Braddock.

Claudia stood breathing fast, staring at him incredulously.

"What are you doing here, Claudia?" His tone was fierce.

"I—I don't know what right you have to inquire into my movements, Wallace!" she stammered.

"I'll have a legal right before many days are out! Do you know what I've come for?"

He crushed her to him, raining kisses over her face, kisses that sickened and frightened her.

She leaned back weakly in his arms, and as she looked at him she could read his purpose in his eyes as clearly as though it were on a printed page. As his wife, her tongue would be tied! If she would not marry him of her own accord, he could force her to. . . .

Never had Claudia's brain worked more quickly. Here was another enemy, whose suspicions must be allayed—or she was lost! She must play up to Wallace for an hour or so, then find some means of escape, with Ching.

• • •

With a weary little gesture Claudia passed her hand over her eyes, looked up at Wally with a tremulous smile.

"Why, Wally! I didn't know you wanted me so much."

His grip relaxed.

"Claudia!" I've always told you so! Will you marry me tonight?"

She smiled. "Tonight? Hardly time for that—even at Burns Lake! Maybe tomorrow, if you insist, Wally! But—what will the family say? You see, I gave them the slip, coming up here! I was kind of peeved that Dick Whalen hadn't answered my telegram or anything. Oh, Wally, you don't know how a girl hats to be snubbed like that! But now—now you've come—" she whispered cleverly, drawing his face down to hers. "It's all suddenly clear to me. It isn't Dick I love—"

Wallace again drew her close.

"Wally dear, I'm so tired and cold, after that drive across the lake. Don't you think that we could have a cup of tea—just you and I in here, without that Braddock? Tell him to ask the Chinese cook to bring it—and then you'll take me back to Burns Lake, won't you?"

Claudia had completely fooled him. The danger, he thought would be past tomorrow, when she was his wife! He went out and called to Braddock about the tea.

Claudia looked about her desperately. The shack had two rooms, Braddock's sleeping quarters and the office. In the office, the stove was roaring; papers and maps were everywhere. Her eye fell on a little hand-lamp on a shelf. She put it on the table and lit it. It was now quite dark.

Bornell came in as she was doing this, and in a few minutes Ching came with a tray, set it down and moved softly out again.

"Oh, wait—I must tip him, he's been so good—" She brushed past Bornell and ran to the door, calling Ching.

"Ten minutes—maybe!" she whispered hurriedly.

"I wait behind cook-house, you come there," he replied.

Then he slipped away.

• • •

Claudia began to pour the tea.

"I can't believe this is true," Wallace said happily.

"It is, Wally," she said softly. "Oh, that old Chinese has forgotten to bring lemon. I simply can't drink this canned stuff! Be an angel, Wally, run over and ask for a lemon, will you?"

He went like a lamb. With trembling fingers Claudia unscrewed the top of the lamp, and poured the coil oil onto the floor round the woodbox, which she overturned. Hastily crumbling up a newspaper, she shoved it in beside the box. Then a match— and there was an ominous roar.

Claudia put on her hat and coat, her haversack, and waited till she saw the flames licking up the side of the wall, eating into the floor—then she opened the door.

"Fire! Fire! Oh, Wally—" she screamed as she saw him running towards her from the cook-house. "I upset the lamp—oh, I'm so frightened!"

The office—with all its valuable papers and records, on fire! Bornell gave a shout and started running towards it.

"Go into the cook-house and wait there!" he shouted over his shoulder to Claudia.

• • •

She ran straight to the cook-house—found Ching waiting for her, a little huddled figure in mackinaw and felt, on snow-shoes. They were alone. Every available man within hearing had run to the fire, and they could hear the roar of the flames as they licked up the office.

To buckle on her skis and take up her poles was the work of a moment.

"Hully now! Follow me, missee!"

They slid forward easily over the snow, round the back of the cook-house, making a tour of the camp through trees, heading for the lake about a quarter of a mile on the other side of the hillock. Then they were on the lake itself, swallowed up in the darkness. No one had seen them go, everyone was busy with the fire. They had an excellent start.

"Are you sure this is where they went?" Claudia asked, breaking the silence with a gasp, still trembling with excitement.

"Velly sure, see—" he took out the flashlight and lit up the snow a few wards away—"see they make some tracks!"

She saw unmistakable snow-shoe tracks. What a wonder that Ching carried a flashlight! They went on, faster and faster, gliding swiftly forward as if on winged feet; Ching kept ahead with an eye on the long line of tracks across the virgin snow. It was sharply cold, more than 20 below, but Claudia felt nothing but the heat of her recent terror.

Woman's World

By Mair M. Morgan

Concerning Rhubarb Pie

To know that the dessert which is so thoroughly enjoyed by grown-up members of a family is, at the same time, a healthful and nourishing dessert for the youngsters is one of the greatest of all satisfactions to the homemaker. This is particularly true of rhubarb, either as plain stewed fruit with cake or in a pie.

There is something so tangy and springlike in the taste of rhubarb that no family would want to miss it when it is in season. It seems to symbolize the good fresh fruits and vegetables which are to follow all summer long. It's almost like a tonic and indeed does contain healthful minerals among them iron, which we need in our diet. The colour of the early rhubarb is particularly pleasing and the fact that its more tender and tasty at the start of the season makes this a good time to serve rhubarb pie.

The trouble most cooks encounter with rhubarb pie, as with most fruit pies, is that tendency it has to run all over the place. This, of course, is not necessary and the simple trick of using quick-cooking tapioca as a binder in all fruit pies is the answer to that problem. Try it for yourself by making this pie and solve the difficulty of watery pies once and for all.

Rhubarb Pie

3½ cups prepared fruit; 2½ tablespoons quick-cooking tapioca; 1 to 1¼ cups sugar; ¼ teaspoon; 1 tablespoon melted butter.

Combine ingredients and let stand 15 minutes, or while pastry is being made. Use as filling for the 9-inch pie. Bake in hot oven (450 degrees F.) then decrease heat to moderate at (350 degrees F.) and bake 20 to 30 minutes; then decrease heat to moderate (350 degrees F.) and bake 20 to 10 minutes longer, or until fruit filling is cooked and crust is delicately browned. (This recipe can be used for plum, grape, strawberry, raspberry, blackberry, blueberry, huckleberry or cherry pie.

Pie Crust (Plain Pastry)

2½ cups sifted cake flour; 2-3 cup cold shortening; ½ teaspoon salt, 1-3 cup cold water (about).

Sift flour once, measure, add salt and sift again. Cut in shortening till pieces are about size of small pea; add water sprinkling small amount over flour mixture and mixing with fork only enough to make flour hold together. Continue until all the flour has been mixed on separate portions. Wrap in waxed pastry. Chill thoroughly. Roll out on slightly floured board using light springy touch.

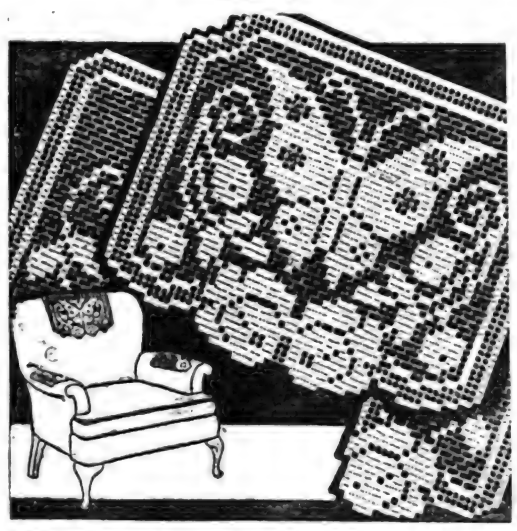
"Spring Fever" Soups

About this time of the year many of us find ourselves languid and tired. Nothing dangerous! Just Mother Nature complaining because we are continuing with our heavy winter eating with Spring already here. She gives us a touch of "Spring Fever" as punishment.

Lighter foods are needed, but we must still have nourishments. How about some rich, light soups? Serve a large bowl, a light salad, a light dessert — and forget the heavy meat dish that night. Here are two excellent recipes.

Lima Puree

2 cups cooked, dried Limas; 4 cups hot water; 1 tablespoon grated onion or onion juice; 1 tablespoon butter; 2 tablespoons flour; 1-8 teaspoon pepper; ½ teaspoon salt.



Rub limas through a coarse strainer; add hot water, salt, pepper and onion. Heat to boiling point. Melt butter, add flour, stir until smooth, then add to hot soup, and cook 5 minutes longer, stirring constantly.

Lima and Tomato Soup

3 cups cooked, dried limas; 2 stalks celery; 1 tablespoon chopped green pepper; 1½ cups cooked, strained tomatoes; 1-8 teaspoon pepper; ½ teaspoon salt; 2 tablespoons butter; 2 tablespoons flour; 3 pints water; 2 slices onion.

Put the Limas, water, onion and celery in a saucepan, simmer 30 minutes, then rub through a coarse sieve. Melt the butter, add flour, stir until smooth; add tomatoes and stir until hot, then add Lima mixture, green pepper and seasonings. Serve with crisp crackers.

Restore Chair's Radiance Easily With Laura Wheeler Crochet

CROCHETED CHAIR SET PATTERN 1485

Which chair seems to be the favorite? Isn't it that with the crisp freshness of filet lace at back and arms? Here's your chance to make every chair a "favorite", and at little cost to you, for humble string is used for this crochet. You'll delight in this simple design of butterfly and roses, set off by lace stitch. Use the design for scarf ends, too. Pattern 1485 contains charts and directions for making the set shown (chair back measures 12½ x 15 inches, arm rests 6 - 12½ inches); material requirements; an illustration of all stitches used.

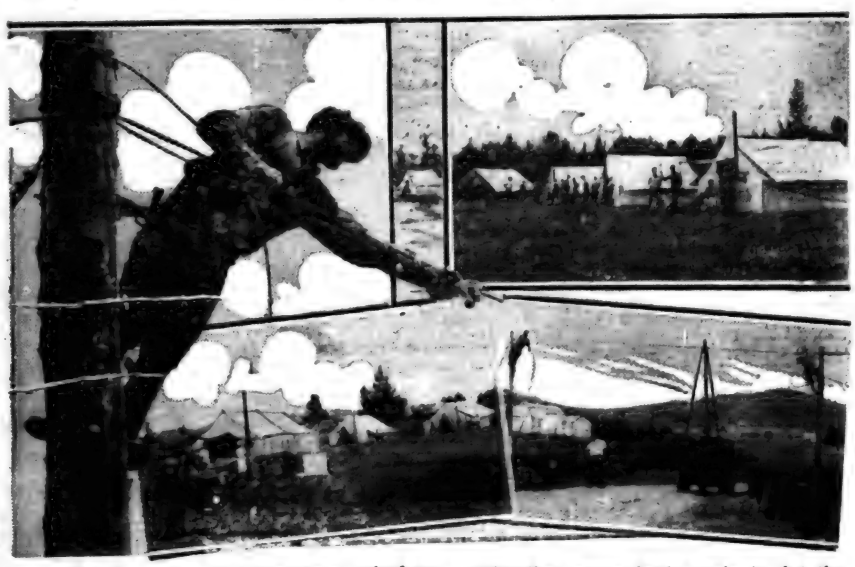
Send 20 cents in stamps or coin (coin preferred) for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 Adelaide St. W., Toronto. Write plainly Pattern Number, your Name and Address.

North Ontario Is Not Worried

Alarmists appear to have been able to thinly spread a fear that the price of gold is due for a drop that will seriously affect Canadian mines, the majority of which are located in Northern Ontario declares the North Bay Nugget.

As yet no government vitally concerned in the movement of the price of gold has in any manner indicated that there is a need for or a probability of the invaluable yellow mineral working to a lower level. The only talk of the kind had been by way of "expressions of opinions" by members of the United States Congress whose views are seldom heeded and never well founded.

Joseph Errington, president of the Little Long Lac Gold Mines, Limited, recently returned after an extended tour of the British Isles and South Africa, stated that he failed to see any indication of a fluctuation of the gold price in any business dealing in had with persons interested in raw gold in the countries he visited.



With Great Britan and the United States sharing a corner on the gold of the world, there isn't any likelihood of any drastic action being taken suddenly. As Mr. Errington said, a drop in the price of gold would not profit any country or individual while a sudden recession would prove ruinous to industry generally.

This talk appears to be calamity howling from no place and for no real good reason. Gold producing companies are spending unsparingly in increasing production at old properties to the maximum point and in seeking out new gold fields. All Northern Ontario is alive with gold mine operators and prospectors and certainly there's not the slightest evidence of a fear of a gold price sag.

Gold mining is undoubtedly established on a high plane that will be maintained by the constant gain in industrial activity and the determination of Great Britain and the United States to remain well in control of this basis of exchange.

The idea of a nation whose farms produce nearly 3,000,000,000 bushels of grain a year and support 178,000,000 head of edible live stock, not to mention poultry, fruit and dairy products, going hungry in thirty-five years' time calls for a lot of imagination. But, fanciful as it may seem to the man in the street, it is nothing less real than the possible consequences of soil erosion in the United States. — Toronto Globe and Mail.

SIGNS OF THE TIMES

With the return of better times, telephone construction camps begin again to dot the countryside along many Ontario highways. For 1937 the Bell Telephone Company's gross outlay will exceed 13 million dollars. Recent reductions in rates for farmers' telephones have induced many farmers to restore the telephones discontinued in depression years and many new rural subscribers are being added to the telephone community.

increase in railway traffic. That year 32,469,768 tons of freight were loaded at Ontario stations and 37,572,821 tons unloaded, increases of 4,091,146 and 4115391 respectively. A present bright spot is in the building and construction section, where, in the first quarter of the current year 2,065 building permits were issued in this Province to the value of $15,825,000. The contemplated new construction is reported as twice as much as in recent years.

The pessimist may object that these quotations do not affect the "basic industry," agriculture. To that the answer is also impressive. In 1936 the value of farm land, buildings, implements and live stock in Ontario increased by nearly $60,000,000 to $1,341,731,000, the highest for any Province in the Dominion. Gross value of farm production in Ontario increased by $40,000,000 which is equivalent to more than $200 in extra spendable money for the average Ontario farm household.

In the face of such "recovery facts" even the most conservative should be justified in feeling a definite optimism.

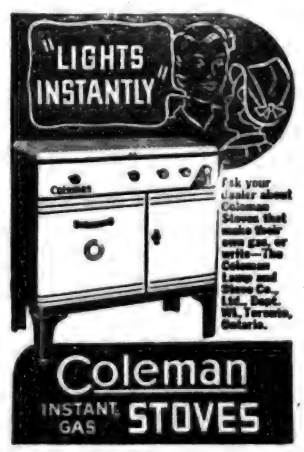
Teach Street Safety To British Children

LONDON — In an endeavour to teach British children how to cross the road in safety, the Save the Children Fund here, in conjunction with the Ford Motor Company, is sponsoring the distribution of working models of traffic lights in cardboard.

"Learn how the traffic lights work and cross the road in safety," is the slogan printed on the top of the ingenious card. By turning a movable centerpiece on the card, traffic lights are shown working in their proper rotation, red, red and amber, green, amber, red.

As each light is made to appear an explanation in red print comes into view. When the red light is shown, the print underneath, the drawing of the lights reads, "Dangerous to cross." With red and amber together, the print reads, "Caution, wait for green." When green appears, the child is told, "Safe to cross now," and with the return of the amber, "Caution, do not move."

Copies are available for all, free of charge on application to the Save the Children Fund. Copies are being distributed to schools throughout the country, and the Ford Motor Company has made arrangements for their agents to distribute further copies of the models.



Recovery Facts

During the depression, economists statisticians and observers generally enthused, almost despairingly, over even the faintest signs of improvement and for a long time were more or less in the plight of a small boy whistling in the dark to keep up his courage, observes the Brantford Expositor.

Instead of being a case of crying "Wolf! Wolf!" it was one of giving assurances, founded on hope rather than evidence, that the world would soon have "turned the corner."

Now it is possible to state that the corner has been turned, in fact, not fancy, and the assertion is supported by impressive evidence in cold figures supplied by the Canadian Business Research Bureau.

Statistics show, for instance, that in 1936 there was an appreciable

Baseball in England

It is only three years since the first English baseball league was formed in Liverpool, but the game has won such favor that this season, according to press reports, will see over 400 teams turning out in Lancashire, Yorkshire, Oxfordshire, Birmingham and London. Thousands of airmen and soldiers play the game at aerodromes and army camps, and it has also become popular in schools all over the country. One British sports writer observes that baseball "is not an American invention, but is thoroughly English, being founded on the good old-fashioned game of rounders, and all that America has done is to put 'pep' into it."—From the Halifax Herald.

Tourists and Flags

It must be refreshing for visitors from the United States to view Ontario service stations, tourist camps, tourist homes and hotels decorated exclusively with British colors, instead of with a mixture of Union Jacks and Stars and Stripes.—(St. Thomas Times-Journal)

Why Pat Burns Wore Out

Senator Pat Burns left an estate of over four million dollars. In these times there is more criticism of accumulated wealth than in any other age.

Pat Burns' career nevertheless is an example. If we had more of his type in Western Canada today, we wouldn't be floundering around as we are. From the moment this unschooled youth left an Ontario farm for Western Canada he depended upon himself to get ahead. He did not look to the State to provide him with relief if things did not go well with him. He took the jobs that came to his hand and when he found one that suited him best, he plugged along at it until he rose to eminence as the greatest rancher of the western country.

Whatever help came to Pat Burns was due to the confidence he had inspired in others. If banks loaned him money to enlarge his ventures, it was because he had proven his worth. He had come up from the bottom because of the self-reliance and the determination that characterized his life. — (Lethbridge Herald)

Spelling Lesson

Last week a man dropped into the office to say we had misspelt "obbligato." One "b" would suffice, he said. We handed him the Columbia Encyclopedia which spells it as we did and defines "obligato" as "the common misspelling of obbligato." Most dictionaries give alternative spelling with preference for the double "b".—(Financial Post)

Highway Problem

Trailers are somewhat of a problem when they are on the highways. They are bulky, they make it impossible for the driver to see what is behind him, and they are not always easy to handle. Standing still, they are still a problem. There is no place for them on city streets, and the ordinary auto camps do not want them. Down south they have exclusive trailer camps.

The health problem is also a serious one. Many of the trailers have only the sketchiest sanitary equipment, and it is feared that if they come in numbers they may pollute sources of water supply and become a menace to the communities which they visit. Moving from place to place, the trailer people may be tempted to be careless themselves about the water and milk they use, and so may become carriers of disease. The Health League of Canada suggests a general policy of tourist regulation with a view to safe-guarding public health. — Vancouver Province.

A Deadly Enemy

If diphtheria is given the chance it will strike with just as fatal results as before. For that reason we can never allow the security which has been given to our children by serum treatment to drop into disuse or be regarded as something optional. We have the weapon now with which to fight, but the fight must be continuous.—Peterboro Examiner.

For Larger Pumpkins

The giant gooseberry and prize pumpkin will soon hide their heads in shame, if the new fertilizer just perfected by Dr. Joseph Seltei, chief medical officer of the Hungarian State Railways, does all that is claimed.

Noticing that certain dyes helped wounds to heal quickly, Dr. Seltei experimented upon plants. The results were astonishing, many species growing to five times their normal size and reaching maturity far more quickly than usual.

The name given to this giant-producing fertilizer is "Photosenin." It is put up in powder form and is very cheap to produce, so we may soon see it in general use by farmers and market gardeners. "Photosensin" might have come out of "Alice-in-Wonderland," for while a normal dose makes a vegetable grow into a giant, an overdose reduces it to a midget!—Montreal Star.

Helping Them Away

Last year the Review published a simple method of keeping cats and dogs away from shrubs and flowers and we have been asked to reprint it. All that is necessary is to spray flowers and shrubs with a diluted solution of nicotine sulphate and dogs and cats will give all places so sprayed a wide berth. The smell is offensive to animals, but not noticed by humans, and must be renewed every two weeks or after a heavy rain. The solution is made by mixing half a teaspoonful of nicotine sulphate with a gallon of water and using an ordinary spray. — Niagara Falls Review.

Different Now

Last year only 12,023 immigrants reached Canadian shores. This is typical of the figures for the last two or three years when immigration reached the lowest point since 1867. The paucity of newcomers doesn't mean that people in foreign lands no longer desire to take up abode in this country. They would no doubt have continued flocking in if federal authorities hadn't raised the barriers when the economic upheaval brought on an acute unemployment problem in the Dominion. It would have been the height of folly to aggravate the situation by not stemming the flow of immigrants.

During the decade preceding the Great War, immigrants came to Canada in large numbers. The highest point was reached in 1913 when 382,841 arrived. Those were the days when the West offered great opportunities. Remember how large posters in railway depots used to announce in screaming letters—FIFTY THOUSAND HARVESTERS WANTED.—Kitchener Record.

THE EMPIRE

Television in England

No one knows just how many television sets are in operation in London now—about 2,000 is the usual estimate. The number will remain small while there are only two short programs in the day and while television sets remain so expensive. But I have not the slightest doubt that in ten years television will have made ordinary wireless as out of date as talkies have made silent films.—New Statesman and Nation.

Handing Over at "No. 10"

The transition from the Premiership of Mr. Baldwin to the Premiership of Mr. Neville Chamberlain will be extraordinarily smooth and easy.

The head of the Government must be in touch with the work of all departments, constantly making a broad survey of the activities of the Administration generally. The Chancellor of the Exchequer has financial connections with the departments which enable him to know something of their work, so that a Chancellor who succeeds to the Premiership is able to undertake the broader contacts and the more general survey which falls to the head of the Government with a miximum of smoothness and a minimum of sudden intensive effort. Men who have gone to 10, Downing-street, from the Opposition, or from anywhere else without immediate previous connection with No. 10, have been almost overwhelmed with the mass of political and administrative ends and details that confront the new occupant there.

Mr. Chamberlain is already engaged in sliding, almost imperceptibly, into the supreme political post. He is working in the closest contact with Mr. Baldwin. When the change is made in the closing days of this month, all the Ministerial adjustments will be prompt, and the whole political and administrative machine will continue without jerk or pause. —Overseas Daily Mail.

Most bacteria reproduce by the simple method of splitting apart. One individual becomes two, two become four and so on. This can happen every half hour, under favorable conditions. At this rate one bacterium in 24 hours could give rise to 281,500,000,000,000 descendants.

News In Review

Prices Soar

NEW YORK—Wheat and stock priced boomed this week.

In Chicago reports of Canadian dust storms drove brisk buying in and wheat rushed up 3¾ to 4¾ cents a bushel.

On the New York Stock Exchange a selective rally, led by steels, motors and rails and copper, netted gains of around $1 to $4. Transactions totalled 1,996,020 shares for one day.

Demand for shares followed news the United States Senate Judiciary Committee had decided to report adversely on the Administration's Supreme Court Bill. Earlier in the session there had been some selling following word Justice Van Devanter would retire from the Supreme Court.

High-jumpers were U.S .Steel at $96.62 and Chrysler at $111.12, both up about $4. Issues about $1 to $3 higher were General Motors at $56.12, Anaconda $50, Santa Fe $89, Douglas Aircraft $50.50, New York Central $45.87, Westinghouse Electric $136.75 and Bethlehem Steel $79.87.

The Associated Press average of sixty stocks was up .80 at $66.30.

Canadian "Stink" Bugs Shipped to Europe

OTTAWA.—Canadian stink bugs are being given new homes in France and other European countries.

Packed snugly in cigar boxes, the humble insects are being given the benefit of foreign travel in fast trains and luxurious ocean liners.

They are welcome across the Atlantic because they eat the beetles that feed on potato fields.

Dr. Arthur Gibson, Dominion Entomologist, said the stink bugs are bought by European Governments in the same way Canada is buying Hungarian parasites to attack the sawfly that is ravaging Canadian spruce stands. A shipment is now on the way to France.

The potato beetle is something of a commonplace in Canada, but in Europe it is feared like a plague. In Germany the Government has turned out the army to combat it. Dr. Gibson showed pictures of men industriously spraying potato plants in German fields.

Favors Jan. 1 as Election Day

TORONTO. — Date of the next civic election will be Jan. 1, provided the City Council, at its next meeting approves of a recommendation to this effect submitted by the Board of Control.

Declares Common Law Marriage Is Valid

SUDBURY. — When two people have lived together for four years and have a family of two children, and are known as man and wife, can they be placed in jail for falsely registering as man and wife? This question was brought up before the Sudbury courts this week.

G. M. Miller, defence counsel, insisted that common law marriages might make a pair legal an and wife.

"To all intents and purposes she is his wife if he died leaving money to his wife, she would get it," he said. "The children are registered under his name." Magistrate McKessock granted a dismissal.

On a "Dime Tour"

SAN PEDRO, CAL. — Sir Harry Lauder, 67-year-old Scottish entertainer, disembarked from a Pacific cruise here chortling about his "dime tour" of the world..

He explained that ten cent pieces he saved during his career have financed the trip.

Housing Loans Now Stand at $7,000,005

OTTAWA.—Since the inception of the Dominion Housing Act of 1935 a total of $7,064,287 in loans has been taken out for the construction of new homes, of which $2,096,414 was borrowed between Jan. 1 and April 30 of this year, according to figures announced by Revenue Minister J. L. Ilsley, Acting Minister of Finance.

It is estimated that since the loans became available, some 1,583 families have been provided with new homes. The average loan per family unit has been $4,463 and the total of individual loans has been 994.

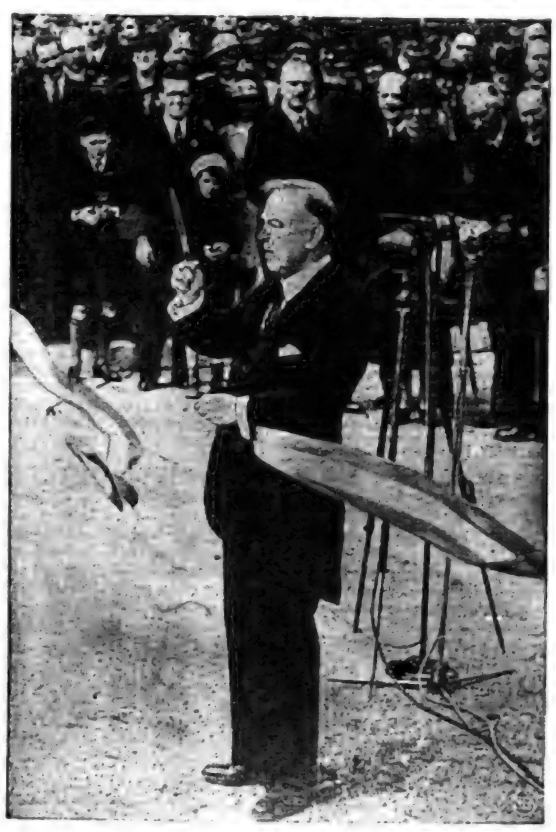
Every Province except Alberta has taken advantage of the scheme, Ontario leading with 468 loans and others coming in the following order: Quebec, 298; Nova Scotia. 159; British Columbia, 27; New Brunswick, 19; Manitoba, 16; Prince Edward Island, 6 and Saskatchewan, 1. Flats and apartments, as well as private dwellings, may be financed under the plan.

Unbreakable Glasses

LOS ANGELES. — E. G. Lloyd ended a 12-year-old job last week when he casually fished a pair of pinc-nez glasses from his pocket, slammed them against a wall, and picked them up—intact.

Lloyd, a long-jawed optician with a pair of bushlike eyebrows, explained the impromptu demonstration climaxed research he personally has been conducting since 1925, and ended a hunt carried on by others for 2,500 years. His new product is unbreakable glass for spectacles, and he has developed a process to turn it out like hard-sugar candy.

"Ever since the Chinese first began using glasses," he said, "people have been breaking them. We have something here that will put a stop to such annoyance.. These glasses will resist anything but a hammer, or perhaps abrick. And we can make them by the dozens."



The basis of Lloyd's unbreakable glass is a new, synthetic resin called acryloid. The substance weighs 40 per cent. less than glass, admits 25 per cent. more light, and, as a finished product, costs approximately the same.

Acryloid is pressed out between dies, eliminating the tedious grinding process that is necessary to fashion spectacles of glass.

E.P. Ranch Sells Bull to The Alberta Government

EDMONTON. — Purchase of Princeton Questor, fine two-year-old Shorthorn bull, by the Alberta government from the Duke of Windsor's E.P. ranch at Pekisko to lead the herd at the Olds agricultural school was announced by Hon. W. N. Chant, minister of agriculture. He and his deputy, H. A. Craig, negotiated the purchase at Pekisko on a visit to Southern Alberta, he said. The bull will not be handed over until August, after it has appeared in Western Canada exhibitions. It may also be shown at Toronto, he said.

Canadian Prime Minister Opens New Bridge

Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, pictures as he cut the tape to open the newly constructed Chelsea Bridge in London, Eng., recently.

NEWS PARADE

Commentary on the HIGHLIGHTS OF THE WEEKS NEWS —

By Peter Randal

"The tumult and the shouting dies,—the captains and the kings depart"—the world is settling back after one of the greatest shows in modern history. But over in Great Britain where the spotlight of interest is still focussed, they are saying that it isn't the same old world. A new age has begun and nothing is more significant of the change than the passing of an old man, worn and spent from too much conflict.

A Great Man of Our Age

Phillip Snowden, the weaver's son is dead. He lived to become twice Chancellor of the British Exchequer, to become Viscount Ickhornshaw and to be branded "traitor" by his former friends and followers. He will be remembered as the man who took Great Britain off the gold standard in 1931 and, in the words of another lonely and deserted man, Ramsay Macdonald, he will be mourned as "a great man of our age."

25 Years of Peace?

Adolf Hitler is said to be making proposals of a twenty-five year mutual peace and protection pact with France, Belgium and Great Britain as potential signatories. Present at the delicate negotiations being carried out in London are Anthony Eden, Prime Minister Stanley Baldwin and Chancellor of the Exchequer, Neville Chamberlain. The presence of Mr. Chamberlain is but another indication of the changing times as Stanley Baldwin prepares to hand over the duties of office to his successor. Should the conferences being conducted at the present time prove successful, there will be a great many sighs of relief, not only in Europe but in almost every part of the world. Here are just a few of the things such a treaty would accomplish. It would obviate the possibilities of a close German-Italian agreement with a threat to democratic countries within their spheres of influence. It would bring about an arrangement between France and Germany whereby the enormous fortifications being carried out along their respective borders would be left unchanged thus preventing further causes for friction in a very dangerous zone. And finally, Germany, while not abandoning her desires for colonies would practically agree to a hands off policy where British colonies formerly belonging to Germany were concerned.

Spanish Repercussions

An interesting conjecture, should the treaty be accomplished will be the effect on the Spanish civil war. Hitler, is said to be disgusted with events as they have been taking place in that country and there is every possibility that he may attempt to persuade his fellow dictator of Italy to pull up their mutual stakes.

And when the Spanish war is mentioned, there are many still wondering just what, if anything, Great Britain intends to do about the damaging of a British destroyer on patrol duty with a loss of eight lives. The destroyer had a huge hole torn from her bow, outside the three mile limit and while first examination attributed the mishap to a mine, closer examination opens the interesting possibility that the ship was deliberately torpedoed. If so, by whom and for what? Either side in the unhappy war might be responsible in the hope that by blaming the other they might obtain the aid of the most powerful nation in Europe. True to her policy all through the present crisis, Britain is holding her own council and refusing to be stampeded into anything.

Happily Ever After

Over in France there is another change and the possibility of a happy ending to a royal romance. Mrs. Simpson is no more. Her name was changed the other day by permission of the court to Mrs. Wallace Warfield and it is said that the King will announce her engagement to Edward Duke of Windsor. Such action would amount to a family forgiveness and a recognition for the first time of Mrs. Warfield by the Royal Family in its official capacity.

Security Jitters

And business at home is not the only thing the Danes have to think about. Denmark is torn between her market connections with Great Britain and the land hungry tendencies of Chancellor Hitler, to whom Great Britain seems willing to give a more or less free hand in the Baltic Sea. Thinking seriously along the same lines are the other Scandinavian countries who form what is known as the Oslo group—neutral during the war but said to be considering defense at the present time.

Statement to Shareholders

Of interest to students of social and economic problems everywhere is the record of his country during the years of his reign. Denmark is the champion of the co-operative system. 76 per cent. of her total area is devoted to agriculture and of this land, 92 per cent. is owned by half a million farmers. Through the co-operatives which regulate quality and attend to the function of marketing, Denmark supplies 30 per cent. of the world's export butter and 60 per cent. of its bacon. Great Britain is her biggest customer, taking nearly 60 per cent. of her total exports.

Feminine Diplomacy

It is to Norway, one of the countries represented in the Oslo group, that the United States is sending one of her few feminine Ministers. The new Minister, Mrs. J. Borden Harriman of New York and Washington is already in headlines as the diplomat who cannot keep a secret, a very feminine characteristic after all but one which is likely to cause embarrassment to Uncle Sam. Mrs. Harriman has unconsciously revealed the state of negotiations being conducted between the United States and Norway on the subject of a trade treaty.

Corporation Monarch

The job of being a king is much the same as being head of a large corporation according to Christian X of Denmark. The tallest monarch in Europe is celebrating the twenty-fifth anniversary of his accession to the thrones of Denmark and Iceland. Typical of his businesslike attitude towards his job was the modest state banquet and celebration of the event.

Three Way Trade

The United States seems to be in the market for advantageous treaties these days. Though not in evidence at the Imperial Conference being conducted behind closed doors in London, it is known that American influence has coupled with Canadian interest to sound out the possibilities of three way trade agreements between Great Britain, Canada and the United States.

Irish Temperament

And just so the Emerald Isle shall not pass unnoticed in the excitement surrounding the crowning of a king, the wild Irish have blown up the statue of one of his ancestors in Dublin. The act, intended as a protest against coronations, kings and the English in general did not prevent the same wild Irish from opening up a three hour air service between London and Dublin with other lines scheduled to be opened to the Continent in the near future.

Canada Imports Apples From Far New Zealand

Announcement of heavy shipments of New Zealand apples to both eastern and western Canadian ports in the next few weeks emphasizes again the world-wide transformation in apple growing in the last decade or two.

Not so long ago there was practically no exportable surplus of apples from southern hemisphere countries. Canada and United States with late winter varieties practically monopolized the British market from March until June. Shipments of this type of fruit were in addition to heavy earlier exports of better varieties such as McIntosh, Spys and Kings. Shortly before the war, however, New Zealand and some sections of Australia and South America started to develop apple growing. They used the best Canadian and United States varieties, mostly Jonathan, McIntosh and Delicious. Commercial results of this introduction are now apparent.

Maturing during what are early spring months in this country, Britain is supplied with high quality fresh fruit in place of former inferior, long-stored North American varieties. As a result, Canadian growers of the "long-keeping" apples have been switching to more popular types and in recent years Canadian consumers, too, have been getting fresh apples from the southern hemisphere in the spring. Six months from now the trade will be reversed with considerable exports to the Antipodes from British Columbia.

Thrifty Co-eds Attend Dance In Nightgowns

ROCHESTER, N.C.—The secret's out—some of the stunning evening gowns worn by University of Rochester co-eds at last week's inter-fraternity ball were just remodeled nightgowns. It was simply a matter of economizing. Co-ed Phyllis Probst explained.

"You can get a very chic model in a nightgown for about $5," said Miss Probst. "Add a buckle here and a flower there, and a mere male wouldn't know the difference."

Lawrence Dolby Writes a Letter

In the course of the service last Sunday night, Rev. T.D. Jones, the minister of the Streetsville United Church, read parts from a letter sent by Lawrence Dolby, who, with his wife, are serving in Missionary work in the Belgian Congo, Africa. Mr. Dolby speaks of the danger of fires in the brush and of the need of being prepared to backfire to defend one's life and going onto the ground burned over, where, though not comfortable, one is reasonably safe

Mr. and Mrs. Dolby seem to be enjoying their work, and are meeting with encouraging success. He asks for the prayers of the people at home to support the workers in Africa

District News

Claireville Spring Fair will be held on Wednesday, June 2nd, at Claireville.

St. Peter's Church, Erindale, held a very successful congregational social last evening at the home of Mrs. Robert Taylor, Lorne Park.

Peter Hume passed away in Hamilton on May 23 and was buried in Milton Cemetery. This is the third death in the Hume connection during the past month.

A daughter was born on May 4th, in Toronto, to Mr. and Mrs. George James (nee Vera Entwistle). George is well known in Streetsville.

Mrs. George Elliott passed away at her home, Fifth line east, Chinguacousy, on May 22nd, in her 67th year. Interment took place in Brampton cemetery.

Mr. T. H. Wilson, Base Line, Trafalgar, had a very successful sale of farm stock, implements, etc., on Tuesday, conducted by Auctioneer W. A. Russell, when good prices were realized and everybody paid cash. We are pleased to know that Mr. and Mrs. Wilson will make their home in Streetsville.

Miss M. A. Kaiser, aged 84, passed away at Woodbridge on May 24th.

Mr. Charles A. Hopkins of Cooksville passed away very suddenly on Tuesday at his home. The funeral took place this Thursday afternoon to St. John's Anglican Church and cemetery, Dixie, under Masonic auspices, and was largely attended. Deceased was a member of River Park Lodge, Streetsville. Rev. J. F. Banks conducted the service at the church.

WEDDINGS

Duncan—Martin

Amidst a setting of spring blossoms and white tulips, an interesting wedding took place in Grace Anglican Church, Milton, Saturday, when Jessie McCraney Martin, daughter of C. W. Martin and the late Mrs. Martin, became the bride of Mr. John Daniel Duncan of Toronto, son of Mr. and Mrs. John Duncan of Vancouver. Rev. Canon L. J. R. Naftel, rector of the church, officiated, and Miss Maura Mackenzie played the wedding music. During the signing of the register, Mrs. J. Willis sang "Love's Coronation." The bride, given in marriage by her father, wore a graceful gown of mousseline de soie with a crown-shaped net veil, caught with bouvardia. She carried a bouquet of white sweet peas. Her sister, Miss Monica Martin, frocked in rose quarte mousseline de soie with a hat of leghorn to match and a large arm bouquet of scarlet and purple sweet peas, was maid of honor. The bridesmaids were Miss Kathleen Dick, attired in amber mousseline de soie, and Miss Enid McColl, in jade mousseline de soie, with hats of leghorn to match. All attendants carried bouquets of scarlet and purple sweet peas. Rev. James Duncan, brother of the groom, was best man, and the ushers were R. L. Martin, brother of the bride, A. Doyle and A. G. Fenik. Following the ceremony a reception was held at the home of the bride's father and sisters, Misses Augusta, Gladys and Monica Martin, Miss Enid McColl and Miss Kathleen Dick received. The groom's mother, who also assisted, looked lovely in a gown of beige lace with a hat of beige straw. She wore a bouquet of California daisies. Later the bridal couple left for a trip to New York, the bride travelling in a blue redingote, with a blue felt hat and accessories to match. On their return they will live in Toronto.

"YOUTH IN AGRICULTURE"

By Mildred Stephens

The Royal Winter Fair was organized in the year 1922. Therefore, this year the Fair and directors marked their 15th year of very successful and educational progress. The motto of the 1936 Royal Fair was "Youth in Agriculture." Not only was it a slogan, but it was the very spirit which animated every activity in every nook and corner of the Winter Fair.

This year, Hon. J. G. Gardiner, Minister of Agriculture, and the Fair officials, had the program so arranged that the boys and girls of the High Schools of Ontario were given an opportunity to spend a day at the Show. The main object being to enrich their lives along the field of agriculture.

I am very thankful that I, along with the mighty throng, was fortunate enough to be able to enjoy the 1936 Royal Winter Fair to its utmost.

On entering the building I stood breathless for a moment, at the pageantry of colour, at the ranks of gold and orange, of mauve and white and the deepest brown and red. The main centre of attraction was the beautiful exhibit of the Dale Estate, which consisted of two thousand roses, arranged in a fountain effect, on a revolving base.

Great interest was taken in the Dog Show, which exhibited dogs of all sizes, colours and breeds. At certain times the dogs became rather noisy, each one having its own individual whine, because of the many visiting people annoying them. One noticeable attraction was that each dog received very attentive care. Each had its own comfortable home, which in many cases the furniture was made up of soft, downy, velvet cushions. There were sheppard dogs of great beauty, police, gray hound, water spaniel, Dachshund and Pekinese, which were also attractive.

This year there was the greatest exhibit of horses. There were as many horses on the upper floor as on the lower one. Each horse stood in its stall with great pride, knowing that it was dressed up to perfection for the Royal Show. The ponies were looked after with great care, and attracted immense crowds of spectators. The heavy work horse looked husky and strong, and the light saddle horses were well groomed with their maines and tails adorned.

Market cattle classes aroused more than usual interest. One hundred boys from the O.A.C. at Guelph were present in the barns to keep the place clean and sanitary, in order to set a higher standard of showmanship. Cows from all over the world were exhibited. The various classes being in their own group which made a unique colour scheme of black, white, red and fawn. The picturesque Ayrshires and Holsteins lend beauty and interest to the magnificent showing of dairy and beef cattle.

The swine were all represented and it was very noticeable that great pains had been taken to present the exhibits to the best advantage from the general spectators' point of view.

The poultry were all in their wire cages, which were bedded with clean, dry straw. Their masters saw that they had all needed care and had them at all times, looking their best. Looking at the poultry one would never believe there were so many breeds.

The magnificent glossy apples were very high in quality. It is interesting to know that the 'Red Delicious' grown and exhibited by Oak Ridge Farm, Port Credit, won the sweepstakes honour at the Fair. There were many entries of honey, which looked very delicious. Although there was a good exhibit, the best was not shown on account of our local dealer having to judge. The full display of vegetables was very interesting to any young or old vegetarian. One feature which seemed to strike my eye was the art of displaying the onions which seemed to be hanging in long spiral coils.

In the afternoon in the coliseum the schools all showed their appreciation to the Minister of Agriculture and directors by three cheers.

The evening horse show is always a popular attraction and it provides plenty of recreation and thrills. Many people took great interest in the saddle horses, which were competing to see which horse could get the least number of faults. Next came the three teamed wagon, which was magnificent. The rider could make them do most anything he wanted. They could turn sharp corners, charge up the coliseum and make the figure eight. The horses turned completely around so that the front horses could take sugar from a little girl's hand at the back of the wagon. Army saddle horses came into the ring and competed in jumping. All showing great skill. Then came the pageant, with the white man trying to make peace with the Indians, which showed the activeness of the Indians on horses. Caravans came out and the Indians being frightened started to fire at the occupants. Carriages were now shown, one being the carriage in which Queen Victoria often rode, and the other that carried La Fayette. Nothing takes the glamour away from the nightly ride of the Royal Canadian dragoons, their shining helmets flashing, the bits of their horses jingling, the creak of saddle leather, the toss of their plumes, the snorting of their excited mounts, as they swing rhythmically to music in and out of an entangled dance. Then to end the wonderful performance of a wild gallop and charge with lances fixed and pennants flying. The wagons saw service, as did the specimens of the earliest motor cars which went at the rate of eight and ten miles an hour. Then came sleekly, the streamlined cars of to-day.

In conclusion, I feel that the entire exhibits of the 1936 Royal Winter Fair would surely enlighten the hearts of all present to the important part which is played throughout the land by our "Youth in Agriculture."

ADVERTISE IN, THE REVIEW

SEED OATS

FARMERS BEWARE what *seed grain* you buy to *sow* this *coming Spring*. There is a great deal of grain being offered for sale in Ontario for feed. A grain shortage has resulted in a demand for *Western Feed Oats*. These oats are being sold for *Feed* but some farmers may re-clean them and use part of them for seed.

Germination Tests of samples of such oats have shown as low *percentages* as from *20% to 70%*.

The Sowing of Such Seed may have *disastrous results on the crops.*

A survey of the grain held in Ontario would indicate there is *sufficient good seed* to be obtained at home, and all farmers who must purchase *seed grain* this year should make careful selection upon *Germination Tests*. A farmer can make a simple and accurate test at home by sprouting a number of kernels either between two sheets of dampened blotting paper or in a box of earth. The sample sprouted must be a fair average of the lot.

WRITE

The SNAPSHOT GUILD
BRING IN THE CLOUDS

Without the clouds this would have been a dull picture. A K-2 filter over the lens brought them in. Exposure 1/25 second at f.8.

Go to any art gallery and examine the landscape pictures. Find one in which the artist has failed to put clouds in the sky. If you succeed you will have encountered a rarity in the world of art.

The fact is that even though a painter may succeed in capturing the true empyrean blue he seldom omits to put in a cloud or two, white, dark or tinted, despite the fact that a cloudless, blue sky is not an unusual phenomenon and hence true to nature. The painter appreciates that clouds in their many beautiful forms, "pavilions of the sun," as a poet once called them, are artistic contributions to any outdoor scene. Too, the artist who works in black and white rarely fails to put clouds in his sky because an expanse of plain white space is uninteresting.

Why do we not more often see clouds in amateur photographs? Years ago the qualities of photographic materials were such that it was very difficult to photograph clouds because there was no film so sensitized that it would register clouds distinctly. Today films are available which to a greater or less degree will do so, but if the little gadget known as a filter is used over the lens, clouds may be brought into the picture in their full form and beauty.

Nevertheless, many amateurs continue taking cloudless landscapes, their skies being represented only by a void of white or gray, or faint outlines of clouds at the best. The beauty of a great tumbling cloud, or the attractive canopy which a mackerel sky spreads above a landscape is absent in the print although present when the picture was taken.

Why should not amateur photographers be cloud artists, too, when they have the means to do so? The trick the filter does is to hold back the violet, ultraviolet and blue light to which photographic film responds more sensitively than to the other colors, and in which clouds and sky are both rich. This allows the green and red light (also reflected from clouds) to register, and if the film is of the type especially sensitive to green and red, such as the supersensitive panchromatic, the clouds come in still more distinctly. Naturally since the filter holds back all the light to some extent, somewhat longer exposures are needed than when no filter is used. Correct exposure can be determined by using the "filter factor" data furnished by the manufacturer.

Filters for recording clouds and for general use are yellow in different degrees of density, variously suited to different subjects. A good average filter costs only from $1 to $1.50, depending upon the camera on which the filter is to be used. This is an investment which pays high dividends in the satisfaction you get from the enhanced beauty of your outdoor photographs.

138 John van Guilder

NOTICE

The Editor of The Review would greatly appeciate the co-operation of the secretaries of the various organizations who would send him a brief account of their meetings or other items of Local Interest

When our readers have visitors or go visiting, we would also like to be advised of it, too.

Special Equipment Used by Experts in Taxidermy

The first principle governing taxidermy is that, after the specimen has been procured in as fresh and clean state as possible, it should have the skin stripped from the body so as not to disturb the scales if a fish or reptile, the feathers if a bird, or the fur or hair if a mammal, according to a writer in the Indianapolis News. Tools required comprise several sharp knives (some pointed and some obtuse), a pair of scissors, a pair of pliers, a pair of nippers or "cutting pliers," some tow, wadding, needles and thread, a "stuffing iron," some crooked awls, a pair of fine long flat-nosed pliers and a camel-hair brush.

The preservative compound often used is the original "arsenical soap," made by cutting up and boiling 2 pounds of white soap, to which 12 ounces salt of tartar and 4 ounces powdered lime (or whiting) are added when dissolved; to this mixture, when nearly cold, 2 pounds powdered arsenic and 5 ounces camphor (the latter previously triturated in a mortar with spirits of wine) are added. The mixture is put away in small jars or pots for use. Like all arsenical preparations, this is very dangerous in the hands of unskilled persons, therefore an efficient substitute composed of 1 poung white curd soap and 8 pounds whiting boiled together, to which is added, while hot, 1¼ ounces chloride of lime, and, when cold, 1 ounce tincture of musk. This mixture is safe to use when cold, although when hot the fumes should not be inhaled.

Numerous Prominent Men Choose Life of Bachelor

Sir Isaac Newton was one of the most distinguished men who lived and died a bachelor. He loved a Miss Mary Story when both were young and she was beautiful. But he was too poor to marry her then and he lost her to another. His devotion lasted all his life, and though she was twice married, he never passed her home without going to see her, and later he assisted her financially.

Michelangelo was also a bachelor. "I have only too much of a wife in my art," he said, "and she has given me trouble enough. As to my children, they are the works that I shall leave; and if they are not worth much they will at least live for some time."

Raphael was another painted who was unmarried. Among musicians there were Chopin, Liszt, Beethoven and Paganini. The unmarried poets have included Swinburne, Whittier and Walt Whitman. Lewis Carroll, the author of "Alice in Wonderland," never married. Others, distinguished in various fields, who remained bachelors, were Schopenhauer, Cecil Rhodes, Charles Lamb, Alfred De Musset, Phillips Brooks, Voltaire, Henry James, and the painter, Lord Leighton, president of the Royal Academy. James Buchanan was the only bachelor president of the United States.—Cleveland Plain Dealer.

The Ecuadorian Government

President General Jose Maria Urvina served as the seventh head of the Ecuadorian government from September 6, 1852, until October 16, 1856. It was during his term of office that the sixth Constitution, adopted at Guayaquil on July 17, became effective October 2, 1852. The efforts of Bolivar to maintain the greater Republic of Colombia, formed at the time of the revolt from Spanish rule, came to an end in 1830. Venezuela and Ecuador both set up separate governments. However, it wasn't until 1835 that the name "Republica del Ecuador" was adopted, and the second Constitution adopted. Since that time the various Presidents have had great difficulty in effecting any real progressive measures, caused by the necessity of fighting to maintain their power by arms.—Philadelphia Record.

Demanded a Battle

The medieval custom of trial by battle was not abolished in the common law of England until 1819, when a trial by battle was actually insisted on by a person accused of a crime. The judge had to admit that inasmuch as trial by battle was never abolished the accused had the legal right to have his battle. And, as the one accusing him didn't care for the idea, the undoubtedly guilty man went free.

Discovered Brazil

In 1500, Alvarez Cabral discovered Brazil. One of the nautical instruments he used was the armillary sphere, which consists of several brass rings, all of which are circles of the same sphere, and designed to represent the position of the celestial bodies. The center of the Brazilian flag is occupied by a sphere and a portion of circle.

Twins

"Twin" is a singular noun, and is defined "one of two children or young brought forth at one birth." The plural form is "twins," and is defined as "two children or young brought forth at one birth." A pair of twins is two children. The expression, however, is tautological, since "twins" implies a pair.

Cleaning Parchment Diploma

A parchment diploma may be cleaned if it is not too soiled by rubbing lightly with art gum, which may be purchased from any art dealer. Another method is to use pieces of freshly baked bread with the crust cut off. For grease spots apply Fuller's earth. Rub it into the stain and then brush

The last meeting the Community Club was held at the home of Mrs Durant, Mrs. W. Leslie presiding

A picnic will be held some time in June.

Any sewing not already handed in should be in for next meeting. Any clothing will be acceptable as a bale will be made up to be sent to the stricken district at London.

Readings were given by Mrs. Cliff May, Mrs. H.Campbell and Mrs. M Williamson.

Next meeting will be held on Wednesday, June 2nd, at the home of Mrs. Sol Cordingley.

Charles A. Hopkins

Hopkins—Suddenly at his home Cooksville, on Tuesday, May 25 1937, Charles A. Hopkins, husband of Ella Maude Wilcox, in his 66th year

Interred at St. John's Anglican Church, Dixie

Deceased was born in Cooksville a son of the late William Hopkins and had been a resident ofCooksville all his life. He is survived by his widow, who was Miss MaudeWilcox two sons, Clivel, Cooksville, and Ancel, Toronto, a grand-daughter, three sisters, Mrs.Daniel McDonald Dixie; Mrs. Geo.Bull, Oakville, and Mrs.Bella McFadden, Toronto, and five brothers, John, Robert and Edward, Cooksville, Fred of Totten bam, and Thomas of Toronto.

B. D. Wolfe, son of Mr. and Mrs Albert Wolfe, Streetsville, was one of four Peel County young men to graduate from the Ontario Agricultural College last week. The others are Brampton boys, Jack Bromley, Sherlock Martin and W.H.Fleury.

Reuben Lightheart of Snelgrove an ex-Warden of Peel County, observed his 92nd birthday last Sunday.

Mr. I. J. Ardagh, Mr. T. Cook and Mr. Pat Ardagh spent the holiday at Stoney Lake.

Thursday, May 27, 1937

The Review office will be closed for business every Saturday afternoon.

Local Items

Master Harold Gill of Brampton visited his grandparents here over the holiday

Miss Bernice Temple, Nurse-in training spent the holiday at her home here.

Miss Margaret Falconer, Nurse-in Training in Toronto, spent a few days at her home here last week

Miss Helen Hall,Nurse-in-training at Guelph Hospital, is spending a few holidays at her home in North Trafalgar.

Streetsville Oddfellows will attend divine service at Trinity Church on June 13th, at 11 a.m.

The annual meeting of Churchville Cemetery Board will be held in the Hall at Churchville Saturday May 29, at 1 o'clock, S.T. All the plot holders and others interested are invited to attend.

Mr. Anthony Leece from Weston visited friends here this week.

Cooksville Girls defeated a Port Credit team at softball on Tuesday evening at the Cooksville Park by a score of 21—8.

Mr. W. A. Hardy and Mr. C. P McArthur and sons went on a fishing trip up North over the week end. They visited the Midland Shrine on Sunday and called on Rev. George H. Purchase, of Elmvale, on their way home.

The Young People of the United and Presbyterian Churches were entertained last night at the Trinity Church Parish Hall. They had a nice program and a lunch. Rev. E. S. Ottley was chairman. There were Instrumental solos and readings. Miss Mary Crozier played the accompaniments..

Several members of the W. M. S of St. Andrew's Presbyterian Church attended a sectional meeting of the W.M.S.of Toronto Presbytery to-day at Milton

Mr E. James, Tralalgar, a veteran of the Great World War, has been appointed Postmaster of Oakville.

Two cars of members of Eastern Star, Streetsville,attended the Installation of officers of Orchid Chapter Brampton, Tuesday night. The new W. Matron is Mrs. Watts and the W Patron, R. Campkin. About 200 were present. It was a most enjoyable affair

Owen's Dry Goods Store, Streetsville, is putting on a Big Clearance Sale this week end, May 27, 28 and 29—Thursday, Friday and Saturday with bargains galore, including suits shirts, sox, hose, yarn, slips, aprons, caps, ties, blouses, boots, braces combs,etc. Be sure to visit our store to get your share while the sizes are complete.

We are informed that some person with very little sense, and bent on mischief, has been pulling the flowers at the Soldiers Memorial. It is too bad that we have that class of people in the community, but we have had them for some time and may always expect they will be with us. If the Chief of Police catches anybody pulling flowers out of that plot they will be made an example of.

Peel County Women's Institute held their annual convention at Brampton on Tuesday. A motion was passed condemning the placing of a broadcasting station in this district. Among those present from Streetsville were, Miss M. Graydon Mistresses G. Bunt, D.McCaugherty and A.B.Bruce.

The Horticultural Society has gone to considerable trouble and expense to make a flower garden in front of the old cemetery beside the Presbyterian Church and has it in nice condition. We hope people will show respect to the Society for what they are trying to do and warn children to not touch the flowers or plants. Owners of dogs are also reminded that these animals must be kept tied up,

Play Coming

Under the auspices of Eden W.A the Garrick Players of Norval Pres Young People's will present their play "The Bells of Shannon" in the Oddfellows Hall, Streetsville, Thurs day evening, May 27th, at 8.30 D.S. T. Rev. Norman McMillan, coach. Miss Ruth Giffen, of Georgetown soloist. Mr. Jim Steen, Streetsville violinist,will assist with the program

Port Credit

Credit Valley Lions Club, Port Credit, Tuesday night elected the following officers— President, J W Crashley ; Directors, Col. Hon. T L Kennedy, Dixie; Dr. G. H. Watson Lakeview; and Rev. K. R. Berkley Port Credit. The new organization draws its members from Lakeview, Clarkson, Dixie, Erindale, Port Credit and Cooksville.

Women's Institute

The May meeting of the Institute was held in the Club room May 20 with the president Miss M. Graydon presiding and Mrs. Bunt hostess. Mrs. Maskie was appointed convener of Canadian Industries. Delegates to the convention at Brampton May 25th were appointed and it was decided to have a speaker from the Department at our June meeting also to plant a Coronation tree in the hospital grounds at Brampton. Mrs Lundy spoke on Home and Country and emphasized that if our homes are what they ought to be, our country would be alright. Miss E. Stephens, one of our Juniors,gave a paper on "Patriotism and Flags," which was greatly appreciated.

During our social hour lunch was served by Mrs. Andrews, Mrs. Maski and Mrs. Barton

"Gone With the Winds"

The following is the opinion of one of the Toronto University Staff :

"This book is supposed to be a fairly good and quite interesting account of the period of the American Civil War, and after.

The bits to which some people might take exception on moral grounds are handled with restraint and care, and are pretty true to life at that time. Practically any real literature has such realistic bits and considering the size of this book and the interest which it has created, it has less of such "purple spots" than most. It is as well written as the average popular fiction and to ban it on moral grounds would be silly. That is my opinion. It is the most popular book at present in Toronto Public Library, and they have forty copies at present on their shelves."

but... what does she say?

No matter what "it" may be — the price of eggs, that other recipe for shortbread — are you sure your not-very-frequent visits with the neighbours give your wife real ample opportunity to "talk it all over"? Wouldn't a *telephone* suit her far better? A telephone never lets you get lonely. Maybe good roads and automobiles have brought us all closer together . . . but not within *a moment's speaking-distance*. That's the telephone's job!

NEW LOW RATES
for farm telephone service are now in effect!

SUNDAY SCHOOL LESSON

LESSON IX—May 30.
THE REMAKING OF JACOB
(Genesis 28: 1—33: 20.)
Printed Text—Genesis 28: 16-22; 32: 24—33.
Golden Text—Be not fashioned according to this world: but be ye transformed by the renewing of your mind. Romans 12: 2.

The Lesson In Its Setting.

Time.—God's appearance to Jacob at Bethel occurred in B.C. 1784. Jacob was married in B.C. 1777. Joseph was born B.C. 1752. The reconciliation between Esau and Jacob took place in B.C. 1749.

Place—Bethel is located 12 miles north of Jerusalem on the road to Shechem. Haran is in Mesopotamia on the great trade route from Nineveh to Carchemish. Penuel was near the brook Jabbok which flowed into the Jordan River about 25 miles north of the Dead Sea.

"And Jacob was awaked out of his sleep, and he said, Surely Jehovah is in this place; and I knew it not. And he was afraid, and said, How dreadful is this place! this is none other than the House of God, and this is the gate of Heaven." (See Job 33: 15—18.)—Bethel was become a place where Jehovah is, where the House of God is found, where the nature of Heaven is discovered. It is most significant, and may I not say interesting, that when this great phrase, "the House of God," first appears in the Scriptures of truth, it has no reference to a temple, or synagogue, no reference to a building. The House of God. Where is it? Just where you are.

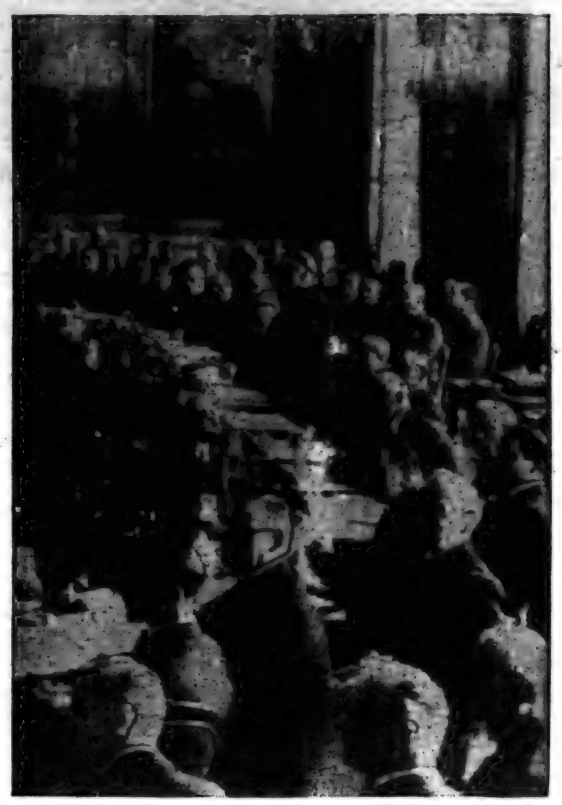
"And Jacob rose up early in the morning, and took the stone that he had put under his head, and set it up for a pillar, and poured oil upon the top of it. "—Often in the night we make great resolutions, we pray earnestly and find our hearts moved anew with the love of God. We are stirred to new endeavors by the reading of the Bible, and we promise God and ourselves that the next day will be a new beginning for us. But so often when the morning light breaks and a new day has begun, and all the common, familiar things of the world are seen again, there is a danger that the hopes and vows of the night will be put away, and the day after will be no different from the day before.

"And he called the name of that place Beth-el: but the name of the city was Luz at the first."—The word Bethel is formed of two Hebrew words, Beth, which means house, and El, which is the name for God found thousands of times in the Bible in the name Elohim. Therefore this name means "the House of God," just as the name Bethlehem means "the House of Bread."

"And Jacob vowed a vow, saying, If God will be with me, and will keep me in this way that I go, and will give me bread to eat, and raiment to put on, so that I come again to my father's house in peace, and Jehovah will be my God. Then this stone, which I have set up for a pillar, shall be God's house: and of all that thou shalt give me I will surely give the tenth unto thee."—Jacob's promise to later erect an altar here for the worship of God was subsequently kept (35: 1, 15). This is the only time in the book of Genesis that we have any reference to the giving of one-tenth of one's possessions to the Lord, but, as Dr. F. B. Meyer has said: "There is no reason to doubt that this became the principle of Jacob's life, and if so, he shames the majority of Christian people, most of whom do not give on principle, and give a very uncertain and meagre percentage of their income.

"And Jacob was left alone; and there wrestled a man with him until the breaking of the day. And when he saw that he prevailed not against him, he touched the hollow of his thigh; and the hollow of Jacob's thigh was strained, as he wrestled with him."—God saw that what Jacob needed was first to discover his own weakness, and that, in order that he might discover as he never had done before, the power of God in whom he believed. On the threshold of possession of the land, he must be brought to that attitude of soul in which he would be willing to receive the possession as the gift of God; rather than imagine that he had gained it by his own cleverness and his own wisdom. It is not said that Jacob wrestled with the man, but that the man wrestled with Jacob; there is no question that Jacob wrestled to, but the beginning of the struggle was on the side of God.

"And he said, Let me go, for the day breaketh. And he said, I will not let thee go, except thou bless me."—Undoubtedly Jacob knew that he was not only facing a great crisis of his life, but that his own stubborn will that night would be broken, and that it was God himself with whom he was dealing, and he knew that this was the hour when he must either receive a new blessing from God or live as a failure the rest of his days. The desire to retain God binds God to us. All God's struggling with us has been aimed at invoking it, and all God's fullness responds to it. Prayer is power. It conquers God. We overcome God when we yield to God. When we are vanquished, we are victors. (See a rich comment on this struggle in Hosea 12. 4).



"And he said unto him, What is thy name? And he said, Jacob. And he said, Thy name shall be called no more Jacob, but Israel: for thou hast striven with God and with men, and hast prevailed."—The name "Jacob", supplanter," while the name "Israel" comes from a root meaning "to be chief;" hence the name means as we have seen before, means "a "prince," and, with the termination "el," the word means "prince of God." It was a prophecy of the new type of victory over men which he would win because God had won a victory over him. If a man will prevail with God, he will do so in the hour in which he is mastered by God.

"And Jacob asked him, and said, Tell me, I pray thee, thy name. And he said, Wherefore is it that thou dost ask after my name? And he blessed him there. And Jacob called the name of the place Peniel: for, said he, I have seen God face to face, and my life is preserved."— The word Penuel (Peniel) means "the face of God," and must have been close to the Jabbok River, though there is no place near there bearing this name today. (See Ex. 33: 20,; Deut. 4: 33; Judges, 6: 22, 23). Fellowship with God changes Jacob to Israels. Fellowship with God gives insight and foresight, peace and patience, calm and courage in every emergency. Fellowship with God dispenses with subterfuges, natural craft, and clever resourcefulness. Not by unworthy expedients, not b, moral human acts, not by natural energy, but in union and communion with God, all grace and blessing becomes ours. We must see the face of God.

Our solar system contains about 50,000 particles large enough to be called planets.

Because it protects the stonework from corrosion by acids in the air, limewash is used extensively on London buildings.

As Baldwin Opened Imperial Conference

This radiophoto, transmitted from London, shows Premier Stanley Baldwin (centre), as he opened the British Imperial Conference May 14th. "We deplore the necessity, but we have no choice," Baldwin said, in commenting on the unprecedented armament building program being carried out by the Empire.

Bridget Wrote To Pat

An Irish soldier in France during the 1914-18 war received a letter from his wife saying there wasn't an able-bodied man left, and she was going to dig the garden herself.

Pat wrote at the beginning of his next letter: "Bridget, please don't dig the garden; that's where the guns are."

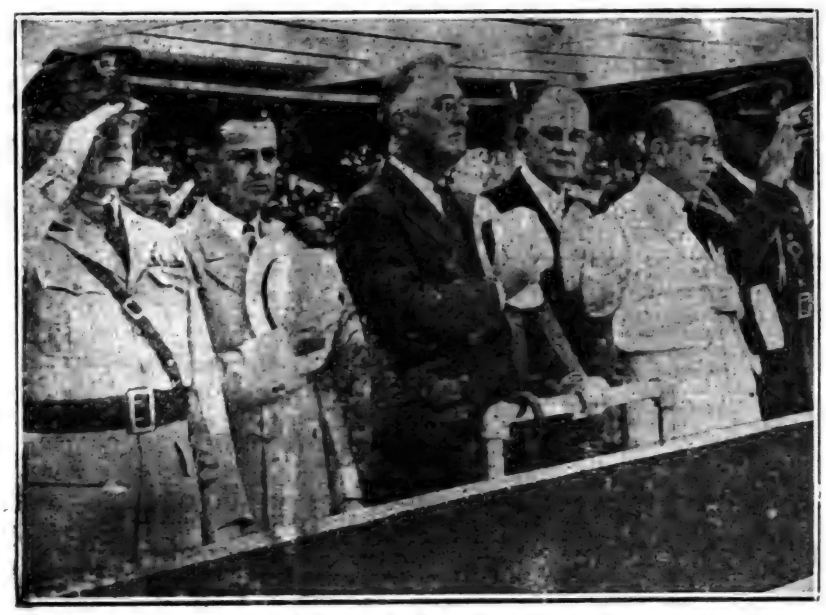
The letter was duly censored, and in a short time a lorry-load of men in khaki arrived at Pat's house and proceeded to dig the garden from end to end.

Bridget wrote to Pat in desperation, saying that she didn't know what to do as the soldiers had got the garden dug up, every bit of it.

Pat's reply was short and to the point: "Put in the spuds."

ENERGY IN PLAYING PIANO

The amount of energy expended by a person while playing the piano varies greatly with different compositions. A study of the subject shows that the per-minute energy required to play "Tarentella" by Liszt, is 150 per cent more than that required to play "Songs Without words," by Mendelssohn.



Monsoons blow from land toward th sea, in winter and from the sea toward the land in summer.

Service For Three

Sabu, Indian boy who appeared in a British film, acts as waiter for a chimpanzee luncheon party at opening of Pet's Corner in the London Zoo. The service is a little awkward, but, after all, it is the food that counts.

Reviews Students

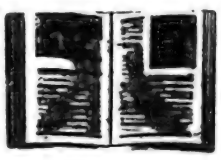
President Roosevelt watches review of R. O. T. C. unit at Texas Agricultural and Mechanical College, which he visited on way home from fishing trip. L-R: General H. J. Brees, Governor James V. Allred, the President, Dr. Thomas Otto Walton, president of the college, and Dr. F. M. Law.

Farm Problems

Conducted by
PROFESSOR HENRY C. BELL
with the co-operation of the various departments of Ontario Agricultural College

1. Question:—"I am preparing a field for potatoes. It is pretty heavy clay and I want to use some fertilizer. What would be the best way of getting fertilizer on the potatoes, and what kind of fertilizer do you think would give the best crop?—M. J. P., Wellington Co.

Answer:—If you are planting your potatoes with a plow, strike out the furrow, then draw in 1½" to 1" of soil on top or mixing it with the fertilizer, then drop the potatoes and cover them with the plow or by hand.



If you are planting them with a hoe, dig the potato holes, drop a little fertilizer, pull in ½" to 1" of soil, drop the potato pieces and proceed as usual.

We have obtained best results from 4-8-10 fertilizer applied at 750 lbs. per acre. If this fertilizer is sown broadcast on the soil and worked in, you will not get as good results as if applied the way we have described. Broadcasting results in a large amount of the fertilizer being fixed in insoluble form so the immediate crop does not get the full benefit of it.

I note that your soil is a heavy clay which is not well adapted for potato growing. I would, therefore, change the fertilizer recommendations to 2-12-6 instead of 4-8-10. We have found the latter fertilizer to do best on clay soils.

2. Question:—"We would be glad if you could send us results of your experiments of commercial fertilizers with the ground limestone as a filler. Any results of the limestone and barnyard manure seems to be better than with the commercial fertilizers. Would be glad if you could give us the right amount of the different chemicals to use to, say a ton, of the finely ground limestone."—C. A. M., Grey Co.

Answer:—Regarding lime as a filler, quite a little bit has been said about this with limited justification. Of course, any free lime that there is in a fertiliser will function just as any other lime applied to the soil, but in the higher brands of fertilizer there is room for so little filler that the good it would do would be very, very small. Understand, I am not decrying the use of lime. You understand lime is a soil corrector, not a fertilizer. Conversely, fertilizers are carriers of plantfood and do not function as soil correctors. Hence, if your soil is acid and needs lime, by all means apply lime. Fertilizer will function best for most of our valuable crops if the soil is about neutral in reaction. Recent investigations show that a very heavy application of lime which will make the soil distinctly alkaline, tends to tie up in an insoluble form, any phosphorus applied in fertiliser or alone. Do not mix lime with fertilizers, but apply it at least one week or ten days ahead of fertiliser, working it into the soil broadcast.

The Book Shelf

BY MAIR M. MORGAN

BUCKSKIN BREECHES
By Phil Strong

(Farrar and Rinehart, Toronto)

This is Mr. Strong's first long novel and his first historical theme. It ranks with the great historical romances of America, this tale of Jesse Ellison, his wife Margaret, and their four children.

Jesse Ellison had fought in the murderous forest battles of 1812. Lithe as a panther, his aim with rifle or knife was deadly. When he married a belle of Cincinnati he did not tame easily. He took his gentle bride to the pioneer country of Western Ohio. But in 1837, Merkumville was no longer pioneer country. The Ellison tavern prospered, but Jesse saw his children degenerating and he feared he was losing the love of his wife. He decides to go on and escape the intrusion of civilization — to give his family the freshness and innocence of a new land. They find it, and at the same time, adventure, love, drama of settlement and struggle for existence.

This novel is alive — you are transported into the atmosphere of growing, uncouth, honest America.

"ABOUT THE MURDER OF A MAN AFRAID OF WOMEN"
By Anthony Abbott

(Farrar and Rinehart, Toronto)

A Thatcher Colt detective-mystery. Sauve and debonair as ever, Thatcher Colt, Police Commissioner of New York City, faces the most subtle and intricate problem of his career.

The body of Peter Slade, dead from two bullets, is found hanging out the front window of his Greenwich Village apartment Many women loved Peter, and his acquaintances came from all walks of life. His lovely secretary ,Carol Burgess, his protegee, Eleanor Foxhall, the Broadway star, Norma Sutton ,all had something to conceal and all gave clues to the strange happening on that cold winter night when murder stalked.

The style is breezy, racy and humorous. One of the "must" detective yarns.

"THE HEART HAS WINGS"
By Faith Baldwin

(Farrar and Rinehart, Toronto)

Because of her life-long devotion to a father, an aviator, who saw duty in France, Gail develops a neat father complex, with the result that she falls in love with Peter Harris, a married man, the father of her school chum.

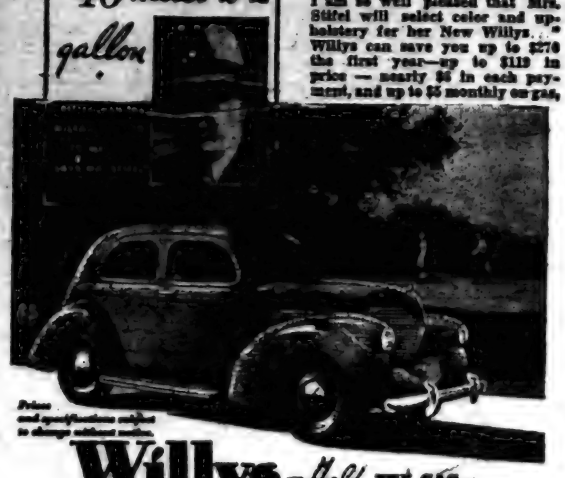
Bill Smith, a young inventor, blithely ignores his rival, until events assume a serious aspect — then he disappears ,disappointed and bitter.

This is a more profound study of a girl's heart than Miss Baldwin's previous novel.

How Gail tames her wayward heart and eventually finds happiness, makes engrossing reading, and you will be curious until the very end, how these people untangle the web of emotions that suddenly enmesh them all.

Movie-radio gossip

By DOROTHY



Marion Claire, who for the past two years has been trouping around the country with "The Great Waltz," has been signed to play Bobby Breen's mother in "Make a Wish." Schulberg has signed Lenore Urlic, who was so good as the vicious grafting friend of "Camille," to play in "The Great Gambini." A girl in her 'teens named Wyn Cahoon who has had considerable success on the New York stage has been signed by Columbia, who have also nailed the veteran Dick Arlen down to a contract to keep him from gallivanting off to England again.

For those audiences that like chills and fever, horror and suspense, blood and thunder, there are two new pictures just made to order. "The Soldier and the Lady," and RKO picture which is really that old classic of spine chillers, "Michael Strogoff," is the more spectacular since it introduces army scenes made in Europe. More intimate, but less blood-curdling, is "Love From a Stranger," which stars Ann Harding and Basil Rathbone. It is a story of a mild young woman who wins a sweepstake prize and marries a fiend who has dispatched several wives via morbidly-contrived murder.

Odds and Ends:—Bing Crosby has been kidded so much about his tennis in an effort reduce. Incidentally, did you hear his old friend Harry Barris on his program? And wouldn't you love to see him in a picture with Bing? . . . Basil Rathbone, as I kept reminding myself all through his horrifying antics in "Love From a Stranger," keeps 86 kinds of tea on hand at his house so as to have just the flavor he wants of an afternoon . . . All Hollywood swooped down on the Selznick-International studios to watch the Coronation scenes in "The Prisoner of Zenda." And then Madeline Carroll broke up the scene by whispering to Ronald Colman just as the hundreds of extras in the procession got under way, "Don't look now, but I think we are being followed."

"Closer to 40 miles to a gallon"

"I have at last found a car giving better than the mileage stated to me at the time I purchased my new Willys. It is not 30 miles to a gallon, but closer to 40 and I am so well pleased that Mrs. Stiftel will select color and upholstery for her New Willys." Willys can save you up to $270 the first year—up to $113 in price — nearly $6 in each payment, and up to $5 monthly on gas.

Prices and specifications subject to change without notice.

HAVE YOU HEARD

Ha! — "Isn't Maybelle's evening gown a perfect song?"

Sue—"Yes, sweet and low!"

But if cod liver oil builds up the brain, why is the cod fish sucker enough to take the hook.

Did anyone ever find any meat on "the bone of contention"?

Officer—"What's up?"

Man—"My hands. I was just robbed."

A desirable neighborhood is a place where the rents are too high.

New Typist (following rapid-fire dictation)—"Now, Mr. Jones, what did you say between 'Dear Sir' and 'Sincerely yours'?"

If you don't think some old sidewalk crusher is wide-awake, just watch him when a pretty girl goes by.

Read It Or Not—Sealing wax contains no vax.

The parson of a small church was visiting one of his flock, and admiring the vegetable garden.

Parson—"Nice bunch of carrots you have there, John. You must thank the Lord for that."

John—"Yes, parson."

Parson — "Very good beets, too. Thank the Lord for those, too."

John—"Yes, parson."

Parson—"Indeed, a very nice garden all the way around, John. You must thank the good Lord for that."

John (silent for a moment, then shyly)—"Did you ever see this piece of ground when the Lord had it all to himself?"

This thing we know as wisdom is in reality only common sense in an uncommon degree."

Mrs. Newlywed — "John, I don't like your stenographer!"

Mr. Newlywed—"Now, dear, you have no cause for jealousy, whatever! Why, that girl refused me four times before I ever met you.

Fable:—Once a married man tried to win a sweetie, and he didn't tell her he was lonely and misunderstood."

Clara's New Beau—"Tell me, Bobby, do you ever peep through the hole when your sister and I are sitting in there alone?"

Bobby—"Sometimes, if mother or sister ain't peeping."

No man can go completely to the devil without exercising a good deal of determination.

A big buck Indian had just ordered a ham sandwich at a drug store counter and was peering between the slices of bread when he turned and said to the waiter:

Indian — "Ugh, you slice 'em ham?"

Waiter—"Yes, I sliced the ham."

Indian — "Ugh! You near miss 'em."

It is good to contemplate at times what we have accomplished. But we must not expect our yesterdays to carry us to the end of our days. Life means eternal striving. Raise your hat to the past if you wish, but take off your coat to the future.

Boss—"Yes, I want an office boy. Do you smoke?"

Boy—"No, thank you, sir, but I don't mind having an ice cream cone."

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Brightening Scene For College Men

Thousands Needed in New Trans Canada Air Service Says Howe

HALIFAX, — The graduating class of Dalhousie University received their degress last week and contemplated the bright picture painted at an Alumni banquet here by Transport Minister C. D. Howe.

Graduates of 1937 have as many opportunities of falling into their allotted spheres in the life of the country as graduates 20 or 30 years ago, the Transport Minister said, reviewing work of his department as he returned to the University where he once taught engineering.

Thousands of young college graduates were needed for the proposed Trans-Canada and Trans-Atlantic Air Services, as pilots and mechanics, and in the affiliated radio and meteorological branches, he said. A service between Montreal and Vancouver was expected to be inaugurated before the summer was over, he said

The new air service would require at least 500 meteorological stations all throughout the country to report on weather conditions on land and in the air; radio beacons carrying a beam from coast to coast; emergency landing fields not more than 60 to 100 miles apart. He said college men were required in all these branches.

Rules For Good Health

LONDON—Speaking at a Guildhall banquet, Lord Horder, noted physician, said essentials for health were, enough of the right food, proper shelter, fresh air, an occupation, some leisure and rooms to play.

Nailed to the Colours — An Austrian school teacher has been sentenced to two months' imprisonment for maltreating children. In order to bring them up in a "heroic spirit" he ordered them to swallow iron nails. The most heroic boy swallowed 12.

FREE CREAM SEPARATORS

Be one of the three lucky farmers to get a brand new 1937 streamlined stainless ANKER-HOLTH separator FREE; send postal for Entry Blank and "How to cut separating costs in Half"; nothing to pay simply express your opinion. Address ANKER HOLTH, Room 1-3, Sarnia, Ont.

Marriage – Career Cannot Be Mixed

Society Beauty Outlines Reasons Why One or the Other Must Suffer—Full-Time Job

NEW YORK. — Azadia Newman tried mixing marriage and a career. It didn't work, and now she feels she knows the real answer to the ages-old feminine controversy—the woman who insists that she's mixing marriage and a career successfully is simply kidding herself and really she's just a dabbler at one or the other.

"Women who are married, and in love, most often dabble in their profession," asserts the pretty portrait painter, who has been called the "greatest woman painter of the day." "It seems a physical impossibility for a wife to reconcile her marital duties and those of her career. One or the other suffers, whether outsiders are aware of it or not."

Attractively titian and curly-headed, Miss Newman explained that her own marriage was most happy up until the time she became absorbed in art. Then she found she was too tired after a day's work to go out or be a charming hostess: and often she had to go out of town to paint a portrait just when her husband wanted to go on a cruise or a trip to Europe.

"Besides," Miss Newman continued, "I discovered that husbands themselves originated that old saying that a woman's place being in the home. A man wants his wife's interests to be centered entirely around him. He dislikes feeling that she finds work as interesting as looking after his needs, planning his meals, caring for his children He believes marriage is a full-time career in itself. And it is. No woman can be a wife, in every sense the terms implies, and have a successful career, especially if she does creative work.

'nterest Stimulated

Still in her twenties, the titian-haired, blue-eyed Azadia Newman is the daughter of one of Washington's oldest society families. In 1932 she was married to William F. A. Herrman, and for four years she lived the happy, gay, social life of a wealthy young matron, whirling along on a tide of parties and trips with her husband, studying painting on the side.

The death of Azadia's mother, who always had been in favour of an artistic career for her young daughter, caused the girl to take her painting more seriously. When she pronounced her intention of having a career, she shocked all who knew her, most of all her family, which has been wealthy for ten generations. However, Miss Newman was to prove herself to be not only an exception, but an eminently successful one. In 1935 she had an exhibit at the Corcoran Art Gallery, and the critics gave it loud praise. The same year, she had a one-man show in St. Louis.

"During that period I was striving to keep my marriage going. But it was difficult. Often I worked so late at the studio that my maid had to bring evening clothes to me there, in order that I might dress and meet my husband for social functions.

"I was on the verge of a nervous breakdown, making flying trips on business out of town and attempting to keep up my social obligations in Washington. This brings us to another reason why marriage and a successful career never can be reconciled. There must, in a career, be certain independence in time. One must feel free to move about and uproot oneself at a moment's notice.

"So, as soon as I realized conclusively that I could not eat my cake and have it, I had to make a choice—for the sake of both of us, I induced my husband to divorce me."

The difference in the sides on which eclipses of the sun and moon begin is caused by the fact that the sun's movement in the ecliptic is only apparent, since it is the earth which moves, while the moon's movement is real.

"The Antarctic is land, and land, wherever it is, is valuable."—Lincoln Ellsworth.

"Nerves Went to Pieces"

WOMEN who suffer periodically, who may have sideache or headache, and those about to become mothers, will find Dr. Pierce's Favorite Prescription a dependable tonic. Read what Mrs. D. Kelly of Mount Vernon, Ont., said: "Following motherhood I was too weak to be up, my nerves went to pieces, but I began to pick up almost from the first bottle of Dr. Pierce's Favorite Prescription so I continued its use and I gained in every way. I could eat more, my nerves were calm, I became stronger and was in excellent health." Sold by druggists. Buy now. New size, tablets 50 cts., liquid $1.00. Large size, tabs. or liquid, $1.35.

Repeats Daring Hop

Glenn Martin, aircraft manufacturer and one of the first flyers, leaves a China Clipper at Santa Catalina Island, Cal., after piloting it from the mainland on 25th anniversary of his first flight over same route.

Complaining Is An Adult Fault

Children Are The Most Philosophical People on Earth

Children don't care whether it rains or snows, blows or shines, they are the most philosophical people on the earth.

They get ear-aches, and stomach-aches, yet when it's all over they do not talk about it for days the way we do. Listen to ladies at bridge explaining all about their special headaches, or men in offices recommending nostrums to each other for acid systems.

Suppose the meat money runs out and we have to buy tough cuts until next pay day. We grouch and act like babies over the lost tenderloin, but Johnny picks up his fork and sails right in. He eats it and likes it.

Mother says, "My poor darling, you have to wear that same old sweater for another month."

And son says, "What's wrong with this sweater? I've always worn it, haven't I?"

Oh, babies, babies, what great things you could teach us if we would only listen, and listen well!

Fewer Cheese Makers

Forty-eight fewer certificates were issued to Ontario cheesemakers by the dairy branch last year than in 1935. There was a slight decrease in the number of factories, but that does not begin to account for the falling off in certificates, which is most noticeable in the category of first-class certificates. These were down from 523 to 486. Some of these makers evidently dropped into second class, the total for which was up to 161 from 154. That, it is said, would be due to the abnormally hot weather last summer, with consequent difficulty in turning out a first-class product. To get a first-class certificate, a maker must have not less than 95 per cent. first grade cheese, and a score of not less than 95 points for workmanship.—Woodstock Sentinel-Review.

Budgeting Time Most Important

Some Women Pay Too Little Attention to Personal Groomings

"The majority of modern women who live alone (whether they like their isolated status or not), seem to pay too much attention to personal grooming or else far too little," say an artist (male, you can be sure). "Why can't these girls who have more free time than women with husbands and children learn to budget it sensibly?"

By way of explanation, my irate informant pointed out that he certainly would hate to be forced to have a second date with any woman who spends so much time doing her face and nails, taking baths, pressing clothes and washing her hair that she never can manage to read the daily paper, and read it daily, learn a few new facts now and then, find something interesting to talk about. Also that he would detest just as much the idea of having to date more than once an unkempt, untidy, positively dowdy girl, regardles of her brains or personal charm.

The artist—the majority of men, in fact—want us to be clean and neat, dresed in good taste, of course. But they have no patience with a woman who makes a fetish of and overdoes the business of beauty.

If your home and time are your own once you have finished a day's work, do figure out a way to keep hair clean and shining, nails perfectly manicured, clothes spic and span and skin smooth and still have time to read and enjoy our leisure.

And don't discuss your beauty routines with men. They want us to look alluringly lovely, but they do not want to know how we accomplished the feat or the lurid details of what would happen if we did not use certain preparations a certain way.

Cattle Exports in U.S.-Canada Trade

New Record Set During 1936 — 191,000 Head Exported

The Canadian cattle trade in 1936 with the Chicago, Buffalo, St. Paul, and other markets in the United States established a new record for recent years in volume and value, states the Seventeenth Annual Market Review, 1936, just issued by the Dominion Department of Agriculture. Altogether, more than 191,000 head, valued at about $8,679,000, of which 136,533 head came under the reduced tariff, moved to the United States, as compared with 102,934 head, valued at about $5,935,300, in 1935.

The reduction in tariff from 3 cents per pound to 2 cents per pound on cattle weighing 700 pounds or over for beef purposes, and from 3 cents to 1½ cents on similar weights on dairy cattle, greatly stimulated the movement, in spite of the lower prices ruling in the United States as compared with 1935. Of the quota for cattle of 700 pounds or more, amounting to 155,700 head, Canada had about 85.5 per cent. and Mexico 13.5 per cent., which for Canada represented about her average percentage of United States importations over a number of years.

Of the quota of 20,000 head for dairy cattle, all from Canada, the Dominion filled less than 30 per cent. This indicates the relative conditions of the markets in the two countries for dairy cows in 1936. United States statistics give the calf imports from Canada as 55,695 head. The quota of 51,993 head, limited to calves not weighing over 175 lbs., was filled by August 8, 1936.

With regard to the present year, almost twice as many cattle and calves were exported from Canada during the first two months as during the corresponding period of 1936 and since then the exports have continued substantially higher.

Pays $42.79 Tax In Bulky Coppers

KITCHENER.—With only a margin of one day to get his taxes paid before the penalty of one per cent. goes into effect a local house owner came into the tax collection dpartmnt with a six-quart basket filled with coppers. There were 4,269 of them to pay his first instalment totaling $42.79. The man's name was withheld by the collectors. Fortunately they were wrapped in regulation bank rolls which made counting less difficult.

Issue No. 22—'37

It Is true what they say about OGDEN'S

You bet—it's true! Ogden's Fine Cut is always sweet and cool and easy to roll. And once you try Ogden's you'll know why roll-your-owners vote it the spotlight attraction. "You will like—you will love" the cigarettes you roll with Ogden's and "Chanticler" or "Vogue" papers. There's a bigger package of Ogden's now for 15c.

P.S.—Your Pipe Knows Ogden's Cut Plug

OGDEN'S FINE CUT

Meanest Cruelty

If we had not the word of the S.P.C.A. for it we should find it impossible to believe that so many Montrealers could be guilty of the most arrant cruelty to what they would probably call their pets comments the Montreal Star. This year, Mr. Innis reports that his organization has picked up more than five hundred stray dogs and cats deserted when their owners moved to new quarters. In some cases these wretched beasts have actually been left locked up in the abandoned dwellings, certain, unless new tenants move in at once or someone heard their cries, to suffer the utmost miseries of hunger and thrist. How many of these poor creatures the S.P.C.A. has not yet found, and may never find, nobody knows; probably a lot of them.

Most people will find it impossible to understand how any normal person can be guilty of this sort of thing, particularly as there is such a simple and practically costless method of getting rid of an animal which it may be impossible to provide for under altered conditions, or of which the owner may have quite simply grown tired. To condemn a creature which has been sheltered and fed to the wretchedness of lonliness, hunger, thirst, heat and cold that the stray dog or cat in a big city must undergo until a merciful death releases it, is a refinement of downright cruelty that cannot be explained as mere thoughtlessness.

To See If Cow Birds Have Homing Instinct

EDMONTON—If cow birds have a homing instinct, 24 dark-feathered immigrants are winging their way from Edmonton on a 2,000-mile flight to Waukegan, Ill.

W. J. Lyon, president of the Inland Bird Banding Association at Waukegan, believes cow birds, like homing pigeons, have a homing instinct and could be used for carrying messages. To test this theory he shipped 24 of the birds here in cages and they were released by Dr. J. E. Horning, Edmonton bird bander.

The take-off didn't prove anything. Some apparently started on their way south; others set out in the general direction of the North Pole; and the remainder flew towards the Pacific coast. The doctor said, however, the birds might have not obtained their bearings until out of sight.

RADIO DIRECTS CANADA'S FASTEST PLANE

THE fastest airplane in Canada became the property of the Dominion Government this month as officials of the Civil Aviation Branch of the Department of Transportation accepted the swift silvery Lockheed 12-A from Fairchild Limited. This ship is shown at St. Hubert Airport, Montreal, where it will undergo exhaustive tests before flying to its home base at Ottawa to become the first of the Trans-Canada passenger service.

Propelled by twin 420 horsepower constant speed motors, the adjustable pitch propellers drive this silver streak at a top speed of 245 miles an hour and a cruising speed of 212 miles an hour at 11,000 feet. Every modern improvement for comfort and safety, including the latest Northern Electric Radio Beacon and two-way communication equipment have been built into this ultra-modern aerial argosy which will be recognizable by its letters "CF-CCT", and is similar to that which guided and kept Dick Merrill in touch with land during his latest triumphant dash across the Atlantic with historic news films.

In the lower photo, left to right, are officials present at the handing over ceremonies. They are: Squadron Leader A. Ferrier, of the Department of Transport; H. Pasmore, president of Fairchild Aircraft; Major Tudhope and Alec Snyder who flew the machine here, and S. Chiswell, of the Airways Branch of the Department of Transport.

TORONTO TOWNSHIP COUNCIL

Cooksville, May 3, 1937.

Minutes of the regular meeting of Council held on Monday, May 3, 1937.

Members of Council all present, Reeve E. D. Maguire presiding, the meeting opened at 9 a.m.

The minutes of the last regular and special meeting were read and on motion were adopted as read.

The following persons appeared before Council: Mr. Wright and a deputation re relief; Mrs. Parsons, Miss Ruse and a deputation re a grant to the St. Elizabethan Order of Nurses; Mr. Phelps and a deputation re the installation of a water main on Ogden Ave.

The following correspondence was received and presented to Council for consideration: Bell Telephone Co., re pole line; M. J. Rogers, re water course; J. L. Law, re piano from Cooksville Club; A. E. Redsell, re water course; H. G. Page, re water course; Robert M. Bruce re water course; J. E. Dickert re road sign; Messrs. Gore, Nasmith & Storrie re water main on Mississauga Road; P. Karmel re water main on Parker Crescent; amusement tax branch re township hall; Department of Highways re 1936 road expenditure; municipality of Port Credit re coronation; Township School Boards re coronation medals; A. E. Jupp Construction Co. re tender on road oiling; Municipal Spraying re tender on road oiling; A. Bachinskie re purchase of township lots; secretary Malton Police Village re accounts; F. Lynette re Burial accounts; trustee board of S.S. No. 8 re advance of school monies; Globe Indemnity Co. re renewal of W. A. Maxwell bond; Joseph Burton re sheep killed by dogs; Fred J. Notley re hogs killed by dogs; A. Viney, valuator, re above claims; Workmen's Compensation Board re 1936 assessment; F. Scrafield re resignation as building inspector; D. Wilson, county clerk, re high school rates and county levy; F. W. Denny re Lorne Park Road; Department of Highways re 1936 road expenditure; Department of Highways, re Middle Road entrance to Catholic Cemetery; G. B. Jackson re report on high school taxation; L. Magness re coronation celebration; H. L. Cumings re high school taxation; E. Veryan re change in building by-laws; Department of Highways re 1937 road expenditure; Mrs. Elsie Moore re garbage dump; A. E. Wilson & Co. re public liability insurance policy; A. Dennison re purchase of tile.

The following by-laws were read a first, second and third time and finally passed, signed by the reeve and clerk, and the corporate seal attached thereto: By-law No. 1218, being a by-law to provide for the collection of taxes; by-law No. 1219, being a by-law to strike the rates for 1937; By-law No. 1220, being a by-law to lay a water main in Toronto Township.

The following resolutions were presented to Council for consideration:

H. J. Hazard and T. H. Graham—That the clerk be instructed to take the steps provided for by the Municipal Act. Chapter 233, Section 486, R.S.O. 1927, to close the first 40 feet of road on the map of the village of Erindale. Carried.

H. J. Hazard and P. E. Syme—And resolved that the contract for road oiling on township roads for 1937 be and is hereby awarded to the Municipal Spraying and Oiling Co. as per their tender of April 29, 1937. Carried.

P. E. Syme and H. J. Hazard—That the Township Solicitor be instructed to prepare an agreement between Mr. Charles Powell Bell and the Council with reference to the permission given to Mr. Bell to carry service pipes or water mains under the Trafalgar and Toronto Town Line, on conditions that Mr. Bell will if required agree to co-operate in establishing a water area and that the Reeve and Clerk be authorized to sign te said agreement. Carried.

T. A. Leslie and P. E. Syme—And resolved that in compliance with the request of Mr. J. E. Dickert re street signs, therefore be it resolved that Mr. Dickert be and is hereby given permission to erect a street sign on the Madigan Road at his own expense, said work to be approved of by the township road superintendent Carried.

P. E. Syme and T. H. Graham—That the Township Solicitor be instructed to prepare an extension agreement of the Clergy Reserve Mortgage on the property of Mon Gray for five years commencing Nov. 10th, 1935, on conditions that he pay $50.00 half yearly on principal, and that the Reeve and Clerk be authorized to sign the said agreement. Carried.

H. J. Hazard and T. A. Leslie—And resolved that the Township solicitor be and is hereby instructed to take immediate proceedings to protect the township's interest in the Clergy Reserve and Woods mortgage. Carried.

P. E. Syme and H. J. Hazard—And resolved that the Clerk be and is hereby instructed to notify the owner of Lot No. 45, Plan C. 19, to open up the water course running through his property, said water course having become blocked, thereby causing the water to block up on the township roadway. Carried.

P. E. Syme and T. H. Graham—And resolved that the Treasurer be and is hereby authorized to pay K. Wiszszuk the regular 10 per cent commission on sale of lots 101 and 102, plan K. 22, and that the offer of Andy Baclinlki under date of April 24 at $300 be and is hereby accepted. Carried.

T. A. Leslie and H. J. Hazard—And resolved that the Treasurer be and is hereby authorized to pay the St.-Elizabethan Order of Nurses the sum of $75.00, being township grant for 1937, this grant to be paid on Dec. 15th, 1937. Carried.

H. J. Hazard and T. H. Graham—And resolved that the Treasurer be and is hereby authorized to pay the following accounts: N. J. Alteman, coronation medals, $250; G. B. Jackson, drawing deeds, $11; Ontario Gazette, advt. tax sale 1937, $159.00. Carried.

P. E. Syme and T. H. Graham—And be it resolved that this Council go into committee to pass the several accounts of this day and pay sheets. Carried.

H. J. Hazard and P. E. Syme—And resolved that the Treasurer be and is hereby authorized to pay Bert Dennison the sum of $4.00 re police duty at Lakeview on April 6, 1937. Carried.

H. J. Hazard and P. E. Syme—And resolved that in compliance with the request of residents on the Mississauga Road for water, that the matter be referred to our Township Solicitor, this Council being willing to allow the residents to have the same installed providing they be responsible for the full cost of same, approval for installing the pipe line on the Mississauga Road to be obtained from the County Engineer. Carried.

T. A. Leslie and T. H. Graham—And resolved that the Treasurer be and is hereby authorized to pay the following accounts and charge same to the Police Village of Malton, said accounts having been certified by Wm. Sommerville, secretary-treasurer: Clifford Garbutt, Malton, tractor and man, six hours at $1.25, $7.50; Fred Moody, Malton, five hours at 30 cents, $1.50. Carried.

T. H. Graham and H. J. Hazard—And resolved that the treasurer be and is hereby authorized to pay G. F. Skinner the sum of $183.00 re funeral and hospital transportation, Dec. 17, 1936 to April, 1937. Carried.

H. J. Hazard and T. A. Leslie—And resolved that the Treasurer be and is hereby authorized to pay the following accounts: Dr. H. C. Sutton, 170 vaccinations at Lakeview Beach school, April 30, 1937, $5.00; Dr. Geo. Watson, 170 vaccinations at Lakeview Beach school, April 30th, 1937, $5.00; Dr. H. C. Sutton, re indigent cases, April 30, 1937, $7.50; F. Lynett, re burial indigent cases, March 27, 1937, $60.00. Carried.

H. J. Hazard and T. H. Graham—And resolved that the Treasurer be and is hereby authorized to advance the following monies to the school board of S.S. No. 8 as per their request of April 27, 1937: May, $300; June, $300; Sept., $300; Oct., $300; Nov. $300. Carried.

T. H. Graham and H. J. Hazard—And resolved that the Treasurer be and is hereby authorized to pay the Globe Indemnity Co. the sum of $75, being premium on W. A. Maxwell Bond No. 3927, due May 15, 1937. Carried.

T. H. Graham and T. A. Leslie—And resolved that the Treasurer be and is hereby authorized to pay the following re sheep claims: Fred J. Notley, April 7, 1937, four hogs killed, $55.00; Arthur Viney, valuator, $2.00; Joseph Burton, April 15, 1937, two sheep killed, $18.00; Arthur Viney, valuator, $2.00. Carried.

T. A. Leslie and P. E. Syme—And resolved that the Treasurer be and is hereby authorized to pay G. B. Jackson the sum of $5.00 re report on high school rates. Carried.

H. J. Hazard and P. E. Syme—And resolved that the Treasurer be and is hereby authorized to pay the Provincial Treasurer the sum of $10.80 re insulin supplied indigent persons in the municipality January 1, 1937 to March 31, 1937. Carried.

H. J. Hazard and P. E. Syme—And resolved that the Treasurer be and is hereby authorized to receive and place to the credit of the municipality the following moneys: W. G. Denison, R. & B. car, $922; Carburry Gravel, $100; Hydro debenture 1088, $2091.99; cheques returned, $7.00; A. Crooks, printing, $1.15; hall rent, St. John's club, $3.00; 1931 tax sale, $235; R. & B. wood sold, $18; R. & B. Burgess Gravel, $66.00; 1936 tax sale redemptions $313.51; water accounts receivable, $73.07; water installation, $58.20. Carried.

H. J. Hazard and P. E. Syme—And resolved that Mr. W. A. Paterson, pt. Lot 26, 2 S.D.S., be and is hereby allowed a credit of $26.48 re an error in assessment on buildings burned in 1929, he being assessed for $600 on said building in 1931. Carried.

T. A. Leslie and T. H. Graham—And resolved that the treasurer be and is hereby authorized to pay the Workmen's Compensation Board the sum of $13.51 re administration of part one of the said act for 1936, as per their letter of April 17, 1937. Carried.

T. A. Leslie and T. H. Graham, and resolved that the clerk be and is hereby instructed to obtain prices on printing 200 copies of the 1936 minutes of council. Carried.

P. E. Syme and T. H. Graham, and resolved that permission be and is hereby given the Bell Telephone Co. to extend their lines on Forest Road as requested in their letter of April 28, 1937, said work to be done to the approval of the Township Road Supt. Carried.

P. E. Syme and H. J. Hazard, that the Council will agree to assist Mr. Hassell in relieving him against water drainage trouble on his property, by lowering the ditch if necessary by a further two feet. Without prejudice to the present rights of the Council or and party concerned, Mr. Hassell to assume full responsibility for same, and to indemnify and save harmless the said Council against any matter arising therefrom. Carried.

On motion Council adjourned.

J. H. PINCHIN, Clerk.
E. D. MAGUIRE, Reeve.

HUMANITY

"Our humanity were a poor thing but for the divinity that stirs within us."—Bacon.

"Take away wealth, fame and social organizations which weigh not one jot in the balance of God, and we get clearer views of Principle. Break up cliques, level wealth with honest worth be judged according to wisdom, and we get better views of humanity."
—Mary Baker Eddy

Being reproached for giving to an unworthy person, Aristotle said, "I did not give it to the man but to humanity."

"A rational nature admits of nothing which is not serviceable to the rest of mankind."—Marcus Antonious.

"A man's nature runs either to herbs or weeds; therefore let him seasonably water the one and destroy the other."—Bacon.

Local News

Miss Annie England, of Islington, visited with Mr. and Mrs. W. A. Hardy last week.

J. K. Rayburn, Caledon, has a grade Shorthorn cow which gave birth to triplet calves on Coronation Day. Last year this cow had twin calves.

Miss Bertha Morris, of Cooksville, has gone to Fort William to visit her brother, Wilbert, and Mrs. Morris.

R. J. Pinkney, Cooksville, has graduated as a B.V.Sc. and has been awarded a C.A.V.C. scholarship.

The Men's Club of St. John the Baptist church, Dixie, will take a trip to Niagara on Monday, June 14th.

Georgetown's tax rate for 1937 is only 51 mills on the dollar.

Streetsville Oddfellows will join the Brampton Lodge in their annual church parade and decoration service next Sunday, June 6th.

J. S. Allen, former Mayor and clerk of Burlington, fell down an embankment at the bay and was drowned in three feet of water.

Georgetown will be the scene of the Ontario Provincial Firemen's Convention from July 30 to Aug. 2nd.

York, Peel and Halton Juniors will hold a picnic at Eden Mills on Saturday, June 5th.

The Milton Champion says that three deer were seen in the north end of Halton county last week. That's nothing, there are hundreds of dears seen in Peel County every day.

St. Peter's church, Hornby, will celebrate its centennial on Sunday, June 20th.

Peel's County Town is away behind the times. They allow dogs and bicycle riders to run at large. We saw one bicycle rider nearly knock the Chief of Police off the sidewalk one day last week.

The funeral of the late Thomas McGinty of Port Credit took place to St. James R.C. Cemetery at Colgan, Ont., last week.

General Sessions of Peel County Court will open at Brampton, Tuesday, June 8.

Mrs. H. Nelson and daughter, of Fort Erie, are visiting with Mrs. J. H. Saul.

Unable to fix responsibility for blame in the auto collision in which William J. Feller, Georgetown, was fatally injured on May 23, a Coroner's jury brought in a verdict of accidental death. A rider recommended that stop signs be erected at the intersection of the Seventh Line and No. 5 Sideroad, where the accident occurred. Dr. H. A. McCall conducted the inquest, with W. L. Dick appearing for the Crown.

The Open Column

We spent a real Sunday this week. Other Sabbaths, somehow, we found ourselves tearing about the countryside with a herd of other morons, filling our lungs with the stale fumes of gasoline, sawing frantically at the brakes when we caught up with a driver who wasn't going anywhere, and tramping madly on the accelerator when we got past him, tearing along the road to get nowwhere in particular at a certain time, so that we could turn about, and be home again before dark.

But last Sunday, somehow, there was no incentive to go anywhere. We pulled a couple of deck chairs out on the lawn, and just sat. The chairs didn't know us very well, not having been used much, but they were just as friendly and hospitable as if we had paid them the amount of attention they deserved. The wife put our child "Groucho" into the baby carriage, and pulled the carriage where we could jog it by slowly wiggling one finger.

The air flowed by like tepid water, snuggling into the hot spot where the shirt ends and the vest begins, sort of tickling us. A tame squirrel strolled over and swore at us for five minutes, in a carefree, jovial sort of way, and the robins roared at each other from the tree tops. Our maple trees shed hairy filaments all over clothes, indicating, probably, that they were pleased we had stayed at home and made use of their shade, for once.

Last week we had cursed the grass on the lawn because it grew so fast, and blistered our hands trying to reduce it to a more or less respectable height. But Sunday it behaved very well, growing only enough to let us know it was still alive. We sat on it for a while but it didn't seem to mind.

And when we went indoors, the house was delightfully cool, and the refrigerator gave a pleased hum as we reached for the pint we had stored there overnight. Altogether, our home seemed rather happy about us staying here. Which brings us to the question: why haven't we sense enough to stay home oftener, instead of wearing our nerves down to a frazzle burning gasoline?

We advocate a national stay-at-home week, so that the citizens of our fair dominion might get acquainted with the places where they live. There would be fewer accidents, and the racial tendency towards neurosis would be reduced. The old-timers used to boast of their homes, but most of us moderns shout about the swell auto we have.

HEART

"A loving heart is the truest wisdom."—Dickens.

"In the walk to Emmaus, Jesus was known to his friends by the words, which made their hearts burn within them, and by the breaking of bread. The divine Spirit, which identified Jesus thus centuries ago, has spoken through the inspired Word and will speak through it in every age and clime. It is revealed to the receptive heart, and is again seen casting out evil and healing the sick." — Mary Baker Eddy.

"When the heart goes before like a lamp, and illumines the pathway, many things are made clear that else be hidden in darkness."—Longfellow.

"All our actions take their hue from the complexion of the heart as landscapes their variety from light." —Bacon.

"The heart of a wise man should resemble a mirror which reflects every object without being sullied by any."—Confucius.

"Many flowers open to the sun, but only one follows him constantly. Heart, be thou the sunflower, not only open to receive God's blessing, but constant in looking to him."—Richter.

LET US SMILE

"Your son went to Cambridge. Didn't he go in for research work, and has he made any discoveries?"

"Only one so far as I know," said the father a little grimly. "He discovered what he calls his scientific paradox."

"Really," said the other; "and what does that mean precisely?"

"Just this," said the father. "He succeeded in demonstrating that debts can be expanded by contracting them."

Trinity Anglican Church

Services on Sunday, June 6th. Rev. E. S. Ottley, Rector. 10 a.m., Sunday School; 11 a.m., Morning Prayer and Holy Communion; 7 p.m., Evening Prayer and Service of Dedication of Altar Cross.

At the evening service on Sunday, June 6th, the Cross on the Holy Table, which was presented as a thank-offering, from the Rev. E. F. Hockley, a former Rector of the Parish, will be dedicated. Mr. Hockley, who is now on a visit from England, will be present to take part in this act of consecration.

Peel County L.O.L. Parade To Be Held In Streetsville

Although the Peel County L.O.L. had previously decided to hold its annual church parade at Cooksville on July 5, it was announced that because Streetsville Lodge was this year marking its centenary the parade would be held in Streetsville instead. James Olliff, the Immediate Past District Master, was made the recipient of a jewel, the presentation being made by Deputy County Master Cecil R. Doyle.

OBITUARY

NOBLE, Frances (Fanny)—Suddenly Thursday, May 27th, 1937, at her residence, 344 Howland avenue, Toronto, Frances (Fanny), beloved wife of the late Thomas Noble, and mother of Mrs. Butson, Mrs. Ferris, Mrs. Tipping, Sophie, at home, Frank Noble, Streetsville; Gordon Noble, Toronto.

Funeral Saturday, 29th instant, at 2.30 p.m. Interment Prospect Cemetery.

ENGAGEMENTS

Mr. and Mrs. Charles A. Tipp of Toronto announce the engagement of their eldest daughter, Hilda Irene, to Mr. Garfield E. Browne, eldest son of Mr. and Mrs. Arnold Browne, Bronte, Ontario. The wedding will take place early in June quietly at Jarvis Street Baptist Church.

The engagement is announced of Mary Louise Ellenby, granddaughter of Mrs. Felan and the late Maurice Felan, of Oakville, to George Henry, youngest son of Mrs. Lowndes and the late J. Mont. Lowndes of Toronto, the marriage to take place the middle of June.

Miss Alice Charters announces the engagement of her younger sister, Ruth, daughter of the late Mr. and Mrs. Frank Charters, to Mr. Gordon Earl, son of the late Mr. and Mrs. Richard Bentley. The marriage to take place quietly early in June.

Mr. and Mrs. A. M. McMeekin, of Norval, announce the engagement of their second daughter, Jean Willis, to Vivien Robert, only son of Mr. and Mrs. R. F. Dale, of Brampton, the marriage to take place quietly early in June.

Mr. and Mrs. A. J. Tipping, Jr., Cooksville, announce the engagement of their eldest daughter, Myrtle Ann, to Crawford Kirby Irwin, only son of Mrs. Irwin and the late Walter C. Irwin, of Cooksville, the wedding to take place quietly at the bride's home June 10th.

MILTON

While standing near his home on Main St. William Smiley was suddenly overcome and fell into an old well, in which there was about 20 inches of water. A peddler visiting the next house had just called over to Mr. Smiley when he noticed him fall. Aid was immediately summoned, but Smiley was dead before the difficult task of raising him could be completed.

According to Dr. G. Denton, death had occurred from shock before Smiley struck the bottom. Smiley had been subject to such attacks for some time. He was in his 66th year.

The well had not been used for many years, and was covered, but the top broke under his weight.

PINECREST CAMP NEWS

Where? Norval, Ont.

When? Boys' Camp, July 3-12; Girls' Camp, July 14-22.

How much? Cost $5.00—50c for Registration and $4.50 for Board.

Why?

(1) For a healthy holiday in the open air.
(2) For making new friends.
(3) For games, swimming, fun.
(4) For the knowledge gained in interest groups.
(5) For closer relationship with nature.
(6) For learning to share work with others.
(7) For worshipping God in the open air.
(8) For learning songs and hymns.

Who goes? We cordially invite every girl or boy between the ages of 12 yrs. and 16 yrs., both in Peel or out of Peel. For campers out of Peel the cost is $6.00. Send for application forms to Miss Irene Peacock, 77 Elizabeth St., Brampton, and start to save for the best and most inexpensive holiday you'll ever get.

We've heard of fellows being lost in the desert and subsisting on the sandw(h)iches there, but here is a fellow who did better than that:

"A Kansas newspaper has found a man who lived to tell the tale after being cast on a desert island without food. He happened to have an insurance policy in his pocket, and it had enough provisions in it to keep him alive until he was rescued.

Farewell Party for Mr. and Mrs. T. H. Wilson

For 27 years Thomas Wilson and Jennie McCracken knew what farm life meant, to sow and reap as the season's come and go. And the neighbors all knew what a pleasure and help it was to have neighbors like them. Then when they decided to retire from farm life, the nearby neighbors, with whom they were in daily contact, decided to surprise them in the old McCracken homestead, on the farm they owned and operated for so many years, and with songs and stories, reminiscent of happy times spent in the past, accompanied by the following tokens of love, something that will be a link to remind them of the past, a triple (indirect lighting) floor lamp, with rust shade, and an electric grill.

The chairman, W. G. Cooke, called the meeting to order at 9 p.m., D.S.T., and after making many complimentary remarks about their value as neighbors, the following programme was proceeded with: Sing-songs, by all; several recitations by George O'Connor, which were greatly appreciated; duet by Ruth Lee and Merlie Noble; speeches by George Bonham, Nat. McCracken, A. G. McNab and D. McGregor. All of the speakers were generous in praise for Mr. and Mrs. Wilson, as neighbors and friends, and sincere wishes for their future happiness. And when they all were bidding good-bye to the past, they did not forget the young couple who are taking up the work, Pearl Crozier and Joe Trimble, where Mr. and Mrs. Wilson are laying it down, on the old McCracken homestead, as Mr. and Mrs. Joe Trimble. And all join in wishing them a long, prosperous, happy life together.

The following address was read by Mrs. Robert Coulson and the presentations made by Violet Simmons and Mrs. Wick Atkinson.

ADDRESS

R. R. 1, Streetsville, May 28, 1937

TO MR. AND MRS. T. H. WILSON:

Your friends are here to-night to rejoice with you in the decision you have made to take a well-earned rest from your labor and the worries of farm life. When you started the home fire burning on this farm together you saw a bright, prosperous contented, happy future ahead. And the early training you both received in your home life, taught you that for a real home your motto must be:

"We need Thee every hour, most precious Lord."

And now, when we turn over the pages of your past life, we find all of your youthful dreams have come to pass.

And you were specially blessed in your family, Mary and George

They were both a comfort and credit to you and themselves all their lives. But changes will come, and, in the natural course of events, the time came when they started their own home fire burning.

And when these changes come, it brings to our mind this verse in one of Longfellow's poems:

"Thus it is our children leave us,
Those we love and those who love us,
Just when they begin to help us,
When we are old and lean upon them"

And you are leaving the farm now just as you started together—starting farm life, and together, ending your life on the farm. In days to come you will often live over the happy past you will find in memory's storehouse

And now your friends all join in wishing you a long, happy future of comfort, peace and happiness, with the greatest of all blessings, health

We are pleased to know you are going to take up your residence in your good old home town, Streetsville, where you will continue your active service in the Church to which you belong, and members of other societies.

And now, Dear Mr. and Mrs. Wilson, we ask you to accept these gifts to keep your memory fresh and green in scenes of the golden past spent together, and a link to remind you there is free-hearted hospitality in all of our homes waiting ready to give you a welcome.

Signed on behalf of Committee

MRS. ROBERT COULSON
VIOLET SIMMONS

Mr. Wilson was almost overcome with emotion, but made a suitable reply. Then Mrs. Wick Atkinson was asked to explain all the mysterious contrivances in the modern present, which she did in a neat address.

An excellent lunch was then served, which was much appreciated. Then dancing was enjoyed for a short time. The music was furnished by Will Leslie and Mrs. Cliff May; the calling off was by the old-timer, Billy Simmons. It was like the old-time house parties we used to enjoy so much, with grace and time to the music.

The meeting was brought to a close by all joining hands in a circle with Mr. and Mrs. Wilson in the centre, and singing "Auld Lang Syne." Then the following song was sung:

Tune—Gypsy's Warning

There are changes, many changes,
You will go and we will stay,
We are gathered here this evening
For to cheer you on your way.

In our joy and in our sorrow,
You were always kind and true,
And we will report this meeting
In the Old Streetsville Review.

On the old farm you were happy,
Perhaps sometimes you might be sad,
But you always dropped your troubles,
In the pleasures that you had.

In life's trials and temptations,
You both bravely stood the test,
And we all hope in the future,
You'll enjoy your well-earned rest.

When we look around the circle,
The faces young, and faces old,
Will some good be said about us,
When our life's work will be told.

SANDY.

VOICE of the PRESS

CANADA
THE EMPIRE
THE WORLD AT LARGE

CANADA

Our New Coins

To Master of the Mint J. H. Campbell our hearty congratulations on his series of George VI coins. In design and in all other respects these are the most distinguished and handsome coins that Canada has ever had. Particularly should all be grateful for the improvement over the current five-cent piece, undoubtedly the ugliest coin issued anywhere by any country in the world's history.

A word, while we are in a congratulatory mood, for the Post Office's Coronation stamp. It is a beautiful-stamp, much more so than the ordinary series, and compares favorably with the new British stamps. —Ottawa Journal.

Quality Poultry

There are still producers and others who question the wisdom of the increased emphasis placed upon the quality of the articles which Canada sends to export markets and who think that the greater amount of inspection to which they are subjected constitutes unwarranted interference on the part of Government officials. And yet if can scarcely be denied that if we wish to hold the export markets that we already possess in the face of the keen competition which appears in most of them and if we wish to expand our foreign sales, especially of foodstuffs, we must be careful to exercise close scrutiny of the commodities that are shipped and do our utmost to keep their quality to a high peak.—The Brockville Recorder.

The Farmer's Task

The tendency to place at a discount the inherent ability needed for successful farming is at least deplorable. Such work demands more of the stronger qualities of character than almost any other. Its taskmaster, nature, is the most adamant of them all. It is sheer casuistry to place it anywhere but in the higher scale of occupations.

Ironically enough, it is the so-called advantages of the cities, the things which so often surfeit us, that maintain a certain hold on the country dweller of today. But it is a good thing. Modern entertainments and transportation have helped farming communities everywhere. And perhaps after all there is still a deep-rooted love of the land, among the larger portion of our people which, if not eloquent, is at least the sanest and the safest patriotism to be found.—Hamilton Spectator.

Rules For Fishing

(1) When fishing don't allow the bait to lie on the bottom if you can possibly avoid it.

(2) When you get a strike set the hook in the usual manner, before the fish has had time to swallow it. This will usually result in catching the fish through the jaw, and if undersize will enable you to release it without injury.

(3) Carry a hook extractor in your kit. This is simple to make and may consist of a piece of thin metal with a notch at the end. This is inserted down the throat of the fish with the notch against the hook.. A little downward pressure will frequently release the hook and prevent tearing the throat.

(4) All these precautions will be in vain unless you "wet your hands before handling the fish."—Ontario Fisheries Department.

Old Landmarks

But the old buildings must give place to a massive modern structure. And while everyone is glad to see Kitchener's downtown section vastly improved by an artistic structure, it does tug a little at the heart strings to see the old landmarks go. They withstood the storms just like the early settlers braved adversities.—Kitchener Record.

Saving Useless Time

Extremely few motorists are engaged on business of such urgent importance that a minute or two, or five minutes, is a matter of first consideration. Every day in Ottawa we see drivers trying desperately to save that minute or two and we cannot believe that life or death depends on catching a light, on passing another car on the wrong side, or on flashing through a party of youngsters at play. The driver so bent on saving a couple of minutes that he has no time to think of other people and their safety probably spends those minutes, having arrived at his destination, in filling his pipe, chatting about the weather or being very indignant about traffic conditions.—Ottawa Journal.

Rehash

An authority informs us that in ancient Egypt and Babylonia, books were not valued so much for new ideas they contained as for the old, time-worn lore they preserved. The authors in those days were, at least, honest about it. Much of so-called originality in current literature is merely rehash.—Stratford Beacon-Beacon-Herald.

Growing List

Women used to talk about pin money, but now they want shin money for silk stockings, skin money for cosmetics, spin money for gasoline, and tin money for the family meals.—Galt Reporter.

Fighting Drought

At this particular time, when aviation is so much to the fore in Canada, it is worthy of note that Saskatchewan aeroplanes are to be used to make a survey of some 11,000 square miles of semi-arid land. Experience has shown the Saskatchewan authorities that settlers acting independently have not been able to make use of the slim water supplies of this district, and it is thought that, if they were assisted by the government, migration to the northern part of the province, a costly and generally disruptive operation, would be rendered unnecessary. Instead some slight shift in the location of their farms might bring the desired effect.—Hamilton Spectator.

THE EMPIRE

Baldwin the Beloved

Of the eight statesmen who have been at the helm in British politics during this century—Salisbury, Balfour, Campbell-Bannerman, Asquith, Lloyd George, Bonar Law, Ramsay MacDonald, Baldwin—it may be that the last was not the most distinguished; but would it be an exaggeration to say that he has been the most beloved? The allegiance of his party he was bound to command, for he had saved it from possible disintegration in 1922, when he led the revolt against continued support of the Lloyd George Government. But the Englishman, whatever his political leanings, likes his leading public men to display other qualities than incidental to political office. Mr. Baldwin revealed himself on many occasions as capable of charming public audiences when he spoke about books, farming, pigs, locomotives, classical studies, and the English countryside, for in these speeches he displayed the simplicity, sincerity, and humanity which go to the heart of mankind.—Melbourne Argus.

British Foreign Finance

Fertilizing flow of British capital has been for centuries one of the prime factors in world progress, and so far as the Empire is concerned has played a predominant part. Britain should be approaching the stage when she will be able to resume overseas lending without disturbing the era of cheap money, which the Government desires to continue. When that day arrives, it will probably be found that Britain will seek to make loans serve her export trade, a department of her economy that is flagging and that she is anxious to stimulate.—Auckland, N.Z., News.

Aim To Increase School Grants

Hope To Eventually Pay Over 11 Per Cent Cost of Education Says Dr. Simpson

LONDON, Ont. — Ways and means of increasing financial grants to schools are under consideration by the Ontario Government, Hon. Dr. L. J. Simpson revealed recently. Speaking here, the Minister of Education said his Department hopes to be able eventually to pay more than 11 per cent of the cost of education.

Dr. Simpson dealt more directly with proposed changes in the primary and second school curricula. He stressed particularly a warning to trustees not to judge a school or its teachers by the number of examinations successfully passed. Examinations, he believed, were over-rated and their value over- emphasized.

The question of the teacher with relation to education and its progress and development, was also stressed by Dr. C. Goldring, superintendent of Education in Toronto. Speaking on the philosophy of education Dr. Goldring gave a treatise on what the child should obtain from school training. He urged "the education of the emotions" and claimed education should stress honesty, industry, fidelity and allied virtues.

Prefers Banking To Baking Any Day

Kentucky Woman Most Successful in Chosen Career

ST. LOUIS.—Mrs. C. E. Hearin, executive vice-president of the Farmers National Bank of Clay, Ky., chose a career to homemaking—and admits she prefers it. Known as "Allie" to bankers from coast to coast, Mrs. Hearin came here with her husband for a bankers' convention. Her husband is president of the Clay Bank.

"I wouldn't trade banking for cooking or making beds," declared Mrs. Hearin, who has been associated in the banking business with her husband for 30 years. "I love banking and it is my whole life, but of course if I had to I can do housekeeping."

In charge of all loans made by her husband's bank, Mrs. Hearin handles all the "hard" cases. Her husband attempted to dispel any belief that a woman can't be as hard-hearted as a man. "She turns them down much more quickly than I do," he ventured.

News In Review

To Help Famine

WINNIPEG, A letter from a St. Boniface man to the press here, says, "I believe a genuine service may be rendered to many of our fellow citizens as well as to the state, by admitting immediately into this country young girls and women of desirable character either from the British Isles or of other countries, or both if necessary, to relieve the shortage of female farm help, and possibly, if desired, marriage opportunity for the rural population."

An article by Geraldine Taylor in The Free Press is on the same lines but with a different slant. The days of the little 'skivvy,' the kitchen drudge are over. With so many new fields of endeavour open to them today, girls will not accept distasteful tasks, long hours and miserly pay, or working in another woman's home. The householders have found this out by the simple experience of not being able to engage servants, and now efforts are being made by the government and employment agencies, to re-establish domestic service on a business-like and dignified status.

Toronto Gets Airport

OTTAWA. — Toronto will have its airport and the Dominion Government will assist with a lump sum which is to be fixed.

An agreement to that end between the city and the government was discussed for between Hon. C. D. Howe, minister of transport, and Acting-Mayor Day, Controller Conboy, and E. E. Cousens, engineer of the Harbour Board.

Two sites are proposed, both to be used. One would be alternative to the other. The Island would be the port ordinarily used and another west of the city when flying conditions were bad and there might be a risk in landing at the Island.

By the terms of an order-in-council passed last fall the government is understood to pay a quarter of the cost of municipal airports.

Study Fish Exports

OTTAWA, — Representative of the fresh fish export trade of Ontario, Manitoba, Saskatchewan and Alberta opened a conference with officials of the Department of Trade and Commerce, looking toward better marketing arrangements in the United States.

Because of lack of organization, exporters to the United States have suffered loss through failure of consignees to meet their obligations. Delays in handling at the delivery end are also a cause of loss.

The conference will discuss a proposal to set up a credit investigation bureau, probably in New York, and to establish an office in that city, or a marketing agent.

Britain Plans Aid For Farm Areas

LONDON, — Legislation involving an expenditure of $17,000,000 will be brought down in connection with the Government's agricultural policy, W. S. Morison, Minister of Agriculture, announced in the House of Comons this week.

He said that under the scheme the Government hoped to improve the general prosperity and efficiency of the home agriculture and make it sound in times of peace as well as in any emergency.

It would not be practicable, Morrison added, to put agriculture on a war time footing at the present time, as that would involve regulation and regimentation of the farming community as well as heavy cost.

The Government felt, however, the Minister went on, that it was desirable to be prepared in a way consistent with a policy designed to ensure maximum supplies for the consumer and reasonable remuneration for the producer.

Bases Wheat Aid on National Need

REGINA, — Aid to the farmers by the government in times of low prices was warranted from a national viewpoint and was not based on any sectional consideration, James R. Murray, of Winnipeg, chairman of the Canadian Wheat Board, last week told the Turgeon Grain Commission.

Declining to make any definite suggestions as to the way in which aid should be given, Mr. Murray told M. A. McPherson, of Regina, counsel for the Saskatchewan Wheat Pool, that the steps would have to be taken as conditions arose.

When Mr. McPherson raised the question of a government guranatee for the initial payment by wheat pools, Mr. Murray said he believed in co-operative effort more than government assistance. If there was a government guarantee it would have to apply to all producers.

Salmon Pack Probably Light for Two Years

TORONTO, — A guarded prediction the Maritime Provinces might see a scarcity of salmon this year and next was made before the Royal Society of Canada by A. G. Huntsman, professor of marine biology at the University of Toronto. Dr. Huntsman told the biological sciences section of the society recent dry summers in the Maritimes made it probable that there would be a scarcity of salmon during the next two seasons, particularly in view of the fact scarcities had been found in roughly every 9.6 years in conjunction with decreased rainfall in corresponding circles.

Spare the Trilliums

Growing in its native environment the trillium is a thing of beauty. Picked, it is dead long before it can be carried home to be placed in water, and each gathered blossom leaves a doomed and dying parent plant behind it. To preserve for future generations one of the most charming features of Ontario's woods in spring, do not pick or injure the trillium.

"In England people are tired of the problem of ownership; they want security."—Hilaire Belloc.

Although only one man in 20 reaches the height of six feet, all seem to get in the front row at any event. — St. Thomas Times-Journal.

NEWS PARADE

Commentary on the
HIGHLIGHTS OF THE WEEKS NEWS ---
By Peter Randal

This Year's Crop of Graduates

The annual job hunt is on as hundreds of nervous young men and young women come rushing out of colleges everywhere in a wild dash to make their impression on the business world. For some years past, the happy hunting grounds of industry have been anything but kind to these would-be hopefuls and there is many a graduate wondering if the time and effort were worth the price. For these and their younger fellow collegians, the Investor's Syndicate, of Minneapolis offers a ray of hope. According to a recent survey conducted by the Syndicate, "employment prospects of this year's college graduating classes are only a little less favorable than those of the 1929 graduates, and substantially better than the June 1936 classes. . . Engineering, business administration, teaching and general business classifications are offering employment in greatest volume."

Curiosity prompted a test of this statement in a Canadian college. A class of twenty men expecting to graduate next month were interviewed on their chances of securing employment and the results were very surprising. Of the twenty, seventeen had offers of jobs as early as April, while a number had even been placed in the awkward position of turning down opportunities that last year's graduates would have considered golden. It is interesting to compare the qualifications of the 1937 graduate with those of the ideal model in other years. The 1937 model is a pretty good all-round man with a general background not only of classics, but of the more practical subjects like economics, political practice, accounting and finance. His four years at college have not represented four years of life in another world, but four years of familiarization with the problems both past and current of the world he must learn to live in after the parents on the home farm have ceased to foot the bills. He has no illusions about the world he is going into. He knows there must be a period of apprenticeship in which he may even have to sweep the floors and dust the office desks, but in place of the "world owes me a living" attitude of a few years ago, there is a quiet confidence in his own abilities to succeed on the merits of his own demonstration. He is, in most cases technically trained for his job and business men say that given an opportunity to try his training out on practical problems, he will go ahead fast enough to justify his years of education.

Golfmaniac

The summer sportsmen are beginning to come out of their winter shells in the wake of the optimists who have been haunting the nation's golf courses of many weeks now. A well-known Toronto business man told us the other day that he thought he might have to give up business if it didn't stop raining every Saturday—he barely recovered from one cold before the next Saturday's drenching came round again.

Million Dollar Deluge

And all this time, the wheat men in the Western Provinces have been saying: "What a waste of good water!" We met a Regina man the other day who leaves standing instructions to his office staff to telegraph him when it rains. The telegrams haven't been for some time and this particular man's temper has been getting worn to the thin edge. Over the week-end the long-awaited telegram arrived: "Forty-mile gale all day Saturday (stop) rain general (stop) store windows smashed." It sounded pretty desolate until he started to wave the yellow slip in the air and inform us that a few million dollars to his customers meant more than a few blankety blank windows.

Endeavour I

And gales remind us that the old fighting spirit has not departed from "the men who go down to the sea." Unreported for nine days, Endeavour I, T. O. M. Sopwith's big challenger to the American Cup, was sighted off Nantucket. Left to her own resources when her tow line parted from the tender 1,000 miles from nowhere, the Endeavour carried on in a fifty-mile gale. It may be slow in comparison to modern means of power but there is many a sail man will tell you that he would sooner be on her in rough weather than the greatest steamboat ever built.

Tin Can Airships

And in spite of the discredit brought upon the airship by the recent Hindenburg tragedy, John J. Dingell, member of the American House of Representatives, is to sponsor a bill for the building of a $6,000,000 "tin can" ship. Dingell bases his proposal upon the success of a navy ship made of metal and in service since 1929. According to tests made at regular intervals, the airship is in as good condition today as it was when first delivered.

The Old Order Changeth

Almost in sight of his century mark goal, the nonagenarian American dime magnate has "gone the way of all flesh." John D. Rockefeller died peacefully at his Florida estate after ninety-seven years of a life in which he is said to have amassed the greatest fortune ever known. Through companies which controlled substantial portions of the nation's income he administered a fortune of five billion dollars, while his gifts to public institutions are said to be past the five hundred million mark. Those who knew him in the early days of his struggle have called his tactics ruthless but the use to which his great fortune may be put in advancing the general good of civilization may well outbalance his untold sins.

A Hazardous Quest

A Russian airplane landed at the North Pole last week with eleven men who form the advance guard of a group of scientists engaged in studying polar weather conditions. After preparing the ground for heavier planes, seven men will return to the base of the expedition on Rudolf Island. Four men plan to stay at the polar observation station for a year. Since their position is on a floating ice field, subject to constant cracking, the post is looked upon as a hazardous one. It is expected that the data collected will be of invaluable service in predicting weather conditions in the Northern hemisphere.

Atlantic Crossing

Of such use is the airplane. Though accidents have been frequent with this mode of travel, it is difficult to imagine what progress would have been made in many out-of-the-way parts of the world without this means of transportation. The last remaining ocean to be spanned by regular service, preparation of ships for the Atlantic run is in progress both in England and in America. At the Boeing Aircraft Plant in Seattle, Wash., a giant 72-passenger ship is being built for Pan American. The super liners will be powered with new secret engines developing 6,000 horsepower and will have a speed of around 200 miles per hour. Test flights are scheduled for the early fall with regular service before the end of the year.

The sun and the moon appear about the same size to observers on earth, but the sun actually has a diameter 400 times that of the moon. Since the moon is only about 239,000 miles away, and the sun is about 92,900,000, the enormous difference in size is not readily apparent.

Iron ore is so abundant round Kropna, a village in Jugoslavia, that every one of its 120 inhabitants is a blacksmith irrespective of sex.

A Beautiful Task

Being surrounded by a bevy of beauties may not appear to be a task to you, but just think what a job Russell Patterson, Arthur William Brown and John La Gatta (L-R) had picking Model California Sports Girl.

Trainer Gives His Team Kruschen

"Daily Dose" for Footballers

Read what one professional trainer does to keep his team in tip-top condition:—

"I am a professional trainer, at present with a first-class football team, and have been for the past fourteen years. Kruschen Salts has been very beneficial, both as a laxative and in keeping the men free from staleness. Each morning I see that every man under me takes a small amount of Kruschen Salts to assist the liver and kidneys. I have used Kruschen with all types of athletes, and also extensively among my private patients, for cases of loss of vitality, rheumatism and neuritis." — J.J.J. (Certified Masseur).

The "little daily dose" of Kruschen Salts helps to keep the internal organs functioning regularly in their daily duties. Liver, kidneys and bowels are stimulated to healthy, vigorous activity, thus assisting them to eliminate waste products and poisons that endanger the health.

The Speckled Hen

Driving along the road just a mile or so north of Omemee we saw a dead hen lying beside the road, writes the Peterborough Examiner. It was speckled hen too, and it had apparently not crossed the road fast enough to suit the traffic of this rapid day. A hen often gets confused and it does not seem to know right straight off whether to stay on the side of the road or try and get back to the side where she lives. When she sees a car coming along that instinct to get back home seems to become operative at once. A hen may not know a great deal but when she gets scared she will run for home and never away from it. There have been a good many hens killed along a good many roads and highways in the same way, and we have always felt the number has been too great. A car driver knows a hen is likely to run across the road and it would not call for much exertion to try and avoid the thing.

Looking back quite a few years, we cannot recall seeing a speckled hen or any other kind of hen lying dead beside the road in front of Lot 4, concession Ten, and there were days when the speckled hens used to go out there. The speckled hens used to cover quite a lot of territory. Days when the plowing was going on the hens often moved over to follow the plow, and they were probably feeding themselves and doing a good turn for growth in general when they filled up on the white bugs.

Other days they might take a notion to follow the lane toward the road. The pup could always get through the gate, so could the hens. Just where the lane turned toward the road over an old culvert the roadway was rather sandy and it was a fine place for the speckled hen to dust herself. In the cool of the evening it was also a pleasant place for a lad to walk with bare feet for the dust as it came up between the toes seemed pleasant indeed. The heat of the day had gone from it.

But we are quite certain the speckled hens do not dust themselves today on the Tenth Concession because it is now part of the Highway system and there is probably a newer and better gate at the end of the lane through which they could no longer pass. So the hen has to move in a narrower circle today if she wishes to keep on living her full span of years. Quite often we have seen the remains of the hen which tried to hurry to her own home-side of the road when a car came along. We believe the speckled hen of the Tenth Concession must have had a happier sort of life than the on living beside a highway today. She could wander here and there and do her dusting out on the road and be certain enough of turning up in time for bed all in one piece.

In Your Garden

By GORDON L. SMITH

Article No. 14

The more tender sorts of vegetables are beans, tomato plants, squash, cucumbers and melons. They will not start to grow until the weather and soil really become warm. All garden tomatoes should be staked, using either wooden or steel stakes about six feet high. Trim off all side shoots as they develop, training the main stem up along the stake and tieing loosely about every foot.

Like Rich Soil

All these warm weather vegetables prefer rich, open soil and any members of the melon family; that is, squash, cucumber, citron, etc., take special delight in hot, sandy soil, though it must be made rich with well-rotted manure or good garden fertilizer.

Conserve Moisture

Dry weather will seldom affect a constantly cultivated garden. Stirring of the top soil prevents evaporation of moisture and it also keeps down those robbers of plant food and waterweeds. Especially during the early part of the season is cultivation necessary and more particularly after each shower.

Late Planted Flowers

Even in the more northerly sections of Canada it will soon be time to plant those rather tender flowers such as dahlias, gladioli and cammas. None of these, with the possible exception of gladioli, will stand any frost, but because all are bulbs or corms and are planted several inches deep, a light frost after they are set out but before the shoots appear, will not do any damage. Rules are simple: fairly rich, but loose garden soil is preferred by all three, though good results from dahlias can be obtained in almost any kind of soil. The bulbs or corms should be planted from about four to six inches deep for gladioli to twice this much for the larger dahlias and cannas. All prefer an open position, though with these as well as all flowers of vivid coloring, a position which is slightly shaded ground noon is preferrable to protect the blooms from being bleached out by the hot sun. These flowers will benefit from a thorough soaking during the hot, dry weather.

Grasshoppers Are Hatching on The Prairies

Poison Sent to Farmers and Army of Men is Ready

OTTAWA. — Grasshoppers are hatching on the prairies and an army of men is waiting to launch an attack on the destructive pests.

"The next two or three weeks will tell the story," H. G. Crawford of the Entomological Branch in the Agriculture Department said.

"Dry weather is favorable to their development. If there are plentiful rains in Saskatchewan and Alberta, vegetation will get a head start on the insects. Also, in wet weather, the grasshoppers die of disease."

The war against grasshoppers is carried out every year through cooperation of Dominion and Provincial Governments. Federal experts carry out surveys of infestation and the Provinces spend the money for poisoned mash set out in the fields.

Throughout the badly infested area of Saskatchewan and Alberta, Mr. Crawford said, poisoned mash has been distributed to farmers and will be sown in the fields as the grasshoppers hatch and crawl out of the ground where the eggs are laid. The mash is composed of bran, sawdust an active poison.

The Federal survey indicates more than 53,000,000 acres are threatened with infestation. This is an increase of 9,500,000 acres from last year.

Heavy rains in 1935 almost wiped grasshoppers out in Manitoba. Much control activity may not be needed in that Province, although 451,000 acres in the southwest corner will be affected.

Active control measures will be required over large areas of the other two Prairie Provinces, however.

Grain Feeding

In all grain feeding it must be kept in mind that the product being used is an expensive one and can under no circumstances be used in the feeding or finishing of low grade or indifferently bred animals. Not only must the animals be of approved types, but experience has clearly shown that certain kinds of farm animals greatly excel others in their ability to utilize the feeds provided. Especially is this true in connection with the feeding of grains. Poultry would probably head the list in this regard, with the pig standing a close second in its ability to manufacture feed grains into meat economically. The dairy cow, because of her ability to give off from her body immense quantities of milk during a long lactation period, would rank third, followed by beef cattle and sheep.

An Interview

Sometimes we feel one way about Mrs. Roosevelt, sometimes another. At the moment we rather sympathize with her, having just been told of an interview with a reporter in the Hotel Casey, in Scranton, which, in its entirety, went something like this:

Reporter: Do you call the President every night?

Mrs. R.: Heavens, no! It would be too expensive.

Reporter: Well, we can take it, then, that the honeymoon is over?

Mrs. R. (with a slightly fixed smile): Well, when you've been married as many years as I have . . .

Reporter: Do you still carry a pistol?

Mrs. R.: Yes, always.

Reporter: Thank you. (Exit.)
—The New Yorker.

Everyone to "See" Next Coronation

What shall be said of the television experiment that marked the Coronation? It is reported that fully 50,000 in an area of 7,500 square miles were in London, electrically speaking, though seated in far-away homes, and saw and heard something of the magnificent outdoor ceremony—saw troops, Queen Mary, the Princesses, even the King and Queen. Before that a Derby had been crudely televised for the benefit of a music hall's audience in London. But this televising of the coronation procession was an event of historic importance in its own right. It was as important, for example, as Morse's first message, "What hath God wrought," or Marconi's transmission across the Atlantic of the signal that stood for the letter "S", or Bell's famous "Watson, come here," the first words ever sent over a telephone.

What of the next coronation? Not only will the empire hear the prayers, the antiphonal chanting, the solemn vows of the King, but it will see in Westminster Abbey the moving splendor of an ancient rite. Electric waves, millions of them a second, will transport Hindus, New Zealanders, South Africans, Canadians to far-away London. What are the roads of Rome compared with this? Or the telegraph and the airplane? Three hundred million discarnate personalities transplanted with the velocity of light through space. It is plain that an invention is in the course of development which is of incalculable social, political and economic value to the empire. The dominions have achieved independence, but so long as they can hear and see what is going on in London, they must feel a kinship with England that depends on something stronger than sentiment. Perhaps historians would do well to consider the part that electrical communication has played in cementing together colonies and home country, and the even greater part that it is destined to play when the King's majesty becomes a living presence wherever the British flag flutters in the breeze.

White Grub Pest

Have you ever noticed when visiting the country during seeding time that farmers allow their poultry to run loose in the fields? A city man accustomed to think of hens as kept in wire-encircled yards, might think there is a bit of carelessness there, but the very reverse is the case. n fact the farmer is glad to see the hens out there scratching for a living. Busy "biddy" is doing a most useful work, comparable with the value of the eggs she lays.

Watch the hen pecking away industriously behind the plowman as he turns the sweet-smelling sod. They are feeding on the enemy grubs that have been developing in the pipelines in which the mother beetles laid their eggs, and which the plowshare has uncovered. Occasionally the birds take a hand in helping the farmer in thus riding the soil of the pests.

The white grub is one of the worst of these. Ordinarily it lives on grass roots, but it likes potatoes, the roots of corn, wheat, oats, asters, geraniums, strawberries and roses. Entomologists of the Dominion department of agriculture made an examination of many farms in eastern Ontario two or three years ago and found an average loss of $138 per farm.

The May beetles which lay the eggs that become the white grub are burly brown insects that fly about at night, bang against window panes because they are atracted by the light, and otherwise prove a nuisance if there are holes in the screen door. In 1934 a major flight of them caused much destruction by defoliating trees and shrubs in over 4,000 square miles of Southern Quebec.

Hence fowl and the birds of the air befriend not only the farmer by devouring the white grub in quantity.

The Fire Menace To Our Forests

Man's efforts are puny in fighting with the elements of fire and water when these assail man's ingenuity in force. The latest fire reported is from Alberta where damage to the extent of many thousands of dollars was caused within a couple of days.

In Northern Ontario there was another outbreak that seemed likely to rival some of those that swept the northern forest areas last summer. Fortunately this was overcome when rangers were rushed to the scene of the conflagration in airplanes.

The problem of all the provincial governments is to prevent fires, and to this end rangers are employed to traverse the districts constantly, following the paths of the woodsmen, the hunters and other tourists, who, despite the prevalence of warning signs, set out fires with absolute disregard for consequences, and leave the neighborhood without extinguishing them.

That is the carelessness that is costing the provinces many millions of dollars annually. Fire ranging unquestionably prevents great loss, but there ought to be some way of getting the facts before the people, that better precautions must be taken in their own interests, as well as those of the country, if the forests are not to be wholly obliterated, or else permits to traverse them denied altogether. Lumber is becoming too scarce an article to be wasted. The supply is lessening annually, and unless better methods of fire prevention are adopted it will not be many years before the whole of the timber supply will be exhausted. Scarcely a timbered area in Canada has escaped untouched.

One big problem of governments nowadays is that of reforestation, but little has been done in this direction. Perhaps when fire has consumed the bulk of the merchantable timber and the pulp forests, they will realize the importance of reforesting all cut over areas as speedily as possible.

Some vainly imagine there are illimitable supplies for all time, but official reports show that a real danger exists that the supply will shortly be a thing of the past. The greatest danger places are said to be along the lines of railways, and if this is the case, the railways may yet be compelled to share the cost of fire ranging, unless safety devices are installed on all engines to prevent the transmission of fire from the track allowances to the bush. Forest fires are considered largely preventable, and all governments have a duty in this respect that cannot be ignored.

HAVE YOU HEARD

Housekeeping

I can take a broom
And sweep up a room
Or wield a mop if I must;
But the thing I scorn,
Both night and morn,
Is wiping off the dust!

There are now several good five-cent cigars in this country. The trouble is that they sell for 15 cents.

Junior—"Mother, I was playing in the yard and the stepladder fell."
Mother—"Well, run tell daddy."
Junior—"He knows — he's hanging on the window sill."

Read it or not—Amsterdam, Holland, has more than 300 bridges.

College Man (who had come to work on the farm for the summer)—"I have only one request to make."
Farmer—"What is that?"
College Man—"Please let me stay in bed long enough for the lamp chimney to cool off."

Most of us know so much that we can't remember the half of it."

Wife—"When we married I thought you were a brave man."
Husband—"So did everybody else."

If consistency is a jewel, there are a lot of speakers who are running very short of jewelry.

Agnes—"I guess Catherine is determined to keep that secret."
Helen—"Why?"
Agnes—"I noticed she has rounded up four or five girls to help her."

The man who is too early, strikes before the iron is hot. The one who is too late strikes after it has cooled. Both are alike in the fact that they are hammering cold metal, wasting their effort and accomplishing nothing.

Gretchen—"What did you do when Harry Johnson kissed you?"
Winifred—"Sat on him, of course."

There is nothing the world is so slow to applaud as success, and nothing it is so quick to discover as failure.

Son—"Daddy, who invented the hole in the doughnut?"
Father—"Oh, some fresh air fiend, I suppose."

Men, like horses, get the most accomplished when they stop kicking and pull together.

Mrs. Porter—"Dearie me, I'm always afraid that my husand will get in the money some day."
Mrs. Casters—"Hmm, why should that worry you?"
Mrs. Porter—"He's a bankteller."

If the author took ten pages to say what a modern would put on ten words, the book is a classic

Franklin—"You know that kettle song?"
Ferguson—"What do you mean — kettle song?"
Franklin—"Home on the Range."

Read one time that life is a hammer-and-anvil affair. . . . Assuming one is a good anvil he can endure a lot of hammering.

The average man is always willing to help you celebrate anything at your own expense.

Even in Sweden Nature's Tree Method Is Best

In Ontario Tree Planting By Man Has Not Been Wholly A Success

Over in Sweden where scientific forestry has been followed for two generations "the ideal" method of reforestation is by Nature's method, without more than a pat on the head from man.

Under Canadian conditions reseeding by Nature is the only practical method. Our efforts at artificial forest regeneration have been of doubtful value.

Wilson Woodside, writing in a Toronto paper says:

"Forestry has been developed to a science in Sweden. The nation's forests are measured, and estimated to contain 1,420 million cubic meters of wood. The annual growth is calculated at forty-seven million cubic meters of wood. The annual growth is calculated at forty-seven million cubic meters; the "crop" taken out is between thirty and forty millions. Her forest land is Sweden's greatest single natural resource, and she intends that it be permanently maintained. For thirty years it has been unlawful, not merely to slash forests but even to thin them out unduly. Immature trees may not be cut at all, and the replacement of all mature timber cut must be provided for either by natural regeneration (the ideal held out), or by planting seedlings.

"To this end, the State provides annually from its nurseries forty to forty-five million seedling trees and many tons of pine and spruce seed. Its foresters dig four to five thousand miles of forest ditches, clean out hundreds of miles of brook, and visit annually all of Sweden's 20,000 logging sites. This work of supervision and education is carried on by the Forest Commission Board, and by its branches in every country. It is supported by a tax of 1.3 per cent. on the stumpage value of all timber cut. Forest operators, large and small, have come to co-operate so well that the commission's annual list of specific prohibitions of activity now numbers only about 100, and its court actions less than half a dozen."

In the above are several significant hints Ontario might well take note of:

(1. Sweden doesn't permit a forest to be thinned out unduly. Doubtless some trees are left to reseed the ground.

(2) Immature trees are not allowed to be cut at all.

(3) "Natural regeneration" implies certain work in helping Nature.

(4) Sweden digs forest ditches to drain wet forest land and cleans out brooks for the same purpose.

(5) There is an annual inspection of camps, to see that the law is observed.

It would appear that this paper has been unconsciously advocating Swedish methods for some time.

Issue No. 23—'37

A—1

Ontario Province As a Business

The Government of Ontario has bought space in The Journal and many other newspapers through which today it conveys to the people of the province a detailed statement of the financial position of Ontario at the end of the fiscal year notes the Ottawa Journal.

It is a departure in government practice, and an excellent one. The taxpayers of this province are shareholders in the business of Ontario, and Mr. Hepburn and his associates are in the position of a board of directors. That board now reports to the shareholders through the medium used by private corporations—advertising space in the newspapers.

The report, furthermore, is in a form every citizen must see and can understand. is publication will add to his understanding of public affairs, and it is highly desirable that every shareholder in this business which took in more than eighty million dollars last year should have at least a superficial knowledge of the manner in which that money was raised, and the purposes for which it was spent.

We are not thinking particularly of the revenue involved when we say it would be a good thing for governments generally to follow the precedent that is set in the present instance. Public money judiciously spent for public information is well spent.

Gasoline is now being made from wood. As a matter of fact, sugar, grain alcohol, yeast, glycerine and other products are made from wood. It is believed that as much food can be grown on one acre of woodland as can be grown on an acre of cultivated ground. But a distillation to feed your car, supplanting gasoline from wells is the newest by-product of wood and as yet its volume of productivity and its possible effect on the present gasoline market have not been measured or even conjectured.

The State of Florida has 3,751 miles of tidal coast line.

District News

John J. Walker, second line west, Toronto Township, passed away on Sunday, May 30. The funeral took place to Britannia United church cemetery Tuesday afternoon. He is survived by his widow, formerly Miss Dagmar Hunter, one daughter, and two sons.

Union Presbyterian church, Norval, on the Peel-Halton Town Line, celebrated its 104th anniversary on Sunday, May 30th. Ladies from Trinity College, Toronto, assisted the choir in the morning, and the Brampton Presbyterian choir took part in the evening, when Rev. John Y. Fraser, Streetsville, was the special preacher.

Mrs. R. J. Poyntz passed away in Toronto and was buried in Brampton cemetery on May 31. Her maiden name was Martha Giffen.

Geo. Graham, of Montreal, was given six months in the Ontario Reformatory for stealing steel from the Port Credit Brick Co., by Magistrate Bull in Brampton Court.

Eight farm properties south of Malton, Toronto Township, have been purchased for a site for an airport. Owners of these properties are: H. G. Death, John Dempster, J. H. Perry, W. Martin, A. Schrieber, Mrs. T. Osborne, R. H. Peacock, and Frank Chapman. The site will form part of the Trans-Canada Air Service.

ERINDALE

Text of address delivered by Rev. E. S. Ottley, Rector of Trinity Church, Streetsville, at a meeting of Erindale A.Y.P.A., last week:

"A cheater reveals the dishonesty of his soul," he said. "But you know, it's very easy to cheat in life and it reveals a barrenness there, a surrender that is a form of cheating. Many people, during a struggle, either physical or moral, will simply give up when the going becomes tough. That is what I mean by cheating. It is a substitute for real action. I would advise, in cases like this, to apply a form of Pollyanna principle where nothing is tragedy that can be remedied satisfactorily."

"There is another form of cheating, too," he continued, "and this is called by the psychologists 'projection,' or putting the blame on someone else. Some people blame death on God, but responsibility for that state rests more on human shoulders. This form is nothing more than trying to get out from under. Then there is a form called 'rationalization'. Under this head people everlastingly camouflage their motives with other reasons. A man buys a new car and declares he got it to give the wife and kids an airing but if you could dig out the real reason behind that purchase you would discover that he bought the car simply because he wanted a car, nothing more. That illustrates the point of being too cowardly to give the real reason for any act."

Every young man does not have to 'have his fling' or 'sow his wild oats,' Mr. Ottley declared. A form of slavery could be induced through such as this while moral weakness and self-indulgence is being covered up.

"A blunt person will say 'I'm like that. Can't help it.' He is what is known as a moral fatalist. 'I am what I am and that's all there is to it' and thinks he has excused everything," he said. "We cheat right along and make no effort to improve on any of these points. Most of us offend and in, perhaps, hundreds of other ways as well. In our religion we are given a way to face life honestly, bravely, truly and actively. Let's apply religion to our life and avoid any more cheating."

BRITANNIA

John J. Walker, native of Etobicoke Township, died suddenly at his home on lot 6, concession 2, Toronto Township, Sunday, following a brief illness. He was a son of the late John Walker, and had spent the greater part of his life farming in Toronto Township.

Mr. Walker was a member of the Britannia United Church, and a Liberal in politics. He is survived by his widow, who was Miss Dagmar Hunter, of Georgetown, a son, John, of Lakeview; two daughters, Mrs. Gordon McMurray, Toronto, and Miss Irene, at home; a brother, Edwin, of Meadowvale, and three sisters, Mrs. Robert Jackson, Indian Head, Sask.; Mrs. John McKim, Claude, and Mrs. William Faulkner, Inglewood.

Hornby Church to Celebrate

St. Stephen's is Over 100 Years Old

Built of timbers and boards cut from virgin pine of Trafalgar Township, St. Stephen's Church of England, celebrating its centenary on June 20, has stood atop a low knoll on the Hornby-Milton road and weathered the storms of a hundred years.

On land given by John Cowan, who was one of the first lay delegates of the congregation, the church was built, as nearly as can be ascertained, in 1837, to house a congregation that had been gathered before 1834 by Rev. Mr. Boulton, a young curate of St. James' Cathedral, Toronto.

The earliest reference to the presence of an Anglican congregation at Hornby was made by Rev. Adam Elliott, in notes dated 1834, when he said that he had been asked to visit the Trafalgar congregation, when returning from Esquesing. He referred to the death, at an early age, of Rev. Mr. Boulton, who, besides his duties as curate in Toronto, had been a teacher of the Upper Canada College, and had ministered to congregations as widely separated as Hornby, Scarboro and York Mills.

Arthur Brain, a member of the congregation, recalls the words of his grandmother, Susan Cowan, daughter of the donor of the church site, that she had sat on a log and watched the building of the church. Family records of her descendants indicate that the church was built in 1837, but the first register of the church disappeared years ago.

Rev. George Graham, Streetsville, was the first rector definitely assigned to minister to the congregation, and on May 13, 1836, he recorded the baptism of John, son of John and Eliza Branning.

The first wedding was not solemnized until the following year, when Andrew Robinson and Letitia Bowes were married by Rev. Graham. The country, at that time, was still undeveloped, as instanced by the fact that neither bride nor groom was able to sign the register with more than a cross.

Another interesting entry was the baptism of twins. The babies were carried 14 miles by their father and mother, Richard and Ann Shorthill of Ballinafad, to the church at Hornby. Pioneer families were large ones, and some of the entries show 17 and 18 children of one family baptized at the church. In one case, nine children of one family were baptized on the same day.

A chancel and vestry were added to the church in 1869, and in 1899 the church was redecorated and the present pews installed. When first the church was built, there was no other accommodation for worshippers than pine boards laid across pine blocks, and there was no organ to lead the singing. The choirmaster, perforce, followed the example of early Presbyterian precentors, and used a tuning fork to sound the note.

From 1841 to 1843 Rev. G. W. Warr of Oakville had charge of the parish, but relinquished his ministry because the distance between Hornby and Oakville was too great. Rev. Richard McGeorge of Streetsville assumed the responsibility, and, during his term of office, founded the congregation of St. Paul's at Norval, which, with St. John's Church at Stewartton, forms the circuit of the present rector, Rev. W. G. Book. The church was at first in the diocese of Toronto, but was joined to that of Niagara, when the latter diocese was organized.

Rectors who have served the church during the past century, with the year in which they took office, were the following: Rev. G. Graham, 1836; Rev. R. J. McGeorge, 1841; Rev. Donald Fraser, 1849; Rev. T. W. Marsh, '52; Rev. F. Tremaine, '55; Rev. W. J. Mackenzie, '75; Rev. P. J. Mignot, '93; Rev. R. McNamara, '96; Rev Wilson McCann, '98; Rev. R. F. Nie, 1901; Rev. S. C. Nixon, '03; Rev. A. G. Smith, '12; Rev. J. Rogers, '18; Rev. E. O. Twiss, '20; Rev. W. A. Kyle, '22; Rev. R. S. Boyd, '26; Rev. F. C. Jackson, '35, and Rev. W. G. Brook, '37.

CHURCHVILLE

The annual meeting of the plotholders of Churchville cemetery was held last Saturday. Mr. Stan. Hall presided. Mr. H. H. Arnott, Secretary, read the minutes of last meeting, and George Wilson gave the Auditor's Report, which showed a nice balance in the treasury. A bequest of nearly $200 had been received from the estate of the late Mrs. Buchanan (formerly Miss Birdsall) and this was added to the permanent up-keep fund. There had been six burials during the past twelve months.

The cemetery is in splendid condition, and is the admiration of all who pass by. The plotholders are proud of it and they have a right to be, as it is better kept than some in many larger places.

The retiring trustees and officials were all re-elected and the Board will remain the same until the next annual meeting. The trustees are: H. H. Arnott, O. R. Church, T. C. Fraser, J. Fletcher, S. L. Hall, F. A. Hutton, W. Lambe, L. Marchment, J. Pearson, Geo. Wilson.

It was decided to erect a small building 10'x10' to house the caretaker's implements. It will be built of cement and wood and placed in the centre of the cemetery. The driveway into the cemetery will also be improved.

ADVERTISE IN, THE REVIEW

The SNAPSHOT GUILD

Photography, Time and Sentiment

"Backward, turn backward, O Time, in your flight!"

THIS is an address to camera-owning parents to remind them of a few facts relative to the sentimental value of photography and the passage of time. Self evident though they may be, these facts are too often forgotten.

The first is that in the case of parents the most treasured of all photographs are those of their children. When the children grow up, photographic records of how they looked as children become with the years more and more precious. Any doubt about that?

Fact number two is that parents who are camera owners have the means of obtaining pictures of their children at any time throughout those childhood years.

The third and most important is that since Time is not a motion picture reel that can be repeated or turned back to a given scene, too many parents let Time slip by without taking the pictures that will make the record of their children's constantly changing appearance.

Billie, aged ten, is quite a different looking person from the one he was at eight, six, four and two. If years are allowed to pass without pictures being taken of him, memories of how he looked at different ages survive only vaguely. Remember that mental pictures fade and perish but images on photographic paper endure. Moreover, Billie, too, will cherish those pictures, and so will his future wife and their children.

Here are some important facts, too, relative to the picture-taking. The most interesting and revealing pictures of children are informal ones, showing their natural manner of doing things, their unconscious attitudes and unpremeditated poses, taken unawares. These are the ones you like most to look at. Such pictures are easy to obtain outdoors when the children are at play intent upon the fun they are having. Now, at those times, it takes only a few moments to slip out of the house, camera in hand, and snap them. Don't let the children discover your purpose if you can help it, because they will most surely stop everything with a shouted, "Wait a minute! Mummie's going to take our pitchers" and start to pose.

The "pitchers" may not seem anything remarkable when a day or two later they come back from the photofinisher because they merely show the children just as you now see them every day. But wait a few years! Then they will be priceless!

Don't neglect to get these snapshots from time to time, and particularly when birthdays come around, and don't forget to date the prints. Remember: it only takes a few minutes to step out with your camera and obtain these precious remembrances.

135 John van Guilder

NOTICE

The Editor of The Review would greatly appeciate the co-operation of the secretaries of the various organizations who would send him a brief account of their meetings or other items of Local Interest.

When our readers have visitors or go visiting, we would also like to be advised of it, too.

IT PAYS TO ADVERTISE

Special Equipment Used by Experts in Taxidermy

The first principle governing taxidermy is that, after the specimen has been procured in as fresh and clean state as possible, it should have the skin stripped from the body so as not to disturb the scales if a fish or reptile, the feathers if a bird, or the fur or hair if a mammal, according to a writer in the Indianapolis News. Tools required comprise several sharp knives (some pointed and some obtuse), a pair of scissors, a pair of pliers, a pair of nippers or "cutting pliers," some tow, wadding, needles and thread, a "stuffing iron," some crooked awls, a pair of fine long flat-nosed pliers and a camel-hair brush.

The preservative compound often used is the original "arsenical soap," made by cutting up and boiling 2 pounds of white soap, to which 12 ounces salt of tartar and 4 ounces powdered lime (or whiting) are added when dissolved; to this mixture, when nearly cold, 2 pounds powdered arsenic and 5 ounces camphor (the latter previously triturated in a mortar with spirits of wine) are added. The mixture is put away in small jars or pots for use. Like all arsenical preparations, this is very dangerous in the hands of unskilled persons, therefore an efficient substitute composed of 1 poung white curd soap and 3 pounds whiting boiled together, to which is added, while hot, 1½ ounces chloride of lime, and, when cold, 1 ounce tincture of musk. This mixture is safe to use when cold, although when hot the fumes should not be inhaled.

Numerous Prominent Men Choose Life of Bachelor

Sir Isaac Newton was one of the most distinguished men who lived and died a bachelor. He loved a Miss Mary Story when both were young and she was beautiful. But he was too poor to marry her then and he lost her to another. His devotion lasted all his life, and though she was twice married, he never passed her home without going to see her, and later he assisted her financially.

Michelangelo was also a bachelor. "I have only too much of a wife in my art," he said, "and she has given me trouble enough. As to my children, they are the works that I shall leave; and if they are not worth much they will at least live for some time."

Raphael was another painted who was unmarried. Among musicians there were Chopin, Liszt, Beethoven and Paganini. The unmarried poets have included Swinburne, Whittier and Walt Whitman. Lewis Carroll, the author of "Alice in Wonderland," never married. Others, distinguished in various fields, who remained bachelors, were Schopenhauer, Cecil Rhodes, Charles Lamb, Alfred De Musset, Phillips Brooks, Voltaire, Henry James, and the painter, Lord Leighton, president of the Royal Academy. James Buchanan was the only bachelor president of the United States.—Cleveland Plain Dealer.

The Ecuadorian Government

President General Jose Maria Urvina served as the seventh head of the Ecuadorian government from September 6, 1852, until October 16, 1856. It was during his term of office that the sixth Constitution, adopted at Guayaquil on July 17, became effective October 2, 1852. The efforts of Bolivar to maintain the greater Republic of Colombia, formed at the time of the revolt from Spanish rule, came to an end in 1830. Venezuela and Ecuador both set up separate governments. However, it wasn't until 1833 that the name "Republica del Ecuador" was adopted, and the second Constitution adopted. Since that time the various Presidents have had great difficulty in effecting any real progressive measures, caused by the necessity of fighting to maintain their power by arms.—Philadelphia Record.

Demanded a Battle

The medieval custom of trial by battle was not abolished in the common law of England until 1819, when a trial by battle was actually insisted on by a person accused of a crime. The judge had to admit that inasmuch as trial by battle was never abolished the accused had the legal right to have his battle. And, as the one accusing him didn't care for the idea, the undoubtedly guilty man went free.

Discovered Brazil

In 1500, Alvarez Cabral discovered Brazil. One of the nautical instruments he used was the armillary sphere, which consists of several brass rings, all of which are circles of the same sphere, and designed to represent the position of the celestial bodies. The center of the Brazilian flag is occupied by a sphere and a portion of circle.

Twins

"Twin" is a singular noun, and is defined "one of two children or young brought forth at one birth." The plural form is "twins," and is defined as "two children or young brought forth at one birth." A pair of twins is two children. The expression, however, is tautological, since "twins" implies a pair.

Cleaning Parchment Diploma

A parchment diploma may be cleaned if it is not too soiled by rubbing lightly with art gum, which may be purchased from any art dealer. Another method is to use pieces of freshly baked bread with the crust cut off. For grease spots apply Fuller's earth. Rub it into the stain and then brush

Keep July 1st clear for Streetsville Veterans' Garden Party,

W. J. McKinney, president of the Peel Conservative Association, is welcoming all Conservatives of the County to his spacious farm home at Lot No. Eleven, First Line West, Chingacousy (about three miles north and west of Brampton) on Friday evening, June 11th, at 7.30, standard time, to celebrate the settling of the homestead. It will be an old-fashioned "get-together" with lots of entertainment, a little speaking and a good time for all. Bring along your family and a basket lunch and enjoy yourselves..

Maggie Keir, widow of the late James Crawford, passed away in Toronto, May 28, and was buried in Dixie Presbyterian Cemetery.

Annual field day and picnic of the Holstein Breeders of Halton, Peel and York Counties is to be held at Edgewood Park, Eden Mills, on Saturday. President Herbert Inglehart said there will be 500 or more "black-and-white" enthusiasts present to take part in the program of speaking.

UNITED CHURCH

The coming of June heralds in the picnic season and the Streetsville United Church Sunday School Picnic is announced to be held Wednesday, the 9th of June, at Mr. J. D. Steen's farm. Cars are to leave the church at 12.30 for the grounds and committees to make full arrangements have been appointed.

The Junior Choir of the United Church, Streetsville, is to have a picnic the following Saturday afternoon at Capt. Noble's farm, Norval.

The United Church Orchestra is busy preparing to assist in Open Services to be held in some open space during the summer on 2 or 3 Sunday evenings. It is expected that the 3 local churches will co-operate in these services and arrangements are proceeding. Meanwhile to prepare for them, the Orchestra is going to lead the service on Sunday evening in the United Church, Streetsville. The group works well together and one number to be played Sunday is "Lead Kindly Light" in anthem form.

Local Items

Miss Ruth Andrew spent a week with Mrs. Alwars in Toronto.

Mrs. C. P. Lumbers of Toronto visited with Mrs. T. Gould.

The Rev. Edgar Lorimer of Owen Sound visited at Mr. W.E. Watson's on Sunday.

Mrs. David Ross had the misfortune to fall on a Church step this week and is now confined to her bed.

Mr. and Mrs. James Kee and Mr Mrs. Thos. Johnston, and Miss Ada Prince, Toronto, visited friends here yesterday.

Mrs. Reg. Tucker underwent an operation at St. Joseph's Hospital in Toronto recently. Her many friends will be pleased to know that she is recovering nicely.

A pretty wedding took place on Wednesday, at the home of Mrs Godfrey Bentley, RR1, Streetsville, when her daughter, Miss Irene Eleanor was united in holy wedlock to Mr. Reginald Broadbear, Streetsville.

Mrs. Carl Brix was taken to a Hamilton hospital this week for treatment. Her many friends wish for her a speedy and permanent recovery.

The funeral of the late Mrs. Mary Elma March of Stratford took place to Noval cemetery on Peel-Halton Town Line, yesterday. Deceased was a native of Norval

The Village Treasurer announces that 48% of the total 1937 Tax Roll was paid in on the first instalment due on June 1st. The total roll amounted to $17,154.00. of which $7,760.00 was received in cash and $473.00 allowed in discounts.

Mr. Moore, of the Dominion Sash Limited staff, and Mr. Vic Bonham are attending the meeting of the Grand Orange Lodge at Owen Sound this week. Both gentlemen have high offices in this Order. Mr. Moore belongs to Midland Lodge.

One car sideswiped another on Wednesday morning below the village. The driver of the car that was hit followed the other man up and they settled their differences on the roadway in front of the Post Office. One man lost his hat and we think he lost his head as well. After the fracas, we noticed blood spots on the pavement. There may be a court case as a result.

Last week John Sproule, Erindale advertised a McLaughlin buggy for sale in The Review and almost as soon as he got his paper from the mail box there was a man there from Streetsville to buy it. The buggy was in Streetsville that night and Mr. Sproule had the money in his pocket. John says it pays to advertise—when you advertise in the right paper.

Bro.(Rev.) T.D. Jones gave a very interesting and instructive address on Masonry, Tuesday evening, at the regular meeting of River Park Lodge, here. The junior officers exemplified degree work in a very able manner and proved to brethren present they will be able to uphold the dignity of the Lodge when they are advanced to a higher office. The regular meetings have been suspended till the first Tuesday in September. The lodge will attend divine service at the United Church on Sunday evening June 27th

Lewes A. Pope

Another familiar figure on our streets has passed away, in the person of Mr. Lewes Albert Pope, blacksmith, who had been a resident of Streetsville for 28 years. He was born in Milton and was in his 78th year. He started in business for himself at the age of 19 and kept at it until the end. He had never had any serious illness until a few days ago. He was taken to St. Michael's Hospital on May 24th, and was to have a blood transfusion on the 31st when, with his wife and family by his side, he took a sudden change for the worse and passed away.

The funeral took place this Thursday afternoon. Service was held at the home with Rev. T. D. Jones of the United Church, officiating.

Interment was made in Streetsville cemetery.

Besides his widow, who formerly was Miss Emma Lyons, of Munn's Corners, Trafalgar, two sons, Anson and Leonard, Streetsville, and one daughter, Mrs. R. Whitely, Toronto survive.

Mr. and Mrs. Pope had a long and happy married life. In September 1935, celebrated their golden wedding—Before coming to Streetsville they resided at Erindale for several years. Mr. Pope never took a holiday and was never separated from his wife for more than a day or two at a time. He loved his home, and we would say he was a good citizen.

Mr. Pope was a member of the Canadian Order of Foresters and a Liberal in politics. He came of good parentage. His father was the youngest of a family of 22

Love Huntress

By H. GLYNN-WARD

Claudia Townsend meets Dick Whalen at a hockey game in Seattle one night. Her interest in Dick infuriates Wallace Bornell, rich young lumberman, who wants to marry her. To get Dick out of the way, Wallace gives him a job in one of his lumber camps in British Columbia. At the camp, Dick accidentally discovers that Bornell's men are working stolen timber lands. He asks for an explanation, but Braddock, the boss, puts him off and next day leaves for Seattle. The following day, Claudia stops in at Bornell's office and, by chance, overhears Bornell and Braddock plotting to do away with Dick. Claudia goes to the camp at Burns Lake to warn Dick. At the camp, she learns from Ching, the Chinese cook, that Braddock, who has arrived first, has sent Dick off on a long trip, with a man, Moriarty, who hates him. Moriarty has instructions to "Come back alone!"

CHAPTER XI

What a strange white world this was, Claudia thought, nothing alive now but she—and a Chinese cook! It was a primitive world—passions unrestrained, murder, revenge, love. Mankind back again in the primeval elements.

"I t'ink you one velly clever woman, missee!" said Ching presently, turning with a chuckle. She noticed the band of ice on his muffler where his breath had frozen, put up her hand to feel the tendrils of hair under her cap all stiff with ice.

"You think they will come after us?" she asked anxiously.

"Maybe—maybe not. Not savvee where we go. No one t'ink ole Ching go with Missee! All busy with fire!"

It took about half an hour to cross the lake at the speed they were going, then Ching turned to help her up the bank. They were in the woods again, threading their way through thin timber where the going was not bad but necessarily slower. Again Ching flashed his light, showed her the tracks, winding in among the trees.

"I go ahead," he told her. "You follow."

She left it to him, following his little figure in and out among the trees. Dead silence all around them, no sound but the swishing of the snow under skis and snowshoes. . . . Would they be in time, she asked, with every heart-beat. What might be happening on ahead somewhere! The thought spurred her on, made her forget the cold, the distance they had come without a halt.

Fortunately Claudia was in excellent athletic trim, otherwise she could not have kept pace with the tireless little figure in front of her. Ching Lo went like an automaton, holding the flashlight pointed at the snow in front of him. She wondered that his hand did not stiffen, even in his woolly mittens, because her own fingers were beginning to feel numb from holding her ski-poles.

She stumbled more than once, driving her ski point into a stump, sometimes just saving herself from a fall. Always Ching turned to help her. At last she spoke, begging for a minute's rest.

"Better you keep moving, missee, fleeze now if sit for rest!"

He was right, she knew. He slackened speed, and she moved after him, feeling the bitterness of the cold at once with the slower pace. They had gone now all of six miles from the camp. And still the tracks led on. . . .

All at once Ching Lo stopped dead. He held up his hand.

"Listen!" he said in a whisper.

From far off came a faint tap-tap . . . tap-tap. . . .

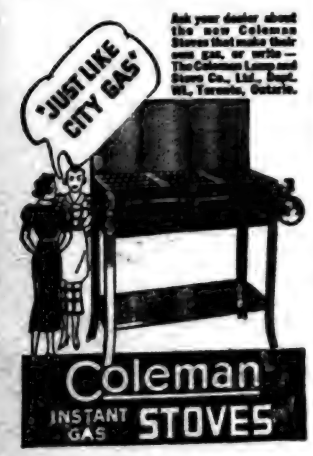
"Axe!" he whispered. "Quick now!"

He was off again like a gliding shadow among the trees, guided only by the direction of the sound. Claudia followed as best she could, her breath coming quickly in her excitement and effort to keep up with Ching. She felt that he had guessed something definite from that regular tap-tap that sounded monotonously—nearer now.

What had Ching Lo sensed? What was going on in the mind of that little shadow weaving his way through the trees? There were only two men in the woods here at this time — which of them was cutting a tree down? And what of the other?

Almost sobbing with anxiety Claudia threaded her way after Ching Lo. The tapping continued, nearer, louder. They must be almost upon them now.

The Chinese turned, whipped off his mitten and laid his finger across his lips. Claudia nodded. He had silenced her at the very moment when she wanted to scream out! Ching Lo had assumed naturally the position of leader. Claudia gave him her full trust. He had quickened his pace; Claudia knew somehow that he felt as she did—they must get there before that tapping stopped!



Then through the trees she caught the red glow of a fire—her heart leaped, and she sped on towards that flickering light. Ching Lo had vanished, but she no longer looked for him. She wanted only to reach the fire.

She had to skirt a thick group of poplars, and then there was a great fallen log to be negotiated. As she came up to it, she saw the flickering fire in full view, saw by its light the figure of a man swinging an axe, chopping at a tree. That man was Dick—Dick Whalen!

She stood there, weak with relief, and would have called out but that her breath was coming too quickly, and she felt the tears stinging her eyes. Also the Chinese had enjoined silence! Ching Lo, where was he? She looked round her among the dark trees—looked back at Dick swinging his axe. Then she saw a sight that froze her stiff with horror!

Another figure, a man who came out of the shadows just behind Dick—a man with an axe raised with both arms above his head—behind Dick—crept slowly nearer—nearer. Claudia tried to scream a warning, but no sound came. The man raised his axe still higher. The tree needed but one more stroke of the axe to fell it. It was swaying, and she knew that the moment Dick stopped swinging his axe and let it fall, the figure behind would strike!

(To be concluded)

Housewife Paying More To Fill Grocery Basket

WASHINGTON. — The U.S. bureau of agricultural economics reports the business upswing has levelled off, but commerce department officials said the industrial pace has quickened in recent months.

The bureau said in a monthly survey: "The marked upswing in business which began late last summer apparently is not continuing."

Whether the development will prove a minor setback or a serious interruption in the business upturn, it said, will depend on the amount of increase in private spending for construction and capital goods.

Parts of the present business slack may be due to expansion of consumer goods lines at a faster clip than construction and capital goods, the ureau said.

Commerce department officials agreed the heavy goods have not moved upward as rapidly as consumer goods. They asserted, however, that in the aggregate business is lengthening its stride.

Industrial production for the first 1937 quarter was 21.9 per cent. over the same 1936 period, these officials said, and this rate of increase was maintained through April and early May. This advance, they added, is greater than that during the last half of 1936.

Cost of filling the U.S. housewife's grocery basket is the highest in six years, reflecting the tribute levied against the consumer's pocketbook by the 1936 drought, a study of food prices in Chicago wholesale and retail markets disclosed.

A U.S. department of agriculture survey showed the market basket's cost is about 10 per cent. higher than a year ago and 50 per cent. higher than the low point of early 1933.

Mr. Aberhart says he has no desire for a general election in Alberta. This is one item in his policy which we can understand.—Ottawa Journal.

Crocheted Beret and Bag Make Up Laura Wheeler "Love Set"

CROCHETED ACCESSORIES — PATTERN 1181

It's a "Love Set"—this matching beret and bag! You'll love crocheting it, too—in a simple crochet stitch, alternated with puff stitches. Mother's Role Becoming Harder

Speaker Predicts Much Hardship For Mother in 1950

WINDSOR.—Life is going to ask a great deal more of the mother of 1950 than is asked of mothers in 1937, Mrs. W. E. Mathews told a large gathering of mothers and daughters here.

"It is going to be much harder for a mother in 1950 to bring her daughter up in the fear and admonition of the Lord than it is to do so today," Mrs. Mathews said. She is the wife of a former pastor of Temple Baptist Church and is a mother. She now resides with her family in Detroit.

"Life has demanded a great more of me than I had any conception of when I was a young girl but it is going to ask a great deal more of you," she declared to the daughters assembled. "More and more, the world is becoming a place for the woman who is prepared. By that I mean we must be able to do something exceptionally well. The world is asking for specialed workers.

"If I had the opportunity to live my life over again, I would know some one thing and be able to do it in the very best possible way in which it could be done. I would also have more interests aside from my chosen career. I would have vocations begun when I was young so that I would have numerous things to turn to in later years when such things are so much needed to withstand life's knocks and bumps.

'For you who are not trained for special work it is going to be a rude awakening some day to wake up and find that your best isn't just good enough. There are t o many already like that. Positions are not waiting for such as them.

"There is not an adult today who has reached maturity without some handicap," Mrs. Mathews said, "something that if allowed to grow from youth to old age, will drag and pull the individual down all through life.

"In some it is just plain laziness, and to be quite frank, I think I could qualify very well in that class myself. But if you will take the advice of an older person, don't let that habit reach into your life. I would give all my gray hairs if I could just be a girl of 14 again and take advantage of the leisure that was mine. I had my tasks to do because I was brought up on a farm, but there were times when I had nothing to do but sit and rock time away in a chair.

"Others there are who let a snappy, quick temper ruin their lives because they will not curb their feelings. Scores of other handicaps are the common lot of all of us. You all know them.

"But there are others who seem to thrive among the thorns of life. Those who have an unbeatable philosophy. Can you find that secret? It is life's greatest gift — a philosophy of life that will not let life beat you even in its worst moments.. My wish for all of you is that you may find it."

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

To Teach Jobless Domestic Science

Young Calgary Woman Lawyer Is Advancing New Plan

CALGARY. — Establishment of a cottage school where unemployed girls would be taught domestic science is advocated by Miss Mary Duncan, young Calgary woman lawyer. Something definite, besides clubs, is needed for young girls who are jobless, she believes.

Miss Duncan expects to start such a school this summer where girls would be taught cooking, sewing, designing, interior decorating, and how to meet people and how to entertain.

"If the girls are not working," she said in an interview here, "they may as well be doing something worthwhile for themselves and the community."

At first volunteer workers will be obtained to teach the girls, if Miss Duncan is successful with her plans to establish the school, but later she hopes to interest the government in what she believes will prove a worthwhile enterprise, and secure teaching aid.

An appeal for furniture and equipment will be made. "Practically any old things will do to begin with," she said. "We'll paint them and fix them and probably learn a great deal in the process."

Not all salmon spend their lives alternately in fresh and salt water. In Maine, Canada and Norway are landlocked salmon that spend their entire lives in fresh water.

The fingerprint is a sure method of identification and files of the Bureau of Investigation of the Department of Justice, in Washington, contain more than 4,000,000 sets of them.

Woman's World

By Mair M. Morgan

Sophisticated Sweets Improve Early Summer Menus

In the early summer season, something with a dash and even "swank" should pep up the dinner menu. The desserts suggested here have a banquet air with their sophisticated flavor combinations, . yet they are very easy to make. Ginger implies sunny lands, and fine preserved ginger bring a prosperous feeling—an emotion that permits forgetfulness of the long rainy season we've had.

Ginger Minute Tapioca is flavorsome and nutritious — a splendid finish for a light dinner or lunch.

- 1-3 cup quick-cooking tapioca
- 1-3 cup sugar
- 1-4 teaspoon salt
- 3 thin strips orange peel
- 1 egg yolk
- 1 egg white, stiffly beaten
- 1-4 cup orange juice
- 1 1-3 tablespoons ginger syrup
- 2 tablespoons chopped preserved ginger
- 2 cups milk
- 1-4 cup cream whipped

Combine quick-cooking tapioca, sugar, salt, orange peel, egg yolk, and mix in top of double boiler and stir enough to break egg yolk. Place over rapidly boiling water, bring to boiling point (allow 3 to 5 minutes) and cook 5 minutes, stirring frequently. Remove from boiling water and remove peel. Add orange juice, ginger syrup, and preserved ginger. Fold small amount into egg whites, add remaining tapioca mixture and blend. Cool—mixture thickens as it cools. When cold, fold in cream. Will serve 6.

New rhubarb on the market now is a little costly, but it has a welcome summery tang. This simple dessert gives a delicious fresh fruit sweet, most attractive in color and flavor.

- 1-2 cup sugar
- 1-2 cup water
- 1 pound rhubarb, cut in small pieces
- 1 pkg. quick-setting strawberry jelly powder

Combine sugar and water and heat until sugar has dissolved. Add rhubarb and simmer until tender. Measure; add water to make 2 cups. Dissolve jelly powder in warm rhubarb mixture — only quick-setting jelly powder that dissolves in warm solution will be satisfactory. Turn into mold. Chill until firm. Unmold. Serves 6.

Jellied Ginger Pears gives a fine finish to a chicken dinner.

- 8 halves canned pears, drained
- 1 pint warm pear juice and water
- 1 tablespoon preserved ginger, chopped
- 2 tablespoons ginger syrup
- 1-8 teaspoon salt
- 1 pkg. quick-setting lemon jelly powder.

Heat pears, pear juice and ginger syrup to boiling. Remove pears; add salt. Dissolve quick-setting jelly powder in 1 pint warm pear juice and water. Pour into mold and arrange pears in jelly mixture, having rounded side up. Chill until firm. Serve plain or with whipped cream. Serves 8.

SUPPER DISH

Sausage Rarebit

- 1 pound sausage
- 2 tablespoons butter
- 1-2 pound soft, mild cheese, cut in pieces
- 1 cup thin cream
- 1-4 teaspoon salt
- Few grains cayenne
- 3 eggs, slightly beaten

Cook sausage until done in frying pan. Melt butter, add cheese and seasonings. As soon as the cheese melts, add cream gradually and slightly beaten eggs. When mixture is smooth, add the cooked sausage and serve on toast points.

QUICK SALADS

These simple, inexpensive, yet very tasty and aristocratic looking salads may be made quickly for the bridge party, or unexpected company.

Starter Salad

Crisp lettuce, watercress, pineapple, grapefruit cubes, sliced stuffed olives and tart French dressing are the ingredients. Combine the fruits and greens in a salad bowl and toss lightly with dressing shortly before serving.

Meal-in-one Salad

This salad calls for shredded cabbage, tiny shrimps, pineapple, sliced celery, and tart French dressing plus curry powder (1-4 teaspoon to 1 cup French dressing). Combine the first named ingredients in a salad bowl and toss lightly with the dressing shortly before serving. Be sure the cabbage is crisp.

Beautifying The Job

Shakespeare once asked, ironically, "What's in a name?" The answer of today seems to be, "Everything".

Samuel Fassler, commissioner of buildings in Manhatan, urged the other day that master plumbers adopt for themselves the new name of "sanitary engineer," so as to make a better impression on the public.

And why not? The whole idea these days seems to be to beautify your job with a fancy title. We have seen the press agent blossoming out as a public relations counsel, the undertaken becomes a mortician, the hairdresser becomes a beautician and the movie actress becomes an artist. If the plumber wishes to become a sanitary engineer, why shouldn't he?

"How do you keep your outhouse clean?"

"I use GILLETT'S LYE regularly . . . it keeps things clean and sanitary"

Outside closets kept clean this easy way!

THERE'S no risk of offensive outhouse odors when you use Gillett's Pure Flake Lye regularly. Just sprinkle half a tin over contents of closet—once a week. There's no need to remove contents—Gillett's does it for you.

Gillett's Lye in the household saves hours of heavy work—clears clogged drains, scours dirty pots and pans, quickly flushes away ugly toilet stains. Keep a tin handy.

Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet tells how to use this powerful cleanser for dozens of tasks. Send for a free copy to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont.

SUNDAY SCHOOL LESSON

JOSEPH'S EXALTATION
June 6th

"Now therefore let Pharaoh look out a man discreet and wise, and set him over the land of Egypt. Let Pharaoh do this, and let him appoint overseers over the land, and take up the fifth part of the land of Egypt in the seven plenteous years." — Literally, the phrase should read: "Let him fifth the land, i.e., levy a tax upon its produce to that extent which was double the annual impost exacted from Egyptian farmers, but which the unprecedented fertility of the soil enabled them to bear without complaint."—Thomas Whitelaw.

"And let them gather all the food of these good years that come, and lay up grain under the hand of Pharaoh for food in the cities, and let them keep it. And the food shall be a store to the land against the seven years of famine, which shall be in the land of Egypt; that the land perish not through the famine. And the thing was good in the eyes of Pharaoh, and in the eyes of all his servants." —The advice which Joseph gave to Pharaoh is found carried out in the latter part of this chapter, and in chapter 47.

Such an immediate exaltation to a place of supreme power and influence as is described in the following verses is difficult to understand by those of us who live in such a time as this, and are citizens of a nation in which high office is generally obtained by election. Yet the entire episode "and the description of Joseph's function and position as vizier are in full accord with all that we know concerning the duties and privileges of the state officials standing next after the king. In this connection we are particularly enlightened by detailed regulations for the office of vizier preserved in the tomb of inscriptions of Rekh-My-Ra, the vizier of Thutmosis III (1501-1447 B.C.). After the king, the vizier is the highest dignitary in the state with all the rights and powers accruing to the king. In a world, he replaces the king. In the king's absence, the vizier is the actual ruler, and in the king's absence the vizier is the actual ruler, and in the king's presence no person and no matter can reach the king except through the vizier's mediation. It is the vizier who issues all orders and he it is who carries out the royal commands. Every officer from the highest to the lowest must report to him.

"And Pharaoh said unto his servants, Can we find such a one as this, a man in whom the spirit of God is? And Pharaoh said unto Joseph, Forasmuch as God hath showed thee all this, there is none so discreet and wise as thou. Thou shalt be over my house, and according unto thy word shall all my people be ruled: only in the throne will I be greater than thou. And Pharaoh said unto Joseph, See, I have set thee over all the land of Egypt. And Pharaoh took off his signet ring from his hand, and put it upon Joseph's hand, and arrayed him in vestures of fine linen, and put a gold chain about his neck." —The signet ring signified not only the confidence of the crown, but it was also a token of high privilege, the bestowal of which rested with the king alone."

"And he made him to ride in the second chariot which he had; and they cried before him, Bow the knee: and set him over all the land of Egypt." —Joseph was driven in a royal chariot through the streets with runners calling for attention in front of him. There are many pictures showing royal chariots in sumptuous official apparel, the horses fully caparisoned as on solemn occasions of state ceremonies. It is noteworthy that some old Egyptian customs have been preserved to this very day in the valley of the Nile. In the same manner as runners were employed in front of Joseph's chariot, so throughout the ages right down to the khedives and viceroys of modern times, runners have been employed to clear the way for kings and high personages. Probably Lord Kitchener was the last counterpart of Joseph to have the runners with swords in their hands running in front of his carriage." The very word here translated "bow the knee," which is the word "abrek", meaning, literally, "mind thee", is the exact equivalent of the Arabic word "balak" which is used today by vehicle-drivers in Cairo when shouting to the pedestrians, by which they mean "Look up!"

"And Pharaoh said unto Joseph, I am Pharaoh, and without thee shall no man lift up his hand or his foot in all the land of Egypt."— The full meaning of this verse is explained in the quotation given above from Professor Yahuda. The meaning of the new name which Paharoh gave to Joseph has been vigorously interpreted. Some suggest that it means "the salvation of life," or " the salvation of the world," or "the food of the living." Professor Yahuda combines all these and says that it probably means "food of the land is this living one," conveying the idea that Joseph was the feeder of Egypt. Joseph's marriage to Asenath is only another evidence of the high position in which he had been placed, for the priests were the highest and most privileged class in Egypt, and intermarriage with this caste gave him the very highest social position. The name of his first child, Manasseh, "making to forget"; the name of his second child, Ephraim, means "to be fruitful." Our lesson closes with a brief notice of Joseph's remarkable administration over Egypt in preparation for and during the years of famine. To Pharaoh belongs the proud distinction of instituting the world's first ministry of food with Joseph as food-controller. There is always wisdom in providing for the future years. What is true of corn is also true of character. Rationing is never a pleasant experience. It means doing without some things for a while and partaking sparingly of others. Pleasure hours may have to be rationed, but only for later advantage, to stave off idleness and ignorance, and to secure the benefits of a good education.

Movie-radio gossip

By DOROTHY

Only the three or four ranking stars in any studio are given little portable bungalow dressing rooms parked right at the side of the set where they are working, so Robert Taylor was rather surprised when he went out to work in 'Broadway Melody" to find George Murphy and Buddy Ebsen occupying a most elaborate one. Seeking out the business manager, he asked if he couldn't have a dressing room on the set since he had so many costume changes to make. "What's the matter with the one we gave you?" the business manager demanded angrily, stalking out on the set. Then he spied Ebsen and Murphy and bellowed: "Those clowns are at it again."

When Lanny Ross abandons the "Show Boat" program shortly, Charles Winninger, the original beloved Cap't Andy, is expected to return, but Eddie Cantor thinks that Winninger will be much to busy making pictures. He says Winninger is a knockout in the new Cantor picture, "Ali Baba Goes to Town."

James Stewart is so worried for fear M-G-M will change their minds about lending him to R K O to play opposite Ginger Rogers that he has stopped having the phone answered at his house, and spends most of his time in a far away corner of the RKO lot where they are unlikely to locate him. To add further difficulties to the lives of phone studio operators, Buddy Ebsen spends most of his time on his new boat.

Ginger Rogers

ODDS AND ENDS—Warner Brothers wouldn't ask Bette Davis to take a supporting role in "Gentlemen After Midnight," the new Leslie Howard-Olivia de Havilland picture, but she surprised them by asking for it . . . Basil Rathbone has a chance to play a hero at last in Bobby Breen's new picture, "Make a Wish" . . . Paul Muni rehearses his lines by speaking them into a home recording machine, then listening to them . . . Sidney Blackmer rehearses in a room with five mirrors placed at various angles so that he can see himself all around . . . Betty Furness has a charm bracelet from which dangle a dozen or so fraternity pins. She claims she picked them up at a pawnshop, but considering her popularity with college boys all the folks around the studio are frankly dubious. . . Victor Moore's son and daughter are making their screen debuts in his RKO picture, "Missus America" . . . John Beal recently rented the house formerly occupied by Charles Laughton in Hollywood, but didn't get around to explore the cellar until recently. He thought he might find mementoes of some of Laughton's horror roles, but confronted by weird sounds and a pair of flashing eyes, all he found was a mother cat with a litter of kittens.

Hare Hounds Dog For Share of His Dinner

Boy, 2-year-old collie, and Girl, 6-months-old rabbit, do their best to chase away that tale of hares and hounds by eating out of the same dinner bowl in yard of their owner, Gregory Bissonette, of Los Angeles.

Claims Co-Eds Are Spiritless

Woman Professor Declares That Modern College Girls Lack Fire

LINCOLN, Neb.—The modern college girl lacks fire and spirit, in the opinion of Dr. Louise Pound, professor of English language at Nebraska University.

Dr. Pound, sister of Roscoe Pound, former dean of the Harvard law school, recalled when co-eds always were fighting and plotting something. Today's maidens, she said, tend to be disinterested in everything.

"It is most discouraging," she declared, "to have the young lady in my front row applying lipstick the entire period during my class. In reading some beautiful poem, when I am trying to keep myself from being moved to tears, or am trying to move my audience to tears, I find it a fascinating distraction to watch this girl smearing her mouth, oblivious."

Sightless Folks "Making Good"

General Public Does Not Realize Their Work in Professional Fields

LONDON, Eng. — While many persons know of the skill of blind craftsmen, the extent to which sightless men and women are today "making good" in professional fields, is not yet fully realized by the general public, according to the National Institute for the Blind here.

Since the World War, it is pointed out by the institute, 73 blind students in Britain have successfully graduated at the universities, most of them taking honors degrees.

Men and women studying for the professions receive help in many ways from the National Institute for the Blind. For example, a special students' library of Braille books is maintained. This has been built up by preparing a Braille hand-transcribed copy of every work which any blind student needs for his studies.

The professions most necessary to the blind are the Christian ministry, the law, and teaching. Prominent among the blind clergy is Canon Bolam, honorary chaplain to the National Institute. Many other blind rectors and vicars are successfully carryin odt parish duties in various parts of the country.

Music is another field in which blind men occupy high positions as composers or instrumentalists. A considerable number are organists and choirmosters, and for these the National Institute runs a special bureau.

Farm Problems

Conducted by
PROFESSOR HENRY C. BELL
with the co-operation of the various departments of Ontario Agricultural College

Question:—"How long does it take manure to produce nitrate in the soil? How does it give the nitrate, potash and phosphorus?"—L. B., Timiskaming Co.

Answer:—The nitrogen of stock manure is quickly available, especially when it is applied to the soil in the spring when the prevailing temperature is rising. Bacterial action is very rapid at this time, and nitrate nitrogen which is a product of bacterial action, therefore, becomes rapidly available. The phosphorus and potash become available as the plant materials decay. They will not be quite so quickly available as nitrogen, but will surely be sufficiently available to nourish the crop to which they are applied.

You probably know that if manure is fairly well stored so as to take care of the liquid manure, it will contain from 10 to 15 lbs. potash per ton. Generally stock manure is quite low in phosphorus, however, since the animal removes phosphorus from its feed in order to build its bone. Manure needs supplementing with phosphorus carriers especially.

Question:—"I have been applying chemical fertilizer (K.N.P.) in the following manner—dusting it on the lawn by shaking through a coarse gunney sacking bag. The result has been that the grass has burned. I followed the application of the fertilizer with liberal watering with garden hose. How can this fertilizer be applied without damaging the grass? Will the application of such fertilizer kill out moss? How much should be applied each time and how often? When is the best time?—G. W. M., Northumberland Co.

Answer:—I would say that it is possible that you have applied the mixture of the carriers N-P-K in too concentrated a form. If you use Sulphate of Ammonia as a carrier of nitrogen for instance, and apply it fairly liberally, its first action would be to burn the grass. However, the grass should soon recover and show much healthier and more vigorous growth.

If you are using a mixed fertilizer and dust it on the lawn after the dew has dried off, following this with a good sprinkling of water, you should have no trouble with burning. If you apply it at about two ounces per sq. yard, you will be applying it at the rate of 600 lbs. per acre.

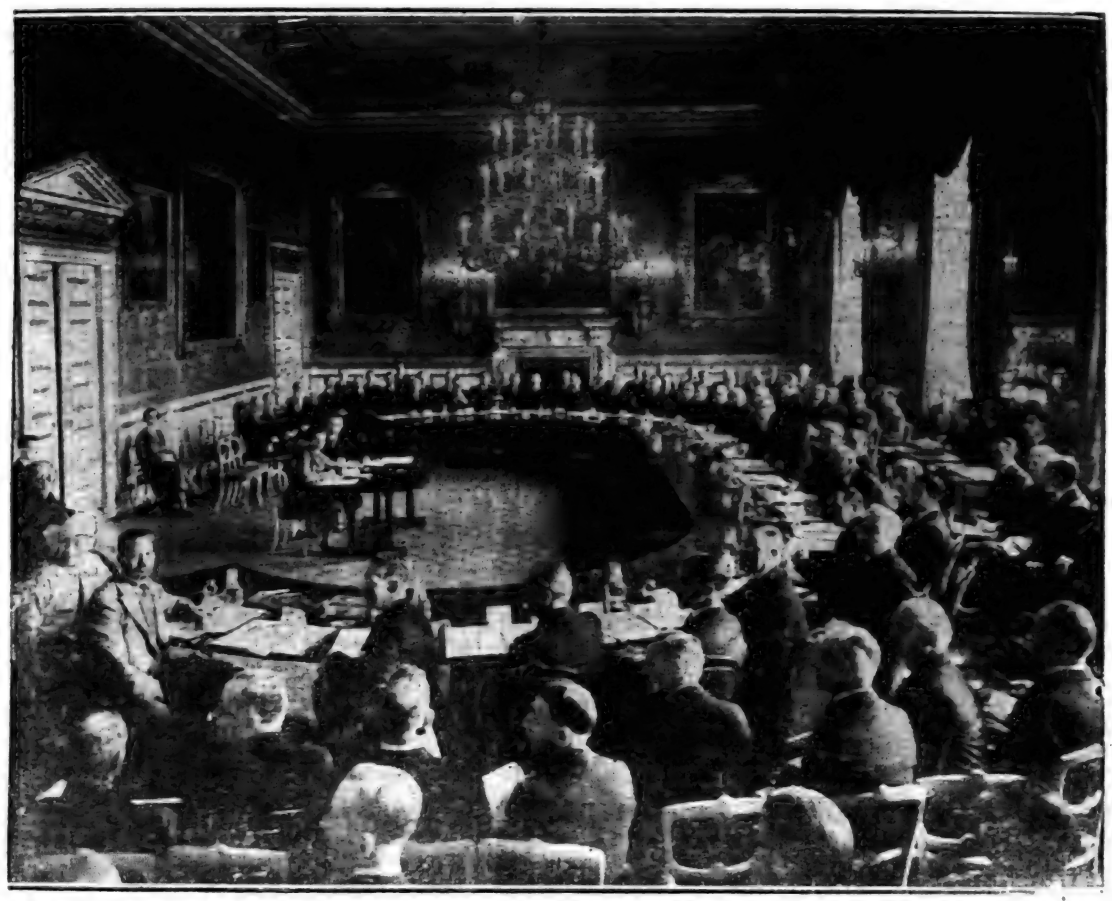
If the fertilizer is acid in reaction, it will not kill out moss to any extent. To make it alkaline, however, if you care to apply a small dressing of lime, you will find this will curtail the growth of the moss. In other words, moss does not thrive under alkaline conditions. Hence the application of lime would tend to kill it out. I would suggest that you give the lawn a treatment as early as possible and again in about a month, and possibly again about the middle of July. This should bring it back in good form.

Girl of Six Writes Better Backwards

MONTAGUE, P.E.I., — Miss Novella Cunningham, teacher of grades one and two at Montague Memorial School, uses a mirror when she checks six-year-old Veda Allen's examination paper. Veda is a daughter of Mr. and Mrs. Alvah Allen.

The grade one pupil entered school last September and was getting along fine until January tests when she was intent on writing an examination paper and found it was more convenient to write it backwards. She is left handed.

Her writing is good for a first year pupil and she is one of the leaders of her class in reading and arithmetic, Miss Cunningham reports. She can read the "mirror writing" as easily as the other and appears quite surprised when grownups pick out a word in a sentence and ask her what it is.



"She tries to please by writing the way she is asked, but her examination papers are quite often about half and half," Miss Cunningham said.

Night Work On Illinois Farm

A farmer near Wheaton, Ill., plowing a cornfield with the aid of searchlights. Farmers throughout the area are working day and night to make up for the late start caused by the heavy rains earlier in the season.

The Empire's Statesmen Conference in London

The first plenary session of the "Coronation" Imperial Conference was held in the Queen Anne drawingroom of St. James' Palace—scene of the historic Indian Round-table Conference. The Prime Ministers of the British Empire met under the chairmanship of Rt. Hon. Stanley Baldwin, Prime Minister of the Mother Country. This picture shows a complete general view of the session. Left foreground: The Indian Delegates; centre foreground, the Australian delegates. On right, Mr. Baldwin (standing- is surrounded by members of the British Cabinet. At Mr. Baldwin's right hand are Canada's representatives.

Will all persons owing accounts at The Review Office please call, or send remittance at once, as we must have money.

Holiday at Banff and Lake Louise

The pleasure of a mile-high holiday in the Canadian Rockies this summer will attract thousands of tourists from all over the world. They will distribute themselves between the Banff Springs Hotel overlooking the rolling peak-surrounded Bow Valley, beautiful Chateau Lake Louise on the shore of the lake of the same name, and six bungalow camps of charm and comfort in settings as lovely as they are different from each other.

Year by year the Canadian Rockies are becoming the most popular summer playground of the continent, due to the unparalleled beauty of the scenery, and the splendid opportunities for a real mountain holiday with riding, hiking, mountain climbing, swimming, golf, and tennis.

At Banff Springs Hotel, which will be open from June 13 to September 15, golf on a course that ranks with the best in the country is a chief attraction. Not to be forgotten, however, are the joys of riding and hiking to out-of-way places, mountain climbing, tennis on championship courts, fishing in tumultuous mountain streams and lakes that derive their rich colors from glaciers, and motoring, topped off by a swim in the sulphur or natural water pools and dancing in the large ball room.

Chateau Lake Louise, open from June 20 to September 15, is situated on Lake Louise, just opposite Victoria Glacier. Encircled by towering snow-clad peaks, it possesses a sheer breath-taking beauty and in addition attractions peculiarly its own. It is an excellent centre for sorties on horseback or by foot to the scenic wonders of the district.

Emerald Lake Chalet and bungalow camps at Radium Hot Springs, Yoho Valley, Lake Wapta, Lake O'Hara and Moraine Lake will be open from June 20 to September 15. Off the beaten track, they combine a restful holiday with all the thrills of exploring a beautiful, untamed, mountainous land.

Five special events during the season will be: Calgary Stampede, July 6-11; Trail Riders' official outing, July 31-August 4; Trail Hikers' official outing, August 7-10; Indian Days at Banff, July 24-26; and Golf Week, with around 50 prises up for competition, August 16 to 22.

THE DOUBLE-BARRED CROSS

International Symbol of the Crusade against Tuberculosis

As armies march across the pages of history, fighting for their rights or their wrongs as the case may be, one custom seems to have been common to them all: each carried flags and banners on which appeared the emblem of the cause. Good or bad, the cause was always blazoned forth in terms of heraldry which gradually became a highly specialized study. After the dawn of the Christian era the cross became a tremendously popular symbol and with this emblem upon their banner, many a doughty knight rode forth to do battle for his principles and to save or reclaim the Holy Land from the Infidel.

Crosses of all shapes, sizes and ornamentations have been used by innumerable families, cities, orders, guilds, nations and causes. The Spaniards found a religious symbol among the Aztecs which was very similar to our cross. The swastika of Hitlerism is an old symbol made of several crosses. Thus the habit of choosing emblems has carried over into our modern civilization and clubs and such peacetime associations still follow that age-old custom.

It was therefore quite the natural thing that as the war against tuberculosis gathered momentum, and nation after nation took up the cause, that some international emblem should be chosen which would be symbolic. The matter was given careful consideration for it was important that the symbol should be internationally accepted and have a universal appeal, and yet it should be decidedly distinct from any already adopted international symbol such as the Red Cross.

It would seem that the tuberculosis campaigners of the eighteen-nineties or thereabout, deliberately went out after a symbol that would have something like the significance and universal acceptance of the Red (Geneva) Cross, and yet be quite distinguishable from it. They had to avoid not only the Red Cross, but those of the various saints, George, Anthony, Andrew and so on. They had also to avoid the Celtic, the Greek, the Maltese and the Papal. In the words of Dr. D. A. Stewart, 'After that, it would seem that what they thought they might require they went and took.' And so we have the patriarchal cross, the Lorraine cross of the two crusades accomplished, now a symbol in every land of a new popular, enthusiastic and successful crusade against entrenched tuberculosis, a new crusade to win back for all the people of the world the Holy Land of Health.'

This is the banner under which the Muskoka, the Toronto and the Queen Mary Hospitals for Consumptives have marched these many years—the banner under which they and other sanatorium and tuberculosis workers' organizations in the Province have won such marked success.

But victory can only be won with the continued effort and the financial support of the people at large.

Your contribution to National Sanitarium Association, 223 College St., Toronto will be greatly appreciated.

Local News

Hall Family Re-Union

The annual Hall Family ReUnion will be held at the home of Clarence Hall, 7th Line, Trafalgar, Agerton on Saturday, June 5th. Dinner served at 12 o'clock noon, supper at 5.30 standard time. Provide lunch. Bring your musical instruments. A good time is promised so come along and enjoy the day with our own kin. Baseball games, races for children and a musical program provided.

Streetsville Man Lucky Winner

Congratulations to Mr. Hugh Q Burns, who drew a lucky ticket on "Sandsprite" in the Irish Hospital Sweepstakes on the Epsom Derby. Mr. Burns and 13 other employes of the Paramount Film Exchange, Toronto, won a total of $75,000.

Their lucky ticket was Number 13 and we suppose they will be taking a long holiday. Each of them will receive over $5000.00.

Public Library

Open every Tuesday Thursday and Saturday from three to five and seven to nine.

Snider's

Previous to her marriage to Mr. Reg. Broadbear, at Wesley Church, on Wednesday, June 2nd, Miss Irene Bentley was guest of honor at several social functions last week. Among them were a miscellaneous shower given by the W.M.S. of Wesley church at the home of Mrs. A. R. Lunau; Misses Roberta and Louise Dunn, a cup and saucer shower; Mrs. Kenneth Skinner, of Port Credit, a miscellaneous shower, and the Trafalgar Y.P.U., a kitchen shower.

Miss Ruth Clifton visited for the week-end wtih Miss Luena Conover.

Peel Park, Streetsville, has been selected by the Trafalgar Y.P.U. for their annual picnic to be held on Saturday, June 12th. The young people of Prospect Park United Church, Toronto, will join with them.

Among those from Snider's and Trafalgar community who attended the pianoforte recital given by the pupils of Miss Edna Lawrence, A.T.C.M., at Oakville recently, were Rev. and Mrs. H. S. Lovering, Mrs. C. Pickering, Miss Eileen Pickering and Mrs. F. Allen.

W. Thomas, Jr., has secured a position with the T. Eaton Company, Toronto.

Mr. and Mrs. Cecil Fish, Mrs. W. Greensides and Mrs. Horace Greensides were guests on Friday evening at the presentation and farewell to Mr. and Mrs. T. H. Wilson, base line, who have sold their farm and are removing to Streetsville.

Mr. and Mrs. Harold Albertson and children, Toronto, were recent guests with Mr. and Mrs. Lorne Fish.

Beginning Sunday morning, June 6th, divine service will be held at Wesley Church at nine o'clock, standard time, followed by a session of the Sunday School.

Miss Grace Fish and Arnold Fish entertained the Junior Women's Institute and Junior Farmers at their meeting. Miss Mary Shea gave a talk on the motto at the girls' meeting. Mr. W. Hutchinson, lawyer, Milton, was the guest speaker for the joint meeting which followed. A recreational period was enjoyed and lunch served before dispersing.

Century Plant Believed to Be Oddest Ice House

The maguey or century plant is used in making ice at Durango City, Mexico, and is said to be the only icehouse of the kind in the world, notes a writer in the Indianapolis News.

When the century plant is about eight years old the leaves, from which the pulque has been taken, are spread out on straw in the plaza, in the public gardens and other open spaces, with the concave sides of the leaves uppermost. Then about two quarts of water is poured into each leaf and while freezing is unknown in the city, under any other natural conditions, the water freezes in the maguey leaves and in the morning hundreds of chunks of ice are gathered and put in adobe ice-holders, each about 20 feet deep and 20 feet square. The supply usually lasts until the middle of July or the first of August and is large enough to be a commercial factor in the ice market of the region of more than 30,000 persons.

Durango City is about 6,000 feet above sea level and at this altitude there is rapid cooling, after evaporation, to which the water is exposed by the broad, shallow surface of the leaves. This is believed to be the scientific explanation of the odd ice plant. There is a legend that the method was learned in the Seventeenth century by Father Jose Lopez, an elderly priest, who also was a scientist.

Measurement of Time Is as Old as Time Itself

Time's measurement goes back to the beginning of time itself. As for modern time measurement, its beginnings are considered to be tangled up in the mysticism, superstition and sun worship of the Chaldeans, says the Philadelphia Inquirer. This ancient people originated the week of seven days from the sun and moon and the five planets: Venus, Mars, Mercury, Jupiter and Saturn. These were their gods and they worshiped them. So they set aside one day each week for the worship of the sun, another for the moon and so on. The sun was their most important god and its day of worship was called sun day from which we get Sunday. The moon was the next important god and its worship day was called moon day or Monday.

The Chaldeans divided the time required for the sun to traverse its path through the belt of the ecliptic into the 12 constellations of the Zodiac. In this way they evolved the 12 months of the year. They also divided the day into 12 hours and then the hour into smaller units.

The Junior League

The Junior league originated among a small group of young women in New York city who in 1900 sent a large number of roses from a party to a hospital. Later they and others banded together "for mutual benefit and the good of the community." From giving entertainments for the benefit of a college settlement they extended their activities to many other forms of social aid. Similar organizations of young women were formed in other cities out of which grew a national association of leagues, each interested in its particular ways in the educational, cultural and civic conditions of its community and in volunteer charitable and other service.

Appointment of Notary Public

A notary public is a public officer who takes acknowledgement of, or otherwise attests or certifies, deeds and other writings, or copies of them, usually under his official seal, to make them authentic, and takes affidavits, depositions, and protests of negotiable paper. In the United States appointments are made by the governors of the states. The oath is as follows: "I do solemnly swear that I will support the Constitution of the United States and the Constitution of the state of ——, and that I will faithfully and impartially discharge the duty of notary public for —— county, according to the best of my skill and ability; so help me God."

Names of Streets in Brussels

The names of the streets in Brussels speak of everday life and everyday things. There are Fish street, Poultry street, Butter street and the Street of the Lost Bread. Another of Brussels' streets, that of the Six Young Men, tells of tragedy—of six youths who were out playing jokes one night and by accident smeared the face of an agent of the country's foreign ruler with tar. They were caught and hanged, and later the street in which they lived was named the Street of the Six Young Men in their memory.

Heresy in 1635

Roger Williams, founder of the Baptist Church in America, went on trial for heresy in Massachusetts Bay Colony in 1635 because he opposed persecution of Quakers. Four years before, Massachusetts had decreed that suffrage should be limited to church members. He was found guilty and banished, and the hanging or whipping of Quakers continued.

Twenty Years, Average Reign

A study of the lives of several hundred kings, emperors, czars and other monarchs who have ruled during the past 800 years reveals that their average reign was 20 years, an astonishingly long period considering the fact that the majority lived in constant danger and that about one third met violent deaths.—Collier's Weekly.

MARRIED

McCAULEY—DAVIE: At Streetsville on Wednesday, June 2, 1937, by Rev. J. Y. Fraser, Maud R. Davie, to George E. McCauley.

WHITEHEAD—ANDREWS — At High Park Avenue United Church, by the Rev. Dr. H. W. Avison, assisted by the Rev. J. R. Harris, on Saturday, June 5, 1937, Emma Roberta, daughter of the late Mr. and Mrs. Robert Andrews, to Mr. Lawrence Reginald Whitehead, son of the late Mr. and Mrs. Robert Whitehead, of Malton.

LET US SMILE

Freddie had been playing truant from school, and had spent the whole day fishing. On his way home he met one of his young cronies, who accosted him with the usual greeting: "Catch anything?"

At this Freddie, in all the consciousness of guilt, quickly responded: "No, I ain't been home yet."

NOTICE TO CREDITORS

In the Estate of HANNAH DEVINE late of the city of Toronto, in the county of York, (formerly of the Village of Streetsville, in the County of Peel), Spinster, deceased.

Creditors of HANNAH DEVINE, late of the said City of Toronto, Spinster, deceased, who died on or about the 26th day of April, 1937, are required to file their claims with the undersigned on or before the 3rd day of July, 1937, after which date the executor will distribute the assets of the estate of the said deceased.

Dated at Brampton this 7th day of June, A.D., 1937.

GRAHAM, GRAHAM & BOWYER,
Brampton, Ont.,
Solicitors for the executor.

The Open Column

Mr. Rowe is with us again, via the rural mail delivery. Last week we got a pamphlet containing his speech at Artnur, and we feel a little better about Mr. Rowe and our Conservative antecedents than we did before. According to our Tory leader, he does not endorse any sort of organization that runs contrary to the law of the land, and holds no brief for the C.I.O. He does believe that the Canadian workman has the right to organize and appoint representatives by secret ballot. Which, it must be admitted, we all believed long ago, anyway. But the reason Mr. Rowe refused to make any very definite pronouncement on the Oshawa situation was, he says, that he did not want to embarrass the government at an embarrassing moment, or something to that effect.

At the same time we have a feeling that Hepburn is prepared for a bit of embarrassment. And, if our deductions are correct, he may expect it any time now. We can see no earthly use in inserting in papers an advertisement to the effect that there are farm jobs open for single unemployed citizens of the country. Our prediction on this point is that, if encouragement of single men to take farm jobs is carried out with any vigor, it will have the effect of infesting the countryside with a great many more transients, ostensibly travelling from place to place looking for work, but not looking hard enough to find it.

Farm jobs, somehow, do not appeal to many of the unemployed of our acquaintance. They had factory jobs before 1929 and '30, and they feel that they are again entitled to factory jobs. Besides, if they went on farms, they would have very much less chance of being johnny on the job to snatch the type of job they think they deserve, if such a job was offered them. So——.

And again, the farmers don't think a great deal of the single unemployed whose services they are expected to retain for legal tender. Good men, from the farmer's point of view are harder to get than this year's tax money. Many of the single men, or married men, for that matter, who are sent to farms to earn their bread by a bit of brow-sweating, get back on relief in the towns within a remarkably short space of time because the farmers to whom they are sent can't get enough work out of them to make them worth their keep—to the farmer.

WEDDINGS

Atkinson—Smith

A popular wedding took place Saturday, June 5th, at the home of Dr. and Mrs. S. H. Smith, when their eldest daughter, Miss Norma Anna Smith, became the bride of Mr. Leonard J. Atkinson, son of Mrs. H. Atkinson and the late Mr. Eli Atkinson of Streetsville. Rev. T. D. Jones, pastor of the Streetsville United Church, officiated. The service took place under an arch of white and purple lilac blooms, and the decorations of the home were carried out in lilacs.

The bride, who was unattended, was given in marriage by her father, and wore her travelling dress of navy blue triple sheer crepe, with blue felt hat and matching accessories. She carried a colonial nosegay bouquet. The wedding music was played by Miss Mary Crozier, Streetsville.

At the wedding reception which followed the ceremony the bride's mother received in a gown of navy flowered chiffon, with blue hat, assisted by Mrs. Atkinson, who wore black and white crepe, with black hat. Following a honeymoon at Kamlachie, on Lake Huron, Mr. and Mrs. Atkinson will make their home at Streetsville.

CROZIER—DORKIN — On Saturday, June 5th, at 2.30 in St. Mark's Anglican Church, Toronto, by the Rev. Mr. Rayson, Ann, daughter of Mr. and Mrs. James Dorkin, to Garnet A. Crozier, son of Mr. and Mrs. C. J. Crozier, Meadowvale, Ontario.

DIXIE

By the invitation of the board of the Old Stone church at Dixie, Mr. Perkins Bull will speak there on Sturday afternoon, 19th June.

Col. the Hon. T. L. Kennedy will take the chair and the speakers will be introduced by ex-alderman R. H. Graham, chairman of the church and cemetery board.

Mr. Bull's forthcoming volume, "From Strachan to Owen" tells the story of the devout settlers who put up the original log building by voluntary labour, and of the Church of England in Peel and throughout Canada.

In addition to Mr. Perkins Bull's address, there will be good music, vocal and instrumental, the details of which will be announced later.

Farm and Home Week at the Ontario Agricultural College, June 21-25, 1937

Again the Ontario Agricultural College is throwing open its doors for a special week of visits from the farm folks of the Province. June 21-25, inclusive, are the days, and the number of visitors should be larger than ever, since the work of the College and the Experimental Farm grows in extent and in value from year to year.

Perhaps special interest will center around the daily live stock parade. Never before has the College had such a fine array of breeding stock, and many farmers will be anxious to see the excellent offspring of such notable College sires as the Clydesdale stallion, "Craigie Realization" and the Shorthorn bull, "Millhills Ransom."

The ninety acres of field crop experiment plots will include some interesting new things, and the magnificent grounds and gardens will be at their best, with hundreds of varieties of roses and other flowering shrubs and trees to be inspected and enjoyed.

Besides these there will be many educational exhibits showing the work of various departments. Visitors will have an opportunity to ask questions of the men in charge of these exhibits and to learn what is being done about mineral deficiency; about improvement of soils and the use of fertilizers; about troublesome pests such as insects and nematodes; about pullorum disease in poultry and the most efficient methods of feeding chicks; about off flavours in butter and the manufacture of blue cheese; and about many other important problems which the College is working on at the present time.

Altogether it will be a great week for the farmers of Ontario and for the College.

Last year more than 16,000 people visited the College during Farm and Home Week, and more than 16,000 others at other times during the summer. Already quite a number of groups have been at the College this year and a large number of others are booked for dates other than Farm and Home Week. Thus does the College extend its services to the people of Ontario, and thus do the people take advantage of that service. It is too good an opportunity to be missed.

BRAMPTON

Golden Star Lodge, I.O.O.F., and Peerless Rebecca Lodge members decorated graves of deceased members of the two associations at Brampton Cemetery Sunday afternoon.

The service, arranged by William O'Hearn, Noble Grand of the Oddfellows, was attended by members of other lodges in the district, and by members of the Hamilton Cantons' and Militants' organizations. A parade to the cemetery was led by the Brampton Band. Later in the day the lodge members attended service at St. Paul's United Church, where they were addressed by Rev. T. W. F. G. Andrews, pastor.

Experts from Toronto are renovating the Perkins Bull Art Collection in the Brampton High School. The pictures and their frames are all being carefully examined and any defect made good by skilled men. Some changes in the hanging are also being made.

The collection of Indian and Pioneer relics housed in the Brampton Public Library is also being arranged and expanded. In addition to Aaron Laidlaw's important contribution to the Indian collection, Col. the Hon. T. L. Kennedy has given valuable pioneer material, including the side saddle brought from Ireland by his great grandmother early in the nineteenth century.

MOUNTAINEERS CAPTURE SEASON'S FIRST GAME

Caledon, June 8—In the first local game of group No. 2 of the Intermediate O.A.L.A., the Caledon Mountaineers defeated Cooksville 16 to 4, at the local arena last night. Jack Burrell, of Brampton, refereed the game. The play was much more evenly matched than the score would indicate, and was of a very clean variety. Goals were scored for the Mountaineers by Reaburn, Lott, Gillespie, McDonald, Erskine, Petch, Wilson. The Cooksville scoring squad consisted of Black, Whaley and Varley. The local team will visit Inglewood for their next game Thursday evening.

Children Cry
FOR FLETCHER'S
CASTORIA

Mr. and Mrs. W. Goddard, Dixie, visited her mother, here, on Sunday.

Mr. and Mrs. Gordon Ward and family of Toronto visited his parents, Sunday.

Mrs. Morley Funston and daughter, of Hamilton, are spending a few days at her former home in Streetsville.

Gordon Hopkins, of Cooksville, underwent an operation for goitre at St. Michael's Hospital, Toronto, last week.

Crawford Kirby Irwin and Miss Myrtle Ann Tipping, both of Cooksville, were married to-day, Thursday, at the home of the bride.

Cooksville Women's Institute held their regular monthly meeting at the home of Mrs. James Smith on Wednesday, June 9th, with a good attendance.

Grahamsville Sunday School will hold their anniversary and tea meeting on Sunday and Monday, June 20 and 21, at their Church, Sixth Line East, Toronto Township.

Snider's

Mauve and white lilac, tulips and iris were used in decorating Wesley Church, Snider's, on Wednesday evening, June 2nd, for the marriage of Miss Irene Eleanor Bentley, daughter of Mrs. Godfrey Bentley and the late Mr. Bentley, to Reginald Norman Broadbear, son of Mr. and Mrs. F. Broadbear, Streetsville. Rev. H. S. Lovering, of Trafalgar Circuit, conducted the ceremony, and Mr. Vernon Honsberger, A.T.C.M., of Toronto, played the wedding music. The bride, who was given in marriage by her brother-in-law, wore a gown of pink satin fashioned on princess lines, with trimming of lace and buttons and small hat of white crepe and net with veil. She carried a bouquet of pink Talisman roses and lilies of the valley. The bride's sister, Miss Audrey Bentley, was her only attendant and was attired in a gown of blue satin and leghorn hat trimmed with blue velvet. Her flowers were yellow tea roses and lilies of the valley. Mr. Douglas Parks was best man and the ushers were Mr. Harvey Dunn and Mr. Percy Broadbear. Prior to leaving the church the bride donned a white coat and the couple left immediately on a motor trip to Sault Ste. Marie. On their return, Mr. and Mrs. Broadbear will reside in Brampton.

The "Brighten the Corner" Mission Band held their June meeting on Saturday afternoon in the school.

Mr. and Mrs. H. W. Albertson left last week by train on a six weeks' visit to their four sons in Saskatchewan. They will stop off at Regina where they will stay with their son, Nelson, going on later to Coderre to visit Gordon, Vernon and Nelson Albertson. During their absence, Miss Alice Maxwell, teacher at Snider's School, will stay with Miss Mary Albertson.

Mr. J. A. Barbaree, Acton, was a guest at the Broadbear-Bentley wedding.

Miss Grace Fish and Miss Clara Dunn represented Wesley Sunday School as delegates at the Trafalgar Township Sunday School Association Convention which met at Munn's United Church on Wednesday.

Miss Evelyn Lunau spent a few days at her home this week previous to taking a position on the nursing staff of the Western Hospital, Toronto. She entered on Thursday evening.

We think a record for late seeding has been established this spring. Practically all farmers in this community finished seeding by Saturday, June 5th. The hay cutting started on Monday.

Service at Wesley Church is being held on Sunday morning at nine o'clock, standard time, with S.S. following. During the summer months, members of the Bible Class will act as teacher in turn of the class.

Mr. and Mrs. Earl Jewitt, Oshawa, were week-end visitors with Mrs. Jewitt's father, Mr. D. Turner, and sister, Mrs. Lorne Fish.

Miss Grace Turner and Stanley Turner were guests on Saturday afternoon at the Parry-Holway wedding at Park Road Baptist Church, Toronto.

DIED

WILSON, Williams—On Tuesday, June 8, at his residence, Dundas street, Dixie, William Wilson, beloved husband of Sarah Hodgin, in his 74th year.

Resting at the Funeral Home of G. F. Skinner, Port Credit. Service in the chapel on Thursday at 2 o'clock (D.S.T.). Interment in Dixie Cemetery.

District News

Verne Steggall, Streetsville, is playing lacrosse with the Orillia Terriers this season.

Hugh Barnett of Clarkson underwent an operation for appendicitis at the Western Hospital.

The semi-annual meeting of Peel County Orange Lodge will be held in Streetsville, Friday, June 18th.

Brampton Ball Team was defeated by Milton by a score of 3 to 1, and by Georgetown by 6-2, all in one week, at Brampton.

Several members of Streetsville Oddfellows' Lodge visited Brampton Lodge Sunday afternoon and evening, and joined with them in their decoration and church service.

Vivian Robert Dale, Brampton, and Jean Willis McMeekin, Norval, were married Saturday by Rev. J. D. Parks, Toronto. They will live in Brampton.

Miss Mary Kehoe, Port Credit, has graduated at St. Joseph's Hospital, Toronto, with honors. She made 95 p.c. and received a special prize by Dr. A. Clarke.

Camp Norval for boys will open June 30th. It is owned and operated by the West End Branch of the Toronto Young Men's Christian Association. It will remain open until August 11th.

H. Ringer, Royal Hotel, Brampton; F. O. Hunter, Norval, and Ed. Mahon, Campbellville, were the winners of the lucky draw held by the Peel, York, Halton Holstein Clubs at their picnic at Edgewood Park on Saturday. Each received a calf valued at $12.00.

William Reed, Meadowvale, was fined $25 and costs for failing to remain at the scene of an accident when he appeared before Magistrate Bull in Peel County Police Court on Saturday.

J. E. Thompson, a transient, was struck by a hit-and-run driver, on the Dundas Highway east of Cooksville, on Saturday. But after attention by Dr. F. Cantelon of Cooksville, was on the road again on Sunday.

Alex. Maxwell, 35, a farm laborer, was struck by an auto Saturday night, east of Brampton, while riding a bicycle. He died shortly after being admitted to Peel Memorial Hospital. He had worked in the district for several years. Two sisters live in Toronto.

Erindale Women's Institute met at the home of Mrs. John Hardy last week, and disposed of the quilt they had made. Mrs. H. McGill presided. The contest was won by Mrs. R. A. Spencer.

Streetsville Oddfellows will attend divine service at Trinity Church, Sunday morning, June 13th, at 11 o'clock, when the Rector, Rev. E. S. Ottley, will preach. They will be joined by brethren from Brampton, Oakville, Georgetown and other places.

"Dick" the gardener, of radio fame, addressed a meeting of Clarkson-Lorne Park Women's Institute last week and was very much appreciated.

The Clarkson United Church W.A. held a lawn tea at the home of Mrs. Donald Taylor on June 8th.

At the first home game of the Brampton Excelsiors Lacrosse Team last week, they were defeated by Orillia Terriers by a score of 12-6, at the opening game in the new lacrosse stadium. The Excelsiors defeated the Native Sons of Brantford by 23 to 7 on May 28.

Miss Beatrice Hockley and Dr. Karl A. Matzinger will be married at Buffalo, Saturday, June 12. The bride elect is the only daughter of Rev. E. F. and Mrs. Hockley of Toronto. She spent several years in Streetsville when her father was Rector of Trinity Anglican Church. They will reside in Buffalo.

The annual convention of the Trafalgar Township Sunday School Association was held at Munn's Corners, yesterday, June 9th. Among the speakers were: Rev. Dr. Gallagher, Oakville; Rev. E. R. McLean, and Miss Betty Ross, Toronto. Vocal music was rendered by junior choirs and Mr. Irven Fell of Oakville led in the song service.

Canada

New Canadians

Formation of a practical policy with regard to immigration is a task that will devolve on the government one of these fine days.

Adequate development of the widespread resources of this great Dominion calls for a much larger population than we have today. The time is not far distant when settlement of our vacant lands will become imperative if Canada is to progress and become a greater nation. And when that time arrives with an influx of newcomers to settle in this country we will have to do something about it.

It is interesting to know what Canadians do with their new citizens and how they cultivate the raw material into something better than mere labor to till the soil and garner the harvests into the barns.—Chatham News.

The Tourist Business

Time was when the average citizen regarded tourists as objects of typical Canadian hospitality who, incidentally spent some money in the country. But the casual regard has been replaced by the realization that the tourist trade is one of the leading industries of the province. Thus, without forgetting friendliness and hospitality the people of Ontario are rapidly learning to appreciate the annual throng of visitors as definitely meaning dollars and cents.

Last year, for instance, about $101,678,000 was spent by motor tourists in this province, and this was supplemented by the amounts spent by the thousands who came in by train and boat.

Basing their estimate on the number of inquiries received, particularly from the United States, transportation experts predict that the present season will set an all-time record, so the "industry" is not only large but growing.

Another point of interest is that while Quebec has always claimed first place in tourist totals, Dominion statistics set aside the boast in favor of Ontario, by indicating that tourists spend about three times as much money in this province as in French Canada.—Brantford Expositor.

A Lot of Honey

When we think of Canada's exports we are liable to think mainly of wheat and newsprint and minerals. Well, last year Canada sold Britain 2,295,000 pounds of honey. —Ottawa Journal.

At Its Best

These are no longer the horse and buggy days. The average motorist can knock off work around three o'clock or later in the afternoon and make a survey of the countryside well before supper time. It is well worth doing in the Niagara Peninsula right now. One of the oldest residents informed this writer this week that he had never seen the district look better. There are favorite drives for everyone. Some of us like to get off the beaten track. The beautification job at Queen Victoria Park, Niagara Falls, will prove one of the finest assets of this province when completed. And from the Falls to Queenston Heights, to Niagara-on-the-Lake, to Port Weller, with its beautiful horticultural garden is a dream now and for months to come.

Is there anything better on the continent of America?—St. Catharines Standard.

More Discipline

A new cell block at Guelph Reformatory is to contain 312 single cells which will replace the dormitory system. This change follows the recommendation made by Judge Madden, who investigated the recent riot in the institution. There is to be greater discipline in the future, and discipline is the first essential in any prison.—Ottawa Journal.

Army Life

The British Army is going to start serving four meals a day instead of three; barracks are to be modernized and equipped with bathrooms and reading rooms. Butter will replace margarine in the army kitchens. Fresh milk will be served daily. Domestic help will be hired to scrub out canteens, thereby relieving Tommy of one of the most disliked jobs. —Vancouver Sun.

Convalescent Hospitals

Formally opening the new St. John's Convalescent Hospital at Newtonbrook, just north of Toronto, Lord Tweedsmuir took time off to utter words of commendation for the high standard of Canadian hospitals. He mentioned their equipment, research facilities and work, and general effectiveness. He brought home what too many persons are prone to forget, the high state of development in this country for the treatment of those who are ill.

At the same time, His Excellency commended the inauguration of the convalescent type of institution. "A patient at this point needs a change, a change of atmosphere," he told the gathering.

In his statement, the Governor General is undoubtedly right. When a patient has reached a convalescent stage, keeping him in an institution where people are seriously ill, many even dying, must be a retarding factor in his recovery. By placing him in a building where all are getting well, and anticipating being able to resume normal health at an early date, a patient is given a psychological benefit.—Windsor Star.

Freight By Air

Government figures show that Canadian airplanes are carrying six and a half times as much freight as all scheduled United States lines, domestic and foreign combined. The last completed figures are those of 1935, and in that year 13,000 tons of freight and express were moved. Last year's figures will total higher, as indicated by the fact that one company carried 1,543,000 pounds in the first six months, equalling nine months of the previous year, while another carried seven million pounds in the first ten months, as compared to five million in the twelve months of 1935. There are some thirty companies engaged in this transportation business in Canada's northland. —Moncton Transcript.

The Empire

London's Eggs

During the hearing of the case an expert said that he supervised the grading of 3,000,000 eggs annually, stated: "I consider an egg new-laid up to seven days. After that it becomes a fresh egg. It may be in a new-laid condition some time after. It depends on the condition of the egg when it is laid."

One egg dealer described a new-laid egg as one "which is fit for boiling, poaching or frying," and added: "I've known eggs to remain fresh for five or six weeks in cool weather. A fresh egg is fresh until it goes west."—London Times.

Gaudy

"I do not believe that Englishmen like to be conspicuously dressed," said the War Secretary, explaining why he refuses to restore the Army's scarlet tunic. That is strange talk in this land of pearly kings, Beefeaters, bewigged Judges, ermined Mayors, Brass Hats, Black Rods and strawberry-leaved Dukes. Apart even from such dazzling personages we are a picturesque lot. See how eagerly the average man gets out of his drab office uniform and into plus-fours, hiker's kit, or a gay blazer as soon as he has a few hours off. And nobody ever heard of a British redcoat or his girl complaining that he was too gaudy.—Sunday Chronicle, London.

Facing The Truth Hard For Women

Lady McLaren Brown Gives Own Folk Some Hints

LONDON, Ont.—Lack of co-operation and unwillingness to face the truth in all situations are principal reasons why women do not achieve their objectives as readily as do men. Lady McClaren Brown, of Hamilton, said in an address on women's enfranchisement before the Local Council of Women here.

"Women's groups seek affiliation with men's organizations because they know that it is best for them, but we do not find men forced to seek the prestige of affiliation with women's work," remarked Lady Brown. "They have learned what we have failed to learn, the importance of co-operation.

Playful Ways

The Advance correspondent at Cobalt calls attention to the improper use of firecrackers in that town. Ladies had their silk stockings destroyed by vicious fools who threw firecrackers at their legs in a distorted and demeted spirit of frolic. There have been a few recent incidents of the same kind in Timmins in the past week or two.

It is difficult to speak calmly of the vicious form of idiocy that prompts this form of prank.—Timmins Advance.

Marie Now Sets Pace for Quints

CALLANDER, Ont. — Marie, tiniest of the Dionne quintuplets, is setting the pace for her sisters these days. Statistics released by Dr. Allan Roy Dafoe show she has more teeth and has gained more weight during the last month than the others.

Weakest of the children since birth and afflicted with a thigh tumor which was removed, Marie is now challenging her sisters for ruggedness. She has 18 teeth, one more than Cecile and two more than Yvonne. Emilie and Annette. She gained one pound in the last month to reach 28 pounds.

Five oak trees sent from a royal forest in England have been planted near the quints' hospital home, two and one-half miles from this Northern Ontario town. Dr. Dafoe, medical guardian to the children since birth, planted one tree for each of the little girls.

Each of the quints, who speak considerable French but little English, gained in height during the last month. Emilie showed a 1-2 inch gain, her sisters each adding 1-4 inch. Anette, although her weight was unchanged, continued as heavyweight at 31 1-2 pounds, while she remained tied with Yvonne at 3-4 inches for height honors.

News In Review

License Cheese Men

Toronto—Every cheese buyer in the Province is to be licensed under a plan which was approved by a Cabinet Council this week at Queen's Park.

Under the scheme, all cheese will be sold through the medium of organized cheese boards. A direct charge of five cents per 100 pounds will be levied by the Ontario Cheese Producers' Marketing Board, and will be remitted to the board by the cheese buyer, who will deduct it from factory remittances.

Eight hundred factories will be affected.

Ontario Dogs Win Awards At New Jersey Show

Toronto.—At the recent Morris and Essex Dog Show at New Jersey, Waterloo Happy Warrior, a bull terrier owned by W. B. Milner of Toronto took first prize in the open class under thirty-five pounds, Trafalgar Queen Bess took first limit class, first open class and reserve winners, and Trafalgar Greatheart took first limit class. Both these bull terriers belong to Captain H. R. Wilks, Bronte, Ont.

Meanest Thief

The Pas, Man.—This Northern Manitoba mining centre, 250 miles northwest of Winnipeg, has found a new type of "meanest thief." One of the collection boxes, dsitributed to collect funds to aid in the battle against cancer, was missing from the postoffice lobby.

Drill for Oil

Calgary.—Several oil companies have announced plans to drill in search of oil near the ranch owned by the Duke of Windsor in the foothills of High River, 40 miles south of here.

Drilling is already underway at one well, four miles northwest of the ranch property, and the rotary drill is down 2,000 feet. The new tests will be made north, east, south and west of the Duke's property, known as the E.P. ranch.

No one may seek oil on the Royal ranch. The Duke holds a 99-year lease on the oil and gas rights and only with his permission could drilling be started.

A strike at the boundary wells, oil men said, might mean permission would be sought from his Royal Highness to drill on the ranch property. . One of the companies which will drill on the ranch boundary is controlled by Chinese. It was organized by the Chinese communities of Calgary and Vancouver.

Charges Patronage Exists In Canadian Postal Service

Quebec.—S. J. Thomas of Montreal, editor of the Postmasters' Association of Qunobec Province year book, told the opening meeting of the annual convention that "although the presence of patronage in Canada's postal service is denied, it is actually present." More than 200 delegates were in session for three days.

Dies While Cashing Pension Cheque

Edmonton.—More than six decades after arriving at Fort Saskatchewan as a bold young bugler with the old, original Northwest Mounted Police, 84-year old Philias Brunette dropped dead here recently—on a bench in a crowded bank.

Overcome by a heart attack immediately after cashing an old-age pension cheque, he suddenly collapsed.

Born July 26, 1852, in St. Martinne, Quebec, he enlisted with the Mounted Police in 1874, original year of the storied force. He was a bugler at Fort Saskatchewan, near Edmonton, the same year. Few living men could look back on so early a connection with the "Mounties."

Little is known of him. He was a life member of the Northern Alberta Pioneers' and Old-Timers' Association. His wife died many years ago. He had one daughter, but old-age pension officials said he did not know himself where she was living.

New Highways Aid to Mines

Toronto.—Expenditure of $474,745 on road construction and improvement, to serve the mining areas of Northern Ontario, is announced by Hon. Paul Leduc in the release recently of his Mining Transportation Program, 1937-38, to be carried out jointly by the Federal and Provincial Governments.

Reduction of the Dominion Government's appropriation for the work, Mr. Leduc's statement announced, had made it "necessary to curtail the anticipated program of road work to some extent." But this, it was added, would have a bearing on the standard of roads to be constructed rather than on the number of projects to be undertaken.

Huge Tobacco Crop

Toronto.—Ambitious plans for tobacco growing in Ontario have been formulated by the Provincial Department of Agriculture which announces that 50,000 acres of flue-cured tobacco would be grown this year, an increase of 15,000 acres over last year.

The increase in tobacco acreage means that from 1,400 to 1,600 expert tobacco curers from the southern United States will be needed, as compared with 836 last year.

There are 500 new growers in the tobacco area this year.

A normal crop is expected to provide employment for 18,000 men in the counties of Norfolk, Brant, Oxford, Elgin, Kent and Essex.

That potatoes fresh from the ground contain three times as much Vitamin C as those which are kept over the Winter is the claim of the Department of Physiology of the University of Upsala.

Measles headed the list of communicable diseases in Canada during the last two weeks of April, according to the Department of Pensions and National Health. The total number of cases was 3,298 or 36 per cent of all reported infectious diseases.

A Queenly Meeting

Jane Ault (left), Bates College student chosen as Queen of Greene, Me., Apple Blossom Festival, and Arlene Gott, Queen of Festival of States at St. Petersburg, Fla., last winter, discuss their royal status.

NEWS PARADE

Commentary on the
HIGHLIGHTS OF THE WEEKS NEWS ---
By Peter Randal

Events in the international arena are moving with all the swiftness of a championship prize fight. At a meeting of the League of Nations Assembly at Geneva last week, fifty nations recognized the Valencia government of the Spanish Loyalists while completely ignoring General Francisco Franco of the military opposition. It looked as though the Loyalists might eventually win on points. The League was for them. Mussolini and Hitler were both reported to be very tired and the Loyalist forces in the field were holding on very well in spite of determined rebel attacks.

The Sins of the Fathers

But the loyalists made a tactical error when a squadron of their fighting planes attacked the German battle cruiser Deutschland. One of the devilish eggs landed on her decks and she limped into Gibraltar with twenty-four dead officers and men. It did not matter that the Deutschland was in forbidden waters when the bombing occurred. Twenty four Germans were dead and Nazi authority challenged. Germany and Italy withdrew from the non-intervention committee and a German fleet destroyed the Spanish harbor of Almeria. Three hundred have been reported dead as the sins of the Spanish fathers are visited upon their defenseless children.

Imperial Politics

Italy and Germany are in dangerous mood and there are many worried heads in England at the present time. Collective security as represented by the League of Nations failed to protect China. Collective security failed to help Ethiopia and now, collective security appears to have failed in a situation that may well threaten the whole peace of the world. One of the chief pillars of the League has been Great Britain but after the failure of sanctions and the possible effect if they should again be invoked by an offended nation, it is said that Great Britain is wavering in its attitude toward the League as a body to punish aggressor nations. As the most powerful of the Dominions, Canada is said to have the deciding voice in Britain's decision. Shall Prime Minister Mackenzie King attempt to use his influence for the abandonment of sanctions? Few think he will but the possibility has interesting aspects when Canada's well known reluctance to being drawn into European affairs is known.

"Chamberlain Is What He Was"

The late Lord Birkenhead once described Neville Chamberlain, the new prime minister, in his characteristic sneer as "a man who is what he was —a very good Lord Mayor of Birmingham—in a lean year. "For honesty, he is said to be Baldwin's counterpart. In matters of policy, it's thought that he will follow in the steps of his former leader. Where new innovations are to be sought, some think he will look for a hint from President Roosevelt. Should some daring experimenter arrive at some feasible plan for world economic and political stabilization Neville Chamberlain is expected to give his whole hearted support. That such a scheme is already on foot cannot be gainsaid in view of the attempts of American statesmen to gain influence in the Imperial conference discussions through the voices of certain of the Dominions.

Last of the "Old Gang"

The past few months have witnessed many changes in high places. This week, the last of England's "Old Gang" statesmen takes over the direction of affairs on the retirement of two contemporaries. Stanley Baldwin has become an earl and retired to the comparative peace of the House of Lords. Ramsay Macdonald, true to his idealistic streak, has declined a similar honour as a gesture toward the political career of his son who retains cabinet rank in the new government as Minister for the Dominions.

An Angry Paper Hanger

Chicago has always had a reputation for very free "free speech". A few years ago, Wild Bill Thompson used the municipal rostrum to hurl imprecation at the head of George V. Today he visits the Dominion of the late king as only one of thousands of enthusiastic American fishermen. Back in Chicago, an oratorical successor has arisen in the past few weeks in the person of an ecclesiastical prince, Cardinal Mundelein who has had the misfortune to call Chancellor Hitler an "Austrian paper hanger". Now Chancellor Hitler was a paper hanger not such a very long time ago but he and the German people like to forget about it. Whether as a direct result of Chicago's Cardinal's remarks or as a part of a concerted campaign against the Church, the Nazi Government last week banned publication of 200 Catholic newspapers and pushed forward the trials of German clergy held on wholesale immorality charges. And the Church prepared to fight back as clergy used their pulpits to denounce the Chancellor and all his works.

Aviation Merry-Go-Round

When we started out, this week's news looked like a prize fight gone mad with the fighters not caring particularly whether they hit the other man, the referee or someone in the audience. After going the circle from Germany to Germany, it begins to take some of the aspects of a merry-go-round.That is just what aviation is about to do with the world as the last remaining link in globe circling is finally prepared on both both sides of the Atlantic ocean. Experimental flights are already being put on schedule basis between New York and Bermuda while in the wilds of Newfoundland, not far from the take off point of the first Transatlantic flight in 1919, 400 men are hacking out the runways which the first one hop planes will use in June. The great airports will take at least two years to complete.

And up at the North Pole, arrangements for the top of the world weather observation post are almost completed as base planes landed on the drifting ice floes with cargoes of supplies. And so another week's adventures march into history.

Marriage Bill Passes 190-37

British Measure Is Sent To Lords Many Absent When Vote Taken

LONDON, Eng. — The marriage bill, which its sponsor, A. P. Herbert, introduced to remove the "indecent, hypocritical, cruel and unjust marriage laws of the country," was given third reading in the House of Commons last week.

A majority of members abstained from the division but the vote of 190 to 37 sends the bill to the House of Lords where it is expected it will either be thrown out or drastically amended.

Under terms of the bill no divorce will be obtainable within five years of marriage but after that time a divorce may be granted on the grounds of adultery, desertion, cruelty or incurable insanity. New grounds for the nullity of marriage are introduced and provision is made for the presumption of death in cases of missing parties to a marriage.

At present adultery is the only ground for divorce.

Never apologize for showing feeling. My friend, remember that when you do so you apologize for truth.—Beaconsfield.

You, who forget your own friends, meanly to follow after those of a higher degree, are a snob. — Thackeray.

The head best leaves to the heart what the heart alone divines. — A.

U. S. Trade Is Declared To Be In Grasp of British Empire

DETROIT.—Francis Patrick Garvin, president of the Farm Chemurgic Council and assailant of American trade treaty policies, has asserted that "the United States is in the ever-growing grasp of the British Empire."

Garvan, president of the Chemical Foundation and former alien property custodian under President Wilson, told a banquet of the Third Dearborn Conference of the Chemurgic Council that little is known publicly of the terms of a new trade treaty about to be made with Great Britain.

"Our people don't know," he declared. "Our government will have nothing more to say about it than Japan because of the control that Britain holds over basic commodities which we need from abroad and the control exercised through financial interests."

Garvan also took the Roosevelt Administration to task for its gold policy, declaring that the United States has bought $4,000,000,000 worth of British South African gold. normally worth $22 an ounce, for $35 an ounce.

"Who told us to increase the price of gold from $22 to $35 before we bought the $4,000,000,000 worth?" he asked. "Did they take any cotton, or any of our exportable materials, in exchange for it? The answer is no."

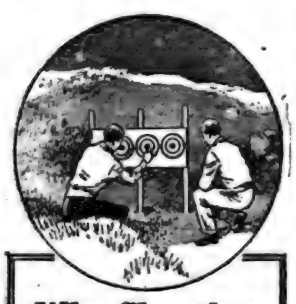
Referring to international trade, Garvan said that such does not exist because 80 per cent of the trading between nations is "British controlled".

HAVE YOU HEARD

A bulldog when he meets a rival has only one thought in mind, he knows he must hang on.

Father's Day
My Dad

"I've got the best dad in the world!"
I heard a fellow say,
But he can't hold a candle to the
dad I greet today;
He don't know what I think of him,
it's awful hard to tell—
I hang around — the words won't
come, but, gee, my dad is swell!
He says "Get at your lessons—turn
off that radio!"
I make a fuss—he thinks I'm mean
—gee, how I hate to go
Up to my room and study. with pro-
grams on the air;
But how could I get on at school if
my dad didn't care?
And when I go out with my dad oh
boy, do we have fun!
He knows the things that I like best,
I'm glad I am his son;
He's kind o' hard on me sometimes,
but just the same I'm glad
That he and not some other guy
turned out to be my dad!
—Fred Winslow Rust.



A woman attended a lecture on the Pilgrim Fathers. At the end of the lecture she said: "We have heard a lot about the Pilgrim Fathers. What about the Pilgrim Mothers who had to put up with the Pilgrim Fathers?"

From the Los Angeles Times we clipped: "Life's hardest ups and downs are keeping up appearances and keeping down expenses."

Master—Why haven't you learned your geography?

Jones Minor—I heard dad say that the world was changing every day, so I though I'd wait until it settled down.

Read It Or Not:—Bristol County, Rhode Island, with an area of 24 square miles, is the smallest county in the United States.

Win Shooting Prizes!

If you own a .22 rifle... this will interest YOU!

From coast to coast, young men and boys are enthusiastically competing for the prizes offered in the Dominion Marksmen Competition using .22 calibre rim fire sporting rifles.

Whether a beginner or an experienced marksman, you, too, should enter this contest and try your skill. The rules are simple—you can win a prize with your present rifle. No charge to join. Any shooter over 12 years of age is eligible. Application blanks, rules and targets are free. Send for yours to-day. Mail this coupon now!

.....COUPON.....

Dominion Marksmen, WL1
P.O. Box 1260, Montreal, Que.
I am interested in your prize competition for .22 calibre rifle shooters. Please send me full particulars.

GARDENING

By GORDON L. SMITH

(ARTICLE NO. 15-

There are two groups of garden insect enemies—those that eat holes in the foliage and those that suck out the juices. For the first-named, poison is usually applied. while the suckers are attacked with a burning spray which penetrates. Often when both are present, a combination of poison and something that burns, such as lime sulphur and arsenate, give the best results. The damage from the biting insects is usually quite apparent but the presence of the other kind is only shown at first by a wilting or withering of the foliage. For sucking pests, chief of which are the aphids or plant lice, spray with whale oil soap, a quarter pound of soap to a gallon and a half of water; nicotine sulphate, or "Black Leaf 40" or any other repellent secured from a reliable seed store.

Mildew or Other Fungus

When fungus attacks the plants. the foliage usually turns yellow or brown, or white spots like mildew cover the leaves. Fungus is most common in warm, murky weather. Spraying with Bordeaux Mixture or dusting with specially finely ground sulphur is advised. Sulphur dust will also protect hollyhocks and phlox from rust, if applied when the disease first shows itself. An ordinary tin can with the top perforated like a salt shaker makes a good duster.

Slow Growth Disastrous to Certain Vegetables

Tender vegetables are those which have been grown quickly. Especially with such things as radish, carrots and beets is slow growth disastrous as the roots become woody and filled with objectionable fibre. But this rule also applies to everything used for salads. On this account experts advise pushing growth with frequent cultivation and applications of a good chemical fertilizer. This should be carried out according to proper directions.

Neon Lights on Farms?

Red rays make plants grow faster. Plant physiologists have known it for years. But it is not easy to get a lamp which is bright enough. Then the harsh, brilliant neon tubes that pierce the night of every Main Street came along. The physiologists tried them. Sure enough, the plants were stimulated. But not in the right way. The leaves grew luxuriantly, but stems and stalks were too long.

In Holland two engineers of the Philips Company, J. W. M. Roodenburg and G. Zecher, have made some new experiments which show that neon can be used to force plants properly. If the dosage is right, the stalks do not shoot up too far, but become thicker and hence stronger.

The ordinary neon tube used for advertising will not do. Roodenburg and Zecher found that the gas had to glow in vapor lamps like those used for highway lighting. Even then the glare blackens at the end of 2,000 hours. But the results obtained with neon in growing gorgeous flowers and big strawberries in midwinter with exposures to red rays eight hours a night make this observer wonder whether some day we shall see bits of countryside ablaze with the steady, relentless red of neon.

No Oratory?

An Ontario businessman, feeling the need of a change and having at last become interested in how the nation's affairs are managed, went down to Ottawa during the session. For two days he sat in the public gallery and listened, comments Maclean's Magazine.

He reports to us that he was greatly disappointed in the speeches made on the floor of the House. He had expected to be alternately soothed and excited by oratory. There wasn't any. He was bored. Now he wants to know where all the silver tongues have got to.

Speaking to the Acadia Alumni of Montreal recently, Hon. J. L. Ilsley, Minister of National Revenue, supplied the answer.

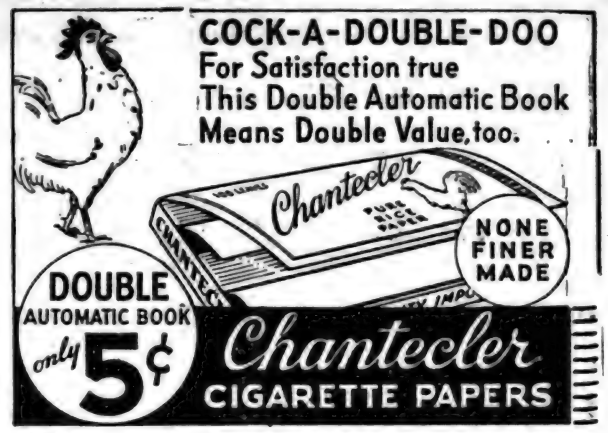
The House of Commons style, said Mr. Ilsley, is the most difficult thing in the world to acquire and the House of Commons is the most difficult forum in the world in which to make a successful speech. Those who make good parliamentarians are rare indeed.

The pitfalls enumerated by Mr. Ilsley are these:

A speaker cannot be too serious and prosy.

He cannot be too facetious.

He cannot afford to quote too many figures; read from too copious notes.



He cannot give way to outbursts of temper.

He must avoid talking too much or too little.

He cannot be guilty of purple patches, pedantry, display of learning, bookishness, over-preparation, inaccuracy, sloppiness of construction, slang, funny stories.

In short, he cannot copy the technique which makes many a good lecturer, after-dinner speaker, Dominion Day orator, stump speaker, evangelist, jury lawyer, Appeal Court lawyer, or professor.

Our disappointed friend will recall that on entering the gallery he paid no amusement tax.

Poultry Yard Parasite Pests

Keep a Constant Look Out For Them

As warmer weather approaches keep a sharp lookout for poultry parasites. Birds are subject to attacks from mites, which are very difficult to eradicate once they get established in a poultry house. Birds cease to thrive in mite-infested houses. These insects are persistent blood-suckers during night time.

For a time their presence may be unsuspected, so that it is necessary to keep a constant look-out. There are very few poultry farms that are perfectly free from pests They must, however, be kept in check if the hens are to continue producing eggs. When present to any great extent they may prove fatal to chickens.

During daylight they leave the fowls and seek shelter in crevices in the walls. perches, nest boxes, or any dark corner or crack, returning to the birds after dark when they have gone to roost.

The roosts require special attention. These should never be permanent, and on no account should branches of trees with bark covering be introduced into a hen house. The roosts should be planed smooth and fitted into sockets. They should be scrubbed periodically and the sockets saturated with a strong cresol solution. Don't neglect the nest boxes and burn and change nesting box litter frequently. Lime wash interior of henhouse three times during Summer season, add soap and kerosene or carbolic acid to the lime wash.

A sparrow was killed at the Lithgow, N.E.W.. golf course, when a player drove a ball, striking the bird and killing it instantly. The ball was deflected only slightly and stopped within five yards of the hole. The ball covered a distance of 120 yards, the bird being hit after the ball had gone 80 yards.

Britain's wealth is estimated to be £40,000,000,000. The average man's share is represented by the last 10 figures.—London Punch.

Doctor (who had dropped in for a sandwich)—"What's the matter. Old Timer?"

Druggist (grumbling)—"I'm simply worn out. For some unexplained reason I have had more calls for medicine this morning than I have had in six months, and I'm nearly frantic trying to locate the fool drugs we stuck away when the store went restaurant.

Life is at best a zig-zag when we with most of us zigging when we should be zagging.

Amos Tash—"Is your son Hiram going back to college this fall?"

Farmer Joe—"Yes, it'll cost something to send him, but it'll be worth a good deal to keep him from interferin' with practical work around the farm."

Can a wife help her husband in his work? In some ways . . . . For instance, she can help to keep him neat, clean, and dressed-up.

Janet—"Oh, Proffy, what do you think of me now that you've kissed me?"

Professor—"You'll pass."

Life has many problems. You are probably one of them.

Teacher—"What excuse have you for being late?"

Johnny (breathlessly)—"I ran so fast, teacher, that I didn't have time to think up one."

In the country chickens go home to roost;

In the city they go home to rest.

Lady (at party) — "Where's that pretty girl who was passing the sandwiches a little while ago?"

Hostess—"Oh, are you looking for something to eat?"

Lady—"No, I'm looking for my husband."

Brief Comment

Magnificent Musical Attraction for C.N.E.

— First "Foreign" Tour of U.S. Navy Band

It was necessary for the Canadian National Exhibition to get the personal approval of President Franklin D. Roosevelt to permit the famous band of the United States Navy to appear at Toronto this year. This favorite musical organization of the Americas, North and South, will appear twice daily in the great new bandshell at Exhibition Park under the baton of Lieut. Chas. Benter. The entire strength of the band, eighty-five men, will be brought to Toronto. This is the first occasion in its history of almost one hundred and fifty years that this famous organization has appeared outside of United States territory.

New Industry Is Developed

Visit Paid by Government Official to Marl Beds

ROCKTON.—John M. Casey, inspector of the federal department of mines at Ottawa, paid a visit to the new plant and mine of the Beverly Holdings corporation in Beverly swamp, near the village of Westover, and expressed himself as surprised at the development of the new fertilizer industry which was established under direction of A. Anrap, general manager, who was a former officer of the mines department.

Much Work Done

Over one mile of poles has been erected through the swamp to carry the Hydro to the plant and nearly a mile of narrow gauge railway has been laid to carry the constituents to the mixing mill.

Not all of Beverly swamp, comprising several thousand acres, contains the organic matter that will go to make up the formula of the fertilizer. It is authoritatively stated that in no other part of the township has the same formation as that comprising an area of 144 acres been found. While all parts of the swamp may look alike on the surface, it is in the marl lying below the thick covering of leaf mould and vegetable matter that the difference occurs. Nearly four feet of black mould covers the marl below, which is about three feet thick and is said to contain chemical constituents peculiar to itself.

It is said that in no other part of Ontario or Quebec has such a deposit ever been discovered. Government officials and others who have been on the ground and had tests made believe that there is a wealth of plant food in the area that only requires development to make it available for agriculture.

Aid To Press Writers Urged

By Empire Union — Britain Found "Cold" to Dominions' Reporters.

LONDON, Eng. — The Empire Press Union concluded its second annual conference last week after adopting a resolution urging its council do everything possible toward improving facilities for Empire correspondents within the United Kingdom, whose task is to portray for the dominions a complete and authoritative, as well as colorful picture of life in the United Kingdom.

It was said insufficient recognition was given outside newspapermen, whose work frequently was labored with unnecessary prohibitions and lack of co-operation.

The conference was marked by speeches from persons prominent in ovry phase of the newspaper world. Modern technique and the latest equipment were lengthily discussed, including the wirephoto, wireless and television.

But members generally agreed with the sentiment expressed by Sir Stanley Reed, of the Times of India, that without an increasing sense of responsibility, faith and forthrightness all fantastic inventions of the new era were but dust and ashes.

Members deplored the trend toward intrusive reporting. It was suggested that if the press failed to govern its own enterprise with decency and dignity it invited governmental legislation which would be a move against freedom of the press.

J. A. Spender, editor of the Westminster Gazette, supplied the keynote to the sentiment of the conference in the final address.

"The responsibility of the press," he said, "was never greater than today in countries where it remains free. To defend this part of a much-threatened field of liberty in our special perogative. If we hold our ground in the British Commonwealth we shall help others recover what they have lost. If we fail we shall bring destruction on many besides ourselves."

Members gave a complimentary dinner at a west end hotel last night for the president of the union, Major J. J. Astor and Lady Violet Astor. Sessions of the conference were held throughout the week at the Astor residence.

To say a person is well known is not necessarily a compliment.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

UNITED CHURCH

The Junior Choir of the United Church, Streetsville, is not nine months old, but its effectiveness was amply demonstrated last Sunday morning, when, with Introit two anthems and a solo the gospel message was beautifully shared with the congregation.

The Introit was "Now to Him who loved us," and the anthems were :(1) "Come Rejoicing," with leads sung by boys, and then by girls, and (2) "Lovingly the Shepherd" from the Ukranian translated by Rev. Robert George Katsunoff of Montreal.

These were feelingly sung and the message in them was given special emphasis by the phrasing and the expression.

Master Donald MacArthur, after the sermon, sang the Theme Song of the Canadian Girls in Training, "I Would be True."

This young choir is justifying itself and if it continues to serve the church it should provide trained material for the Senior Choir in a few years.

United Church S. S. Picnic Great Success on June 9

Threatening showers did not dampen the ardour and enthusiasm of happy boys and girls, parents and teachers of the Streetsville United Church Sunday School who again journeyed for their annual picnic to the delightful flats at the home of Mr. and Mrs J.D.Steen Mother nature kindly held off the refreshing rain until games were played, races were run, a social hour enjoyed and well-laden tables of sandwiches, salads and cakes were emptied by the hungry happy picnickers.

There are few places in Peel County so suitable for youth...and those not so young. Here the Credit invites swimmers, the slopes entice ambitious climbers and the flats enthusiasts of baseball and horseshoe pitching. All these were engaged in before the prepared sport program was run off. Following were the successful contestants:

Race, Children under 5 yrs, Cecil Dudley, Lorne Bentley

Race, Girls, 5 & 6 yrs, Marion Moore, Adrian Adams.

Race, Boys 5 & 6 years, George Amos, Sunny Pope.

Sack Race, 5 & 6 years,, Elaine Pope, Lorne Bentley

Sack Race, girls, Brenda Redick Dorothy Lamb

Sack Race, boys, Jack Williamson Hartley Bond

Race, 7 & 8 years, girls, Nita Mc Millan, Ruth Jordan

Race, 7 & 8 years, boys, Wesley Miller, Alan Amos.

Potato Race. girls 9 to 11 years Brenda Redick Beth Evans.

Potato Race, boys 9 to 11 years Jack Williamson...Hartley Bond

Race, Girls, 12 to 14 yrs, Margaret Jackson, Marion Steen.

Race, boys, 12 to 14 yrs. Donald Jordan, Russell Evans

Needle & thread race, best couple Hughie Lamb and Mable Steen

Race, Girls, 15 and over, Jean Rice Harriet Stewart

Race, Boys 15 and over, Bill Evans Hugh Lamb

Race, single men, Bill Evans,

Race, single women, Jean Rice

Shoe Kicking Contest,
Children, Beth Evans
Women, Mrs. Williamson
Men, Norman Workman

Treasure Hunt, Harold Dowling

The most interesting event of the day was the Tug of War between the married men and the single men. After much tugging, crack went the rope, sending both teams in opposite directions. A second attempt, in which the married men were showing superior strengh to the single, again ended with a broken rope fortunately for the single men!

Much credit is due Rev. Mr Jones Mr. J K. Featherstone and his committee, and Mr. and Mrs J.D. Steen for the success and enjoyment of this happy outing eagerly anticipated from year to year.

Re-Union of Hall Family

Favored with ideal weather, and anticipating the usual gala occasion, nearly a hundred members of the Hall clan gathered at the home of Clarence Hall, son of the late R. E. Hall, to celebrate the 35th successive reunion on Saturday afternoon.

Friends and relatives from London, Vienna, Toronto, Guelph, Erin, Brampton, Milton and Churchville enthusiastically joined in the day's program, the male contingent particularly trying to break previous horseshoe pitching records.

Novelty races of all kinds added to the general hilarity, including a "Mystery Race", which had a few men "buffaloed" for a while, when they found that they were to carry the young lady they had chosen for a partner for some distance. A few of the lads who had selected some pleasingly plump maidens found the going a little hard and fell by the wayside, but the majority of them summoned their chivalry and brawn to the fore and staggered to a glorious finish.

George Wilson succeeded Percy Hall as president this year, Kenneth Wilson being appointed vice-president, and Mrs. Alan Howden, of Toronto, as secretary-treasurer.

It was decided this year that each member of the clan should trace his ancestors back as far as possible, and by the time of the next celebration a family tree would be in the possession of Victor Hall, Reeve of Trafalgar.

The Hall family has lived in this district for over 100 years, coming from Quebec in 1824. Originally from England, the family spent a number of years in Spain and then Pennsylvania. They came to Quebec with the United Empire Loyalists, and Mr. Hall's great-grandfather came up on the first steamer ever to sail on Lake Ontario. The older boys settled at Churchville, where their descendants have lived ever since. Victor Hall is the oldest direct descendant of the original family, and has two younger brothers, Stanley and Harold Hall.

COOKSVILLE

TORONTO TOWNSHIP COUNCIL

Reeve E. D. Maguire, chief executive of Toronto Township, was irritated to give a discourteous retort to one of his ratepayers, Albert Crooks, Lakeview, on Monday.

Crooks presented a lengthy list of suggestions for the betterment of conditions in the township. When he had finished his presentation, he remarked: "Well, I've taken up ten minutes of your time, but I don't expect any consideration."

"And why should you, if you're wasting our time?" fired back the reeve.

Other complaints received from Lakeview received more attention from the council. Councillor Perce Syme protested that Alexandra Ave., Haig boulevard, Northmount avenue and Canterbury road were badly in need of repairs, and pointed out that little had been done in the immediate past to provide better facilities for the residents on these streets. His complaint was met with a promise from council that repairs would be effected within the next ten days.

Mrs. J. Shenton, representative of the unemployed residents of the district, also appealed for improvement of the roads in that district and asked that council provide clothing for citizens of this district. The latter request was tabled until council had an opportunity of discussing conditions in Lakeview with R. S. Moore, district relief officer.

Lakeview Businessmen's Association, headed by W. R. Cluff, asked that council pass a by-law setting the speed limit through the area at 30 miles an hour. "We clocked one man through there at 65 miles an hour," Mr. Cluff informed council. Council will consider the appeal.

Council refused to accept the resignation of Frank Scrayfield from the post of building inspector for the township, and prevailed upon him to retain office, for the time being at least.

HIGH SCHOOL NEWS

Doris Waite Wins Gold Medal

In province-wide competition, sponsored by the Temperance Education Association, during the past winter, Doris Waite of Form IV received this week a beautiful gold medal. She stood fifth among thousands competing from High Schools and Collegiates in Ontario. The first prize of $25 went to a student of Napanee Collegiate.

The school recently received two lovely shields for annual competition. These were donated by two citizens interested in the welfare of the school, in the persons of Dr. Oliver Steen and Mr. S. B. MacPherson. On one will be enscribed each year the name of the outstanding student of Middle School, while on the other will be the leading student of Lower School. The staff and students appreciate these timely donations. They will be formally presented at the next commencement.

At the recent C.O.S.S.A. sports held at St. Catharines, George Schnirr and Frank Reid creditably held up the honor of our school. Reid came in first in his heat of the 100 yards, and led the 440 till within sight of the tape. About 25 schools competed.

Herb. Wilson of Form IV left this week for Niagara Military Camp to take a Sergeant's Course. He will write his matric. papers at N.H.S.

Term Exams. will be completed this week; Departmental exams. start on Wednesday next, and including the Entrance, continue till June 29th. Students to be promoted on their year's work and those exempt from Departmentals will be announced early next week.

We were glad to welcome Frank Hollingshead back last week, after his long illness.

Arthur G. Street, of Wiltshire, England,
author of Farmer's Glory, will address a farmers' picnic at the O.A.C. on the afternoon of Tuesday, June 8th. Don't miss it.

HON. DUNCAN MARSHALL, Minister of Agriculture
DR. G. I. CHRISTIE, President

ADVERTISE IN, THE REVIEW

"Matte" Is Beverage of Some Distant Countries

"Matte" is to Chili, Paraguay, Brazil, Uruguay and Argentina what tea is to European countries, being drunk even more than coffee. The tree or bush grows exclusively in the temperate region, from 1,500 to 3,000 feet above sea level. It is from 12 to 20 feet in height and belongs to the hollies, but is without spinous leaves. In the state of Parana alone, it covers an area of about 146,000 square kilometers.

The leaves are prepared in two distinct ways, according to a writer in the Indianapolis News: (1) Ground into powder to be used in the curi (or gourd) and the decoction, made with boiling water, is sucked up through a perforated tube; (2) prepared as a sort of tea in flakes, with some fine stalks, and taken in cups. The infusion is of a green color. When brewed in a pot, a Brazilian custom is to put a piece of glowing charcoal in it, which turns it to a dark, brownish green, and makes it stronger. It improves also by boiling. Unlike tea, two brewings may be made of the same handful of leaves, with the scond often stronger than the first. It is said to have no aftermath, no injurious influence on the digestive organs. It has been reported that, during a Paraguayan war, soldiers marched and fought for days with no other sustenance than matte. Taken in native fashion, without sugar, it is said to be a blood purifier.

Madstones Are Believed to Prevent Hydrophobia

Madstone is the name of certain objects believed to have the power of drawing poison from wounds made by mad dogs and venomous snakes. They are supposed to be especially efficacious in preventing hydrophobia or rabies. The United States Department of Agriculture speaks of them as mythical stones, and says their alleged virtues have no scientific foundation, unless it is merely psychological effect.

The bezoar stone, which is a biliary calculus from the gall-bladder of an animal, is a common form of madstone, according to a writer in the Indianapolis News. Another form is composed of halloysite, which absorbs moisture with avidity and adheres to a moist surface until nearly saturated.

Those who believe in the madstone, test it for genuineness by placing it against the roof of the mouth. If it adheres it is genuine, they say; if it drops, it is not.

A pebble of carbonate of lime found in the stomach of a deer was once sent to the National museum as a genuine madstone. On another occasion two hair balls from a buffalo's stomach were presented with the statement that one of them had been "successfully used in two cases of dog-bite." To the same institution was offered a madstone of "proven efficiency" for the sum of $1,000. It proved to be merely a polished seed of Kentucky coffee tree.

The Semaphore

In 1793, Claude Chappe, a young French engineer, established between Paris and Lille an experimental line of semaphore telegraph stations. The essential features of his apparatus were an upright post on the top of which was pivoted a movable beam or cross arm carrying, at each end, another movable arm. The apparatus was so arranged that the positions of these three movable units could be changed, as desired, from within the tower on which the semaphore was mounted. Various combinations or sequences of these positions could be used, either for code phrase or alphabetical communication. Carlyle's "The French Revolution" gives a dramatic account of the telegraphing to Paris, by means of a line of Chappe semaphores, of the news of the surrender of the town of Conde. Chappe's system was widely used in France and similar systems were adopted in practically all European countries and in the United States.

Pitcairn Island

Pitcairn Island is a solitary island in the Pacific ocean, between Australia and South America, in 25 degrees 3 minutes south latitude and 130 degrees 8 minutes west longitude. It is about 2 miles long and 1 mile broad. It was discovered by Carteret in 1767. In 1790 it was taken possession of by nine of the mutineers of H. M. S. Bounty with six Tahitian men and a dozen women, the ring leader being called Christian. Of nine British sailors, only one, Adams, was left in 1800. The island was annexed to Britain in 1839. Nearly 200 of the islanders were transferred to Norfolk Island in 1856, but a number of them afterward returned.

The West Indies

The West Indies are a loose chain of tropical islands expanding in a great curve from Florida south and east to South America. They are otherwise known as the Greater Antilles and Lesser Antilles and include among the larger islands, Cuba, Haiti, Porto Rico, Jamaica and many others. They were called West Indies by the Spaniards who thought them to lie off the coast of India.

Third of Life Passed Asleep

The person who lives to be seventy years old passes 23 years asleep. That is the estimate of a scientific committee set at Nice, France, to inquire how persons occupy their lives. Apart from sleep, the committee's report says, the average person talks for 13 years, eats for six years, passes 23 years in pleasure and washes for 18 months.

TELEPHONE TALKS IN THE WATSON FAMILY

"Yes, Mary . . . and Tom's fine, too."

Old Mrs. Watson lives with her son Tom. Yet her only daughter Mary, miles away, is with her too, for Mary, though old-fashioned in many ways, is definitely telephone minded and never fails to call her Mother on Long Distance at least once a week — an inexpensive and supreme pleasure for both of them. As Tom Watson puts it, "though our family's scattered, we're never really far apart — with the telephone."

Are you acquainted with the comfort, convenience and low cost of Long Distance?

[Low Night Rates begin every evening at seven, and apply ALL DAY SUNDAY!]

Love Huntress

By H. GLYNN-WARD

CHAPTER XII

She screamed piercingly—but at the same instant came the sharp click of an automatic. She saw Dick turn sharply. The other figure reeled and fell to the ground.

Ching Lo rose from the bushes where he had been crouching.

"Ching Lo one veily good shot!"

Dick was running towards them. He saw a strange sight—Ching Lo, the camp cook, catching a woman as she fell forward in a faint. Strangest of all, that woman was Claudia Townsend.

When Claudia opened her eyes again, she was lying beside a roaring fire. Dick was holding her little flask of brandy to her lips.

"Are you all right, my darling girl?" Dick was asking.

"I was just in time, Dick, wasn't I? But Ching Lo shot that brute and saved you!"

"But how did you know—"

"I overheard Wallace and Mr. Braddock talking in their office in Seattle. They were planning to get rid of you. Because you knew something—they thought they'd be ruined if you told."

"The spruce! I'd found out they were stealing timber. But tell me—"

Claudia told him all that had happened during the last few days.

"D'you really mean to say, Claudia, that you came all this way north—that you did all this—for me?"

She looked up at him, smiling, nodded shyly.

Meanwhile Ching Lo had dragged the still figure of Moriarty off into the bushes and covered him with his coat. Now Ching turned to Claudia and Dick.

"Better we go now, Missa Whalen! I know where is house. Missee get food—sleep."

Claudia and Dick scrambled to their feet and in a few moments were ready to follow Ching. The little Chinese started off, and soon led them to a rough, trail-like road.

They sped on and late in the night came to a farm at the edge of the lake. Their story as poured into sympathetic ears, hot coffee revived them, and the motherly farmer's wife put Claudia to bed.

"She'll be all right in the morning," the good wife told Dick. "We'll see that you get to the train tomorrow."

"Goo'bye, Missa Whalen!"

Dick looked around to see Ching edging towards the door.

"Hullo, Ching, where are you going?"

"I go, Missa Whalen. You tellum missee goo'bye, yes?"

"But Ching—we haven't thanked you properly! We can never thank you enough for saving my life like that!"

Ching laughed pleasantly.

"Missa Whalen, you savee Ching's life, Ching Lo not forget! Ching Lo savee Missa Whalen's life time he can do! Goo'bye!"

Ching was gone — disappearing through the door and out into the night again, like a mysterious shadow.

The following day, Wallace Bornell and Mr. Braddock sat over lunch in gloomy silence at the Burns Lake Inn. They had received no word concerning the whereabouts of Miss Townsend or their Chinese cook.

They looked up idly and without interest as the day train went through. A few minutes later the inn-keeper came in holding a note.

"Here's new o' the lady, Mr. Bornell! The conductor handed me a note from Miss Townsend, askin' me to forward her grips to Prince Rupert by earliest train. It says to forward Mr. Whalen's grips to Prince Rupert, too."

Bornell and Braddock both started to their feet.

"Whalen with her!"

"Then what has become of Moriarty?"

"We'd better get back to camp—"

But new arrivals intercepted the two as the left the dining-room — two men who had just left the train.

"Mr. Bornell?" asked one of them, stepping forward.

"Yes?" Wallace questioned.

"I want to see you, Mr. Bornell about a little matter of spruce, blue spruce—"

"You had better talk to my manager," said Wallace.

"We'll deal with him later," was the curt answer. The newcomer spread maps out on the table, bent over them, pointing with his forefinger. "Is that where the spruce comes from?"

Wallace Bornell nodded, irritated. "Yes, yes," he said. "That's the section. It's first-class stuff."

"And may I ask," the cold voice persisted, "if you know that I am the owner of it?"

Bornell grew rigid. At last he forced himself to speak.

"I—there's a mistake—my manager can explain—Braddock!"

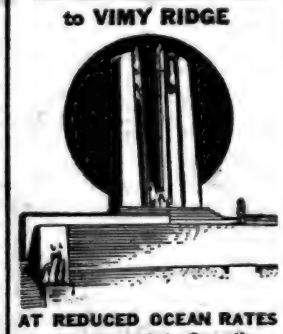
But Braddock had gone.

"You can explain all that in court, Mr. Bornell."

While Wallace Bornell faced trial in an apparently hopeless case, it happened that the captain of the Seattle ice-hockey team met Dick Whalen and his wife in Seattle.

"Hullo, Whalen," he cried, "you are the very man I want to see! We'd be delighted if you could play for us. That is, if you're staying in Seattle now?"

"Yes, he is," Claudia answered with a beaming smile. "We were married up at Prince Rupert last week, and we're on our honeymoon now! Dick's working in Dad's office."



(THE END)

Canada Has Unused Land To Accommodate Millions

Writer in Saturday Night Urges Land Settlement Policy

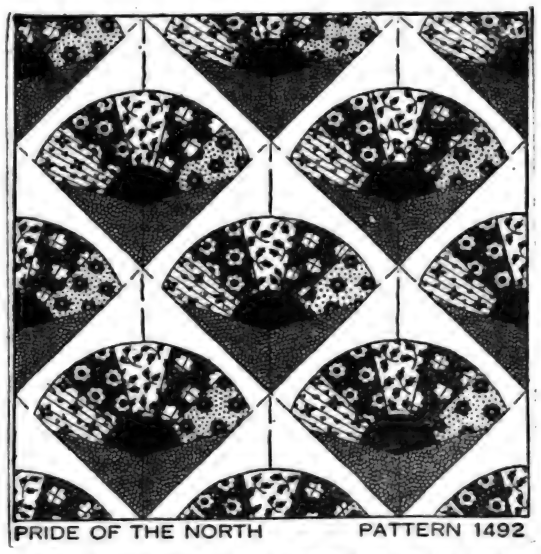
A great land settlement movement once started, would provide its own business and pay its own way. While it was going on it would create employment and provide home markets such as Canadians now only dream of as belonging to the good old days.

So writes E. Newton-White in article in Toronto Saturday Night in which he advocates immigration for Canada. He admits that there are same valid arguments again immigration at this time, unemployment, lack of markets for certain farm products and distress among certain classes and communities. But he goes on to claim that before such a settlement plan as he urges ended "there would be created a permanent and entirely additional population in cities and the wilderness, in factories, mills, forests and mines. Every settled producing family on a farm would mean at least one extra self-supporting family in the other occupations of the nation."

Canadians, the writer says, talk glibly of vast vacant spaces, of "illimitable" resources which are "scarcely scratched; great stores of minerals, forests, soil fertility, power. But he quotes economists as saying, "the untapped resources are valueless until they are put to use, and have their highest value only when they are put to full and careful use and management for the good of the greatest number of people." Otherwise the aboriginal Indians of North America "were each and all multi-millionaires."

The total area of Canada, some two billion acres, is, he points out, only a little smaller than Europe, a little larger than the United States, and almost a third of the whole area of the British Empire. Of that total, some 31,000,000 acres is farming land, larger than France, Germany, Italy, Denmark, Holland, Belgium put together. Yet only about 60,000,000 acres is now actually under cultivation.

Here is a home for a tremendous population and Mr. Newton-White writes:



Three hundred millions acres of unused good farm land in a temperate climate is a tremendous area in the economics of the wodern world, and has far more significance than the average Canadian is likely to be bearing in mind. North American people have always dealt with land in a big way, and they see as an ordinary small farmer anyone holding from 80 to 640 acres. Even on the scale of our famous Quarter Section there is potential room for 1,275,000 families on the unused land. In many parts of the world, for millions of holders, the average "farm" is one or two acres.

"In other words, the carrying capacity of the Canadian vacant spaces in farming soils alone, and according to the standards of overcrowded countries (but which Heaven forbid would ever be the Canadian standard), is almost incredibly large."

Mr. Newton-White discusses the Dominion's forest resources, the tourist possibilities, the furs, the fisheries and the mineral deposits, capable of a great expansion of deevlopment. These special resources, he says, "enhance the agricultural." But he thinks the place to start in developing them lies in a land settlement policy.

Certainly Canada will have to consider immigration before long. It has a railway and a government organization to accommodate many more people than it now contains. But when it decides to let down the ars, it will have to select its settlers with care.

Be Gay—Get Out Your Scraps For This Laura Wheeler Quilt

PRIDE OF THE NORTH PATTERN 1492

Pride of the North—and well this quilt may be the pride of the quiltmaker of today. Colorful and economical in its scraps arranged like a fan, it is one of those quilts that even a beginner can piece successfully. Try the block out as a pillow and you'll want to keep right on and make enough for a quilt. Pattern 1492 contains complete, simple instructions for cutting, sewing and finishing, together with yardage chart, diagram of quilt to help arrange the blocks for single and double bed size, and a diagram of block which serves as a guide for placing the patches and suggests contrasting materials.

Send 20 cents in stamps or coin (coin preferred) for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Write plainly PATTERN NUMBER, your NAME and ADDRESS.

Woman's World

By Mair M. Morgan

Before the summer gets any further under way and before holidays and all the round of summer activities are started, do stop and consider your winter food needs. Nothing, of course, is farther from our minds during these lovely summer days, than cold winter weather, but it's a good idea to prepare for it. Jams and jellies are things which no household can do without at breakfast time on chilly mornings and there are so many other uses for them as well. Every housewife uses a flash of jelly here and there to brighten up and add sparkle to her dishes.

The first Canadian fruit to be used in this way is strawberries and as the season is not long, the sooner you make up your bottles of jam and jelly, the better. But that does not mean long hours of hard labor and hot, tiring work over a cook stove. There is a new way of doing this job which really makes it a pleasure, not only because of the time saved but also because the net result is really something to be proud of. By making your jams and jellies with bottled fruit pectin, you can be sure of the result—a perfect, tender product which has a flavor beyond compare.

Not all fruits, as you may have found out to your sorrow, have the same amount of pectin and that is the cause of the trouble when your jelly won't jell. This is just where bottled fruit pectin comes in. It takes the guess work out of jelly making and insures the results by applying just the right amount of pectin for whichever fruit you may be using. Strawberries, particularly, lack enough pectin to be used for jelly making unless pectin is added. The following recipe gives you just the right amount of each ingredient to control the relationship between the sugar, pectin and acid and so get successful jams and jellies every time.

Here are the recipes for both strawberry jam and jelly which you can make at the same time or within a few days of each other.

Strawberry Jelly

4 cups (2 lbs.) juice
8 cups (3½ lbs.) sugar
2 tablespoons lemon juice
1 bottle fruit pectin

Measure sugar and juice into a large saucepan and mix. Bring to a boil over hottest fire and at once add bottled fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard one-half minute. Remove from fire, skim, pour quickly. Paraffin hot jelly at once. Makes about 12 8-ounce glasses.

To prepare juice for jelly making, crush thoroughly or grind about 3 quarts fully ripe berries. Place fruit in jelly cloth or bag and squeeze out juice.

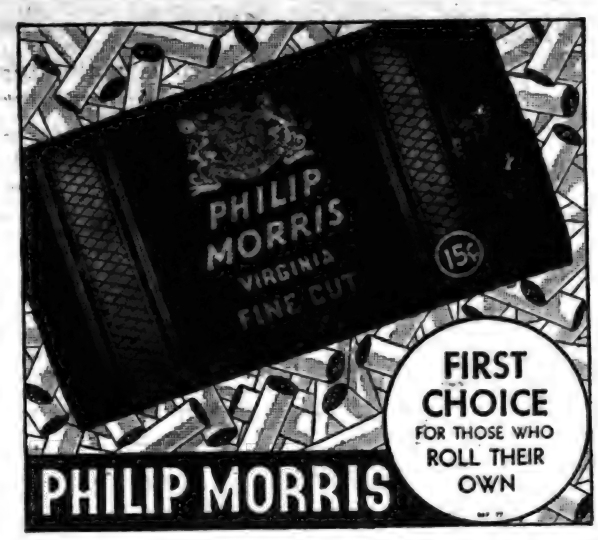
Strawberry Jam

4 cups (2 lbs.) strawberries
7 cups (3 lbs.) sugar
½ bottle fruit pectin

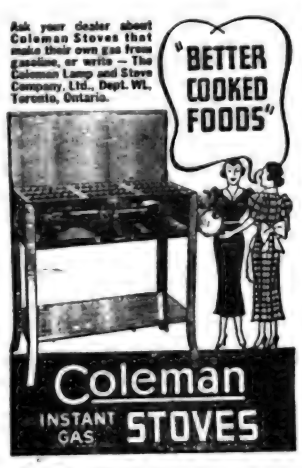
Measure sugar and fruit into a large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 3 minutes. Remove from fire and stir in bottled fruit pectin. Pour quickly. Paraffin hot jam at once. Makes about 10 8-ounce glasses.

Kitchen Friend

Perhaps you didn't know that salt will:



1. Remove egg stains on silver or China if applied damp with cold water.
2. Take away the taste from slightly burned milk if a pinch of it is added.
3. Prevent colors from running when washing colored articles, if a spoonful is added to the rinsing water.
4. Stop the contents of a cracked egg boiling out into the water if a teaspoonful is added quickly.
5. Make wicker furniture look like new if scrubbed with salt and water (no soap), as it stiffens the basket work as well as cleaning it.
6. Make brooms and brushes last twice as long if they are soaked in salted water before using.
7. Make new potatoes much easier to scrape if they are laid in salted water.
8. Sweeten the kitchen sink if a handful is thrown down the sink drain.



Do Not Make Marriage Your Sole Ambition

NEW YORK. — Mrs. Arthur H. Vandenberg, wife of the Republican Senator from Michigan, advised girls against making marriage their sole ambition in life.

"Let it come of it will," she said, "but don't go hunting for the right man. He will find you if it is to be. Meanwhile make good in some chosen vocation and concentrate on becoming a success in whatever you undertake."

Mrs. Vandenberg is the former Hazel H. Whittaker, who once wrote advice to the lovelorn for a midwestern newspaper.

SUNDAY SCHOOL LESSON

Lesson XI.
THE BROTHERLY LOVE OF JUDAH
(Genesis 42: 1—45: 15.)
Printed Text—Genesis 44: 18—34.
Golden Text—Let love of the brethren continue. Hebrews 13: 1.

The Lesson In Its Setting

Time:—The events in this lesson occurred during the seven years of famine, i.e., B.C .1716—B.C. 1710.

Place:—The family of Jacob was probably residing near Beer-sheba in southern Palestine; Joseph was living in the capital of Egypt, Zoan, in the eastern part of the Nile Delta.

The Plan of the Lesson

Subject:—The Perfect Purposes of God and His Divine Overruling to Accomplish Them.

"Then Judah came near unto him, and said, Oh, my lord, let thy servant, I pray thee speak a word in my lord's ears, and let thine anger burn against thy servant; for thou art even as Pharaoh."—Judah first acknowledges the absolute supremacy of the one to whom he is speaking.

"My lord asked his servants, saying, Have ye a father, or a brother? And we said unto my lord, We have a father, an old man, and a child of his old age, a little one; and his brother is dead, and he alone is left of his mother; and his father loveth him."— Almost every word here is bound to appeal to the heart of Joseph—"a father, an old man," "a child of his old age, a little one," "his brother is dead," "he alone is left," "his mother," "his father loveth him."

"And thou saidst unto thy servants, Bring him down unto me, that I may set mine eyes upon him. And we said unto my lord, The lad cannot leave his father: for if he should leave his father, his father would die. And thou saidst unto thy servants, Except your youngest brother come down with you, ye shall see my face no more. And it came to pass when we came up unto thy servant my father, we told him the words of my lord. And our father said, Go again, buy us a little food. And we said, We cannot go down; if our youngest brother be with us, then will we go down; for we may not see the man's face, except our youngest brother be with us."—Though Judah is too burdened and his heart torn with too great an anguish to think of cleverness, yet he could never have spoken more movingly to the one before whom he stood if he had thought out his speech for weeks before, because he is simply telling the one who now demands that Benjamin remain in Egypt that all of this tragedy and trouble came about because the one before whom he was speaking demanded that Benjamin be brought down into Egypt against the strong wishes of the boy's father.

"And thy servant my father said unto us, Ye know that my wife bare me two sons. And the one went out from me, and I said, Surely he is torn in pieces; and I have not seen him since. And if ye take this one also from me, and harm befall him, ye will bring down my gray hairs with sorrow to Sheol. Now therefore when I come to thy servant my father, and the lad is not with us; seeing that his life is bound up in the lad's life; it will come to pass, when he seeth that the lad is not with us, that he will die; and thy servants will bring down the gray hairs of thy servant our father with sorrow to Sheol."—Let the lord before whom he speaks realize that to go back to Canaan without this youngest son will bring the old father prematurely in sorrow to the grave. Here Judah seems to appeal to the deepest emotions of the human heart, love for an aged parent, and a regard for ultimate consequences.

"For thy servant became surety for the lad unto my father, saying, If I bring him not unto thee, then shall I bear the blame to my father for ever. Now therefore, let thy servant, I pray thee, abide instead of the lad a bondman to my lord; and let the lad go up with his brethren. For how shall I go up to my father, if the lad be not with me? lest I see the evil that shall come on my father."—The whole argument is powerfully concluded by Judah's offering to take Benjamin's place. This appeal was not simply a succession of words superficially expressed, but the profoundest confessions of a broken heart are here proved. Judah would rather live the rest of his days in Egyptian slavery than to see his father die with a broken heart when he knew that Benjamin would not come home again. The sublime heroism of his noble act of self-sacrifice on the part of Judah would be impossible to over-estimate. The self-forgetful magnanimity of such an action has never been eclipsed and seldom rivalled. After words so exquisitely beautiful, and profoundly prophetic, it was impossible for Joseph to doubt that a complete change had passed upon his brethren and in particular, upon Judah, since the day when he had eloquently urged and they had wickedly consented to sell their brother Joseph, into Egypt.

"Christ is our surety. He makes himself one with us (Heb. 2: 11). He sprang from Judah (Heb. 7: 14). He was accepted as our substitute, was bound, abused, and crucified. He bore the curse for us (Gal. 3: 13). Christ died for us who were below him. Furthermore, Christ pleads for us before the throne of the Father (Heb. 7: 25).

The Character of Judah

Judah's name had been given to him at his birth amid circumstances of hope on the part of his mother, for Judah means "praise." His early youth did not, however, afford any proof whatever that he was living up to his splendid name. But in these later chapters, he comes to the fore with great force of character, and the whole tone of his exquisite appeal in behalf of Benjamin shows that he is now living up to his name. The pressure of poverty, the stings of conscience, the deepening of family love, the checking of self-confidence, are a few of the ways in which Judah was brought into the line of true life and enabled to take the lead in these family troubles and sorrows (Heb. 12: 11).

Martin has said that he would have given anything if he could pray to God as Judah prayed to Joseph.

Farm Problems .

Conducted by
PROFESSOR HENRY C. BELL
with the co-operation of the various departments of Ontario Agricultural College

J. F. G. of Halton Co., asks the following questions:

Question — "Where can package bees and equipment be secured?"

Answer — Package bees may be secured from F. W. Jones and Son, of Guelph, Ontario; W. A. Chrysler & Son, Chatham, Ontario; H. M. Clubine and Company, Brantford, Ontario as well as other distributors within the province. They may also be secured from one of the many package producers in the Southern States.

Question — "Is it necesary to secure a permit to move or sell bees?"

Answer — The requirements under the Bee Disease Act demand that an owner or possessor of an apiary shall not sell, barter, give away or remove from the premises any bees or used apiary appliances or apparatus unless he has secured a permit from the Provincial Apiarist that such bees, used apiary appliances and aparatus have been properly dininfected and are free from disease.

Question — "Is it necessary to feed package bees, and if so, how would you prepare it?"

Answer — "Package bees should be given at least ten pounds of sugar syrup, mixed, one of sugar to one of water, by weight or measure. This may be fed in a ten pound pail, that has several perforated holes in the lid through which the liquid may be taken by the bees. The main object of feeding is to avoid starvation until the nectar secretion in flowers is available.

Question — "When should potatoes be planted?" E. J., Ontario Co.

Answer — From experiments conducted at the Ontario Agricultural College for seven years in duplicate, figuring from plantings on May 20th to June 17th, there is a loss of 1 1-5 bushels per acre per day in early potatoes, 1 1-3 bushels per acre per day in late potatoes, and 1 1-4 bushels per acre per day in a combination of early and late potatoes as the date of planting is delayed from the earliest to the latest time mentioned.

Question — 'How late can I sow buckwheat to get good results?" J. O., Grey Co.

Answer — Date of seeding tests with reference to buckwheat have been investigated for five years by the Field Husbandry Department, of Ontario Agricultural College, including earliest plantings May 2nd, to as late as July 18th. Highest yields of Silver Hull buckwheat were obtained at the average date of May 16th, with an average yield of 29.0 bushels per acre. The same variety planted on July 4th yielded only 7.0 bushels per acre.

The average yield of leading varieties tends to [illegible] rapidly from the middle of May to early July.

A Delight to Stars

Among the scores of Hollywood notables who turned out to attend opening of Lynn Fontanne-Alfred Lunt production of "Idiot's Delight" were (left to right): Cedric Gibbons, Marlene Dietrich, Douglas Fairbanks, Jr., and Dolores Del Rio.

Know What Cow Comfort Means

To construct a comfortable barn one must know definitely what cow comfort means. Cows do not require fancy and expensive buildings. They are very practical in their tastes. They do want, however, freedom in their stall and a pen permitting them to move about at will. They like their food clean and at regular periods. They like a supply of fresh, clean water always at hand. They prefer a light, well ventilated stable to one that is dark and poorly ventilated. These cow requirements demand modern equipment, which is not only to the cow's liking but also saves much hard work and time on art part of the caretaker.

Forty Hour Week, 40 Cent Minimum Wage Seen in U.S.

WASHINGTON, — Congressmen closely in touch with labor matters predicted the United States government's general labor legislation would seek to establish a 40-hour work week and a basic minimum wage of 40 cents an hour.

The administration bill, to be recommended by President Roosevelt in a special message to Congress, will be Mass.,) of the house Labor Committee.

Connery would not discuss details. But other memers said the provisions of the bill probably would be flexible so as to take care of industries having labor problems peculiar to themselves.

The bill, they indicated, would set up a commission to work out the details of the program. They said the commission probably would have power to fix maximum hours in some of the cases of 35 hours a week and to establish minimum wages in brackets ranging up to a limit of $1,500 a year.

The bill was expected to provide a introduced by Chairman Connery (D.

Freakish weather caused some odd disturbances, when gasping in terrific heat, residents of Wubin, a small West Australian country town, were suddenly deluged with ice. A cloudburst, which caused local floodings, was followed by terrific hail, which killed poultry and damaged houses. Within two hours the sun was shining again and the temperature was over 100 degrees.

She Went to Town Found It Wonderful

CHARLOTTETOWN, — Mrs. Eliza Costain came to town, for the first time in her 74 years, and summed up her sensations in one word, "Wonderful!"

It was one of the few times she had ever left the Hill River district, 95 miles from here, and her first visit to Prince Edward's Island's capital. She spent a full day sightseeing.

Mrs. Costain said she had never operated an electric light switch until she arrived in Charlottetown and the hot and cold water struggle faucets gave her quite a struggle at first after the heavy well-pump.

She was looking forward anxiously to her first motion picture.

The Farmer's Task

Writes the Hamilton Spectator—The tendency to place at a discount the inherent ability needed for successful farming is at least deplorable. Such work demands more of the stronger qualities of character than almost any other. Its taskmaster, nature, is the most adamant of them all. It is sheer casuistry to place it anywhere but in the higher scale of occupations.

Ironically enough, it is the so-called advantages of the cities, the things which so often surfeit us, that maintain a certain hold on the country dweller of today. But it is a good thing. Modern entertainments and transportation have helper farming communities everywhere. And perhaps after all there is still a deep-rooted love of the land, among the larger portion of our people which, if not eloquent, is at least the sanest and the safest patriotism to be found.

Turnover and Cake

Cake truck parked in Newark, J.N., street became the support for a turnover when woman driving this automobile swerved to avoid a collision and found herself suspended, but unhurt, in mid-air.

Officials and "Czar" Pitch in to Make All-Star Game a Success

Officials of both major baseball leagues and Judge Kenesaw Mountain Landis at meeting in Washington, D.C., to discuss all-star game to be held July 7th. Left to right: Ford Frick, Judge Landis, Will Harridge and (standing) Clark Griffiths.

Movie-radio gossip

By DOROTHY

Innumerable fans have asked me if the impressive mansion and estate which Fredric March presents to Janet Gaynor in the course of the plot of "A Star Is Born" was especially built for the picture. Others think they recognize it as the house once occupied by Barbara Stanwyck when she was married to Frank Fay. Neither theory is correct. The house belongs to a Los Angeles real estate dealer and was merely rented by the Selznick-International company for two days.

The enterprising young Grand National company certainly stole a real march on the rest of the studios as they signed Stu Erwin to a starring contract. Since that time "Dance, Charlie, Dance" which he made for Warner Brothers has been previewed and Stu has landed right up in the thin ranks of top-notch comedians. He has finished his first picture for Grand National. It is called "Small Town Boy" and everyone says it is a knockout.

Ever since Myrna Loye finished "Parnell," she has been enjoying a where a gleaming luxurious hotel is sharing scenic honors with the harbor which is said to be the most beautiful in the world — even more beautiful than the far-famed Bay of Naples. Her husband, Arthur Hornblow, got away from his duties at Paralazy vacation at Ensenada, Mexico, and mount long enough to spend a week with her and was seized with the inspiration to write a picture set in the locale of Ensenada. Myrna hopes that she can stay on there while it is being filmed but M-G-M have a crowded program ahead of her.

Myrna Loy

ODDS AND ENDS — A little boy working on the set of "Varsity Show" at Warner Brothers came down with measles, and the whole troupe headed by Dick Powell had to knock off their work and watch for symptoms for two or three days — Errol Flynn brought two lion hounds back to Hollywood with him, the only ones of their breed in America, and now everyone is wondering what these sporting dogs will do for amusement, hunt at the Universal zoo? — Jean Arthur just cannot fix her own hair, so when the studio hairdressers went out on the strike, her director, Mitchell Leisen, arranged her locks for her, and very well too. — Clark Gable and Carole Lombard went as cowboy and cowgirl to a recent masquerade birthday party and took the honored guest a Shetland pony as a gift.

Pleasingly Summery

Adrienne Ames is a cool vision in this summer dress of white crepe printed with red, white, blue and green flowers. It ties at throat with soft bow of matching material.

SPECIAL INTRODUCTORY OFFER

Attractive new rooms can be created overnight with Semi-Lustre, the amazing new *washable* satin-enamel. Semi-Lustre gives you the soft, light-reflecting, non-glare surface so much in vogue, and makes redecorating as fascinating as choosing a costume. The 13 lovely pastel shades give you unlimited scope for individual color schemes.

Think of the immense practical advantage of a *washable* finish! Unsightly finger marks and stains can be removed instantly with soap and water—without injury to the delicate satin finish.

Semi-Lustre is easily applied, dries quickly, and is DEODORIZED. Try this amazing new finish—the 10-day introductory offer enables you to do so at a great saving in cash!

37-0

FOR 10 DAYS ONLY

So that you may try out Semi-Lustre—in your kitchen . . . your bathroom . . . on furniture or woodwork—we are making this sensational introductory offer. Fill in your name and address on the above Cash Savings Certificate. Tear it out and take it to your paint store. It entitles you to any quantity of Semi-Lustre you want at the above special prices. But only during the 10-day period from April 28 to May 8 inclusive. After May 8 the regular prices on Semi-Lustre will prevail. We suggest, therefore, that you use your Cash Savings Certificate at once.

A Real Saving

FOR READERS OF THIS PAPER

FRIENDS! We are combining our newspaper with these two great magazine offers, so that you can realize a remarkable cash saving on this year's reading. Either offer permits a choice of top-notch magazines with our paper, and, regardless of your selection, you will say it's a bargain.

REACHING THE GOAL

Consumption, as tuberculosis of the lungs is commonly called, is a wasting ailment; stubborn to master, requiring treatment and care over a long period of time. It can seldom be cured at home. Then, too, it is a communicable disease, especially dangerous to young children.

This was fully realized by the founders of the National Sanitarium Association, when forty years ago they erected the first hospital in Canada for the treatment of this disease.

This venture met with much opposition and even ridicule, for at that time it was firmly believed that tuberculosis was incurable. It was just one of those things which had to be, so why bother about it.

However, it was not long before the regimen of this small hospital began to show results—people were actually being cured—going home and talking about it.

Such was the small beginning of the Muskoka, the Toronto and the Queen Mary Hospitals for Consumptives, which now provide for more than one thousand patients.

The progress made and the change in outlook is reflected by these and the many other fine sanatoria throughout the Dominion, and by the large number of public and private organizations which to-day are sparing no effort to overcome tuberculosis.

The results have been that thousands upon thousands have been given a chance to get well, who but for hospital treatment, would have been left without hope, and the mortality from this disease has been reduced by 75%.

With tuberculosis ousted from the premier position to seventh place as the cause of death, there is cause for congratulation, but there is also the danger of the feeling of self complacency and the slackening of effort. With the goal in sight, this would indeed be a calamity, for tuberculosis will not halt its advance unless it is forced to do so. This can only be accomplished with the continued co-operation of the public at large.

The Trustees of the Muskoka, the Toronto and the Queen Mary Hospitals for Consumptives are determined that, so far as lies within their power, no one who suffers from tuberculosis shall be denied a chance to get well. If you would help in this great life saving work, please send a gift to National Sanitarium Association, 223 College Street, Toronto.

What saith the Scriptures?

And whosoever was not found written in the Book of Life was cast into the lake of fire—Rev. 20:15

"GENEROSITY"

"He who gives what he would as readily throw away, gives without generosity for the essence of generosity is in self-sacrifice."—H. Taylor.

"He who is afraid of being too generous has lost the power of being magnanimous. The best man or woman is the most unselfed."—Mary Baker Eddy.

"What I gave, I have; what I spent, I had; what I kept, I lost."—Old Epitaph.

"He that gives all, though but little gives much; because God looks not to the quantity of the gift, but to the quality of the givers."—Quarles.

"Men of the noblest dispositions think themselves happiest when others share their happiness with them."
—Duncan.

"True generosity is a duty as indispensably necessary as those imposed on us by law."—Goldsmith.

'LICENSES' AND 'PERMITS'

We like to boast a bit of our country being free,
But listen for a moment and I think you will agree
That we spend a lot of money in this present day and age
For "licenses" and "permits" as we jog along our way.
If you want to drive a motor car, a big truck or a bus,
You have got to buy a license or the Cops will raise a fuss.
You have got to buy a passport would you travel o'er the sea,
And that passport costs you five bucks no matter who you be.
If you should meet a pretty girl you think you'd like to wed,
You've got to get a license or the parson cuts you dead.
If you would build a little home just big enough for two
You not only need the lumber but you need a permit too.
You must have a yearly license for your boy to keep a dog;
And you sure must buy a license to go hunting in the bog.
If you could stay and listen, I could show to you, my friend,
A long list of needed licenses that seem to have no end.
And maybe the time approaches when we'll have to show just cause
Why a license isn't needed for the bearded Santa Claus.
On licenses and permits now our governments do thrive,
And you've got to keep on buying as long as you are alive,
For the diggers in the graveyard won't place sods above your head,
Till they know you have a permit from a doctor to be dead.
—Author Unknown.

Alaska's Lottery Known as "Nenana Ice Pool"

Just as other countries have their favorite lotteries, and sweepstakes, so Alaska comes in for its sweepstakes, known as the "Nenana Ice Pool." One puts down a dollar bet on a freak of Nature, says the Washington Star.

You set the date when you estimate the ice will break and flow down the Tanana river, designating the hour and the minute. For example: You select April 1 (though 'tis no April fool's stunt), designating the hour and the minute. This is considered your booking for your chance in lottery. Here's the way the winner is determined:

A crowbar is set in the ice, a wire runs across the frozen river six feet below the iron stake. This wire is connected to a clock on the shore. When the ice breaks and moves downstream contact is made, which stops the clock. There is a thunderous roar of breaking ice, flowing down the river. This tremendous noise keeps up for many days as the ice breaks up and flows with the current. Very often the ice jams cause floods. This great tide feeds the Yukon river in Alaska. It is a very spectacular sight, especially at early dawn. It has been found necessary at times to dynamite the ice which accumulates in great boulders, to prevent overstacking of the river banks.

The "ice stake" is awarded to the person whose lottery ticket registers nearest the automatic stopping of the clock-time. There is no graft and very little overhead expense, and the full sum, with exception of minor expenses, goes to the lucky winner. At "Nenana Ice Pool," held in Fairbanks, the winner received over $90,000. The whole performance is automatically operated and no one can possibly be cheated.

"Castle of True Wives," Story of Middle Ages

Not very far from Heilbronn, in Wurtemburg, is the ruin of the Castle of Weibertreu, concerning which is told one of the most curious tales of the Middle ages, writes a Heilbronn, Germany, correspondent in the Washington Post. It appears that in the Twelfth century the castle was captured by a feudal chief, who, holding the male inhabitants within its grim walls, planned to put them all to death.

As a parting gesture to the women, who were similarly captured, he gave them permission to leave the castle and take with them only their most valued piece of property. To the victor's astonishment, the women marched across the drawbridge to freedom, each carrying her husband on her back. For this reason, says the old legend, the old fortress came to be called "The Castle of True Wives."

The Castle of Weibertreu is sought out by visitors who account it one of the quaint sights of this region. Mark Twain, when he was there, if one may believe what he says in his "Tramp Abroad," did not actually go up the hill to the ruin, but "observed it from a distance, while my horse leaned up against a fence."

Northern Ohio Indians

The Eries, for whom the lake was named, were at one time the occupants of northeastern Ohio, as well as of the whole southern shore of Lake Erie from near the site of Buffalo to Sandusky bay. They were kin of the Iroquois, but bitter enemies, and it seems that about 1650 a merciless war broke out between them. The Iroquois were superior in numbers and organization, with the result that they practically exterminated the Erie nation, a few remnants of it being received into other tribes. The lands of the Eries were thus left largely in possession of the Iroquois. They were also occupied to some extent by more westerly nations—Ottawas, Chippewas and Pottawattomies.

Ruins of Pompeii

When the fury of the volcanic conflagration which destroyed Pompeii 79 A. D. was past, the site of the city was a sea of ashes, the upper parts of buildings not destroyed sticking out and serving as a guide-post to those who returned to dig among the ruins. By the Third century a number of buildings had been erected to the north of the city. This second Pompeii was, however, abandoned in the Eleventh century on account of the frequent earthquakes, eruptions of Vesuvius and incursions of Saracens.

Famous Greek Monastery

The famous Greek Orthodox monastery of Valamo, on one of a group of islands in the northern part of Lake Ladoga, Finland, is said to have been founded A. D. 992, and was at its height of fame toward the end of the last century, when pilgrims visited it in enormous numbers. The most noteworthy sight is the magnificently equipped Church of the Transfiguration, which consists of two churches placed one over the other. There are several smaller sanctuaries and hermitages.

Had to Buy Sailors

From the Sixteenth to the Nineteenth century, England had such a difficult time getting sailors for her navy that she paid gangs and others so much a head for every man that they "pressed," or shanghaied, into the service. One woman found this business so profitable that she opened a saloon and, within a period of twelve years, produced 26,000 recruits—with the aid of knockout drops—for her king and country.—Collier's Weekly.

WEDDING

DEATH—COWIESON — On Wednesday, June 9th, 1937, in Danforth United Church, by the Rev. S. L. Osborne, assisted by the Rev. McMurray, Dorothy Kathleen, daughter of Mr. and Mrs. C. A. Cowieson, to J. Ivan Death, son of Mr. and Mrs. H. B. Death, of Dixie.

HORNBY-CHURCH TO CELEBRATE CENTENNIAL

St. Stephen's Church, Hornby, will celebrate its centennial with special services on Sunday, June 20th. Morning Prayer at 11 a.m., S.T. Preacher, Bishop L. B. Broughall, of Niagara Diocese. Evensong at 7.00 p.m., S.T. Preacher, Archdeacon Scovil of Guelph. On Tuesday, June 22nd, a garden party will be held at the home of Robt. Orr, 6th line, Trafalgar, 3 miles from Milton. A splendid programme will be given by the following artists: Miss Jessie Butt, soprano, and Harry Binns, tenor (wonderful voices and beautiful costumes) Tom Hamilton, Scotch comedian; Dorothy Merral, accordionist and reader; Edgar Goodaire, pianist. Refreshment booth on grounds. Admission 25c and 15c. Rev. W. G. Brook, rector.

The Open Column

Scientists have told us that we must keep ourselves uninhibited, that is, without a flock of secret, unfulfilled desires and urges bouncing about within our respective skulls. Apparently, if we feel the impulse to go out and be a real, rarin' whoopin' roisterer, we should get all of the little roisters out of our systems, so that our thoughts, if any, would thenceforth be free and unclouded by the unhappy feeling that we should have busted loose, even for a little while. Our personal observation of persons who wanted to keep their minds uninhibited leads us to believe that their minds are not merely uninhibited, but practically uninhabited. A cheap pseudo-pun, perhaps, but we still stand by the observation.

We went through the process of being disinhibited when we were kneehigh to a grasshopper, and continued the process until we had to buckle down and earn a living. The first part of the process was accomplished by a parental hand and arm energetically wielding a carpet slipper, and later a broad rubber strap. The latter end of our mental emancipation came from the flying fists of our associates, who had never heard of inhibitions, and from the officers of the law who objected to our little escapades, etc. Enough of that.

There are, no doubt, millions of people who are carrying a secret inhibition about with them who can do nothing about getting rid of it. Often this hidden rift in their mental cosmos is of a morbid, horrible sort. Bloody murders and "crimes of passion" entrance them. They have a sneaking, unexpressed desire to go out and do something of that sort themselves, but, because they lack courage, or money, or something or other which ties them to ordinary, every-day life, their hidden desires go unsatisfied in the actual sense.

To these unfortunates, whose mental twist keeps them from thinking clearly for themselves, there cater hundreds of publications which provide vicarious surcease from the gnawings of their inhibitions. Many of these magazines and papers are inocuous and vapid. Their written matter provides a sort of opiate which lulls the reader into mental lethargy without providing inspiration for any deeds of valor or horror. One in a thousand of their readers may, perhaps, derive enough encouragement to action from their pages to do something, usually something unlawful. The old "wild west" movies were blamed for inciting little boys to various types of desperadoisms, but there is little incentive to action to be found in the ordinary rough-paper cheap magazine.

Then there are quite a number of "slick-paper" magazines which deal at length and in detail with the boy and girl problem, providing all sorts of somewhat slimy nuances and insinuations. We read a story of that sort the other day, and found nothing in it worth reading, from start to finish. It was all about a young lady who loved a young man, but, being modern, had to disguise the fact, and trail about with a crowd of not-so-good people to express herself, before she finally capitulated to the young man. Having read a few stories written by gentlemen and ladies, about lively, interesting topics, we felt that we had been gypped when he paid a nickel for drivel of that sort. But it was a very popular magazine with our "modern set".

Lately, however, lest any of the public be missed, there have been issued quite a number of magazines dealing almost entirely in pictures. Frequently these pictures depict the neurotic heart-throbs of divorcees, ladies of very doubtful fame who have risen to prominence by their ability with a gun or a bottle of poison, and other anti-social or amoral characters in the public eye, as represented by the yellow press. If you can't read, you can at least look at the pictures, and draw your own conclusions.

These magazines are readily sold to adolescents and pre - adolescents. We've seen plenty of youngsters running about with these scandal-sheets under their arms, or huddled in corners avidly lapping up the printed horrors of their pages. And we believe that vicarious destruction of inhibitions is impossible. A real remedy for hidden urges, we feel, is to be found chiefly in the slipper of parental discipline, control of authorities beyond the limits of the home, and, as a first-class purge of the vestiges of wrong-headedness, a wallop from a lacrosse stick or a boxing glove is worth fifty Freuds.

LET US SMILE

"Yassah," said old Link, "business very good. Done bought a pig fo' ten dollars, traded pig fo' barrer, barrer fo' calf, calf fo' a bicycle, and sol' de bicycle fo' ten dollars."

"But yo' don' make nothing, Link!"

"Sho 'nough, but look at de business Ah been doin'."

OBITUARY

Mrs. Christopher Whitney passed away at Norval on June 11th. She was a native of Cobourg, and had resided in this district 20 years. Buried in Toronto.

Rev. Wm. Stewart Edgar, aged 64, pastor of Lorne Park Baptist Church, passed away at his home on June 13th. He is survived by his wife. Interment took place at Pine Hills cemetery.

John M. Steele, died in Brampton on June 12th, and was buried in Erin cemetery.

Alexander Stirritt passed away at Brampton on June 13th, in his 51st year. He is survived by his wife, Reatha McElwain.

Percival Wickens, headmaster of Appleby School died in Toronto on June 14th and was buried at Oakville yesterday.

Jacob Cook passed away at Brampton on June 11, in his 65th year. Interment took place at Mount Albert. He is survived by his wife, Ellen Morris.

Sarah Margaret Lawrence died at Woodbridge, on June 11, and was buried at Claireville, Toronto Gore.

Leonard G. Martin, Islington, passed away suddenly on June 13th in his 41st year. He was buried in Mount Pleasant cemetery.

Mrs. F. Tracy

Wife of Prof. F. Tracy, of the University of Toronto, Mrs. Charlotte Tracy, 173 Walmer road, died in her 67th year. Daughter of Mr. and Mrs. James Haines she was born at Dixie. She married Prof. Tracy in 1893. Besides her husband, three sons, Gordon, of Madison, Wis., Herman, at Queen's University, and Clarence, at the University of Alberta, survive.

BRAMPTON

Several hundred Peel Conservatives gathered at the home of W. J. McKinney, president of the Peel County Conservative Association, Friday evening, for the first evening basket picnic ever held by the association.

The picnic had little political flavor, most of the speakers contenting themselves with extending their congratulations to the president and his son on the 103rd anniversary of the establishment of his farm estate.

Col. T. L. Kennedy, Dixie, chief speaker, pointed out that, more than a century ago, William McKinney, an immigrant from Ireland to Canada, and his wife, had settled on the farm in the hope of leading Christian lives in a state of law and order. "During the past three years," Col. Kennedy declared, "we have been forgetting too often the ideals of those pioneers, and it is time that we returned to them."

Brief addresses were made by Mr. McKinney, Gordon Graydon, M.P., Sam Charters, Walter K. Mara, T. H. Moorehead, Harry Wilson and Chris Johnston, Brampton; Fred Holder, Mono Road; and Mrs. David Corbett, Lorne Park. Entertainment was provided by Rev. R. V. Wilson, Norval. Mrs. W. A. Nelson, Miss Irene Peacock and the Salisbury family, Brampton.

Streetsville was represented by Mr. H. Q. Burns, president of the local association, and several other gentlemen.

Unusual projects have been chosen for the annual Achievement Day competitions of the Peel Junior Institutes, to be held in Brampton, June 19.

Two types of exhibit will be made, the first a display of vegetables prepared for use, and the second an exhibit of clothes-closet accessories.

Teams from the various branches of the Junior Institute will be called upon to prepare home-grown vegetables in various ways, and judge the quality of various types of vegetables, while girls who have chosen the clothes-closet project will be asked to judge hat-standards, covers, shoe packs, and other accessories of the same kind.

DIXIE

On account of a number of conflicting calls upon their attention and that of the afternoon speaker, the trustees of the Dixie Union Church and Cemetery have postponed their Grand Rally from 19th June, to Saturday afternoon, 3rd July.

Big plans are being made for this meeting, and for the picnic which is to follow. Guests will be present from Toronto, Oakville, Hamilton, etc. A Bugle band and a Flute band will be in attendance, and old-timers in costumes of their youth or of their ancestors, will be there to sing the old songs and renew old friendships.

The speaker, Mr. Perkins Bull, always has interesting news, and has recently been making an intensive study of the beginnings of religion in Peel in connection with his Church of England history.

A full programme and all details of the affair will be published later.

Happy Birthday for Local Lady

On the 6th of June, 1857, in a cosy little house in the city of Glasgow, a little girl came into this home and in life's busy scene to take a part. Her parents, the late Dugald and Christiane McGregor knew their first duty with the child was to have her baptised. This ceremony was performed by the late Rev. A. McDougald, Presbyterian minister, of Cremore church, Glasgow. Her name was Margaret. That same year the family of four, Agnes, Malcolm, Charles and Margaret, left bonnie Scotland on the Brig Lydia, a sailing vessel, being nine weeks on the ocean before landing in Oakville.

After living a few years in Oakville the family moved to lot 7, ninth line, Trafalgar township. Part of their school days were spent in the little red brick school on the 10th line, under Squire McGill, Donald McDonald and John Hasper. When the brick school was replaced by the present white school, they attended this school for a time. Margaret, the only surviving one of the family born in Scotland, was married to David Ross in 1882. On their farm, Lot 6, ninth concession, Esquesing township, where they settled, they were surrounded by families of staunch Presbyterians. There were two families of Browns, McCollums, Huffman's, Harpe's, Trimble's, Douglas's, Kennedy's, McClure's, Brook's King's, McMillan's. All of these families were faithful to the Hornby Presbyterian Church until the frost of 1925, called church union, scattered the Hornby Presbyterians far and wide.

On account of Mr. Ross' failing health they rented their farm. Mr. Ross died in Nineteen Hundred. Shortly after, Mrs. Ross went to live in Streetsville, with her brother-in-law and sister, Mr. and Mrs. John Ross. When John Ross died twelve years ago the two sisters lived together. Two years ago Mrs. John Ross passed away, then Mrs. Dave Ross lived alone. And although she lived ten years after the allotted span of life her relations who loved her did not forget her and asked permission to celebrate with her in her home in Streesville, the eightieth anniversary of her birth. On Saturday, June fifth, with armful of flowers, a birthday cake with eighty candles, and lovely gifts they thought would express their love for her, these friends from Toronto came: Mrs. (Rev.) M. A. Malcolm McGregor, M.A., Agnes McGregor, Breck McGregor, his wife, Hazel, and two children Charles McGregor, Misses Hannah and Nell Breckenridge, Dugald Ross and Mrs. Pendleton, New Jersey.

When Mrs. Ross came to Streetsville the Church she joined and attended in her youth, old St. Andrew's was the place she loved the best, where she has been a faithful worshipper all these years. On Monday evening, June 7th, the following representatives of the Ladies Association of St. Andrew's Church: Mrs. D. W. Reid, Miss Eva Reid, Mrs. Meredith, Mrs. Tisdale, and her two children, Mrs. Greig, Mrs. Victor Johnston, Mrs. T. H. Goodison, Mrs. Fraser and Mrs. Stewart, came laden with flowers and all kinds of beautiful gifts to Mrs. Ross' home to celebrate her birthday and cheer her on her way. Her sister and brother, with Mrs. Lindsay, George O'Connor and Dugald Ross joined the happy circle. Miss Eva Reid then took charge of the meeting. Miss Reid made many complimentary remarks to Mrs. Ross, how her associates valued the part she always took in anything in any way she could to help in church work. Her kind words will be cherished by Mrs. Ross as long as she lives. Then the numerous beautiful gifts were carried by Mysie Tisdale from Miss Reid to Mrs. Ross. Then a short, interesting programme was given by Mrs. Greig, two lovely solos; George O'Connor, several recitations; Mrs. Harold Beaty, reminiscences of Ross and Brown's farm life; Mrs. Tisdale and Mrs. Lindsay. The lovely birthday cake was baked by Miss Reid. A lovely lunch was then served.

MRS. ROSS' REPLY

It was eighty years ago today,
Since I came in this world to stay,
The eighty years now in the past
Have pleasant memories that will last.

The greatest blessings heaven sends
Is when we are old to have true friends,
And now I have this happy thought
That by true friends I'm not forgot.

Dear friends you make my life so bright
With words, and gifts you brought tonight.
What a glorious part in life to find
Such friends like you, so good and kind.

As long as life its powers extend,
My prayers for you will never end,
To one this scene tonight is worth
It makes my home a heaven on earth.

SANDY

District News

WEDDINGS

MELLOW—WHITEHEAD

A quiet wedding took place at the Bolton United Church parsonage with the Rev. G. W. W. Rivers officiating, when Grace Elizabeth, daughter of the late Mr. and Mrs. Robert Whitehead of Malton, became the bride of William John Beatty Mellow, son of Mr. and Mrs. Wilbert Mellow of Bolton. The bride was in turquoise blue net with touches of pink, and rosebud pink accessories. She wore a shoulder corsage of Talisman roses. The couple were unattended. Mr. and Mrs. Mellow left later by motor through Quebec and Northern Ontario. The bride travelled in a navy and white silk suit with navy accessories, and upon their return will reside near Bolton.

Grice—Clevely

Miss Eva May, daughter of Mr. and Mrs. Thomas Clevely, became the bride of Percy James Grice, son of Mr. and Mrs. Clarkson Grice, Dixie, at a quiet wedding service at the parsonage of St. Paul's United Church, Brampton, on June 10th. Rev. T. W. F. G. Andrews officiated.

The bride, who wore a white crepe frock with white hat and corsage of Talisman roses and lily-of-the-valley, was attended by Miss Alice Grice, sister of the groom, who also wore white crepe, with a similar corsage. James Clevely, brother of the bride, was groomsman.

At a wedding reception at the home of the bride's parents, Mrs. Clevely wore black crepe. She was assisted by Mrs. Grice, in black lace with white trim. Following the reception, the bride and groom left for a motor honeymoon to northern points, the bride travelling in blue flowered chiffon, with white flannel coat and white sport hat. On their return, they will make their home at Dixie.

Hunter—Flowers

Acton, June 14—The marriage took place in St. Alban's Church of Irene Lillian Flowers, daughter of Mrs. G. Elliott, and the late Mr. Thomas Flowers of Gravenhurst, to Mr. Clifford Thomas Hunter, son of Mr. Thomas Hunter and the late Mrs. Hunter. Rev. Mr. Brillinger officiated. Miss Pearl McMillan played the wedding music and the soloist was Miss Ruth Gibson. For the occasion, the church was decorated with snow-balls, purple lilacs and ferns. Mr. G. Elliott gave the bride away. She wore orchid satin with overdress of tulle, matching satin hat with veil and carried Talisman roses and lily-of-the-valley. Miss Lorraine Wilson was maid of honor, wearing pink georgette with white hat and carrying Sweetheart roses. The bridesmaids, Miss Reta Whaley of Streetsville, and Miss Lillian Black, of Brampton, nieces of the groom, wore yellow organdie and carried nosegays of mauve sweet peas. Mr. Isaac Hunter was his brother's groomsman and the ushers were Mr. L. Whaley of Streetsville and Mr. G. McFadden, uncle of the bride. The reception was held at the home of the bride's grandparents, Mr. and Mrs. W. McFadden, Crescent avenue, Acton, where Mrs. Elliott, wearing grey flowered georgette with grey accessories and corsage of mauve sweet peas, received.

On Saturday, June 19, in the Church of the Ascension, the wedding is being solemnized of Miss Clara Jeanette Hunt, Hamilton, and Rev. Ernest Sydney Ottley, of Streetsville. The bridegroom-elect was formerly curate at the Church of the Ascension, and has many friends in Hamilton. After leaving Hamilton, he was, for a time, at St. Paul's, Bloor St., Toronto, and is now rector of Trinity Church, Streetsville.

Mr. W. Leonard, manager of the Royal Bank, Cooksville, was elected Grand Patriarch of the Grand Encampment, I.O.O.F., which is in session in Toronto this week.

The Men's Club of St. John's Anglican Church, Dixie, went on a motor excursion to Niagara this week.

Fred Alexander, of Esquesing, was remanded to the Ontario Hospital at Hamilton, by P.M. Bull, for threatening his sister with an axe.

NOTICE TO CREDITORS

In the Estate of HANNAH DEVINE late of the city of Toronto, in the county of York, (formerly of the Village of Streetsville, in the County of Peel), Spinster, deceased.

Creditors of HANNAH DEVINE, late of the said City of Toronto, Spinster, deceased, who died on or about the 26th day of April, 1937, are required to file their claims with the undersigned on or before the 3rd day of July, 1937, after which date the executor will distribute the assets of the estate of the said deceased.

Dated at Brampton this 7th day of June, A.D., 1937.

GRAHAM, GRAHAM & BOWYER,
Brampton, Ont.,
Solicitors for the executor.

WEDDING

DEATH—COWIESON — On Wednesday, June 9th, 1937, in Danforth United Church, by the Rev. S. L. Osborne, assisted by the Rev. McMurray, Dorothy Kathleen, daughter of Mr. and Mrs. C. A. Cowieson, to J. Ivan Death, son of Mr. and Mrs. H. B. Death, of Dixie.

HORNBY CHURCH TO CELEBRATE CENTENNIAL

St. Stephen's Church, Hornby, will celebrate its centennial with special services on Sunday, June 20th. Morning Prayer at 11 a.m., S.T. Preacher, Bishop L. B. Broughall, of Niagara Diocese. Evensong at 7.00 p.m., S.T. Preacher, Archdeacon Scovil of Guelph. On Tuesday, June 22nd, a garden party will be held at the home of Robt. Orr, 6th line, Trafalgar, 3 miles from Milton. A splendid programme will be given by the following artists: Miss Jessie Butt, soprano, and Harry Binns, tenor (wonderful voices and beautiful costumes) Tom Hamilton, Scotch comedian; Dorothy Merral, accordionist and reader; Edgar Goodaire, pianist. Refreshment booth on grounds. Admission 25c and 15c. Rev. W. G. Brook, rector.

The Open Column

Scientists have told us that we must keep ourselves uninhibited, that is, without a flock of secret, unfulfilled desires and urges bouncing about within our respective skulls. Apparently, if we feel the impulse to go out and be a real, rarin' whoopin' roisterer, we should get all of the little roisters out of our systems, so that our thoughts, if any, would thenceforth be free and unclouded by the unhappy feeling that we should have busted loose, even for a little while. Our personal observation of persons who wanted to keep their minds uninhibited leads us to believe that their minds are not merely uninhibited, but practically uninhabited. A cheap pseudo-pun, perhaps, but we still stand by the observation.

We went through the process of being disinhibited when we were knee-high to a grasshopper, and continued the process until we had to buckle down and earn a living. The first part of the process was accomplished by a parental hand and arm energetically wielding a carpet slipper, and later a broad rubber strap. The latter end of our mental emancipation came from the flying fists of our associates, who had never heard of inhibitions, and from the officers of the law who objected to our little escapades, etc. Enough of that.

There are, no doubt, millions of people who are carrying a secret inhibition about with them who can do nothing about getting rid of it. Often this hidden rift in their mental cosmos is of a morbid, horrible sort. Bloody murders and "crimes of passion" entrance them. They have a sneaking, unexpressed desire to go out and do something of that sort themselves, but, because they lack courage, or money, or something or other which ties them to ordinary, every-day life, their hidden desires go unsatisfied in the actual sense.

To these unfortunates, whose mental twist keeps them from thinking clearly for themselves, there cater hundreds of publications which provide vicarious surcease from the gnawings of their inhibitions. Many of these magazines and papers are inocuous and vapid. Their written matter provides a sort of opiate which lulls the reader into mental lethargy without providing inspiration for any deeds of valor or horror. One in a thousand of their readers may, perhaps, derive enough encouragement to action from their pages to do something, usually something unlawful. The old "wild west" movies were blamed for inciting little boys to various types of desperadoisms, but there is little incentive to action to be found in the ordinary rough-paper cheap magazine.

Then there are quite a number of "slick-paper" magazines which deal at length and in detail with the boy and girl problem, providing all sorts of somewhat slimy nuances and insinuations. We read a story of that sort the other day, and found nothing in it worth reading, from start to finish. It was all about a young lady who loved a young man, but, being modern, had to disguise the fact, and trail about with a crowd of not-so-good people to express herself, before she finally capitulated to the young man. Having read a few stories written by gentlemen and ladies, about lively, interesting topics, we felt that we had been gypped when he paid a nickel for drivel of that sort. But it was a very popular magazine with our "modern set".

Lately, however, lest any of the public be missed, there have been issued quite a number of magazines dealing almost entirely in pictures. Frequently these pictures depict the neurotic heart-throbs of divorcees, ladies of very doubtful fame who have risen to prominence by their ability with a gun or a bottle of poison, and other anti-social or amoral characters in the public eye, as represented by the yellow press. If you can't read, you can at least look at the pictures, and draw your own conclusions.

These magazines are readily sold to adolescents and pre - adolescents. We've seen plenty of youngsters running about with these scandal-sheets under their arms, or huddled in corners avidly lapping up the printed horrors of their pages. And we believe that vicarious destruction of inhibitions is impossible. A real remedy for hidden urges, we feel, is to be found chiefly in the slipper of parental discipline, control of authorities beyond the limits of the home, and, as a first-class purge of the vestiges of wrong-headedness, a wallop from a lacrosse stick or a boxing glove is worth fifty Freuds.

LET US SMILE

"Yassah," said old Link, "business very good. Done bought a pig fo' ten dollars, traded pig fo' barrer, barrer fo' calf, calf fo' a bicycle, and sol' de bicycle fo' ten dollars."

"But yo' don' make nothing, Link!"

"Sho 'nough, but look at de business Ah been doin'."

OBITUARY

Mrs. Christopher Whitney passed away at Norval on June 11th. She was a native of Cobourg, and had resided in this district 20 years. Buried in Toronto.

Rev. Wm. Stewart Edgar, aged 64, pastor of Lorne Park Baptist Church, passed away at his home on June 14th. He is survived by his wife. Interment took place at Pine Hills cemetery.

John M. Steele, died in Brampton on June 12th, and was buried in Erin cemetery.

Alexander Stirratt passed away at Brampton on June 13th, in his 51st year. He is survived by his wife, Reatha McElwain.

Percival Wickens, headmaster of Appleby School died in Toronto on June 14th and was buried at Oakville yesterday.

Jacob Cook passed away at Brampton on June 11, in his 65th year. Interment took place at Mount Albert. He is survived by his wife, Ellen Morris.

Sarah Margaret Lawrence died at Woodbridge, on June 11, and was buried at Claireville, Toronto Gore.

Leonard G. Martin, Islington, passed away suddenly on June 13th in his 41st year. He was buried in Mount Pleasant cemetery.

Mrs. F. Tracy

Wife of Prof. F. Tracy, of the University of Toronto, Mrs. Charlotte Tracy, 173 Walmer road, died in her 67th year. Daughter of Mr. and Mrs. James Haines she was born at Dixie. She married Prof. Tracy in 1893. Besides her husband, three sons, Gordon, of Madison, Wis., Herman, at Queen's University, and Clarence, at the University of Alberta, survive.

BRAMPTON

Several hundred Peel Conservatives gathered at the home of W. J. McKinney, president of the Peel County Conservative Association, Friday evening, for the first evening basket picnic ever held by the association.

The picnic had little political flavor, most of the speakers contenting themselves with extending their congratulations to the president and his son on the 103rd anniversary of the establishment of his farm estate.

Col. T. L. Kennedy, Dixie, chief speaker, pointed out that, more than a century ago, William McKinney, an immigrant from Ireland to Canada, and his wife, had settled on the farm in the hope of leading Christian lives in a state of law and order. "During the past three years," Col. Kennedy declared, "we have been forgetting too often the ideals of those pioneers, and it is time that we returned to them."

Brief addresses were made by Mr. McKinney, Gordon Graydon, M.P., Sam Charters, Walter K. Mara, T. H. Moorehead, Harry Wilson and Chris Johnston, Brampton; Fred Holder, Mono Road; and Mrs. David Corbett, Lorne Park. Entertainment was provided by Rev. R. V. Wilson, Norval. Mrs. W. A. Nelson, Miss Irene Peacock and the Salisbury family, Brampton.

Streetsville was represented by Mr. H. Q. Burns, president of the local association, and several other gentlemen.

Unusual projects have been chosen for the annual Achievement Day competitions of the Peel Junior Institutes, to be held in Brampton, June 19.

Two types of exhibit will be made, the first a display of vegetables prepared for use, and the second an exhibit of clothes-closet accessories.

Teams from the various branches of the Junior Institute will be called upon to prepare home-grown vegetables in various ways, and judge the quality of various types of vegetables, while girls who have chosen the clothes-closet project will be asked to judge hat-standards, covers, shoe packs, and other accessories of the same kind.

DIXIE

On account of a number of conflicting calls upon their attention and that of the afternoon speaker, the trustees of the Dixie Union Church and Cemetery have postponed their Grand Rally from 19th June, to Saturday afternoon, 3rd July.

Big plans are being made for this meeting, and for the picnic which is to follow. Guests will be present from Toronto, Oakville, Hamilton, etc. A Bugle band and a Flute band will be in attendance, and old-timers in costumes of their youth or of their ancestors, will be there to sing the old songs and renew old friendships.

The speaker, Mr. Perkins Bull, always has interesting news, and has recently been making an intensive study of the beginnings of religion in Peel in connection with his Church of England history.

A full programme and all details of the affair will be published later.

Happy Birthday for Local Lady

On the 6th of June, 1857, in a cosy little house in the city of Glasgow, a little girl came into this home and in life's busy scene to take a part. Her parents, the late Dugald and Christiane McGregor, knew their first duty with the child was to have her baptized. This ceremony was performed by the late Rev. A. McDougall, Free Church minister, of Cremore church, Glasgow. Her name was Margaret. That same year the family of four, Agnes, Malcolm, Charles and Margaret, left bonnie Scotland on the Brig Lydia, a sailing vessel, being nine weeks on the ocean before landing in Oakville.

After living a few years in Oakville the family moved to lot 7, ninth line, Trafalgar township. Part of their school days were spent in the little red brick school on the 10th line, under Squire McGill, Donald McDonald and John Hasper. When the brick school was replaced by the present white school, they attended this school for a time. Margaret, the only surviving one of the family born in Scotland, was married to David Ross in 1882. On their farm, Lot 6, ninth concession, Esquesing township, where they settled, they were surrounded by families of staunch Presbyterians. There were two families of Browns, McCollums, Huffman's, Harpe's, Trimble's, Douglas's, Kennedy's, McClure's, Brook's King's, McMillan's. All of these families were faithful to the Hornby Presbyterian Church until the frost of 1925, called church union, scattered the Hornby Presbyterians far and wide.

On account of Mr. Ross' failing health they rented their farm. Mr. Ross died in Nineteen Hundred. Shortly after, Mrs. Ross went to live in Streetsville, with her brother-in-law and sister, Mr. and Mrs. John Ross. When John Ross died twelve years ago the two sisters lived together. Two years ago Mrs. John Ross passed away, then Mrs. Dave Ross lived alone. And although she lived ten years after the allotted span of life her relations who loved her did not forget her and asked permission to celebrate with her in her home in Streesville, the eightieth anniversary of her birth. On Saturday, June fifth, with armful of flowers, a birthday cake with eighty candles, and lovely gifts they thought would express their love for her, these friends from Toronto came: Mrs. (Rev.) M. A. Malcolm McGregor, M.A., Agnes McGregor, Breck McGregor, his wife, Hazel, and two children Charles McGregor, Misses Hannah and Nell Breckenridge, Dugald Ross and Mrs. Pendleton, New Jersey.

When Mrs. Ross came to Streetsville the Church she joined and attended in her youth, old St. Andrew's was the place she loved the best, where she has been a faithful worshipper all these years. On Monday evening, June 7th, the following representatives of the Ladies Association of St. Andrew's Church: Mrs. D. W. Reid, Miss Eva Reid, Mrs. Meredith, Mrs. Tisdale, and her two children, Mrs. Greig, Mrs. Victor Johnston, Mrs. T. H. Goodison, Mrs. Fraser and Mrs. Stewart, came laden with flowers and all kinds of beautiful gifts to Mrs. Ross' home to celebrate her birthday and cheer her on her way. Her sister and brother, with Mrs. Lindsay, George O'Connor and Dugald Ross joined the happy circle. Miss Eva Reid then took charge of the meeting. Miss Reid made many complimentary remarks to Mrs. Ross, how her associates valued the part she always took in anything in any way she could to help in church work. Her kind words will be cherished by Mrs. Ross as long as she lives. Then the numerous beautiful gifts were carried by Mysie Tisdale from Miss Reid to Mrs. Ross. Then a short, interesting programme was given by Mrs. Greig, two lovely solos; George O'Connor, several recitations; Mrs. Harold Beaty, reminiscences of Ross and Brown's farm life; Mrs. Tisdale and Mrs. Lindsay. The lovely birthday cake was baked by Miss Reid. A lovely lunch was then served.

MRS. ROSS' REPLY

It was eighty years ago today,
Since I came in this world to stay,
The eighty years now in the past
Have pleasant memories that will last.

The greatest blessings heaven sends
Is when we are old to have true friends,
And now I have this happy thought
That by true friends I'm not forgot.

Dear friends you make my life so bright
With words, and gifts you brought tonight.
What a glorious part in life to find
Such friends like you, so good and kind.

As long as life its powers extend,
My prayers for you will never end,
To one this scene tonight is worth
It makes my home a heaven on earth.

District News

WEDDINGS

MELLOW—WHITEHEAD

A quiet wedding took place at the Bolton United Church parsonage with the Rev. G. W. W. Rivers officiating, when Grace Elizabeth, daughter of the late Mr. and Mrs. Robert Whitehead of Malton, became the bride of William John Beatty Mellow, son of Mr. and Mrs. Wilbert Mellow of Bolton. The bride was in turquoise blue net with touches of pink, and rosebud pink accessories. She wore a shoulder corsage of Talisman roses. The couple were unattended. Mr. and Mrs. Mellow left later by motor through Quebec and Northern Ontario. The bride travelled in a navy and white silk suit with navy accessories, and upon their return will reside near Bolton.

Grice—Clevely

Miss Eva May, daughter of Mr. and Mrs. Thomas Clevely, became the bride of Percy James Grice, son of Mr. and Mrs. Clarkson Grice, Dixie, at a quiet wedding service at the parsonage of St. Paul's United Church, Brampton, on June 10th. Rev. T. W. F. G. Andrews officiated.

The bride, who wore a white crepe frock with white hat and corsage of Talisman roses and lily-of-the-valley, was attended by Miss Alice Grice, sister of the groom, who also wore white crepe, with a similar corsage. James Clevely, brother of the bride, was groomsman.

At a wedding reception at the home of the bride's parents, Mrs. Clevely were black crepe. She was assisted by Mrs. Grice, in black lace with white trim. Following the reception, the bride and groom left for a motor honeymoon to northern points, the bride travelling in blue flowered chiffon, with white flannel coat and white sport hat. On their return, they will make their home at Dixie.

Hunter—Flowers

Acton, June 14—The marriage took place in St. Alban's Church of Irene Lillian Flowers, daughter of Mrs. G. Elliott, and the late Mr. Thomas Flowers of Gravenhurst, to Mr. Clifford Thomas Hunter, son of Mr. Thomas Hunter and the late Mrs. Hunter. Rev. Mr. Brillinger officiated. Miss Pearl McMillan played the wedding music and the soloist was Miss Ruth Gibson. For the occasion, the church was decorated with snow-balls, purple lilacs and ferns. Mr. G. Elliott gave the bride away. She wore orchid satin with overdress of tulle, matching satin hat with veil and carried Talisman roses and lily-of-the-valley. Miss Loraine Wilson was maid of honor, wearing pink georgette with white hat and carrying Sweetheart roses. The bridesmaids, Miss Reta Whaley of Streetsville, and Miss Lillian Black, of Brampton, nieces of the groom, wore yellow organdie and carried nosegays of mauve sweet peas. Mr. Isaac Hunter was his brother's groomsman and the ushers were Mr. L. Whaley of Streetsville and Mr. G. McFadden, uncle of the bride. The reception was held at the home of the bride's grandparents, Mr. and Mrs. W. McFadden, Crescent avenue, Acton, where Mrs. Elliott, wearing grey flowered georgette with grey accessories and corsage of mauve sweet peas, received.

On Saturday, June 19, in the Church of the Ascension, the wedding is being solemnized of Miss Clara Jeanette Hunt, Hamilton, and Rev. Erneat Sydney Ottley, of Streetsville. The bridegroom-elect was formerly curate at the Church of the Ascension, and has many friends in Hamilton. After leaving Hamilton, he was, for a time, at St. Paul's, Bloor St., Toronto, and is now rector of Trinity Church, Streetsville.

Mr. W. Leonard, manager of the Royal Bank, Cooksville, was elected Grand Patriarch of the Grand Encampment, I.O.O.F., which is in session in Toronto this week.

The Men's Club of St. John's Anglican Church, Dixie, went on a motor excursion to Niagara this week.

Fred Alexander, of Esquesing, was remanded to the Ontario Hospital at Hamilton, by P.M. Bull, for threatening his sister with an axe.

Offending Cyclists

While the City Council have instructed the traffic officer to watch for motorists who run through traffic lights, a special watch should be kept on cyclists. Many of them do not pay the slightest attention to the traffic signals, believing, apparently, that they are for automobiles only, so they rush right past to the danger of pedestrians crossing.—St. Thomas Times-Journal.

The Hardest Hit People

The people who are hardest hit today are the middle class people. The rich, even after paying very high taxes, still have enough left to enable them to live comfortably and often luxuriously. The very poor are better looked after today than they ever were. It is the man on the moderate income who is trying to buy his little home, educate his family, keep up his insurance savings, and try to put by a little for the inevitable "rainy day" who finds the going hardest.—Kingston Whig-Standard.

Dangers of the Lawn

To ladies who run lawnmowers we draw attention that a woman in Hamilton cut her hand badly when working one of those contraptions. And to men we bring the reminder that a gentleman suffered a stroke shortly after shoving a lawnmower. Just who should cut the grass we do not know.—Peterborough Examiner.

Beards Might Help

For some generations now it has been man's lot to look as drab and uninspiring as the barber and the tailor can make him. His daily garb is dull, and his evening attire funeral. Even his brief rebellion on the golf links is wilting; gaudy hose and cascading knickers are even now giving way to plain grey flannel slacks.

This is not good for a man. The strutting instinct lies deep, and it cannot be suppressed without causing disturbance somewhere. It is more than a desire to get a night out occasionally that leads a fellow to join lodges and dress up in gold and purple.

Beards, of course, may not restore self-confidence; but they may set the leaven working. That step once taken, men may again assert themselves and regain the right to look as colorful as their womenfolk.—Winnipeg Tribune.

A Better Outlook

There is much greater demand for the services of graduate nurses at present than was the case a few years ago, according to Dr. F. W. Langrill, superintendent of the Hamilton General Hospital, who gave some information on that subject to the board of governors recently.

During the years of severe depression, from 1929 to 1935, graduate nurses outside the hospital staffs had a difficult time, for the reason that many people who were unable to afford nursing service even when that was urgently required. Today it appears that economic recovery has reached a stage where the public is in a better position to hire a nurse if one is needed and the improvement in that direction offers opportunities for those who have taken up nursing as a profession.

In the long view, there ought to be still greater opportunity for nurses. Even a superficial survey reveals that a large percentage of the population encounters illness of more or less gravity and that condition does not appear to become more reassuring. Today throughout Canada there are hundreds of thousands of people who require medical and nursing attention. Why the general health of the population should be so uncertain is hard to explain but it is nevertheless one of the big problems of our existence and it looks as if the work of doctors and nurses is becoming more necessary as civilization rises to so-called higher planes.

Rev. J. A. Tuer, minister of St. James-Bond Church, Toronto, is quitting the pulpit to manage a 57-acre farm in the Grimsby fruit district, valued at $75,000. Oh, well, if it's that kind of farm, there'll be some hired help to exhort. — Woodstock Sentinel-Review.

What Age Can Achieve

At a time when so much is being spoken and written about the demand of younger men that age shall give way to them, it is of real interest to note what has been achieved by some elderly people in history. The Religious Telescope recalls a number of achievements that stand out as worthy of mention, thus:

Kant at 74 wrote his "Anthropology," "Metaphysics of Ethics" and "Strife of the Faculties." Tintoretto at 74 painted the vast "Paradise," a canvas 74 by 80 feet. Verdi at 74 produced his masterpiece, "Othello"; at 80, "Falstaff", and at 85 the famous "Ava Maria," "Stabat Mater" and "Te Deum." Lamarck at 78 completed his great zoological work, "The Natural History of the Invertebrates." Oliver Wendell Holmes at 79 wrote "Over the Teacups." Cato at 80 began the study of Greek. Goethe at 80 completed "Faust." Tennyson, at 83 wrote "Crossing the Bar". Titian at 98 painted his historic picture of the "Battle of Lepanto".

There is plenty of room for elderly and old men in the world of action. For instance, Mr. Baldwin goes to the House of Lords, but we may be sure that his services will still be at the disposal of his country at any time she calls upon him. —Montreal Star.

Not a Bad Idea

Advance fashion tip is that bathing costumes this season will consist of gas masks and tin hats—at Mediterranean beaches. — Windsor Star.

The Empire

A Bite and a Sup

During the Coronation days some of our great West End hotels were really complete cities.

Consider one of them in Park-lane, where over 2,000 guests saw the procession from windows and stands at prices ranging from 2 guineas to 20 guineas. (For those paying over 6 guineas breakfast and champagne were provided!) Eighteen hundred people were at the gala dinner in the evening (tickets, £3 3s. each, paid in advance). Three hundred and fifty extra waiters had been engaged to deal with the important guests who dined and supped in the great ballroom (air-conditioned at a cost of £25,000). The manager of this hotel had ordered £20,000 worth of wines to add to his normal stocks, and two tons of caviar for the Coronation period. Housewives might reflect that twelve men took ten hours to wash up the 60,000 pieces of table-ware.

At the Savoy arrangements were made to serve no fewer than 9,000 meals between supper-time on Coronation Eve and the dawn of May 13.

At one moment the overseas switchboard of another of our largest West End hotels had calls put through for guests simultaneously to places in South Africa, New Zealand, Australia, North America, Canada, India, Brazil and the Canaries — probably a record for one hotel. — Overseas Daily Mail.

His New Title

When I wrote about Sir Robert Hornt's new title I asked whether it would be Lord Horne or Lord Slamannan. It seems that he has decided to have it both ways and the decision is sensible. The retention of his own name saves him from the fate of many a political who has—so far as the public is concerned—lost his identity through the adoption of a purely territorial title. And "Lord Horne of Slamannan" still pays a nice little compliment to his native place.—Glasgow Bulletin.

Valuable Gas Being Wasted

Alberta Helium — But Extraction Regarded as Unprofitable

CALGARY — Thousands of cubic feet of helium gas, suitable for dirigibles such as Germany's giant Hindenburg, destroyed at Lakehurst, N.J., recently, are lost daily in waste gas flares which consume more than 200,000,000 cubic feet of gas in Turner Valley oil fields.

Since gas was discovered here there have been proposals from time to time to erect a plant to extract the helium, and since the destruction of the Hindenburg the subject has been again to the fore.

A Dominion Government report a few years ago disclosed that helium content of Turner Valley gas was only three-tenths of one per cent and experts say that a one per cent content is necessary for economical extraction.

In 1911 Professor J. C. McLennan, of Toronto, erected an experimental plant in Calgary, and some helium, reported 98 per cent pure, was extracted from Bow Island gas. The plant was closed during the war and production of helium was never realized on a commercial scale.

It is believed some of the new wells now drilling may uncover gas flows richer in helium so that an extraction plant would prove commercially feasible.

News In Review

Canadian Foodstuff Needed If War Comes

TORONTO—The importance of a large agricultural population, to provide a spiritual and moral background that is essential to every nation, was discussed this week by Arthur G. Street, British farmer, author and lecturer at the luncheon meeting of the Royal Winter Fair Association, the Canadian Club and the Empire Club.

During a period of troublous times, Mr. Street pointed out, Britain faces the important task of maintaining a sound agricultural industry, to provide her with foodstuffs "if and when the world goes mad." Yet, he said, at the same time Britain expects that when war breaks out Canada will continue to send products to Britain. For this reason, he said, British farmers recognize the importance of Canadian agriculture, but hope that Canadians will recognize the necessity of British agriculture being maintained and preserved as vital to Britain's future.

Smithies Wane

KINGSTON—There are lots of spreading chestnut trees but there aren't enough blacksmiths.

In fact the members of this ancient profession are worried. For it looks as if the mighty men will soon be as extinct as hoop-skirts, shaving mugs and magic lanterns.

The tragedy of the profession, or trade, as you will, is that there isn't enough young blood in it. That's what J. J. Taugher of Kingston says. In fact he said it at the convention of the Master Horseshoers and Carriage Workers' Association held at the City Hall.

This gathering brought out 20 delegates and there was even the question of whether the Association should continue or not. Eventually it decided to carry on.

But it's like Mr. Taugher said. There are very few apprentices learning the trade. "In fact," said he, "I visited over 35 shops and most of the men in them were between 60 and 70 years old.

In only a few were there men under 40 years. He thought that the blacksmith's pay was really to blame. He figured that there were so few apprentices because the smithies were not making sufficient money.

The convention adopted a motion to petition the Government to set a standard for all blacksmiths who intend opening their own shops, and to ask for the registration of all present shops.

Richard Prior of Toronto was elected president of the association. Other officers are: first vice-president, F. E. Gilroy, South Mountain; 2nd vice-president, W. G. Cameron, Falbrook; 3rd vice-president, James J. Taugher, Kingston; treasurer, Don MacLean, Toronto; and secretary, Edward Kearney, MacIntosh Mills.

Start Boat Trip

PRINCE ALBERT, Sask.— Planning to reach Halifax in their 21-foot rowboat within eight months, three Edmonton youths, Jack Peters, Anton Glaser and Fred Peters, rowed east down the North Saskatchewan River this week, after passing through here on the first leg of their inlands-water odyssey from the Alberta Capital.

First Air Mail

PRINCE GEORGE, B.C.—Thirty-five thousand letters from all parts of the world were included in the first flight of the new Prince George to Fort St. James, Takla Landing and Manson Creek Air Mail Service, post office officials of this Northern British Columbia town estimated. It is the first air mail to fly regularly to the isolated points in the northern part of the Province.

Food Prices Rise

SASKATOON — Price of food in Saskatoon rose 17 per cent between last November and May 13 and 26 per cent since November, 1935, according to figures presented by the Central Council of Unemployed to the Young Men's Section of the Board of Trade. The Council asked for an increase in relief grants for food because of the rise in prices.

Claims Farmers Shoot Dogs

WILLOWDALE—H. R. Bain, Toronto stock broker, appealed to the North York Township Council this week to rescind a by-law under which he claimed farmers were permitted to shoot dogs found roaming on their property. "There are many instances of wanton cruelty, some where dogs are apparently deliberately wounded and then left to die in agony," he declared. The Clerk pointed out that there was no township by-law permitting such shooting. "It is permissible under a Provincial statute," he announced, and the matter was dropped as the Council lacked jurisdiction.

Urged Property Taxed

WINNIPEG— Taxes should be levied against occupants of property, whether owner or lessee, and the basis should be rental value rather than the present system based on capital value, the Winnipeg Board of Trade said this week in making recommendations for improvement of the city's financial position.

Among other suggestions were a more vigorous policy of tax collection and investigation of the city manager plan of administration.

Caterpillars Commit Suicide

SUDBURY— Thousands of tent caterpillars, apparently "tired of it all" because trees have been stripped by their predecessors, are joining in mass suicide in this district. They are "marching" over the rocks along the shore on the south side of Lake Ramsay, continuing the parade into the water, where they are swept away by the waves.

NEWS PARADE

Commentary on the
HIGHLIGHTS OF THE WEEKS NEWS ---
By Peter Randal

People are spending money again and travel agencies are looking forward to one of the heaviest summer season in several years. That the rush has already begun is evident from the experience of one honeymoon couple who found is almost impossible to book passage for the West Indies cruise for the month of July. Travellers to the Continent say that Transatlantic bookings are almost as hard to secure.

Not only have bookings increased but the travel people say that the class of accommodation sought this year is better. The big demand of the season is the "all expense cruise" and this the agencies are offering to all places and at all prices. Since the Coronation, the big European attraction has been the Paris Exposition. Dogged from the beginning with persistent labor troubles, the big show is now open and the last buildings are rapidly nearly completion.

Steamship and railroad rates, while slightly higher are not much changed. Hotel rates are rising, however. According to one authority, the traveller will pay 7% more for accommodation this year than last while those who haunt the summer resorts will find prices up 15%.

Wheel of Fortune

While most of us are looking for an increase in the weekly pay cheque as a reflection of the better times, we can hardly expect to be so blessed as some people were last week. As for example, the Torontonians who won $85,000 on Midday Sun, winner of this year's English Derby. Or to take another turn of the wheel, Mrs. Margaret Strong de Cuevas, whose only comment when she was informed that her grandfather, John D. Rockefeller had left her $25,000,000 was, "There must be some mistake."

Dollar Empire

Those money barons who are still alive appear to have adopted the motto, "What we have, we hold". At least, that is something of the inference taken from J. P. Morgan's comment on the tax laws." If Congress makes stupid mistakes which leave loopholes in the law, it is up to Congress to remedy them, not for us taxpayers". Smiling, Morgan continued by saying that he had not incorporated his yacht as a method of tax evasion because he "did not think it worth while."

The Shotgun

But force is not forgotten. Plans are being laid down for two 35,000 ton Italian battleships and the would-be war lord has declared his intention of increasing Italy's underwater fleet to 140 ships. Meanwhile English factories and shipyards are so busy with armaments that Canadian importers say they cannot guarantee deliveries of English goods. Right here, contracts for $14,000,000 in war supplies have recently been awarded. Even Canada's navy, second hand though it is, has been increased by the purchase of two destroyers from Britain.

Clercial Inconsistency

Last week saw the culmination of a royal romance when the Duke and Duchess of Windsor made their vows in the presence of clergy but without the blessing of the church. Historians are commenting on the seeming inconsistency of refusing sanction of the marriage because of a divorce when the state church of England came into being at the behest of a king who created it for the purpose of sanctioning the divorce and subsequent marriage. Archbishop Cranmer of Canterbury was the man and the king — Henry VIII.

Death of a General

Superstition failed to save the life of General Emilio Mola, Spanish insurgent commander in charge of the siege of Bilbao. The general was once told that he would die with his boots on. Flying through thick fog to a meeting with General Franco, Mola's plane crashed into the side of a mountain and when they found his body —there were no shoes. General Mola always removed his shoes when flying but did it not save him when his hour was struck.

Matchmaking

Through a severe blow to the rebel cause, the campaign against Bilbao goes on with as much severity as ever. From Italy comes word that Mussolini is planning to do by grace what he has found very difficult by force. It is said, that he will propose Otto, pretender to the Austrian throne, as the next King of Spain and to bind him to Italy, will marry him to Princess Maria of Savoy.

Preserve The Peace

And money is said to hold the key to future events in the Far East—money in the shape of a $40,000,000 British fortification program at Hong Kong and a consistent investment policy in Southern China. The Japanese are thought to be seeking a new Anglo-Japanese pact of friendship as a means of securing a place in the new world economic plans looked for out of the Imperial Economic Conference now taking place in London and possible co-operation of Great Britain and the United States.

Men Have Wide Choice In Clothes

DONLON, Eng.—A man's wardrobe ranges from overcoats, formal and evening dress, to beach and swim wear. It is a mistake to visualize him changing from one jacket suit to another. When we consider topcoats for different purposes, variety in evening dress, the abundance of styles and materials for sport and relaxation, it will be seen that man does himself well sartorially. Yet it is dull and drab, outshone by his volatile partner. True, he cannot boast such rich fabrics and glowing colors as his eighteenth century ancestors; but choice is remarkably wide in cut, color and design.

Edward wants to live in Austria. Wallis wants to live in America. They will live in America.—Tampa Tribune.

Sporting Comment
By KEN EDWARDS

Well, folks, after the rumpus up at Thorncliffe and the so-called kidnapping of our sport friend, let us hie ourselves to other parts.

It seems that everything is fixed for Schmeling to fight Joe Louis in September "if" Joe defeats Champion James J.—I have my "doots."

• • •

Here is something you may well have guessed. Since Sir Malcolm Campbell is the world's speed demon, it is only natural to think that he would try something else new and different.

He has tried his hand at exploring. In South America, the Bluebird's skipper hunted buried treasure in a big way.

• • •

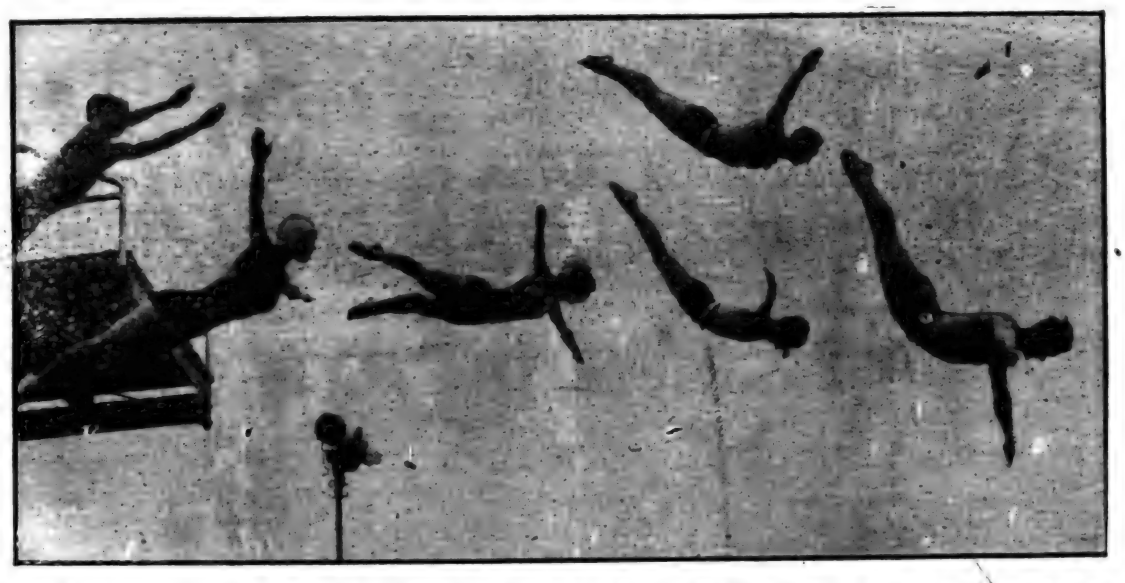
Scrap-book facts:—In 1890 Abner Powell stole seven bases in one day . . . Pete Wood in 1888, "beaned" 34 batsmen and so created an amusing record—he also had 59 putouts in 1889, a record which still stands.

• • •

Everet Marshall, the Oklahoma flash who happens to be around here these days, has not lost one bout while wrestling in the last four years.

Jack Corcoran, who plans one of his greatest shows for this week, tells us that his old money-maker, Howard "Hangman" Cantonwine, is running a road-house near Los Angeles.

Did you know that Cantonwine once told bed-time stories over the air from Toronto? Now he puts 'em to sleep with a smart body-slam!



• • •

About the beefiest moundsman in the International League right now, is King Kong Kline, who hits it at 260 pounds.

Be with you next week—Ken.

"The most important thing in the world is to end war." — Richard E. Byrd.

This is the Way to Create a Big Splash

Seven diving notables—see if you can count them—soaring through the air together as they practice for National Aquatic Show in the Olympic swimming pool at Los Angeles, Cal.

His Rheumatism Left Him

Sufferer Follows Good Advice —and Takes Kruschen

The writer of the following letter had a bad attack of rheumatism, and was advised to take Kruschen. He did so, and describes his experiences in the following words:—

"About two years ago I developed a severe attack of rheumatism in my left shoulder blade. I tried all sorts of remedies, but with no results, until one day my brother-in-law, on hearing of my suffering, exclaimed, 'There is only one thing for rheumatism! That is—Kruschen Salts!' I decided to purchase a bottle, and for the first week took a teaspoonful in a glass of hot water each morning. The pain gradually disappeared and has now gone entirely. I am still taking my early morning dose, as I feel convinced that it is helping to keep me fit."—J.G.B.

Rheumatic conditions are frequently the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts are notable for their work in dissolving uric acid. Other ingredients of these Salts assist Nature to expel the dissolved acid from the system.

Bermuda Silver Band Entry for C. N. E.

Official entry has come to the Ontario Band Association, which conducts band tournament at the Canadian National Exhibition, from the Imperial Silver Band of Hamilton, Bermuda. Secretary A. L. Robertson of the association says that not in the past fifteen years have there been as many entries at this date..

Sir Henry Watlington, mayor of Hamilton, has arranged transportation for the band from Bermuda to New York. He has also concluded arrangements for a series of concerts in the Terrace Grill of the Hotel Hamilton for the purpose of raising additional funds with which to defray the expenses of the trip to the Exhibition. The Imperial Silver Band is under the baton of S. Clayton Pye who has a wide reputation as a conductor and composer. Mr. Pye was at the "Ex" two years ago in the capacity of guest conductor at the band competition. The Bermudians will enter the brass section with an ensemble of twenty-seven men.

Cane Molasses For Pigs

A test carried on at the Minnesota Experimental Station showed that pigs weighing 165 pounds in weight, fed on ground corn alone, did not make as economical gains as when fed oats with 25 per cent. cane molasses was used, thus while you cannot get sugar-cured pork by feeding molasses to swine you can get feeding profits by using the cane molasses in place of part of the corn. Molasses is fed to all classes of live stock and besides being an excellent feed is also an appetizer and aids in conditioning the animals.

Saskatoon. — Alfred Wells' Barred Rock-White Leghorn hen here produced double-yolk egg every third day regularly. One egg was seven inches in circumference, two and three quarter incher long and two inches wide.

HU-MAR

Nature's Own Soil Food

★

HU-MAR is the perfect, natural soil and plant food; free of harmful acid and weed seed. Unlike most plant foods and fertilizers HU-MAR retains its ammonia content; its fertile qualities therefore far outlast all other soil conditioners. HU-MAR retains as high as 70% moisture, is an ideal insulator, and acts as a natural scavenger.

These and many other reasons have proved HU-MAR the world's finest soil conditioner.

HU-MAR is the trade name for a product found on the Beverley properties in Ontario.

Hairy Chest No More Proof of a He-Man

Gradually, as they are attacked by scientific study, many so-called sex differences are melting away. It was a shock to many persons when the development of standardized intelligence tests revealed that men are not superior mentally to their womenfolk. Is it possible that hairy chest and "gorilla shoulders" will suffer a similar fate as criteria of masculinity? asks a Science Service

Dr. Howard Gilkinson, University of Minnesota psychologist, raises the question and provides a surprising partial answer.

If sex is a biological entity — a force which man or woman can be thought of as having in greater or less degree—and if this force finds outward expression in such items as beards or pitch of voice, then you might expect the heavily-bearded man to have also a deep masculine voice and broad shoulders, points out Dr. Gilkinson. Yet examination of more than 200 college men showed these "secondary sex characteristics" to exist quite independently of each other.

And only one of the physical measures, voice pitch, was found to have any significant relation to masculinity as revealed by test or by ratings of associates. Hair abundance and hip-shoulder measurements do not correlate with the masculinity test or with voice pitch. Hip measures do correlate positively with shoulder measures showing, perhaps, that the man with the gorilla shoulders might be expected to have "feminine" hips.

A Mean Advantage To Take Of A Cow

Omar Vinole, an Argenine poet, adopted a "sister"—a cow — with which he made public appearances in Buenos Aires to arouse support for his campaign of anti-materialism. He threw convention to the winds and was dubbed "eccentric" because the Argentines, he said, with their increasing prosperity, were drifting from culture and forgetting the "things of the spirit".

Standing immaculately attired, by the side of the cow, the other day, in a city lecture hall, he declared: "I may, temporarily at least, have lost my dignity, but for twenty years I have been preaching the cause of culture, and society has ignored me. To attract public attention I had to adopt my 'sister'. I have had to cause a public commotion, almost a revolution, to interest my countrymen.

"I stand for the reawakening of an old idea—the perfection of man. I am trying to create a philosophic temperament. My object is to establish open-air universities at which philosophical ideas will be taught, together with physical training."

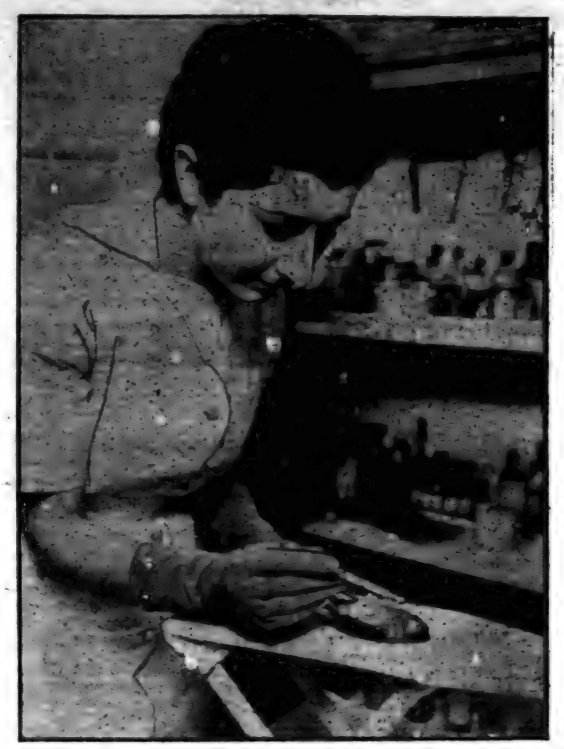
Publicity succeeded with Senor Vinole, for which he has to thank his "sister". He chose the cow because it was illustrative of the Argentine people—a cattle-raising race. Outsiders laughed, but for this poet the cow is a wonderful animal, the only one, according to an Indian parable, that does not let man starve.

He feels that he will soon have to let his "sister" go, but he will always feel indebted to her. For the cow has brought him sufficient attention to expound his gospel. "The rest is up to me—and the masses," says Senor Vinole.

Meaning of Peace

"When politicians in Geneva have been discussing peace, too often they meant by peace a vague word, the state of non-war. It is a state of international mind; it is a plan of national living, not passive inaction, declared M. Hambro, President of the Norwegian Parliament and head of the Norwegian delegates to the League of Nations Assembly at Geneva.

It is essential to prepare peace. You will find in every country in Europe and in America a War Office, but no Government until now has had a Peace Office, a department studying the possibilities of future conflicts, trying to neutralize them before they are born, studying the ways and means of friendly cooperation among the nations that will promote international sympathies.



"Peace is not only absence of war. It is a willingness to join hands across the barriers of race, religion and language, of traditions and institutions. It is an active and fruitful state of goodwill and of well-wishing. And the actions of peace must be prepared carefully.

"They must be made as interesting, as adventurous as the actions of war. They must be made so much more romantic than actions of war, as creation is more romantic than destruction. And this aim cannot be reached only by accepting gifts. It is necessary to pay the price in every country, the full price of peace."

Bobby Hoga, nine-year-old, miraculously escaped death when he fell from a tractor in the path of a trailing disc at Vulcan, Alta. His body becam so deeply imbedded in the soft earth that the sharp discs passed over him harmlessly. He sustained a broken arm and hip in the fall.

An explorer says that he will never marry. This rolling-stone intends to gather no boss.—Montreal Star.

A Healer of Birds

HAVE YOU HEARD

The purchasing agent didn't want to see this particular salesman and instructed his secretary to make some excuse:

Secretary (to salesman)—"I'm sorry, but Mr. Jones can't see you today. He has a sprained back."

Salesman (a persistent go-getter)—"Very well, dearie. Go back and tell Mr. Jones that I didn't come here to wrestle with him. I only want to talk to him."

Knights and Daze

Opinions vary as to which take us to
greater heights—
June's lovely days, with skies of blue,
or its delightful nights.
Some argue that refreshing winds
combined with midday sun,
Inspire adventures and cause rare actions to be done.
While others say, when moonlight
sheds its beams on listless souls,
Their lives take on new meaning and
they start toward higher goals.
I don't know what your ideas are;
but, friends, this is my plight:
I'm living in a blissful daze, inspired
by one June knight!

—Lyla Myers.

Do you get up late mornings and have to rush your dressing, bolt your breakfast and dash to work? If so, that is a bad habit, and one that will tend to make you suffer through accidental injury . . . . Good habits of work will produce a good product, and at the same time produce very few accidents, for after all, an accident is simply a mistake . . . . When you hear someone else trying to explain how unavoidable some accident was, say to him: "Forget the alibi, accident are preventable.

FREE CREAM SEPARATORS

Be one of the three lucky farmers to get a brand new 1937 streamlined stainless ANKER-HOLTH separator FREE; send postal for Entry Blank and "How to cut separating costs in Half"; nothing to pay; simply express your opinion. Address ANKER HOLTH, Room 1-3, Sarnia, Ont.

Wife (preparing breakfast)—"There isn't a slice of bread in the house."

Husband (absently)—"Never mind, dear; just make some toast."

Don't make them say: "I spent a year in that town one Sunday."

In a discussion on the type of milk which should be provided school children, the chairman of the health committee in a small town, is reported to have said at a meeting held recently: "What this town needs is a supply of clean, fresh milk, and the council should take the bull by the horns and demand it."

Jim—"Politics mean nothing to me. I'm going to vote for that fellow because I like him."

Hen—"I understand you were going to vote for him because he gave you $10."

Jim—"Wouldn't you like a man who gave you $10?"

The only thing that keeps a lot of men from marrying twice is the fact that their first wives are so disgustingly healthy.

Read It Or Not

In the state of Alabama it is against the law to buy or sell a sack of peanuts after sundown or before sunrise of the next day. It is contrary to law to work for nothing in California. In Kansas no reptiles are permitted to be eaten in public. This includes centipedes, snakes, lizards, etc.

Dr. Bottles met the wife of a patient he had ordered to bed for a few days:

Doctor—"Well, how is your husband getting on?"

Wife—"Oh, doctor, I do wish you'd change his medicine!"

Doctor—"Isn't it doing him any good, then?"

Wife—"I don't know, but we have such a job getting him in and out of the bath?"

Doctor—"Bath?"

Wife—"Yes, sir. It says on the bottle of medicine you sent: 'One teaspoonful to be taken three times a day in water'."

Husband—"Well, I suppose you're plenty angry because I came home with a black eye last night."

Wife (sweetly)—"Not at all, dear, because when you came home you didn't have that black eye."

A lot of men wake up to appreciate great truths—after its about ten years too late.

Lack of Money Aid To True Smartness

If Extravagant Let It Be In Accessories

HOLLYWOOD, Cal.—An unlimited clothes budget has nothing to do with being smartly attired, according to Adrian, famous M-G-M designer. As a matter of fact, he believes lack of money is a boon to those women who seek true smartness.

"With just so much money to spend,' Adrian says, "most women will get the simple frock suitable to many occasions. A woman who can spend as much as she desires will often buy too much jewelry, too many furs, and spoil the simplicity of the costume.

"Proper carriage of the head and body can give an inexpensive frock of good line the appearance of the smartest creation. Line of a garment should be the first consideration, and then fabric. Fabric is important to line. Inferior fabric stretches and loses shape. It is poor economy to conserve in this way.

Try Courtesy On Highways

Science Cannot Prevent Accidents Without Help of Courtesy — A Vital Challenge

TORONTO. — Sounding a strong warning that the heavy traffic increase on Ontario highways expected this summer will inevitably result in more traffic accidents and deaths unless every motor vehicle operator exercises constant care in driving, Hon. T. B. McQuesten, Ontario highways minister, has announced that his department is launching, for a second year, a newspaper campaign urging every one of Ontario's 700,000 drivers to "Try Courtesy".

"The steady increase in motor traffic," Mr. McQuesten declared, "presents a vital challenge to every user of our streets and highways to aid in checking and reducing the horrible toll of lives which motor traffic costs us each year."

Travel is Faster

Modern motoring, he pointed out, is geared higher than ever before and this influence of speedy travel is steadily increasing. "Every resource of science has been applied to make this faster pace a safe one. Shatterproof glass, improved four-wheel brakes, wider and smoother highways, more effective day and night road markers, new designs and construction in tires, better lighting equipment on automobiles and streets — all these factors have made their contribution to safer motoring.

"But no scientific factor," Mr. McQuesten insisted, "no matter how efficient or fool-proof, can ever have the slightest chance of success unless the simplest and most fundamental principal of human relations is applied. This element can be expressed in many different ways. It can be called 'consideration for others' or 'do as you would be done by.'

"In our newspaper campaign this year, as last year, we are urging drivers to "try courtesy". The dictionary says courtesy is "politeness of manners combined with kindness" and we believe the sincere application of this simple idea by every driver in Ontario can eliminate death and destruction from our streets and highways and make them safe and useful servants of mankind they should be.

How Tourist Dollar Is Divided Up

We have been reading reports of the amount of money that tourists spend in Canada, the approximate number of visitors who come to Canada each holiday season, but who knows how, where and when the elusive dollar rolls around the country and who benefits the most, writes the Oshawa Times.

After travelling through some of the Canadian tourist resort areas for the past three years, one is impressed with the fact that thousands of visitors do come to our lakes and streams each year and they return year after year to enjoy the more favorable climate and scenery which Ontario offers.

Recently "Motor Magazine" has made a careful survey of the channels through which this much coveted dollar passes. Here it is:

Miscellaneous purchases at stores, 25 per cent.

Transportation, 20 per cent.

Hotels and other lodgings, 20 per cent.

Restaurants and other eating houses, 21 per cent.

Amusements, 8 per cent.

Confectionery, 6 per cent.

The wide-spread benefits bestowed by these imported spenders, the tourists, are impressively significant. Scarcely any interest in the lucky tourist community that does not share the benefits brought by tourist expenditures. The fact that 66 cents of every dollar finds access to the tills of the local merchants, the hotels and the restaurants, should impress the obligation these various classes of business owe in encouraging and fostering the tourist trade.

School Principal Pleads For More Men Teachers

WINNIPEG. — Plea for greater masculine influence in public schools to guide growing boys was made here by J. J. .Wilkinson, Winnipeg school principal. He told a service club that women teachers outnumbered men 40 to 1 in junior high schools and 160 to 1 in elementary schools of Winnipeg.

AGENTS WANTED

- To handle Beverly HU-MAR, nature's perfect soil and plant food.
- The only pure, neutral soil conditioner and rectifier known.
- A real, honest opportunity to handle a fine profitable product, backed by national advertising and unsolicited testimonials.
- Agencies allotted on a mutual approval basis.
- Small capital, from $200 to $3,000 required to carry stock.
- The Company guarantees to refund purchase price of merchandise left on hand at the termination of the agreement by either party.

Gray Coach Lines 1937 Vacation Tours

Gray Coach Lines Limited has issued a descriptive and very attractive booklet on their vacation tours for 1937 It includes about 31 tours to Canadian and United States points at most reasonable rates. When you start out on your vacation its a grand and glorious feeling to know that all your arrangements are completed, that there will be no irritating delay or confusion, no rushing or hurrying, no last minute disappointment. When you know that all you have to do, en route or at your destination, is present your ticket and find everything prepared for you —that is when you can really enjoy a happy, restful and carefree holiday —that is the modern travel service offered by Gray Coach Lines Ltd in presenting 'Vacation Tours' for 1937

Copies of this circular may be had from Mr. W. E. Watson, Local Agent Streetsville. Ask for one.

CATERPILLARS INVADE CANADA
PITCH TENTS IN ONTARIO

By R. H. Spencer, Blue Bell Magazine

A newspaper report states that a Moncton, N.B. man, working with a carnival there, had his right leg painfully injured when his trousers caught in a wheel of a caterpillar and he was dragged in and run over. He was taken to hospital in an ambulance.

Immediately below the report, under the heading "Beware Caterpillars" there is the following: "Unusual prevalence of caterpillars in Ontario leads to the prediction that a definite menace will develop unless there is immediate action in checking the invasion. The principal danger seems to be in vacant properties or in roadside trees. With nothing to check them, bushes and trees are often found infested with caterpillar tents."

Well, why doesn't somebody do something? Invoke a clause or that sort of thing? Are we to be mangled in our sleep? Grabbed by the leg of our pyjamas, whizzed by the wheel of one of these monsters, dragged in and ground like so much sausage? How about the Monroe doctrine? What do we subscribe to the League of Nations for? Where is our streamlined navy?

As Feeble Filbert so aptly put it, "If the larvae are of such proportions, what will the butterflies be like?"

Bob Burns' shananigans in Van Buren, Arkansas, matched with this new Canadian menace, pale into insignificance.

The crying need in Canada to-day is not so much for a good five-cent cigar, a triple-decker ice-cream cone, or plush seats for sit-downers, as for a National Caterpillar Day. A day set aside when loyal Canadians with shields and banners bright would march against this destructive foe.

We could recruit a vast army of farmers, farmerettes, boy scouts, school children, telephone pioneers and band of hopers, etc., who, while they might not be able to totally exterminate the pests, could in a few hours' work, armed with a tin of coal oil, a newspaper and a knife, reduce the havoc usually wrought by these furry creatures to a minimum.

500 districts—200 "soldiers" per district—each soldier burns 15 nests—each nest contains approximately 100 ..... potential rhubarb niblers ..... results, some 150,000,000 caterpillars are rendered hors de combat.

Oh, Canada, we stand on guard for thee. Or do we?

ODDFELLOW'S AT CHURCH

Last Sunday morning Streetsville Oddfellows met at their lodge room and paraded to Trinity church. They were accompanied by several Rebekahs, also Oddfellows from Brampton, Milton, Port Credit, New Toronto, Oakville, Georgetown and Toronto, and numbered about one hundred. The church service was conducted by the new Rector, Rev. E. S. Ottley, B.A., L.Th., who delivered an able sermon on the subject, "An Empty House," and was much enjoyed by all present. The flowers on the Holy Table were presented by the Oddfellows, who, on their return march to the lodge room, also placed a wreath on the Soldiers' Memorial in memory of fallen members.

Arriving at their hall, refreshments were served, and speeches were made by Bro. Carscadden, Past Grand Master, Rev. Mr. Ottley, Bro. R. Brownlee, Grand Conductor, W. Hayward, D.D.G.M., and Bro. Jos. Hall, P.D.D.G.M.

A hearty vote of thanks was tendered to the Rector, choir and officials of Trinity Church. Bro. Garnet Green, Noble Grand, presided.

This was one of the largest gatherings the local Oddfellows have had at their church service for a long time, and proved the fact that the local lodge is still very much alive.

Mr. and Mrs. Vernon Mason and family from Saskatchewan, are visiting friends and relatives in Ontario.

ODDFELLOW'S GRAND LODGE

With 1,000 delegates from all parts of Ontario in attendance, all branches of the Independent Order of Oddfellows held their annual sessions at the Royal York Hotel, Toronto, this week.

The Grand Lodge of Ontario, the Grand Encampment, the Patriarchs Militant Department Council and the Rebekah Assembly of Ontario met to review the progress made during the past year and to plan for the future and elect new officers.

A Rebekah Memorial Service, Reception and Dance, Exemplification of Degrees, and a series of luncheons, preceded the business sessions. On Wednesday evening there was a dinner and dance for all delegates and their friends.

The I.O.O.F., was started in the city of Baltimore, Maryland, on April 26th, 1819, and the Grand Lodge of Ontario was instituted at Brockville, on August 23rd, 1855.

The Rebekah or ladies' branch of the Order was founded 85 years ago, and the Rebekah Assembly of Ontario was established in 1891. The Oddfellows maintain Homes for orphan children and for aged members. Through an Educational Foundation Fund sons and daughters of members are financially assisted to secure higher education.

G. L. Green, Noble Grand, and James McLennan, P.D.D.G.M., represented Streetsville Lodge.

STREETSVILLE BOY
WINS HIGH HONOURS

Leighroy Gerhart led the prize list at St. Andrew's College this week. The award of the Governor General's Medal gave him the coveted position of head boy of the school. In addition Leighroy won the Lieutenant Governor's Medal, awarded for the highest percentage obtained in Middle and Upper School work; the Head Master's Medal for unusually high scholarship. (This medal, which has been awarded only six times in the last thirty-eight years, was won by his brother, Eugene, last year). Other awards won by Leighroy were: The Cartier Medal in French, the Donald Cooper Medal in Science, the Old Boys' Association Medal in Mathematics, and the First Proficiency Prize in Upper Sixth Form.

The high standard obtained by Leighroy in his three years at Streetsvill High School qualified him to compete in a Dominion-wide entrance scholarship into St. Andrew's College —good for his two years' attendance there.

Well done, Leighroy! S.H.S. is proud of you!

E.L.H.

JUNIOR CHOIR PICNIC

On Saturday afternoon last, the Junior Choir of the United Church, forty in all, in charge of their leader, Rev. Mr. Jones, journeyed to Capt. Noble's picnic grounds at Norval. Ross Evans provided the transportation and some parents also went along by car. All enjoyed a wonderful time, with swimming, races, stunt games, and of course, sumptuous "eats." Mr. Jones was untiring in his efforts to make the affair a success. He introduced the boys to pillow-pole contests, skipping for the girls, and treasure hunts for all, for which he provided prizes.

Not only are the boys and girls appreciative to Mr. Jones for his capable leadership throughout the winter, but for his generosity and thoughtfulness in arranging such a splendid outing. They have acquired the ability to interpret music and to assist in the Sunday service once a month. They have also learned new games, and a happy attitude to recreation. Nor are the parents unmindful of the sacrifices of time, and of the musical education given by our worthy pastor.

The SNAPSHOT GUILD

PICTURES EVERYBODY LIKES

The amateur who took this picture gave thought to it. The boys are his sons, but the appeal of the picture is universal.

THE statisticians tell us that there are now millions and millions of camera owners—more than a million right here in Canada alone—but how many of them take pictures that really qualify as *pictures*, such as might be chosen to adorn the walls of a home other than their own, is a question.

Some judges of amateur snapshot contests aver that scarcely one person in a couple of thousand submits pictures of genuine pictorial quality or having the saving appeal of story-telling human interest. Others say that often most of the pictures are so good in these respects that they have difficulty in making decisions.

Perhaps the verdict depends as much upon who the judges are as upon what the pictures are. All of them concede that from the standpoint of photographic quality—correct exposure and proper focus—the average of amateur photographs is high. In that sense there is no doubt that thousands of amateurs take good pictures but with respect to evoking general appeal, it must be admitted that not all give evidence of attention to artistic composition, thought in the choice of subject, or care for the right moment to snap the shutter. The result is pictures that are commonplace in their appeal to others. Usually such pictures are personal to the picture taker, such as a close-up of a beloved infant with no qualities to distinguish it from snapshots of a thousand other babies.

To win snapshot prizes, camera users need to take pains to plan their pictures or at least exercise judgment in selecting a viewpoint that will give the best composition. Haphazard shooting rarely brings really good pictures. Unless experience has proved it, amateur picture takers should not assume that they possess a natural picture sense. They would do well to study examples of artistic photographs constantly published in magazines, newspapers and books, go to photographic exhibits, and learn what it takes to make a good picture.

Can it be that the majority of amateur picture takers are quite content with their pictures considering the fun they get in taking them and their value as records of good times or likenesses of relatives and friends? Certainly many do get vast enjoyment in carrying their snapshots around with them in wallets and handbags and exhibiting them to those in the circle of their acquaintance. They think their pictures are pretty good, and, as personal pictures, they certainly are.

Whether or not a camera user is interested in snapshot contests, he can get all the pleasure the painter gets in his work to create pictures that will be admired by everybody if he will venture beyond the field of personal interest and try to make pictures of general appeal. This means planning, care and thought. It's the difference, for example, between a picture entitled, "My wife and Junior, aged four," with the subjects standing stiffly side by side and one of the same subjects entitled, "A boy's best friend is his mother," showing her, with the boy over her knee, giving him a spanking. That's the kind of picture everybody likes.

142 John van Guilder.

IT PAYS TO ADVERTISE

NOTICE

The Editor of The Review would greatly appreciate the co-operation of the secretaries of the various organizations who would send him a brief account of their meetings or other items of Local Interest.

When our readers have visitors or go visiting, we would also like to be advised of it, too.

ADVERTISE IN, THE REVIEW

Successful Recital by Young Pupils

A recital given by the pupils of Miss M. Hicks in the auditorium of the United Church, Streetsville, last week, was not only pleasing, but encouraging, for it proved that there is considerable talent in the making in this district. One ought to have been prepared for this excellent program because the Peel Festival reports showed that none of the pupils of Miss Hicks who entered as contestants in this Festival, received less than 70%, and some won very high marks and medals in their classes.

The program was tastefully arranged with instrumental numbers and vocal pieces and recitations, as follows:

Pianoforte Duet, Ruth and Bob Hinan.
Pianoforte, The School Bell, etc., by Ruth Crawford.
Pianoforte, John Peel, etc., by J. D. Cordingly.
Pianoforte, Waltz, by Beth Evans.
Pianoforte Duet, "The Leaflet Song," by Ruth Jourdan and Neita McMillan.
Pianoforte Solo, Drifting, by Evelyn Lepofsky.
Pianoforte Solo, "Little Dream Girl," by Muriel Hamilton.
Pianoforte Solo, "Lullaby," Neita McMillan.
Pianoforte Duet, by Ruth and Merle Noble.
Pianoforte Solo, "Yellow Butterfly," Ruth Jourdan.
Solo, "Fairy Isle," Donald McArthur.
Pianoforte, "Swaying Ferns," Joyce Picket.
Pianoforte, "The Shepherd," Florence Brighty.
Recitation, Margaret Quennell.
Taps by John McClintock.
Pianoforte, Goblin's Frolic, Merle Noble.
Pianoforte, Feather Dance, Ruth Lee.
Pianoforte, "La Donna é Mobile," etc., by Olga Zardo.
Pianoforte, "Hanging Gardens," etc., by Ruth Hinan.
Pianoforte, "Strawberry Fair," by Florence Brighty.
Pianoforte, "Springtime," by Margaret Quennell.
Pianoforte, "Trumpeters Serenade," by Betty Spear.
Pianoforte, "Dance in Dublin Town," by Don. McArthur.
Pianoforte, Orseaux de Passage, by Mary Crawford.
Pianoforte, "Valse," etc., by Joan Jourdan.
Pianoforte Duet, by Mary Crawford and Betty Spear.

As an encouragement to the pupils who entered the Festival, Miss Hicks presented each with a framed diploma, and to Donald McArthur, who won a Gold Medal, she presented a book. Mrs. McArthur moved, and Mrs. Jourdan seconded, that the group extend to Miss Hicks heartiest thanks for all the help she had so freely given every boy and girl who had sought assistance and some who received this able direction were not pupils. The church was beautifully decorated for the recital with baskets of white and purple lilacs, tulips, daffodils, etc. The Rev. T. D. Jones gave a brief address upon the victory each pupil can win in the realm of the spirit by reasonable care in the training of the fingers of the mind. It is patient diligence and daily practice that wins victories. He said that what had been done best proved what could be done when we did our very best.

TRINITY CHURCH NOTES

During the absence of the Rector, Rev. E. S. Ottley, for the coming two Sundays, the services will be taken as follows:—

June 20th: 11 a.m., Morning Prayer. Preacher: Rev. J. M. Crisall, L.Th., of St. Paul's Church, Bloor St., Toronto. 7 p.m., Evening Prayer. Preacher: Rev. Wm. Hills, B.A., L.Th., of St. Paul's Church, Bloor St., Toronto.

June 27th: 11 a.m., Morning Prayer. Preacher: Rev. B. A. Peglar, Curate of Church of the Ascension, Hamilton. 7 p.m., Evening Prayer. Preacher: Rev. G. A. Stone, L.Th., Curate of Church of St. George-the-Martyr, Toronto.

There will be no Celebration of the Holy Communion on Sunday morning, June 20th, at 8 o'clock.

The Executive of the Tennis Club is anxious to receive your fees for the season, which has just commenced. Let's see you on the court, and don't forget to pay the fee to the Treasurer. Let's have a good membership this year!

About forty of the young people of Trinity Church held a surprise party for Miss Pearl Crozier, bride-elect of this month, at her home, on Monday evening, June 14th. After the shock, of the Crozier family having so many visitors, had passed, Mr. Ottley on behalf of all present then presented Miss Crozier and Mr. Joe Trimble with a huge box containing some eighteen pieces of green and cream enamel kitchenware. After all the presents had been opned, Miss Crozier and Mr. Trimble thanked everyone for this pleasant surprise of such beautiful and useful articles. A number of games were then played, and a lovely lunch was served. After lunch best wishes were extended to the young couple, and Mr. Arthur Arch, on behalf of all present, extended our best wishes to Mr. Ottley, who leaves this week to join in the happy band of wedlock on June 19th. Mr. Ottley very graciously replied. All then formed a circle, and sang "For They Are Jolly Good Fellows" and "Auld Lang Syne," and a pleasant evening was brought to a close.

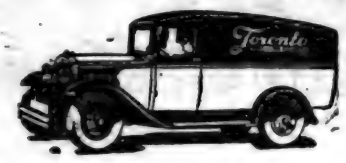
Our High School Is a High School



The Streetsville High School Board takes exception to a statement made by one member of the Peel County Council in said Council this week, to the effect that our High School is only a "Continuation School." The writer put the question of the status of Streetsville High School up to Dr. Duncan MacArthur, the Deputy Minister of Education for Ontario, a short time ago, and his answer was "Certainly, it is a High School and has always been recognized as such." It is still a High School even if the Fifth Form work is not taken up.

We May Lose a Minister

The many friends of the Rev John Y. Fraser, both in the Presbyterian Church and outside of it, will regret to learn that he is seriously considering leaving our village. He is very active and, besides being a good preacher, is a valuable member of our High School Board. Both he and his good wife have endeared themselves with the people, and if they decide to go, will be greatly missed. However, we will have them until September, anyway.

TELEPHONE TALKS IN THE WATSON FAMILY

"Yes, Mary . . . and Tom's fine, too."

Old Mrs. Watson lives with her son Tom. Yet her only daughter Mary, miles away, is with her too, for Mary, though old-fashioned in many ways, is definitely telephone minded and never fails to call her Mother on Long Distance at least once a week — an inexpensive and supreme pleasure for both of them. As Tom Watson puts it, "though our family's scattered, we're never really far apart — with the telephone."

Are you acquainted with the comfort, convenience and low cost of Long Distance?

TERROR MOUNTAIN

By MADELEINE SHARPS BUCHANAN

CHAPTER I

The bus crawled along the bumpy road up the side of the mountain. A gun aimed at the back of the grim-faced young driver saw to this. The smoke from the forest fire below was not so bad now, but it was thick enough to make the frightened passengers glance apprehensively through the windows.

A locust sat upon Miss Tulsa Jones' bony wrist and, with a faint squeal, that lady flung it off onto the ankle of the bandit who sat beside her gun in hand. Without relaxing his vigil, he stepped upon the locust.

Young Tommy Archer, aged twelve, who was having the time of his life, looked hopefully to find another locust to put somewhere on Miss Jones. She had been a source of pleasure to him all the way from the coast, but gee, things were breaking so swell, what with this forest fire and the bus getting held up by bandits and being run up the mountain, that Miss Jones could hardly expect to receive much more of his attention.

The road was steep and narrow. Occasionally they came out on a ledge gave an uninterrupted view of the blazing forest below.

May Lawrence, looking down, thrilled. A trained nurse in a small California town, she had never had any adventures, which was why, when an ailing aunt in New York had sent for her, she had chosen to make the trip by bus.

May was not troubled. She had no jewels and very little money. Ond the bus could not have traveled much faster than those flames. If the bandits had not held it up and ordered the driver up this mountain road, they might have been trapped in the fire. It had been alarming.

"This is terrible," moaned Mrs. Kenneth Jenkins, her two chins quivering.

A grunt was the only response from little Mr. Jenkins, who looked sadly at his razor, which, with all the other razors and pistols in the party, lay at the feet of the bandit who sat beside Miss Tulsa Jones.

"Does anyone know the meaning of this outrage?" demanded Finley Trump. "I have an important appointment in Chicago. Somebody will pay for this!"

The bandit covering the driver then opened his taciturn lips to emit two words.

"You bet," he said.

The air was cooler now and was pungent with the scent of pine needles. Night was fast aproaching, and the darkening sky was lit with the crimson reflection of the fire.

Miss Jones, shuddering away from the dreadful man beside her, took stock of the fellow passengers for the doxenth time. There was that lovely-looking girl, May Lawrence, and the attractive young man, Doctor Nicholas Strand, who had been paying her little attention; that impossible fat woman, Mrs. Kenneth Jenkins, who was everlastingly knitting, and her downtrodden little husband, who took snuff constantly. Then there was that asthmatic business man, Finley Trump; the frightful little boy, Tommy Archer (Miss Jones taught forty like him all winter), and his rather good-looking uncle. "Red" Doyle, who had red hair and a pugilistic appearance. And last, the mannish-looking woman who wore field glasses about her neck and read modern literature, Amelia Bangor was her name.

Miss Jones' thin fingers clutched her black bag which contained among other things, her smelling salts, her sleeping powders, her nail file, and six large handkerchiefs for her hay fever. Although the bandits had removed all money and valuables from their prisoners, they had permitted Miss Jones after a brief examination, to retain this bag. They treated everything about Miss Jones with contempt — which was a mistake.

She looked them over. The one beside her was short and stockily built, with a sallow face. The others called him Ike. The bandit who kept the passengers covered was bigger. Ike called him Lefty. The third bandit, farther back in the bus, was a pallid youth who chewed gum and had shifty eyes. He had been addressed by his companions as Stutter.

Around the neck of each bandit, in lieu of a collar, was fastened a gayly colored bandana. Miss Jones (took note of these bandanas.

The bus stopped, and Miss Jones peering out, saw a one-story log structure in the glare of the headlights.

"Hunters used to say here," Ike offered. "We got some cats laid in, and Stutter is a good cook."

"We may be here for some time folks, so you may as well make the best of it," advised Lefty. He gathered up the assortment of weapons and jumped to the ground.

"But why?" demanded Red Doyle.

"Use your head brother," said the bus driver. "We got Finley Trump with us, ain't we? And he's the head of that big chemical concern, Trump-Vilday, ain't he? There's been a lot of talk lately about a new secret explosive they have discovered that the War Department is interested in. It's over my head, but I imagine there are certain foreign interests that would like to get hold of the formula for that explosive and these bandits look like foreigners to me. It's my bet that Mr. Trump has got that formula with him, taking it to Washington. But maybe I am wrong — maybe I am wrong. Anyway, we had to get out of the fire — if we did."

Doyle stared at him. "You mean," he said slowly, "that we may be trapped by the fire up here on this mountaintop?"

"Sure," said Jim Somers laconically.

The interior of the low house was lamp-lighted and sparsely furnished. Also, it was untidy and dirty. It had a large living room and, surrounding this, three bedrooms and a kitchen. The cots were in evidence in the bedrooms. One large room was assigned to the women, and two small ones to the men.

Having hauled the baggage from the bus and given it to its owners, the man called Stutter repaired to the kitchen, whence the aroma of coffee and the sound of frying soon emanted.

Ike addressed the silent passengers, assembled in the living room.

"Folks, we got Finley Trump here with us, and he's got something we want. If he gives it up like a nice fellow, we'll let you all go — the sooner the better. If he decides not to come across peacefully, it's this for him."

Thrusting a finger into the bandana about his neck, Ike gave it an unpleasant twist. It was a decidedly suggestive gesture, and Mrs. Jenkins screamed faintly.

Mr. Trump seemed unimpressed.

"I have nothing more of value to you," he said icily. "You got my money and my watch."

"Think it over," shrugged Ike, turning away. "You know what we want all right. The formula of that new explosive you've discovered. You got it on you somewhere, brother, and before you get out of here you got to hand it over. Folks there's basins in the rooms and a pump out back, and Stutter is a fast cook. You better get ready for supper. And you can thank your lucky stars we didn't leave you all to fry down there below."

Amidst the indignant protestations that burst forth, May looked at Doctor Strand, and with apprehension in her heart. She had suddenly recalled that she had seen the young doctor and Mr. Trump in a few whispered conversations. Suppose Doctor Strand had his formula? Supose he was travelling with Trump? Then he, too, would be in danger! The thought struck a panic to her heart.

Yet why should she be so particularly concerned about young Doctor Strand — a man she had met for the first time on this bus trip? Why should his safety mean so much to her? She only know that it did.

Woman's World

By Mair M. Morgan

It's The Berries !

Though the Canadian strawberry crop may be a little late this year, it promises to be a good one. There is no fruit quite so delicious as fresh strawberries so when they do finally come on the market, be sure to serve them plentifully and often. Many people prefer just plain strawberries and cream but even this gets a little tiresome during the season so it is a good idea to have on hand, several smart strawberry recipes which you can use for the sake of variation.

Here are three recipes which use these delicious berries and they are the tops in the dessert field. They are simple to make and will certainly be well received by your family and friends.

Your favourite summer dessert, ice cream, is pepped up and make more delicious by flavouring it with strawberries and using quick-cooking tapioca. This recipe for home-made ice cream is so far ahead of the ready-made product that there is no comparison. And you will find it very useful when you are far away from civilization during your summer holidays.

Fresh Strawberry Ice Cream

½ cup cupar, 1 pint fresh strawberries, hulled; 3 tablespoons quick-cooking tapioca; 2 cups milk; ¼ teaspoon salt; 6 tablespoons light corn syrup; 2 tablespoons sugar; 2 egg whites; 1 cup cream, whipped.

Add ½ cup cugar to strawberries and crush well. Let stand 30 minutes. Add quick-cooking tapioca to milk in top of double boiler. Place over rapidly boiling water, bring to scalding point (allow 3 to 5 minutes), and cook 5 minutes, stirring frequently. Strain hot mixture on salt and corn syrup, (not rubbing) through very fine sieve; mix thoroughly. Chill. Add 2 tablespoons sugar to egg whites, beat until stiff; fold into tapioca. Fold in cream and berries. Turn into freezing tray of automatic refrigeration; freeze rapidly 3 to 4 hours. Or turn into container, cover tightly, and pack in equal parts ice and salt 2 to 3 hours. Makes 1 quart ice cream.

Strawberry tarts are favourite everywhere so don't miss out on making them at least once during the season.

Fresh Strawberry Tarts

1 quart fresh strawberries, washed and hulled; 1 cup sugar; 1 package quick-setting jelly powder 1 cup warm water; 1 cup cream, whipped; 9 baked 3½ inch tart shells.

Combine strawberries and sugar and let stand 1 hour. Dissolve jelly in warm water, pour over strawberries, and chill until jelly begins to thicken, stirring frequently. Fold 4 tablespoons thickened jelly into whipped cream. Chill. Place a layer of whipped cream in bottom of each tart shell. Chill about 10 minutes. Cover with layer of jellied strawberries, pressing hull-end of each strawberry lightly into cream. Add thickened jelly to fill tart. Chill a few minutes longer and serve.

After you have finished making your strawberry jam and jelly and have to turn around and get the family supper, here is something that you can whip up for dessert. There is bound to be a cup or so of jam or jelly which you didn't bottle and now you can use it.

Strawberry Mousse

1 cup strawberry jam or jelly; 1 egg white, unbeaten; dash of salt; 4 tablespoons milk; ¾ cup heavy cream.

Beat jelly until soft and smooth. Combine egg white, salt, milk, and cream, and beat with rotary egg beater until stiff. Add jelly and mix well. Turn into mold. Cover with waxed paper, press cover tightly down over paper, and pack in equal parts ice and salt. Let stand 4 hours or langer before serving. Or place in freezing trays of automatic refrigerator and let stand 4 hours. Makes 1 quart mousse.

WIN DISTINCTION AS HOSTESS WITH LAURA WHEELER'S "POPPY" APRON

HOSTESS APRON — PATTERN 1495

Flit from pantry to parlor in this "hostess" apron, so gayly appliqued with poppies, and guests are sure to ask how it's made! Choose bright contrast for yoke, border and poppies (the latter's patches simple, their stems in outline stitch.) One poppy forms the pocket. Pattern 1495 contains a transfer pattern of the apron and a motif 6¼ x 10¾ inches; a motif 6½ x 9¾ inches and the applique patches; illustrations of all stitches used; material requirements.

Send 20 cents in stamps or coin (coin preferred) for this pattern to Wilson Publishing Co., 73 West Adelaide, Toronto. Write plainly PATTERN NUMBER, your NAME and ADDRESS.

Enjoying Himself

Two mountaineering acquaintances climbed one of the famous Glencoe peaks during the week-end and were sitting basking in the sunshine and enjoying the marvellous view when they heard someone scrambling up the other sided of the peak as if he had a train to catch. As soon as he got to the summit he pulled out his watch, looked at it—then smiled. He had beaten the time of his previous climb by four and a half minutes.

Most Valuable Wood

Teak is the most valuable of all known timbers. For use in tropical countries it has no equal, and for certain purposes it is preferable to other wood in temperate climates.

Teak has great strength, elasticity and remarkable durability. It is not very hard, is easily worked, and takes a beautiful polish. The average weight of a perfectly-seasoned piece of teak wood is between 38 lbs. and 46 lbs. per cubic foot. Once seasoned, it does not crack, shrink, split or alter its shape.

Teak grows in India, Burma, Siam, the Philippine Islands and the Malay Archipelago. The trees are about 100 ft. to 150 ft. high, and 2 ft. thick when full-grown. They often produce leaves 2 ft. long by 1 ft. wide, which the natives use for thatching and wrapping bundles. The leaves contain a red dye once used in treating silk and cotton.

It wouldn't hurt any if the colleges would work their way through some of the students.—Montreal Herald.

Processed Cheese

The 1936 production of processed cheese amounted to 12,494,959 lbs., the largest since 1930, and an increase of 14 per cent. over the previous year. There were 20 plants manufacturing processed cheese during the year, didstributed as follows: Ontario 11, Quebec 6, Manitoba 2, and Alberta 1.

The Value of Humus

The value of Humus lies in its high moisture retaining powers, and because of its light fibrous texture. Humus that is neutral, neither acid nor alkaline and containing a high percentage of ammonia and nitrogen has a twofold value, it acts as a moisture retainer and when mixed with soil produces a porous top surface; it acts further as an insulator and nourisher, keeping the plant roots cool and supplied with ample moisture. Humus, by retaining moisture readily keeps up the multiplication of bacteria life which, where soil is baked and dry, dies out in millions and the development of plant life is retarded.

Marl is light gray or white in colour, very fine grained in texture, soft and soapy to the touch and has excellent fertilizing qualities. Sweden, Germany, America, France, etc., are now supplying world markets with this type of soil conditioners in vast quantities.

Reports by leading scientists and geologists reveal that the Beverly-bog contains the same essential materials and the discovery of these deposits has given Canada a distinct advantage.

"Poor Fellow"

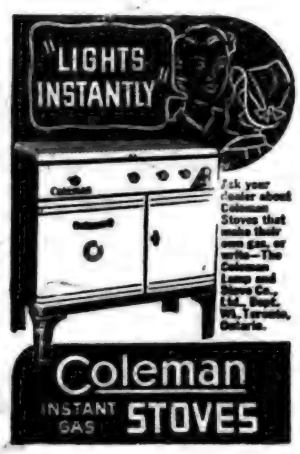
A hen is not supposed to have much
common sense or tact,
Yet every time she lays an egg she
cackles forth the fact.
The mule, the most despised of all,
has a most persistent way
Of letting folks know how he's
around by his insistent bray,
The busy little bees they buzz,
Bulls bellow and cows moo,
The watch dogs bark, the ganders
quack, and doves and pigeons
coo.
The peacock spreads his tail and
squawks, pigs squeal and robins
sing.
And even serpents know enough to
hiss before they sting.
But man, the greatest masterpiece
that nature could devise,
Will often stop and hesitate before
he'll advertise.

DRINKS... HOT OR COLD taste better with "RITZ"

Their tangy, nut-like, slightly salty flavor gives added zest to refreshments.

Christie's Biscuits

"There's a Christie Biscuit for every taste"



Firestone TIRES FOR EVERY PURPOSE

GET the most for your money. Firestone tires, with all their extra features for longer and safer mileage, do not cost one cent more than ordinary tires. Only Firestone tires have Gum-Dipped Cords with 58% longer flexing life. 2 Extra Cord Plies under the tread make them safe at any speed. And the Firestone treads are scientifically designed for long wear and utmost safety. You need all these features for safe, low cost mileage—and only Firestone gives them to you. SUNDAY SCHOOL LESSON

JOSEPH'S KINDNESS TO HIS KINDRED

Printed Text — Genesis 46:1-7, 28-30 : 50 : 24-26.

Golden Text — "Be ye kind one to another, tenderhearted, forgiving each other, even as God also in Christ forgave you." — Ephesians 4:32.

THE LESSON IN ITS SETTING

TIME — According to the common chronology, Jacob went down with his family into Egypt B.C. 1715; he died B. C. 1698. Joseph died B.C. 1643.

Place — Joseph's residence in Egypt was at Zoan, the capital of the kingdom at that time, located on the eastern part of the Nile Delta. The Hebrew people settled in the land of Goshen in the eastern part of Egypt and north of the southern part of the Delta. Hebron is nineteen miles to the southwest of Jersualem.

"And Israel took his journey with all that he had, and came to Beer-sheba, and offered sacrifices unto the God of his father Isaac." Israel, who is, as we have seen before, the same Jacob, knew that he and his entire family, the chosen people of God, were on the threshold of a great experience, were at a turning-point in their history, and, coming to know through his long years of experience, that great ventures undertaken without God are doomed to failure, tarries at Beer-Sheba on his way down into Egypt, to offer sacrifice to God. (See 21.33; 26:24; 28:10).

"And God spake unto Israel in the visions of the night, and said, Jacob, Jacob. And he said, Here am I." 3. "And he said, I am God, the God of thy father; fear not to go down into Egypt; for I will there make of thee a great nation." 4. "I will go down with thee into Egypt; and I will also surely bring thee up again; and Joseph shall put his hand upon thine eyes.' Here is the fulfillment of the oft-repeated promise — "They that seek Jehovah shall not want any good thing" (Psalm 34:10). Four things are promised — God's permission to go down into Egypt; God's presence as they go into Egypt; God's promise to make of them in Egypt a great nation, and God's purpose to bring them back again to Canaan. And probably God's assurance that Jacob's descendants would come back to Canaan in the future was the most reassuring of all God's gracious promises to Jacob this day.

"And Jacob rose up from Beer-Sheba; and the sons of Israel carried Jacob their father, and their little ones and their wives, in the wagons which Pharaoh had sent to carry him. And they took their cattle and their goods which they had gotten in the land of Canaan, and came into Egypt, Jacob, and all his seed with him. His sons, and his sons' sons with him, his daughters, and his sons' daughters, and all his seed brought he with him into Egypt." The wagons which Joseph sent were certainly four-wheeled conveyances. In such wagons, drawn by oxen, did the women and children of the patriarchal family travel. The cattle were driven and the rest of the goods packed upon asses and camels. — F. Delitzsch.

While the carefully enumerated list of names of those who went down into Egypt is important in a minute discussion of Hebrew history, we do need here spend but a moment with it. We must not identify this list with another contained in Numbers 26, written two hundred and fifty years later. Jacob, himself, at this time, was one hundred and thirty years old (47:9), and Joseph approximately forty years old, while Reuben, the oldest, was about forty-six, and Benjamin, the youngest, about twenty-six. The sons of Ieah are first enumerated in 9-15), then the sons of Zilpath, Leah's handmaid (16:18), then the sons of Rachael, who alone is here called the wife of Jacob (19-22), and finally, the sons of Bilhah, Rachael's handmaid (23-35). All the souls that went with Jacob into Egypt that came out of his loins were eleven sons, one daughter, fifty grandchildren, and four great-grandsons; in all, sixty-six. Jacob, Joseph, and his two sons are four, and thus all the souls belonging to the family of Jacob which went into the valley of Egypt were seventy. The Septuagint gives seventy-five as the sum total, which is made out of inserting five names not found in this list.

"And he sent Judah before him up to Joseph, to show the way before him unto Goshen; and they came unto the land of Goshen." Joseph had previously promised his brethren that they should dwell in the land of Goshen (45-10), and the region in Lower Egypt east of the Bubastic branch of the Nile, a region not of any great extent, having an area of approximately nine hundred square miles, but exceedingly fertile, and which allowed the Israelites more or less of a life of separation from the contaminating influences of great Egyptian cities.

"And Joseph made ready his chariot, and went up to meet Israel, his father, to Goshen; and he presented himself unto him, and fell on his neck and wept on his neck a good while. And Israel said unto Joseph, Now let me die, since I have seen thy face, that thou art yet alive." The meaning of the patriarch is that, since with his own eyes he was now assured of Joseph's happiness, he had nothing more to live for, the last earthly longing of his heart having been completely satisfied and was perfectly prepared for the last scene of all, ready, whenever God willed, to be called to his fathers.

"And Joseph said unto his brethren I die; but God will surely visit you, I bring you up out of this land unto the land which he sware to Abraham, to Issac, and to Jacob. And Joseph took an oath of the children of Israel, saying, God will surely visit you, and ye shall carry up my bones from hence." Through all the terrible bondage they were destined to suffer, the bones of Joseph, or rather, his embalmed body, stood as the most eloquent advocate of God's faithfulness, ceaselessly reminding the despondent generations of the oath which God would yet enable them to fulfill. And thus, as Joseph had been their pioneer, who broke a way for them into Egypt, so did he continue to hold open the gate and point the way back to Canaan.

"So Joseph died, being a hundred and ten years old; and they embalmed him, and he was put in a coffin in Egypt." The book opens with life; it ends with death, because in between had come sin which brings forth the death. And yet that coffin spoke of life as well as death. It was a symbol of hope, a message of patience, and a guarantee of life everlasting. Genesis, with its coffin in Egypt, was followed by Exodus, which means departure, deliverance. There is nothing finer to remember in all this lesson than the five words: "I die, but God will."

The same writer whose books on Genesis are so valuable, gives the following qualities of the life of Joseph: (1) Guilelessness, (2) frankness, (3) tactfulness, (4) sensitiveness to evil, (5) purity of heart and life, (6) humility of word and deed, (7) wisdom, (8) executive ability, (9) filial affection, (10) manly energy, (11) resolute adherence to duty, (12) prudence, (13 self-control, (14) sympathy, (15) hopefulness, (16) considerateness, (17) equanimity, (18) courage, (19) patience, (20 large hearted generosity. These are perhaps the most important features, though there are doubtless a lot of others that can be found.

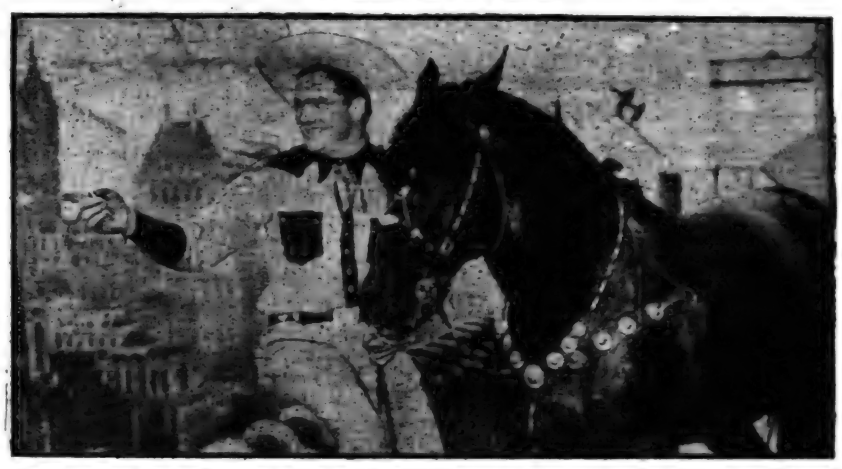
All Want to Drive

Writes the Kingston Whig-Standard:—Why is traffic, after all these years, getting constantly more dangerous instead of safer? Perhaps the chief reason is that a far greater number and range of persons now drive. Not merely are there more car-owners and in direct consequence more car drivers, but also more persons within an owning family drive. The handling of a car is not left to the one, or perhaps two, members of the family assumed in pursuance of the ways of horse-driving days to be specially skilled or adapted to the task. Nowadays almost everyone feels that he or she is able and has the right to drive. Put another way the reason may be that we have tried to fit the auto into the system of democratic individualism. We have assumed that it is every person's right to drive a car. It is probable that a far greater proportion of persons drive cars today than ever drove horses. In the days when the horse was dominant everybody did not feel competent to drive. As yet we have hardly begun to tackle the problem of ruling incompetent and dangerous drivers off the road.



A capital levy was imposed in England nearly 700 years ago, in 1262.

Court Session In Wilderness

To speed justice, the judge and the jury of the Prince George, British Columbia, Assizes, went into the wilderness to take the testimony of the Chief of the Siccanens Indians (seated), who was quarantined in his cabin.

A Horse On The House

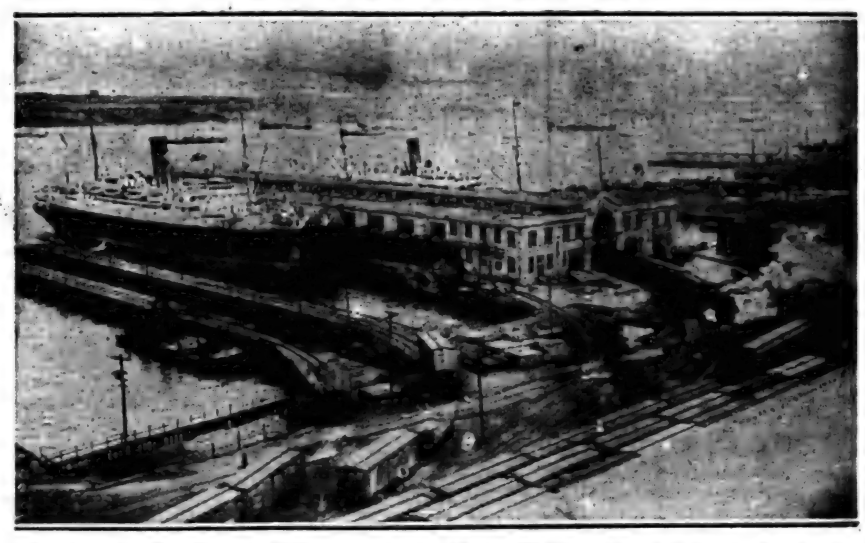
"Silver Dollar" Brady, western figure whose antics are meant to attract attention to the Golden Gate Exposition in San Francisco, shows his horse, "Cheyenne," the sights of New York from roof of hotel where both registered and were accommodated.

For Their Brave Dead

After telling 18 policemen to whom he awarded medals for bravery to shoot hoodlums first and then ask questions, Mayor Fiorella LaGuardia of New York pins Medal of Honor on Mrs. Nora Gallagher, widow of slain officer. Mrs. Jean Pasquerella waits turn to receive posthumous honor to husband killed on duty.

The Honor Roll

In a country as young as Canada one does not expect to find many individual business enterprises with a history going back as far as 1850. Yet the Canadidan publication industry can boast of 10 daily newspapers, 17 weekly newspapers, three religious periodicals and one magazine, all in active operation, that had their beginnings earlier than the middle of last century. That makes 21 publications, each of which is 87 years old or older.



And if the honor roll were to begin at 60, there would be 204 publications that would qualify, 199 of them being in Eastern Canada, the part settled first. Today there are many media available to advertisers, but none with the long and distinguished record of useful service, both to advertisers and the public.

A seaplane can rise from slightly rough water more easily than from a calm surface.

The unseen forces that are contained in the sun's rays are necessary to all life existing on the earth.

The largest window in England is to be found in York Minster. It is seventy-five feet high and thirty-two feet wide.

One of the World's Greatest Ocean Ports

This view of the waterfront at Halifax covers only a portion of the vast extent of shipping but shows one of the big sheds, where in fact most of Canada's overseas contingents embarked on the way to war and were royally greeted when they returned.

Movie-radio gossip

By DOROTHY

In spite of her outstanding success in "Valiant Is the Word for Carrie", and the forthcoming "They Gave Him a Gun," which is said to be even better, Gladys George looks on herself as just a novice at screen acting. So intent is she on becoming as skilled a player on the screen as on the stage, that she spends all of her spare time studying movies. The players she admires most are Garbo, Spencer Tracy, and Merle Oberon.

Social life and cafe-hopping were at low ebb during the weeks when there was talk in the air of a strike of the Screen Actors' guild which counts all the great in its ranks, but the homes of Robert Montgomery, Jim Cagney, Fredric March and a few other leaders were continual mob scenes. These men won the undying gratitude of extras and bit players, for they were battling to improve their pay and working conditions, not their own. Everyone is relieved that no strike was necessary. These leaders rallied the support of their fellow-players so quickly and thoroughly that the producers gave in to their demands without a struggle.

James Cagney

ODDS AND ENDS — Hollywood will throw a grand party soon in honor of Weber and Fields and the fiftieth anniversary of their stage debut as a team. Imitations of their act will be put on by Jack Benny and George Burns, Eddie Cantor and George Jessel, and two motion-picture producers . . . Joan Crawford is teaching Mrs. Gary Cooper to crochet and Gary is threatening to buy them old-fashioned rocking chairs . . .Betty Davis never gets the least bit nervous in front of a camera or a microphone, but waiting between scenes gives her the jitters. She calms down by sipping tomato juice between scenes . . . Joe E. Brown, Jr., is the envy of all his pals because he takes Dixie Dunbar, the cutest little trick in 20th Century-Fox pictures, to his fraternity dances . . . James Dunn has bought an airplane so that he can fly around the country to big sports events whenever he has a few days between pictures . . . Whenever the R-K-O studio wants to reach Ginger Rogers on a day when she is not working, thye call the hospital where James Stewart is undergoing treatment for arthritis . . . Paul Muni has rebelled against beards and weird make-up.

A store on wheels carrying a supply of groceries, soft drinks, bread, toilet articles, medicines and crockery, has been equipped by the Bryukhovetsky village store in the Azov-Black Sea Territory of Russia to serve the collective farmers while in the fields.

Cotton is considered the only important part that was cultivated independently in both the Old World and the New, before white men came to America.

A Form of Relaxation

Joan Blondell looks up from the springboard over the pool of her Hollywood home as she lazily relaxes in the sun after a day on the studio sets.

SPECIAL INTRODUCTORY OFFER

Attractive new rooms can be created overnight with Semi-Lustre, the amazing new *washable* satin-enamel. Semi-Lustre gives you the soft, light-reflecting, non-glare surface so much in vogue, and makes redecorating as fascinating as choosing a costume. The 13 lovely pastel shades give you unlimited scope for individual color schemes.

Think of the immense practical advantage of a *washable* finish! Unsightly finger marks and stains can be removed instantly with soap and water—without injury to the delicate satin finish.

Semi-Lustre is easily applied, dries quickly, and is DEODORIZED. Try this amazing new finish—the 10-day introductory offer enables you to do so at a great saving in cash!

37-9

FOR 10 DAYS ONLY

So that you may try out Semi-Lustre—in your kitchen . . . your bathroom . . . on furniture or woodwork—we are making this sensational introductory offer. Fill in your name and address on the above Cash Savings Certificate. Tear it out and take it to your paint store. It entitles you to any quantity of Semi-Lustre you want at the above special prices. But only during the 10-day period from April 28 to May 8 inclusive. After May 8 the regular prices on Semi-Lustre will prevail. We suggest, therefore, that you use your Cash Savings Certificate at once.

Miss Alice Metcalfe and Mr. Wm. Jackson, of Toronto, visited with Mrs. Lundy this week-end.

There will be a Rose Convention at the O.A.C., Guelph, June 29 and 30, held by District No. 7, which includes Peel County. Everybody is invited, and a lovely lunch will be served at a cost only 25c.

Did you see the lovely Iris display in the window of Ramsay's Butcher Shop last Saturday? It was the work of Streetsville Horticultural Society and is only a sample of what this society is doing in the village. The flowers were later taken to decorate the pulpit of the United Church.

Miss Mary M. McCracken, R.R. 2, Meadowvale, will commence training as a nurse at St. Michael's Hospital, Toronto, in September.

The next [illegible] holiday will be Thursday July 1st.

We are pleased to hear that Mrs. T. A. Rogers, who has been very ill, is improving nicely.

The large barn on the farm of Walter Pearson, Trafalgar Township, was destroyed by lightning one night last week. Three calves, a bull and 100 tons of hay were also burnt to death.

Mrs. Temple and Mrs. Lundy attended the W.M.S. Toronto Presbyterial West Sectional meeting at Port Credit on [illegible]. Mrs. Lundy attended the W.M.S. Toronto Presbyterial Centre Sectional meeting at Weston, Friday.

There will be a pigeon race of 600 miles from Illinois to Ontario on June 19, for which many entries have been received. William L. Higgins of Port Credit is in charge of the Canadian Race Committee, and is secretary of the Canadian Racing Pigeon Union.

In the report of the Settlement Committee of th United Church, the following changes are slated: F. A. Gilbert goes to Norval; A. G. McPherson, Mono Mills; Thos. Merryweather, Malton; S. J. T. Fortner to Creemore; C. J. Bailey to Kleinburg, and A. Laycock to Mono Road.

Alfred Lancaster, Dundas, was remanded in custody on charges of reckless driving and failing to remain at the scene of an accident, when he appeared in Peel County Police Court before Magistrate L. J. C. Bull Friday. His car is alleged to have struck down Austin Hepton, Cooksville youth, late Thursday night.

E. T. Hinchcliffe, Toronto, was sentenced to ten days in the county jail at Brampton on a charge of driving while intoxicated.

MAY FAMILY RE-UNION

Descendants of George May, who settled on the Town Line, Chinguacousy Township, more than a century ago, gathered at Huttonville Park on Saturday for the annual reunion of the clan, electing Clifford May, Hornby, president, and Miss Mildred May, Streetsville, secretary for the coming year.

Saturday's reunion was arranged by the family council under the direction of Anderson May, Streetsville, past president of the clan.

Guests and members of the family were in attendance from most of the Toronto district, and from as far away as Saskatchewan. Mrs. James Brown, Norval, was the oldest member of the family taking part in the outing and Kenneth Collie, son of Mr. and Mrs. Ernest Collie, Toronto, was the youngest. Of the five generations of the family since the founder three were represented at the picnic. The homestead, not far from Huttonville, is still in possession of the clan, and is now farmed by Lawrence May.

PORT CREDIT

The social evening held in the Legion Hall here, under the auspices of No. 3 & 4 Platoon "A" Co'y., Lorne Scots, was a great success. A large audience enjoyed the spicy program, consisting of numbers by the Lorne Scots Pipe Band, the boys' orchestra, and entertainers from Toronto. A hearty lunch was served, while the lucky tickets were being drawn. The following were prize winners:

1st—Mrs. A. J. Beard, Lakeview.
2nd—Mr. A. H. Smith, Toronto.
3rd—Mr. H. Waldick, Port Credit.
4th—Mr. L. Magness, Port Credit.
5th—Mr. A. Leek, Toronto.
6th—Mr. J. Kelly, Long Branch.
7th—Dr. C. Heggie, Brampton.
8th—Mr. D. Miller, Oakville.
9th—Mr. R. Layton, Toronto.
10th—Mr. Carman Reilly, Toronto.
11th—Mr. A. E Phillips, Cooksville.
12th—Mr. R. Collins, Toronto.
13th—Mr. Carl Carter, Streetsville.
14th—Mrs. A. Steers, Port Credit.
15th—Mr. Frank O'Connor, Meadowvale.
16th—Miss Peggy Morris, Port Credit.

God Save the King.

St. George Chapter, I.O.D.E., held its last-of-the-season meeting at Mrs. G. W. Morrow's lovely house in Port Credit. The chapter donated a flag to St. John's Convalescent Hospital at Newtonbrook and $10 was voted to Rose Day—in lieu of tagging. Decision was that the chapter resume meetings in October. Mrs. Velvien Henderson reported on the proceedings of the National Chapter in Quebec. Later Mrs. Morrow entertained at tea and the members were shown over the very beautiful estate and the interesting aviaries.

NOTICE TO CREDITORS

In the Estate of HANNAH DEVINE late of the city of Toronto, in the county of York, (formerly of the Village of Streetsville, in the County of Peel), Spinster, deceased.

Creditors of HANNAH DEVINE, late of the said City of Toronto, Spinster, deceased, who died on or about the 26th day of April, 1937, are required to file their claims with the undersigned on or before the 3rd day of July, 1937, after which date the executor will distribute the assets of the estate of the said deceased.

Dated at Brampton this 7th day of June, A.D., 1937.

GRAHAM, GRAHAM & BOWYER,
Brampton, Ont.,
Solicitors for the executor.

OBITUARY

The funeral of the late Alfred G. Boake of Toronto took place to Dixie cemetery on Tuesday. He was 60, and leaves his widow.

Thomas T. Hunter died in Brampton on June 18 and was buried in St. Stephen's Church Cemetery, Hornby.

The many friends around Streetsville, of Mrs. Lindsay Ward (nee Cecilia Macklin) of Weston, regret to learn of the death of her husband, which took place on June 17th. Three children, Helen, Macklin and Marjorie Ward, also survive.

Martha L. Elliott passed away on Sunday, June 20, at Churchville, and was buried in Huttonville cemetery. She was a daughter of the late Nathaniel and Letitia Elliott. One brother, Mr. W. E. Elliott, R.R. 1, Meadowvale, survives, also two sisters, Mrs. Chas. Oram, Cooksville, and Mrs. J. E. Thompson, Saskatchewan.

The last time there was a 12th of July celebration in Streetsville was in 1907, just thirty years ago. It should have been held here this year, as it is just 100 years since the first Orange Lodge was started in this village.

The Open Column

Credit where credit is due: Warden D. W. Moran shoved the county council through a modicum (meaning a small amount) of business, last week, in three days. Scarcely a by-law to amend by-law 646 reared its ugly head. In other words, councillors were more than a little chary of tampering with the county road system. T. W. McMurter, the rubicund reeve of Bolton, wanted a connecting link added to the system, to link Peel with the northern reaches of York, but, lest an addition to the county highways should precipitate a deluge of appeals for other township roads to be assumed, the council voted him down.

G. F. Skinner, Port Credit's chief executive, made a somewhat coy announcement that, if he were returned to the county council next year, he would be prepared to support the addition of a reasonable mileage of township roads to the county system, provided that the need of the assumption of these roads by the county was readily apparent. Other councillors smiled quietly to themselves when they recalled that Skinner was an avowed contestant for the wardenship next year.

Reeve S. H. Foster's declaration that the Streetsville High school was not a High School, but only a Continuation School, drew no comment from the council. Streetsville, it seems, can settle its own difficulties arising from secondary education, until a situation arises that definitely impinges on the legislative authority of the county.

The warden's remarks to the effect that county representatives on the High School boards of Peel were, perhaps, inspired by a session several years ago, when boards of the various secondary schools of the county appeared before the council, and the High School situation threshed out at some length. It was very apparent, at that time, that the council had very little control over the actions of the school boards, and that the only possibility of controlling the boards lay through the appointment of representatives who work from the county council's viewpoint.

At any rate, the remarks of Reeve Foster and Mr. Moran would certainly do nothing to lubricate a set of conditions in Streetsville, relating to secondary education, which have already begun to creak a bit for need of sympathetic understanding and cooperation in obtaining better educational facilities in the village.

PORT CREDIT

An informal tea in honor of Miss Mary Van Kleeck, social worker, was held at Lorne Park House, Port Credit, on Sunday afternoon. Miss Van Kleeck was the guest of the Toronto Interprofessional Association. A buffet tea was served in the garden of Lorne Park House, which has just been opened. During the summer it is the home of an exhibition of the Picture Loan Society, and of the looms and displays of the Thackery Weavers. The grounds were laid out by Carl Lorgstrom and H. S. M. Carver.

LET US SMILE

"The office boys at our place had a sit-down strike for three weeks last month."

"A sit-down strike for three weeks? Goodness, why didn't you settle it sooner?"

"Because it was that long before we realized they were striking!"

Friend—There wasn't a very big account of your daughter's wedding in the paper this morning.

Father (sadly)—No; the big account was sent to me!

ACHIEVEMENT

"The devotion of thought to an honest achievement makes the achievement possible. Exceptions only confirm this rule, proving that failure is occasioned by a too feeble faith."—Mary Baker Eddy.

"We should believe only in deeds; words go for nothing everywhere."—Noyas.

"No matter what a man's aims, or resolutions, or professions may be, it is by one's deeds that he is to be judged, both by God and man."—H. W. Beecher.

"Man's life was made not for creeds, but actions."—Meredith.

"A noble deed is a step towards God."—J. G. Holland.

At the June session of Peel County Council, Reeve S. H. Foster, Streetsville, presented a bill for $385.00 for tuition of Streetsville pupils at Etobicoke High School for 1936. Mr. Foster has a letter from our County Clerk to the effect that the County was liable to pay for the tuition of pupils coming from a village of less than 1200. population. As the School Act has been changed since 1935 the County would not pay the bill. It has been estimated that the cost of tuition of Streetsville pupils at Etobicoke High School for 1937 will be $800.00, so we think it is time Streetsville was improving and enlarging their school accommodations so these pupils could be taught at home.

TWO FARMS SOLD IN ETOBICOKE AREA

Sale of two farm properties has been made by C. R. Purcell and Co., realtors. E. McCartney of Toronto, through Mr. Purcell, has bought eight acres of apple, pear and cherry fruit lands, formerly owned by D. R. D. Morris of Dixie, the parcel fronts on the Lakeshore road, west of the Etobicoke river, just north of the new middle highway.

It is one of the apple orchards of Mel and Fred Watson, the latter claiming among the best equipped cold storage plant in the province. There is a nine roomed brick residence with all modern conveniences, a large greenhouse, barn, chicken house, and the orchard surrounds the house. The purchase price is understood to be around $15,000.

The other sale was of four acres adjoining the larger parcel. This piece was also formerly owned by D. Morris and was sold to William S. Wade of Toronto, who plans to build a bungalow on the land similar to some he owns in Florida. The dwelling will be put on high ground so it can have an unbroken view on three sides. Nearly half of the four acres is a wooded ravine extending down to Etobicoke creek and it includes part of a small wooded island.

PAGEANTRY IN PEEL

Historic costumes will be worn and historic days lived again at Dixie's Old Stone Chapel on Saturday, 3rd July. They will sing the haunting melodies the pioneers sang more than a century ago. The company will picnic under the old trees and join in the songs. Mrs. N. W. Armour will play the piano.

There will be other music as well, the Bugle Band of the Boys' Brigade, 12th Toronto Regt., and the Flute Band of the Kilted Irish Regt. of Canada.

Col. the Hon. T. L. Kennedy will be chairman, Mayor and Mrs. Robbins and the Peel Old Boys will be guests of honour, and ex-Alderman R. H. Graham will speak. His grandson will play the violin. Mrs. Shipp's Pioneer Caravan, assisted by members of the Toronto Branch of the United Empire Loyalists Association, in costume, will present in song a panorama of the past.

Wm. Perkins Bull, K.C., out of his wide and intimate knowledge of Peel history, will tell how and by whom the little log chapel came to be built in the forest land that was Peel in 1810.

The pageant and picnic will be under the auspices of the Official Board, Dixie Church and Cemetery, in co-operation with the Church of England, United, Presbyterian and Baptist churches.

DIXIE

The Women's Institute, under whose auspices—jointly with the official board, Anglican, United, Baptist and Presbyterian churches—the pioneer pageantry and picnic are to be held at Dixie at 3.30 Saturday afternoon, 3rd July, will sell at nominal prices, home-made refreshments, including bread and butter, sandwiches, ginger bread, doughnuts, pies, cakes, fresh-picked, locally-grown strawberries, with cream or ice cream, buttermilk, milk and chocolate milk, from the Acme Farmers Dairy.

The Women's Institute president, Mrs. Grimshaw, of the old Absalom Willcox home on Dundas street, which sheltered the fugitive William Lyon Mackenzie, will be in charge of refreshments.

The United Empire Loyalists Association has arranged to help in the programme of music and tableaux being presented by Mrs. Shipp's Pioneer Caravan, of which D. L. McClure of Brampton is a notable member.

PERSONALS

Miss Helen Ives, Meadowvale, is visiting with Mr. and Mrs. B. Brighty.

Mr. F. W. Keene of Essex and Miss Helen Scott Sergeant of Milton are to be married this week.

Mr. and Mrs. W. J. Moore visited friends at Midland on Sunday, their former home.

Mr. and Mrs. E. E. King and family of Brigden, Ont., visited friends here over the week-end.

25 YEARS AGO IN STREETSVILLE

(From The Review of June 20, 1912.)

A conference will be held to-morrow to discuss the question of building a paved road from Toronto to Hamilton.

A case of slander preferred by Wm. Trenwith against Wm. Bowbeer, both of Clarkson, was settled by Judge McGibbon. The defendant had to pay.

Born on June 16, 1912, to Mr. and Mrs. T. M. E. McCracken, Town Line, Trafalgar, a daughter.

Seward D. Jarvis of Hamilton and Miss Doss Cordingley of Lisgar were married on June 17th at St. James Cathedral, Toronto.

Mr. R. H. Greig took the Village Council and the Clerk to Oakville for an auto ride, when they interviewed Oakville Council re their waterworks system.

ADDRESS

Streetsville, June 18, 1937

TO MR. AND MRS. GEORGE FULLERTON :

The most important time in life
Is when two start as man and wife,
And that is why we are gathered here
To welcome you and bring good cheer.
For the greatest blessings heaven sends
In country life is neighbor friends.
Happy day, happy day,
Spent in the good old-fashioned way.

When on life's highway, side by side,
George travels with his fair young bride,
When years have come and passed away
May their hearts be young when heads are gray
And then can look back with delight
On the happy time with friends to-night.
Happy day, happy day,
With neighbors spent that pleasant way

Sometimes we read in The Review
What brings tears or joy, to me and you,
What happened twenty-five years ago,
In summer heat or in winter's snow,
So our blessing on this happy pair
Until their silver wedding they will share.
The Review will then have this to say,
Twenty-five years have passed away.

We ask you to accept these gifts from friends and neighbors

Signed on behalf of the Committee

CLIFFORD MAY
CHARLES McCARRON

This address was sung by Mrs Clif. May

PRESENTATION TO MR. AND MRS. G. FULLERTON

When George Fullerton and Ruba Campbell were married on the 12th of June and started off on a wedding trip, Cliff May and Charlie McCarron, neighbors on the lookout committee, got busy to have a surprise for them on their return. George was always a favourite, and everyone was delighted to join with these two leaders to have a social night and give a useful present. Arrangements were made to hold the presentation in the old Fullerton homestead, George being the youngest boy in the fifth generation of Fullertons. But on account of the heavy rains making the lane impassible for cars, the committee decided to hold the presentation in the old Number 10 White School.

And it seemed the right place, this old school room,
To welcome this young bride and groom,
Then with joy we sang this sweet refrain
The musicians will be here again.

Old nature that night was in tune,
On this eighteenth day in June
When old friends and musicians met,
What joy to pay old friendship's debt.

The old folks didn't step aside,
That night for George and his young bride,
For, all joined together, with delight,
And had such a happy time, that night.

Everyone in the school was happy and proud,
To be in such an up-to-date crowd,
In days to come, memory, will recall then,
That happy night, spent in old No. Ten.

Seventy cars brought about two hundred to the old white school. What a time everyone expected and what a time everyone had. We heard the musicians were coming we heard play on March 6th, 1935, in the old Fullerton homestead. When Cliff May moved a vote of thanks that night to those musicians for the music that everyone enjoyed so much and for the ice cream and all the free gifts, their spokesman said the pleasure is ours. We enjoyed the entertainment as much as you possibly could and will come again any time you want us.

The musicians are Will Saunders, old-time fiddler and violin collector, who has the largest collection of violins of any one in Canada. There are one hundred and eighty violins in his collection. Mr. Saunders won the gold medal for the best old-time fiddler at the Toronto Exhibition last year. That night be played a waltz tune, composed by himself thirty-four years ago, during a three days' blizzard while alone in his shack on his homestead in Melford, Saskatchewan. The tune was taken from the dismal wail of the wind, as it whirled the snow around his shack and the snarling howl of the prairie wolves. By requests, he often plays this tune. When he played it for the Kiwanis Club at the Royal York, it was greatly appreciated. Will Saunders was an old Trafalgar boy. Wallie Cordingley, another old Trafalgar boy and an old-time fiddler, had a happy time with old friends that night. Then Bill Crawford, one of the foremost square dance players in Canada, radio artist, violin repairer, winner of Lord Anthrim's challenge cup, and Irish gold medal in 1930, never wearied all night playing, and in the recess after lunch it was "The Mocking Bird" we heard. It was so real and imitating the bagpipes was surely the bagpipes, and so many old familiars.

An interesting scene of the entertainment was the stepdance contest. There were four entries —Wally Cordingley, Fred Townsend, Will Saunders, and Dug McGregor. The announcer said Wally had spent 3 weeks at Brooks Academy learning a step for this contest. Fred had spent his boyhood days in England learning stepdancing and never could see a clean barn floor in Canada, but he wanted to whistle a clog tune and practise something new. While Will and Dug never had any training but what they got at the house parties years ago and were out of practice now, and not as supple as in days gone by. Then Bill Crawford started the music and Wallie started the dance. It was a wonderful performance. He hammered the floor until we thought the ceiling would fall, and sat down with considerable perspiration on his face, amid thundering applause. When Fred started, he gave a wonderful exhibition of style and speed, but sometimes he forgot Bill Crawford was playing and he was kicking and dancing to his own whistling. Then he said it was Bill who was out of tune with the music. Will's and Dug's performance was not so noisy or energetic as the two former contestants.

Eagerly everyone waited for the Judges' decision, Will Cooke and Cliff May, and they know what dancing is and should be. They said Will and Dug had out-pointed Wallie and Fred in everything except speed and noise, but they could not decide which one of the last two had the best of it, so would call it a draw.

Fred said Bill Crawford showed particularly in the music and he intended to enter a protest and have the trial over again, then he will whistle his own music and call off his different steps.

For lovers of green tea

"SALADA"

GREEN TEA

TERROR MOUNTAIN

By MADELEINE SHARPS BUCHANAN

Three bandits seize a transcontinental bus and its passengers, and force mountainside to a lonely log shack. A raging forest fire, creeping up the mountain, threatens to trap the group. The bandits are after a secret new explosive formula believed to be in the possession of a passenger, Finley Trump, chemical magnate. One of the bandits, giving a suggestive twist to the bandana around his neck, hints that Trump may be killed unless he "comes across". May Lawrence, pretty trained nurse, to whom young Dr. Nicholas Strand has been quite attentive, remembers that she had seen him in confidential conversation with Trump, and fears that he may be carrying the formula.

CHAPTER II

There were only three cots in the woman's room, and at once, Amelia Bangor announced that she would sleep in the bus.

"They won't le you," said Mrs. Jenkins. "To think of that man travelling with that valuable formula! Maybe he's got some of the explosive somewhere about him. It might blow us all to kingdom come!"

"Yes," muttered Miss Bangor. "He's on his way to Washington. I heard him say so."

Miss Jones snorted. It seemed absurd for a sickly-looking man like Finley Trump to be the central figure in this bizarre and rather alarming adventure. Still, the thought of being present in such cramped quarters when he was strangled with a bandana—if Ike carried out his threat—shook her nerves.

"I don't really suppose, though, that they'd murder him," she mused.

"Why not?" asked Miss Bangor. "Human life is nothing to men like these."

Mrs. Jenkins laid a fat, cold hand on Miss Jones' shrinking arm.

"I feel it in the air!" she whispered. "Murder! I'm slightly psychic, you nkow. Once, I was in a hotel where a man was killed, and I told Mr. Jenkins—"

Miss Jones looked at her with contempt. "You'd better keep that kind of thing to yourself," she advised.

But Mrs. Jenkins was not to be squelched.

"Don't you think, what with the razors and all the weapons we had, taken from us, it was kind of foolish for that bandit to show us what could be done with a bandana, or just a big handkerchief?" she whispered hoarsely. "I said to myself, 'My, that's a foolish gesture for him to make, all right'!"

As she spoke, a distant explosion shook the log house. Almost at once, the scared face of young Tommy Archer appeared in the doorway.

"Gee! They're blastin' down there on the mountain!" the boy told the frightened women. "My uncle says the fire's gettin' out of control sure!"

After supper, May Lawrence went out for a stroll in the moonlight. She wished to get away from the dreadful prisonlike atmosphere inside the house, and she wanted to take to Nick Strand. Until she knew he was not travelling with or for Finley Trump, she could know no rest. She was a frank person with herself, and now she knew that, for the first time, she had fallen seriously in love.

As she stood there on the mountaintop, the huge gray shape of the bus before her, several particles of ash fell on her hand. What would they do, she wondered, if that fire crept up to them? Every one of them realized that it was a grave situation, quite aside from the question of the bandits and Mr. Trump. Already, May sensed a tension in the air.

Nick Strand was standing beyond the bus, smoking a cigaret and he turned quickly as the girl approached him.

"I wish you were out of this," he said, with troubled eyes on her lovely, earnest face. "It's a devil of a pickle, and we may as well face it. Here—take this, and use it if you have to. I have another."

To May's astonishment, he thrust a small revolver into her hand.

"But—where did you hide it? And another one?" she gasped.

"Under the cushion of my seat in the bus." He grinned. "Quite simple. I always do it. But because of you women, I didn't dare start firing at three armed men."

"But—"

"I'd like to do for those dogs with my bare hands!" Strand growled angrily.

The sound of another explosion drifted up to them.

"Still blasting!" he said briefly. "Lucky for us those crooks steered us off the road just where they did. We'd never have broken through, Somers says. He was one scared lad."

"But if they don't put out that fire down there—"

"Then that's the end of us," said Strand. He glanced at the bus, inside which Amelia Bangor's flashlight was moving about. "There's an unpleasant person," he remarked.

"There were not enough cots in the room for all of us," explained May. She paused, then said, "I—I came out here to task you something. Are you really what you say you are, Doctor Strand? Please—I must know. Are you really connected with that hospital in Baltimore or—or—"

"Or what?" He was smiling a little, looking deeply into her anxious eyes.

"Or travelling with Mr. Trump, with that dreadful formula or explosive or whatever it is?" she whispered. "You see, several times I saw you talking with him."

Strand's face became grave. "Why do you wish to know?" he asked.

"I am afraid for you," said May simply.

"You're a brick!" said Strand, and lifted her cold hand to his lips. "But wouldn't it be better if you didn't know?"

Iced water seemed to trickle through May's veins.

"Then you are — you are—" she breathed.

But there was no opportunity for more just then. A boyish voice spoke at their elbows.

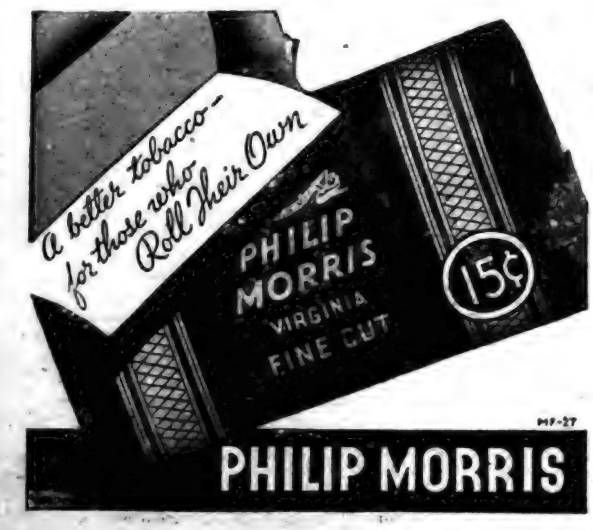
"Hey, what price a good idea, Doc?" Strand looked at Tommy Archer without any particular pleasure. Most people did.

"Let's have it," he suggested.

Tommy kicked at a stone. "Well, you see," he went on, "when my uncle and me left Los Angeles, my grandmother gave me a lot of silly stuff. I got it in one of Red's bags, and there's a lot of good balloons there that can be blown up, see? I thought if we blew 'em up and tied a message to 'em and sent 'em off in this wind, maybe one of 'em would get somewhere and folks would know about us. See?"

"Here'sa dollar now," said Doctor Strand, smiling, "and the other half million your idea is worth, you can collect when we get back to safety."

"Let's try it!" said May.



"Sure," agreed Tommy, "but we gotta go in your room and set 'em up in the dark. Those guys won't think about you women startin' anything."

As May moved away with the boy, she looked back at Nick Strand, leaning so nonchalantly against a tree, smoking his cigaret. Was he really carrying that horrible thing for Trump?

Full information regarding the capture of the bus and the plight of its passengers was tied to each fat little balloon before Tommy climbed from the window of the women's bedroom and set them adrift in the strong wind on the mountaintop. It seemed futile to expect much from this venture, but May felt a little better when the thing was done.

TO BE CONTINUED

Two Little Girls Were Lost; A Drama of the Prairies

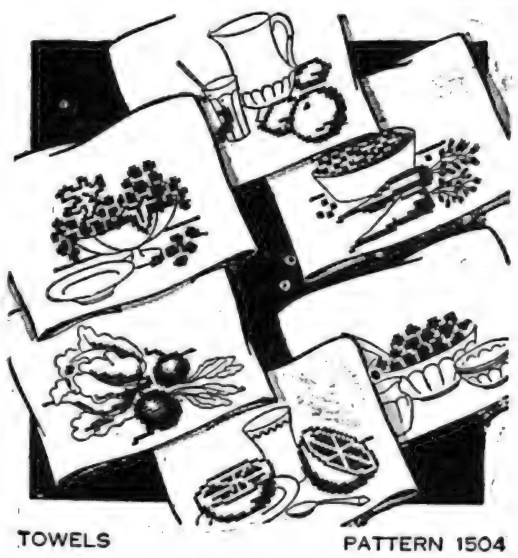
It takes some such event as a lost child to evoke the deepest and tenderest and most chivalric of human emotions, and to call forth the best in man in a practical, co-operative way.

Take the case of the two little girls, around 10 years of age, who were lost in the bush country beyond Norquay, Saskatchewan, for four days and four nights. Going in search of their parents' cattle, they got deeper and deeper into the wooded country and eventually became separated as well as thoroughly lost. It is a region in which wild animals abound. There are bears about — an ugly word for children. The little girls tried to sleep in the dank, forbidden woods. They tried to sleep beside logs. It was a terrifying experience. It was a modern "Babes in the Wood" story.

Above airplanes roared in search. Two hundred farmers and others formed rescue parties. The lost, forlorn children were the sole topic of conversation. There was general distress of mind until both were happily, finally recovered.

When a child is lost it is one of those occasions when concern, even heartache, is a general possession. It is not confined to the family directly involved. It becomes an occasion of deep personal anxiety for all who know of it. This is conspicuously the case in this rural Canadian west, where neighborhood is real, where the brotherhood of man so often finds expresion.

In this hunt for two lost children word finally flashed across the acres that one of the missing girls had been "rescued by Indians," and was being driven in safety to her home. "Rescued by Indians!" How different from olden time! There was terror in the word "Indian" in the early days of Canada's story. It was linked with pillage, burning, the tomahawk of massacre. Today it is a friendly term. The Indian on these plains today is part of a brotherhood in the making. He shares the white man's cares; he sympathizes, understands and helps. —Regina Leader-Post.



Queer World!

Widowed by Stamps

Frau Maria Schmidt is asking Vienna courts for a divorce because she says she is "a stamp album widow." She says that she had been happily married for 15 years. Then her husband took up stamp collecting. Now he is so absorbed in his hobby that he neglects her.

Rev. Dr. John Pitts, of Liverpool, during a recent address in Toronto, said that everyone, except Mussolini and Hitler, suffered at times from an inferiority complex. How did he happen to omit Stalin and Bernard Shaw?—Brantford Expositor.

LAURA WHEELER OFFERS TEA TOWELS GAY WITH GARDEN "GOODIES"

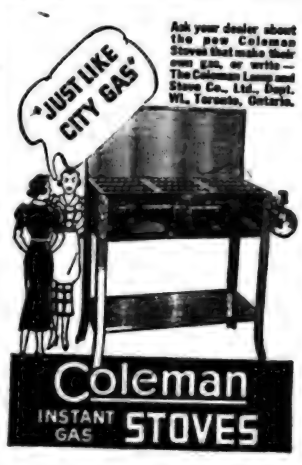
TOWELS PATTERN 1504

Juicy fruits—tasty vegetables—create more than their share of kitchen interest when used to adorn a set of tea towels. Here's where color counts, so be sure to use the gayest cotton floss when you embroider these. Child or grown-up will have fun with this "Set of Six," for it's just 8-to-the-inch cross stitch. Pattern 1504 contains a transfer pattern of six motifs averaging 5 x 7½ inches; illustration of all stitches used; color suggestions; material requirements.

Send 20 cents in stamps or coin (coin preferred), for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Write plainly PATTERN NUMBER, your NAME and ADDRESS.

Few Girls Remain In School When Married

TORONTO.—Unlike a case recently reported from Britain, Toronto collegiate girls who marry do not stay in school after they undertake to be wives and homemakers.



There have been a few cases in Toronto where girls attending school have been wed, but principals say that they know of no cases in which a young married woman remained as a student.

"It is not surprising that a few of them get married so early—we have some remarkably good-looking girls among our students, and nowadays they are taught something of domestic science," said Principal F. H. Clarke, of Jarvis Collegiate.

"There is no law against a girl student being married, other than the requirements as to parental consent," said Dr. C. C. Goldring, superintendent of schools.

W. E. Dunlop, issuer of marriage licenses, said that if a girl were under 18 the consent of her father, or in certain circumstances her mother, would be necessary.

At the university, say the authorities, it is quite a rare thing for married men to be in attendance, and almost unknown for married women to be regular day students.

Woman's World

By Mair M. Morgan

A Summer Snack

What is more delicately appetizing for a summer snack than golden sponge cake, fresh strawberries and cold, creamy milk? We can't think of anything that would taste better and so we give you this recipe for sponge cake. It seems, somehow, a particularly suitable cake for summer because it is light, golden and very tasty.

True sponge cakes never call for baking powder in the recipe, they are made light, solely by the air that is beaten into the eggs. But there is another kind of sponge cake that can be made with baking powder and which calls for fewer eggs. That is the one we have chosen because it is economical and is quite as good as the more expensive kind.

There is one thing you must remember, however, in making this cake and that is to use finely milled flour. If you specify the finest flour on the market when you buy from your grocer, you need have no fear that this cake won't be a success.

Champion Sponge Cake

1¼ cups sifted cake flour, 1¼ teaspoons baking powder, ½ teaspoon salt, 4 egg yolks, 1¼ cups sugar, 4 egg whites, 1 teaspoon vanilla, 1 teaspoon grated lemon rind, 2-3 cup boiling water.

Sift flour once, measure, add baking powder and salt, and sift together three times. Beat egg yolks until thick and light. Add ½ cup sugar gradually, beating constantly. Beat egg whites with flat wire whisk until light and foamy throughout; add remaining 3-4 cup sugar very gradually and continue beating until stiff enough to hold up in definite, satiny peaks. Add vanilla and lemon rind. Add boiling water to egg yolks, stirring well; then add flour all at once and beat with spoon until smooth. Fold quickly into egg whites. Turn into ungreased tube pan and bake in moderate oven (350 deg. F.) 1 hour and 5 minutes, or until done. Invert pan 1 hour, or until cold.

Be Tender with Strawberries

Strawberries need affectionate handling. They don't take kindly to shower baths. Keep them away from the faucet. Instead, put them in a bowl of water and lift them out with the fingers somewhat apart to serve as a strainer. The sand and soil from the berries will settle to the bottom. For that reason, don't pour the water off the berries. Unless berries are unusually dirty, two such washings will be enough. Place them in a colander to drain. Then remove caps. Rinse again after removing caps if necessary.

Never allow berries to stand in water to lose color and flavor. To sweeten strawberries before serving, cut in halves or chop rather than crush them in order to keep them as attractive as possible.

Fresh Strawberry Tarts
(9 tarts)

One quart hulled strawberries, 1 cup sugar, 1 package strawberry-flavored gelatin, 1 cup hot water, 1 cup cream whipped, 9 baked 3½ inch tart shells.

Combine strawberries and sugar and let stand 10 minutes. Dissolve strawberry-flavored gelatin in hot water. Pour over strawberries. Chill until gelatin begins to thicken. Fold 4 tablespoons thickened gelatin into whipped cream. Chill. Place layer of whipped cream in bottom of each tart shell. Chill about 10 minutes. Cover with layer of jellied strawberries, pressing hull end of each strawberry lightly into cream. Add thickened gelatin to fill a tart. Chill a few minutes longer and serve.

Heat is the enemy of color and flavor, so use preserving methods requiring minimum of heat. The Bureau of Home Economics suggests this as one of three good processes. It is for 8 pounds of prepared fruit — the maximum for best results.

Processing according to this method you would use a pound of sugar for each pound of berries, and combine the two in alternate layers, then let them stand 8 to 10 hours before cooking. No water should be added, as the sugar draws enough liquid out of the fruit. As soon as they are ready boil them rapidly 15 or 20 minutes or until the syrup is rather thick. You'll need to stir it occasionally but carefully so as not to break the berries.

Rules for "Ideal" Guest to Follow

Summer Girl Will Be Popular If She Can Adapt Herself

No one is a more definite asset to a country house or a week end cottage than a woman guest who can and does play tennis or golf or likes to ride or swim and who, when twilight falls, suddenly turn out to be an attractive bridge or dance partner. The trick, of course, lies in being an active sportswoman without looking it twenty-four hours a day. Any girl will get further with the other guests as well as her hostess if she is chameleon-like in her ability to adapt herself to various situations.

This means taking care of your skin and taking care not to over-develop your muscles while doing the things which keep you out-of-doors and make your figure lean, slender and supple. If you play golf or tennis for hours and hours with no suntan lotion on face and arms and no hat on your head, you just won't be your prettiest at the dinner table.

Unless it is fearfully hot, wear gloves when golfing, and, hot or cold, always wear them when you ride a horse or drive a car. Rubber ones will come in handy the Sunday you are elected to help scrub down the yacht, canoe, howboat or whatever. Do apply hand cream or lotion several times a day, particularly after a prolonged swim, and use cuticle cream every night.

Keep a small hat on your head when it's your turn to ride in the rumble seat and wear a big one if you expect to sit in the sand all morning. Brush your hair every night and remember that there are various pomades to correct dryness in case brushing alone does not do the job well enough to suit you. Get into the swing of rearranging your coiffure attractively before dinner. You can cover up straggly ends with sports bandanas during the daytime, but you can't very well go to dinner with a shawl tied around your head.

Depend on suntan oils by day and softening cream by night to keep your complexion from getting a rough, weather-beaten look. Unless you think squint lines are attractive (you don't, and neither does anyone else), wear tinted glasses during the day.

Wear precious little makeup on golf courses, tennis courts, beaches and bridle paths, of course, but don't discard it entirely. Lipstick is a must wherever you are, whatever you are doing. Wear a little more at night, but don't overdo the job. During the hot months, simplicity has a lovely charm all its own. Feel like a Dr. Jeckyl-Mr. Hyde character if you must, but do manage somehow to look the part whether you are being an active sportswoman or a romantic, slightly clinging dancing girl.

There are 3,096 county divisions and 22 independent cities in the United States.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

BLACKHEADS

Get two ounces of peroxine powder from your druggist. Sprinkle on a hot, wet cloth and rub the face gently. Every blackhead will be dissolved. The one safe, sure and simple way to remove blackheads. Have a Hollywood complexion.

SUNDAY SCHOOL LESSON

LESSON XIII

Messages from Genesis — John 1:1-5; Luke 17:28-32; Galatians 3:6-8; Hebrews 11:1-12 ; 2 Peter 2:4-10.

Printed Text - Hebrews 11:3-10, 17-22

Golden Text — "These all died in faith, not having received the promises, but having seen them and greeted them from afar, and having confessed that they were strangers and pilgrims on the earth. — Hebrews 11:13.

THE LESSON IN ITS SETTING

Time — John wrote his Prologue about 90 A.D. The teaching of Jesus recorded in Luke 17 was given in the winter of A.D. 30. Paul wrote the Epistle to the Galatians about A. D. 57. The date of the Epistle to the Hebrews may be placed about A.D. 65-A.D 68.

Place — There are so many different places recorded in various passages that it would only be confusing to enumerate them, except to say that most of the examples of faith given in Hebrews are from events which took place in Palestine, in which country also Jesus taugh, Paul wrote his Epistle to the Galatians while at Corinth. We do not know with certainty where the Epistle to the Hebrews was written.

"By faith we understand that the world's have been framed by the word of God, so that what is seen hath not been made out of things which do appear." There are fifteen special instances of the work of faith in this chapter, in addition to the general enumeration beginning at verse 32. Here in the third verse we have the first specific instance, namely, that it is by faith in God's revelation to us how creation took place that we believe that the world was framed by the word of God, i.e., by God speaking, and that the visible world was not made from things that already in existence.

"By faith Abel offered unto God a more excellent sacrifice than Cain, through which he had witness borne him that he was righteous, God bearing witness in respect of his gifts — and through it he being dead yet speaketh." The offering of Abel is recorded in Gen. 4:4-5, where we read that it was accepted by God, who, at the same time, refused the offering of Abel's brother, Cain. The offering of Abel was a slain lamb, while the offering of Cain was some product of the ground. It would seem that God had told these brothers that an animal sacrifice was necessary when making an offering for the atonement of sin, and Abel, by faith in what God had said, and carrying out God's command, showed himself to be a true man of faith.

"By faith Enoch was translated so that he should not see death; and he was not found, because God translated him; for he hath had witness borne to him that before his translation he had been well-pleasing unto God." The reference here is to Gen. 5:24. Enoch pleased God because he had faith in God, and God, in turn, delivered him from death, and took him to glory because of his faith. This does not mean that all people who have faith should expect to be translated as was Enoch. However, it is clear from the New Testament Scriptures, that all who believe in the Lord Jesus Christ, when Christ returns to his church, will not die, but will be caught up to be with the Lord, undergoing a change but not suffering the death (1 Thess. 4:17).

"And without faith it is impossible to be well-pleasing unto him, for he that cometh to God must believe that he is, and that he is a rewarded of them that seek after him." To question God's justice is to show a lack of faith, and this is sometimes a hard point with Christians who have endured must suffering or great losses. We must throw ourselves completely on the love of God and believe that he does all things well.

"By faith, Noah, being warned of God, concerning things not seen as yet, moved with godly fear, prepared an ark to the saving of his house; through which he condemned the world, and became heir of the righteousness which is according to faith." Here again we note that faith on the part of Noah was not only a conviction of the truthfulness of the warning of God, but actually acting in the light of that warning — God warned him that judgement was coming, and that only an ark would ever preserve him during the flood; Noah believed that warning and prepared the ark.

"By faith Abraham, when he was called, obeyed to go out unto a place which he was to receive for an inheritance; and he went out, not knowing whither he went." God's call to Abraham is recorded in Gen. 12:1-3. Abraham had no idea of the nature or the location of that land to which God was calling him. He knew that God called him to go, and that God had promised to give him an inheritance, and he simply followed the leading of God until he came to that place that God then told him was to be a perpetual possession for his descendants.

"By faith he became a sojourner." The word sojourner means "one who lives in a place without the right of citizenship," and, consequently, "one who lives on earth as a stranger." The idea is perfectly expressed in 1 Peter 2:11, and also in Phil. 3:20 — "our citizenship is in heaven." "In the land of promise." Of course this refers to Canaan, which is called the Land of Promise, simply because God promised it to Abraham and his descendants,, as we read continually in the book of Genesis. "As in a land not his own." Abraham never actually did come to possess the Land of Promise. It belonged to the Canaanites when God promised it to Abraham, and, during his life and the lives of Issac and Jacob, the land, except that particular portion in which their families lived, never was their own. "Dwelling in tents, with Issac and Jacob, the heirs with him of the same promise." This trait of dwelling in tents, pitched today in one place and tomorrow in another, indicates the temporary, unsettled nature of Abraham's abode in Canaan, which his immediate descendants, Issac and Jacob shared.

"For he looked for the city which hath no foundations." This city, of course, was not an earthly city, no matter how great or glorious it might be, but a heavenly city, "the city of the living God, the heavenly Jerusalem" (Heb. 12:22), which is so continuously referred to by the apostle John in the last two chapters of the book of Revelation. "Whose builder and maker is God." Literally this might read "of which architect and master builder is God."

"By faith, Abraham, being tried, offered up Issac; yea, he that had gladly received the promises was offering up his only begotten son. "Even he to whom it was said, in Issac shall thy seed be called. "Accounting that God is able to raise up, even from the dead; from whence he did also in a figure receive him back." The reference here is to the events described in Gen. 22.1-14. There is one marvellous statement here which is not even found in the records of Genesis, namely, that Abraham believed when he was about to offer Issac, that God would actually raise Issac up from the dead, and that not in some long-distant future, but, then, so that the promises of God concerning the seed of Abraham would be kept. Abraham also knew that God's world would be kept, and he knew that if Issac died, the only thing that could happen so that God could keep his promises would be that God would bring his dead son back out of death again.

"By faith Issac blessed Jacob and Esau, even concerning things to come. The reference here is to Gen. 27:26-29 and 39 and 40. These promises to his two sons concerned the future in which he had absolute confidence because of his faith in God's revelation.

"By faith, Jacob, when he was dying, blessed each of the sons of Joseph; and worshipped, leaning upon the top of his staff." The reference here is to the remarkable dying prophecies of Jacob, which he uttered after he went down into Egypt, recorded in Genesis 49. When it says he worshipped leaning upon the top of his staff, it simply means that he was too feeble to rise and kneel, or stand, and that he bowed his head in an attitude of prayer while resting his hands, probably on the top of his staff while reclining on his couch.

"By faith, Joseph, when his end was nigh, made mention of the departure of the children of Israel, and gave commandment concerning his bones." The reference here is to Genesis 50:24-25. Joseph, though hundreds of miles away from the land that God had promised to his great-grandfather, Abraham, to his grandfather Issac, and to his father, Jacob, was absolutely persuaded that that land belonged to Abraham's seed, and that some day the descendants of Jacob would go back to that land to receive it according to God's promise. These mighty patriarchs lived, spoke, planned, travelled, and blessed their children all in the light of, and in accordance with the word of God which had been given to them and in which they had such implicit confidence. To sum it all up, these men lived by the faith in God's word.

The Honeymooners

Fashions and manners may change but Niagara Falls still continues to draw the honeymooners and, according to local hotel-keepers and officials, more have registered at local hotels in the past two months than in six months last year. Immigration officials report large numbers of American honeymooners crossing to Canada every day. In any gathering, almost anywhere, it is possible to find a large number present who spent wedding trips here and look back kindly on their visits to the falls. All the world loves a lover and we have always had a kindly feeling for the honeymooners, so generation after generation of married lovers continue to come here. Long may they come. Welcome may they always be. —The Niagara Falls Review.

An obedient wife is one whose husband has told her to do what she pleases, and who does it.—Kitchener Record.

You may be able to get Australia, China and Russia on your radio. But try and get ten dollars on it at the dealer's. — Quebec Chronicle-Telegraph.

Law on Soil Drifting

A couple of years ago the legislators of the province decided that the time had come to take some compulsory action, and a soil drifting measure was passed which made it possible for neighbor to sue neighbor if drifted soil caused damage to land.

We have never heard of the act being invoked, but it might be a good thing if it were. It might focus public attention on the problem and bring about more concerted action in this phase of farm rehabilitation work in the West.

There is a strong tendency, we have noticed, for farmers to say that soil drifting control methods are fine "for the other fellow;" but they do not apply them at home.—Lethbridge Herald.

Milk Protection For Tourists

Ordinary raw milk heated to 142 degrees in a double boiler for thirty minutes and then chilled is free from dangerous bacteria. This process is called pasteurization, and from pasteurized milk there is little or no likelihood of contracting bovine tuberculosis, diptheria, typhoid fever, undulant fever or septic sore throat. Toronto and almost 5 other Canadian centres make pasteurization compulsory for the protection of their people. But when their people go touring the country, this protection, and the protection afforded by a pure water supply, can no longer be exercised by the home municipality. It remains for the individual to demand pasteurized milk and government tested water at the resorts which he patronizes.

The Health League of Canada is going to promote this form of tourist safety by listing the resorts in Ontario which furnish guests with pasteurized milk only. United States tourists are beginning to ask for such information, and to some this will no doubt be a deciding factor. It will, at any rate, do much to promote public health.

There have been in the past, resorts which prided themselves upon giving their guests "milk fresh from the cow — not like the poor stuff you get in the city." Such milk, unfortunately, may be full of harmful germs. The cow may have tuberculosis, or it may have been wading in a typhoid-contaminated pool. Pasteurization is a simple process which removes the liklihood that any disease will be transmitted.

"Any girl who is needed at home has a job just as surely as the girl who operates a machine in a factory."

"The fruits of the free spirit of the men do not grow in the garden of tyranny." — Stanley Baldwin.

Typical City's Typical American Family

Muncie, Ind., recently studied as the typical American city, selected Mr. and Mrs. Glen Craig and their children, Emma Lou, 7, and Bill, as the "Typical American Family." They are shown in Chicago as they arrived by plane.

Youth "Emancipator"

Mrs. Kathryn Coburn, Albany, N.Y., with model and finished rotary yarn winder she is exhibiting at Inventors Congress in New York. It is designed to relieve impatient youth, whose arms mothers use while winding yarn.

Paris Exposition Formally Opened

The great Paris international exhibition was opened recently by President Lebrun. Our picture shows, from right to left, in first row; Paul Bastid, Minister of Commerce; Edouard Herriot, President of the Chamber of Deputies; Albert Lebrun and M. Jean-neney, President of the Senate.

Movie-radio gossip

By DOROTHY

Executives at the Twentieth Century Fox studio are disappointed the public hasn't made more of a fuss over Simone Simon, so they are going to put her in a comedy and see if she goes over better. They are teaming her with Jack Haley, who made such a hit in "Wake Up and Live," in a fast-moving comedy called "Love at Work."

Motion picture studio officials always change the subject when anyone asks if their stars really sing or if some singer substitutes for them, but radio listeners can recognize their favorite voices under any circumstances. They insist that Buddy Clark of the Hit Parade did Jack Haley's singing, that Virginia Verrill sang for both Jean Harlow and Virginia Bruce and that in "The Great Barnum" it was Francia White who sang for Miss Bruce.

Warner Brothers have arranged to borrow Miriam Hopkins for two pictures and it looks as if it would keep the entire studio busy for weeks finding stories to which she won't raise a violent objection. Scheduled to appear with Errol Flynn in "The Perfect Specimen," she flatly refused. Instead she will make a tearful little romance called "Episode" supported by Ian Hunter and Charles Winniger. After that, the Warner Brothers studio would like to have her in "Sisters," with Kay Francis.

Miriam Hopkins

Douglas Fairbanks, Jr., has decided that he likes the United States better after all. While he was in England, he realized his ambition to become a producer, and felt so grateful to the countrymen who backed him that he thought he would live there always. Coming back to Hollywood to make just one picture, "The Prisoner of Zenda," he found when it was finished and he was free to go back to England that he just couldn't bear to leave all his childhood friends.

ODDS AND ENDS — Joe Penner doesn't mention ducks even once in "New Faces," which is being filmed by R-K-O, and furthermore he appears black face for the first time. — Ken Murray always dresses most conservatively, when he shows up for a broadcast, but around home he goes in for the dizizest colored smoking jackets and lounging robes — Motion picture producers, are wildly enthusiastic over the intimate, caressing voice of Rosalind Greene who announces Mrs. Roosevelt's radio program, and since they have heard that she is young and extraordinarily beautiful they are rushing to her with contracts for the pictures.

Sensible Loveliness

This formal evening gown of sheer dotted swiss, a new, modern version of the old-time favorite, is made of pre-shrunk material and will withstand a season of tubbings in soap and water without the loss of any of its fit or style.

Lacrosse Schedule

The Ontario Juvenile Lacrosse Association has produced the following schedule for this district for 1937 season

June 24—Streetsville at East York
29—Brock Grads at Streetsville
July 2—Mimico at Streetsville
7—Streetsville at Brock Grads
18—Streetsville at Brampton
16—East York at Streetsville
21—Streetsville at St Vincents
24—Brampton at Streetsville
26—Woodgreen at Streetsville
29—St Vincents at Streetsville
Aug 2—Streetsville at Mimico
5—Streetsville at Woodgreen

LACROSSE— ?

By Alex Grabb

Lacrosse - ? Yes ! Most certainly! Juvenile Lacrosse of the highest order. Seven all star teams : including Brampton, Mimico, Streetsville, East York, Brock Grads, and two other Toronto teams

The local Juvenile Lacrosse team heads for East York on Thursday (to night) for their first game. How about a few rooters ? (I'd take my Rolls Razor but I can't find which button you push to start the gosh dinged contraption.)

The first home game will be on Tuesday, June 29th, with the Brock Grads. The Grads suffered defeat at Brampton on Monday 7 to 4 So if our boys can trim the Brock Grads they will probably hold their own against Brampton, which team is rated by some experts as the top notch crew.

The grounds have become slightly over run with weeds, and the boys would appreciate a little help from some of you boys who swing a hoe instead of a gutted stick. Monday night is the clean up night for the grounds

Tuesday night our boys hope to clean up the Brock Grads. Be sure and be on hand ... Lower prices this year. See our ad. in this paper.

Miss Lillian E. Church is visiting her sister, Mrs. E. G. Crozier, in London.

Victor Bonham Gets a Jewel

Mr. Victor J. Bonham, retiring County Master, was presented with his Past County Master's Jewel at the meeting of Peel County Orange Lodge in Streetsville last Friday night.

Wor. Bro. Emerson Westlake, C.M., presided, and the jewel was presented by Bro. Gordon Graydon, M.P.

It is a beautiful jewel, in gold and purple, and bears the words P.C.M. Peel County, on the front, also the emblem, with this inscription on the back: "Presented to Wor. Bro. V. J. Bonham 1936."

Mr. Bonham is well pleased with his jewel, and it will be a nice remembrance of the many pleasant times he has spent with the members of Peel County Orange Lodge.

Further arrangements were made for the big celebration of the Battle of the Boyne to be held at Bolton on Monday, July 12th.

Hundreds of Orangemen are coming to Streetsville Sunday afternoon, July 4th, for service in Trinity Church.

"A life spent worthily should be measured by deeds, not years."—Sheridan.

Local News

Women are more interested in what a bride is married in than what she is married to.

After July 1st, Rev. A. J. Love will be the new pastor of Glen Williams United Church.

Mr. M. G. Clements and Miss Muriel B. Mark of Milton are to be married this month.

Two special C.P.R. trains brought a large number of picnickers from Toronto last Saturday to Peel Park.

Mr. Horace Barnes and Miss Evelyn Walsh of Milton were married on June 19th.

Albert F. Husband has been appointed Clerk of Trafalgar Township, to succeed E. J. James.

The Gordon Home (Children's Shelter) has been sold to Mr. P. L. Robertson for $3,250. It is a fine brick building situated on the corner of Main street, in Milton, and the street leading to the C.P.R. station.

The annual picnic of St. Peter's Sunday School, Erindale, was held at Huttonville Park last Saturday, with a good attendance. St. Andrew's Presbyterian Sunday School, Port Credit, held their picnic at this park the same day.

A wedding took place Saturday afternoon, June 19th, 1937, at the United Church parsonage, Streetsville, when James Lacey, Jr., and Dorothy Eleanor Wright, both of Brampton, were united in the holy bonds of wedlock, by Rev. T. D. Jones.

Liquor is floating around Oakville in large quantities and last week a woman and a man were arrested on charges of "keeping for sale." The woman was lodged in the county jail. Halton County should be proud of some of its female sex.

Isabella M. Tomlinson, widow, passed away at Malton on June 20, in her 83rd year. Interred at Riverside Cemetery, Weston.

Several members of Streetsville Odd Fellows Lodge motored to Georgetown on Sunday and participated in the Odd Fellows' parade.

The Cook family re-union was held at Peel Park last Saturday.

William C. Dearborn and Evelyn M. Mills of Brampton were married by Rev. Mr. Andrews last week.

Orange Celebration at Bolton July 12

About 5,000 visitors are expected to take part in the Orange celebration at Bolton July 12, it was reported at a meeting of the Albion District Lodge, in charge of arrangements. A committee headed by Charles Hesp has sent invitations to attend to twenty-five Ontario lodges, scattered over Peel, Simcoe, Halton, Dufferin and York Counties.

EASTERN STAR

Peel Chapter No. 96, Order Eastern Star, celebrated its fifteenth birthday on June 21, at the regular meeting with Mrs. E. C. Drew, W.M., presiding. Visitors were present from Toronto, Brampton and Oakville.

After regular business, a short program was given as follows: Musical selections by Burns Bros.; tap dancing by Dorothy Drew and Willie Pop, of Port Credit.

The accompaniments for the tap dancing were played by Miss Margaret Hickey.

A nice lunch was served and a lovely birthday cake, bearing 15 candles, was cut by Mrs. G. E. Bunt.

ENGAGEMENTS

Mr. and Mrs. D. S. Sinclair, Wiarton, announce the engagement of their only daughter, Catherine Elizabeth, to Mr. Carman Greig, son of Mr. Peter Greig and the late Mrs. Greig of Arthur, the marriage to take place quietly early in July. Mr. Greig is a nephew of Mrs. R. H. Greig and the late R. H. Greig of Streetsville.

Mr. and Mrs. Richard Burrell of Port Credit announce the engagement of their daughter, Constance May, to Mr. Wilbur Elliott Cowie of Timiskaming, son of Mr. and Mrs. Isaac Cowie of Ottawa. The marriage will take place July 22.

MEADOWVALE

The last meeting of the Meadowvale Women's Institute was held at the home of Mrs. L. Davidson, with a good attendance. The roll call was answered by each one giving a one-minute talk on a different subject. Current Events was given by Miss Yates. The meeting took the form of a picnic and all had a delightful time.

The next meeting will be held on the second Wednesday in September at the home of Miss Beardmore.

ADVERTISE IN, THE REVIEW

WEDDINGS

Ottley—Hunt

The marriage took place on Saturday afternoon, June 19, at 3 o'clock in the Church of the Ascension, Hamilton, of a former Curate of the church, Rev. Ernest Sydney Ottley, now Rector of Trinity Anglican Church, Streetsville, and son of Mr. S. F. Ottley and the late Mrs. Ottley of Winnipeg, to Clara Jeanette Hunt, daughter of Mrs. Hunt and the late Albert Hunt of Hamilton. Quantities of white peonies, ferns and palms decorated the chancel and altar. The ceremony was conducted by Archdeacon W. F. Wallace and Rev. J. A. Newman of St. Catharines. Mr. J. H. Lewis was organist, and during the signing of the register Miss Evaleen Kirby of Toronto sang "I Love Thee" and "O Perfect Love."

The bride looked charming in a white Alencon lace gown with a peplum jacket, sleeves puffed at the shoulder and tapering to fit closely at the wrists, full skirt sweeping into a train. Her tulle veil fell from a braided band of tulle and orange blossoms and she carried a white prayer book with shower of lily of the valley. The bride was given in marriage by her brother, Mr. H. W. Hunt. Miss Edith Hunt, sister of the bride, was maid of honor; she wore a yellow crepe gown with matching organza jacket and green picture hat. Mrs. R. A. Chidwick, of Toronto, was bridesmaid, gowned in slipper green satin with while halo hat. They wore white accessories and carried colonial nosegays of roses, sweet peas, and lily of the valley.

Rev. J. M. Crisall of Toronto was groomsman and Messrs. Charles Hunt, brother of the bride, Hugh Rice, Rev. B. A. Peglar and Murray Proctor, all of Hamilton, were ushers.

After the ceremony a reception was held in the gardens of Mrs. Adam Cook's home, Concession St. Mrs. Hunt, mother of the bride, received wearing a gown of amethyst lace, matching hat and corsage of orchids and lily of the valley.

Following the reception the bride and groom left on a motor trip to the States, the bride travelling in a navy and white ensemble, with white accessories. On their return, about the end of June, they will take up residence in the Rectory, at Streetsville.

Snider's

Mrs. Franklin Wilson entertained the members of Wesley Church W.M.S. on Wednesday afternoon. The program was arranged by Mrs. H. S. Lovering and Mrs. R. K. Gibson. A feature of the devotional service preceding the program was the singing of a ladies' quartette, composed of Mrs. A. Fish, Mrs. Osborne (of Whitby), Mrs. J. McSparram and Mrs. Cameron Pickering. Arrangements were made to hold a social get-together for the ladies on Tuesday afternoon, June 22nd, at the home of Mrs. Gibson, which would take the form of an afternoon tea to welcome the new-comers, who have moved into the community during the last few months.

Rev. H. S. Lovering exchanged pulpits with Rev. B. Eyre, of the Hornby United Church circuit on Sunday. Flower Day was observed and the sermon, hymns and responses were all in keeping with the day. Many baskets and vases of beautiful iris and roses adorned the church.

Mrs. Osborne, of Whitby, is visiting her friend, Mrs. A. Fish. Mrs. Osborne, formerly Miss Sarah Trimble, spent her youthful days here and is a frequent visitor in this community. She was organist at Wesley Church when only 13 years of age, before the present church was built and a year ago (Sunday) sang in the "old time" choir at the 50th anniversary.

The postponed picnic of the Public School, owing to rain last Wednesday, was held on Monday afternoon at Mr. J. D. Steen's, on the Credit River, Streetsville. Several mothers with their cars assisted the teacher, Miss Maxwell, in transporting the pupils to the picnic ground.

Mr. and Mrs. R. N. Broadbear (Irene Bentley) have returned from their wedding trip and are now settled in their new home at Brampton.

A union service of Trafalgar circuit will be held at the Sheridan appointment on Sunday morning next. Mrs. J. T. Walker, prominent temperance speaker of Ontario and Saskatchewan, will give the address. There will be no service at Wesley. The following Sunday morning, July 4th, a union communion service will be held at Wesley, prior to the minister leaving on holidays.

District News

Remember the Presbyterian Garden Party in Streetsville is to be held July 17.

Mr. Sam. Cordingley has returned home after a delightful motor trip to Manitoulin Island and points in Northern Ontario.

Dixie Women's Institute held their annual picnic at Centre Island, Toronto.

Catfish weighing over eight pounds have been caught at Port Credit recently.

Wilfrid Russell of Caledon and Miss Mary R. Wilson of Claireville, are being married this week.

Malton Women's Institute held their annual picnic at the home of Mr. and Mrs. Mark Dawson, Bronte, who were formerly residents in Malton district.

Rev. R. W. Wilson has preached his farewell sermon in Norval United Church. He has been stationed at Mt. Albert, North York. He is an excellent violin player.

Unpardonable Sin

A New York Times dispatch, telling of the arrival in England of some 4,800 children from war-wracked Bilbao, contains some fearfully tragic paragraphs. As, for instance, this one:

"It was not the children's physical condition, however, that caused most concern. . . . The saddest by-product of the Spanish civil war is their overwrought mental condition, brought about by the terror of the air raids. The war has left many of them abnormally nervous, perhaps for the rest of their lives. They have spent hour after hour huddled in "refugios" with their frightened mothers, while rebel airplanes droned overhead, dropping bombs. . . . Scores have seen brothers, sisters or little friends killed or maimed near their homes."

Can any sensitive person read that without feeling that the bombing of an inhabited town—by anyone, in any land—is one of the most shocking crimes of all the ages?—Guelph Mercury.

There Are Too Many Guns

Our experience is that it is useless to protest about the number of revolvers in this province. Nothing has been done to decrease the number and we seem quite content that nothing shall be done.

It is difficult to recall where a householder has been called upon to seize a weapon and fight it out with an invader. Truth is, he would be poorly advised were he to try to do so because the invader would probably be a much better shot than the householder.

There are teeth in the law now regarding possession of weapons, but the trouble is the teeth do not seem to come together and bite.—Peterboro Examiner.

Rivers Under the Earth

A cottager near Goderich, on Lake Huron, received word the other day that a well-driller had got water on his property.

"How do you know that the water you found isn't lake water that has seeped through the soil?" inquired the skeptical owner.

"Well, to begin with," explained the driller, "the land here is about eighty feet above the level of the lake water, and I had to drill down nearly twice that distance before I got water. But if that doesn't satisfy you, consider that the water in the well has risen to within sixty feet of the surface, although, as I have said, the lake level is eighty feet below us. In other words, the level of the water in the well is about twenty feet above the level of the lake. So I must have struck a different source, a subterranean river under pressure sufficient to push the water high up in your well."

Convinced, the cottager listened to the driller's claim that he could drill a well in the lake and get a column of well water whose level would be higher than that of the lake itself. All of which is easy to understand, if you can understand it—Stratford Beacon-Herald.

Canada's Highway Accidents

Every Canadian citizen will agree that there are too many accidents on the roads, yet it will come as a surprise to learn that the number of deaths in the Dominion is the third lowest in the world in proportion to the number of cars in use. A table compiled by the Automobile Manufacturers' Association of New York shows the following percentages of deaths per 10,000 vehicles:

New Zealand	7.4
Union of South Africa	8.9
Canada	9.9
Denmark	12.5
United States	13.6
Australia	13.9
Norway	14.0
Irish Free State	22.1
Sweden	26.0
England and Wales	30.6
Belgium	36.5
Chile	40.0
Netherlands	44.0
Scotland	44.8
Ceylon	46.5
Germany	46.6
Switzerland	50.0
Italy	59.4

Flood Damage

Every drop of Thames water was carrying some mud with it. Where did it come from. The answer is obvious. It came from some farmer's field. It was the soil he needed this year and for generations to come, to grow his crops. He hasn't a very large supply of it—a few inches at most—and it takes years to add an inch on impoverished grounds. That is the loss that hasn't been counted in the newspapers, but it is the worst loss of all.—Fergus News-Record.

Barber Signs

Most of us must have wondered at some time or other how it came about that barbers display red, blue and white striped poles outside their shops. Well, that question mark has been answered by an explanation we came across recently. It is pointed out that the local barber used to be the local surgeon, where patients were bled and bandaged. The pole was the symbol of the splint to which a broken arm was bound, the white stripe represented the bandages, the blue the veins that had to be opened and the red the blood.—Kitchener Record.

It Came True

For several weeks the King of Denmark had been trying to find a Silver Jubilee march. One day the king was riding in Copenhagen. His horse, upset by the traffic, threw him. Christian Thomsen, a poor composer, was among those who rushed to help him. Although in pain, the king mounted his horse again and rode off. That inspired Christian Thomsen. He composed a march, submitted it. As soon as King Christian heard it played he exclaimed: "That is the very thing!" He sent for Thomsen and decorated him. And a poor composer has become famous. A true "fairy tale" from the Hans Anderson country at last.—Halifax Herald.

Walnuts From Meach Lake

Interesting news to this district and to all of the Canadian West is the information that the Provincial Government's horticultural experiment farm at Brooks has received some small black walnut trees from the plantation of H. H. Blanchet at Meach Lake, Quebec.

The Brooks experimental farm, which has played such an important role in the development of fruits on the prairies, will carry forward efforts to cultivate that type of walnut in Alberta. The efforts will be watched with interest, for their success would provide western farmers with a useful and decorative crop. And it would provide a welcome addition to Alberta's products.

Similar efforts, with young trees from the same Quebec plantation, are being made at the same time in England, Germany, Italy and Syria.—Calgary Albertan.

The Lure of the Road

Spring is here and summer is approaching. The man of the house is looking over the old car and figuring whether it will do for another year. Some of them will keep on figuring so long that the season may be over before any decision is reached, then the car will again be housed for the winter and its owner will conclude that he has saved a lot of money just because he has not taken into consideration the cost of upkeep on the old family automobile.

But what we want to say is that the lure of the road is urging the long drive for the week end and the evenings. It's a good idea to give a little thought to the new conditions this year. To apply a little time and thought to the safeguarding of the car and those it contains. To make it a year free from accident.—Peterboro Examiner.

THE EMPIRE

Queen Mary's Laugh

Though no Royal lady ever bore herself with greater dignity when occasion requires, Queen Mary, to whom the Empire's affectionate greetings have gone on her 70th anniversary, has no liking for rigid etiquette in private life.

There is a story of a housemaid, just promoted to the upper regions of Buckingham Palace, being taken aback on hearing whistling in the corridor leading to Queen Mary's bedroom.

She was still more astonished on discovering that the whistler was the Queen herself!

As all who come in contact with her know, the Queen Mother has a keen sense of humor and a gift of genuine laughter.

It was Keir Hardie—no flatterer of Royalty—who once declared that Her Majesty's was the most cheerful laugh he had ever heard. — News of the World.

Wedding Attire

The Dean of Johannesburg is gloomy. He looks askance at weddings to which the bride comes resplendent and the bridesmaids and pages appear in bright array, calling such ceremonies 'extravagant and tawdry." What then would he have? Not, surely, the drabness of a register office? Solemn vows will not be heard less reverently if those at the altar are joyously attired for life's most joyous day. With marriage goes jubilation and feasting; why not wear happiness in the dress as well as in the heart? For a woman, especially, this is the day to which memory turns back, and her wish is that the recollection should be gay and pleasing. We want no penalty on [illegible] weddings, and it would be [illegible] to muffle the bells as the bride is homespun.—London Daily Mail.

Declare Canada Could Care for Fifty Million

Better Adjustment of People In The World Needed Says Judge McFadden at Chatham.

CHATHAM. — "If the arable land of Canada was fully and efficiently farmed, and its products properly distributed no one in the world need go hungry" Judge Uriah McFadden told thirty applicants for naturalization at the opening of the country General Sessions of the Peace here and in pointing the resources of Canada, the land of their adoption.

"I believe the time has arrived for a better distribution of people in the world to relieve the density of population in some countries, he said. It is said there are more people in the world today than at any time before in history, notwithstanding wars, famines, floods and disease. It is said there has been an increase of 500,000,000 people in the last thirty years, or an increase of 50,000 per day. There is room here in Canada for many millions. This land could stand a population of between 40 and 50 million people. Statesmen are giving this matter more consideration. There is an agitation in the British Isles for more settlement here.

"I have no patience with the cry 'Canada for Canadians' said the judge. "It's resources are of no use until utilized," he said.

Judge McFadden pointed out that in eastern Canada average farms range from 50 to 150 acres while in Western Canada they range from 160 to 640 acres in extent. In many European countries individual farmers have only one or two acres at their disposal and these are cropped intensively.

To become Canadians the judge said, applicants must be faithful and bear true allegiance to the British Crown and British institutions and must respect and obey the law.

"There is no room here for Communism" he said "My experience has been that New Canadians are as law abiding as the British born. And why not? Here we have one of the most democratic country in the world and we will soon reach the peak of practical social service legislation."

Judge McFadden pointed out that as each new Canadian received the oath of allegiance, he would receive too a card of greeting from the I. O. D. E. This card should be framed and placed upon the wall of the home where it can be seen at all times, he said. It urges the privilege of freedom in all things and the basis of Christianity upon which the law is founded.

Sporting Comment

Did you know that "Twenty Grand and "War Admiral" carried Charlie Kurtsinger past the finish post at the Kentucky Derby, making the two fastest Derby rides.

Nowadays everyone seems to be out for records, new and entirely different. Dave Yack, the boxer, has one——He managed to be the only boxer in many a day to win the "daily double."

The Kentucky Derby has been won three times by Earl Sande and Isaac Murphy.

This year they are cutting down the C.N.E. swim some more. The race is to be outside the sea-wall, the men going 10 miles, and the women three, with $6,000 for the total prize money for both.

In a few years they will probably be holding it at the Y.M.C.A., with a cup for the first prize, just to make it more exclusive.

Larry Gains, the colored Canadian boxer, made between 1932 and 1934 nearly $50,000 in fights in England.

They say his biggest purse was around $13,000. He made this when he defeated Carnera.

Gains, who has beaten most of the heavyweights overseas, worked his passage to England on a cattle boat 14 years ago.

Brief Comment

As this is written, pleasure-mad New York is looking forward eagerly to the Schmeling-Braddock fight. This is a unique sporting event—an imaginary prize-fight for the mythical championship of the world. — The New Yorker.

Age doesn't crusade much. Changing labels doesn't seem very important after you learn that it doesn't change what's in the bottle.—Robert Quillen.

News In Review

Urges Beauty in Building

MONTREAL. — Lord Tweedsmuir called on Canadian engineers tonight to aim their efforts at the esthetic as well as the utilarian in building "the material background of a great nation."

Canada's Governor-General addressed a banquet of the Engineering Institute of Canada, celebrating its semicentennial in a four-day gathering. He spoke to more than 500 engineers from Canada and envoys from a half-dozen other nations.

An honorary life member of the institute, the Viceroy told its members it was "most necessary" for them to preserve a balance between what is useful and what is beautiful in their projects. Man's constructive powers must be kept in harmony with nature.

"Even in Canada," Lord Tweedsmuir said, "where you are dealing with nature in its wildest form, the engineer should also be something of the artist." At the same time, he emphasized his belief the introduction of human interest through man-made scenery "does not spoil, but rather dignifies, any landscape."

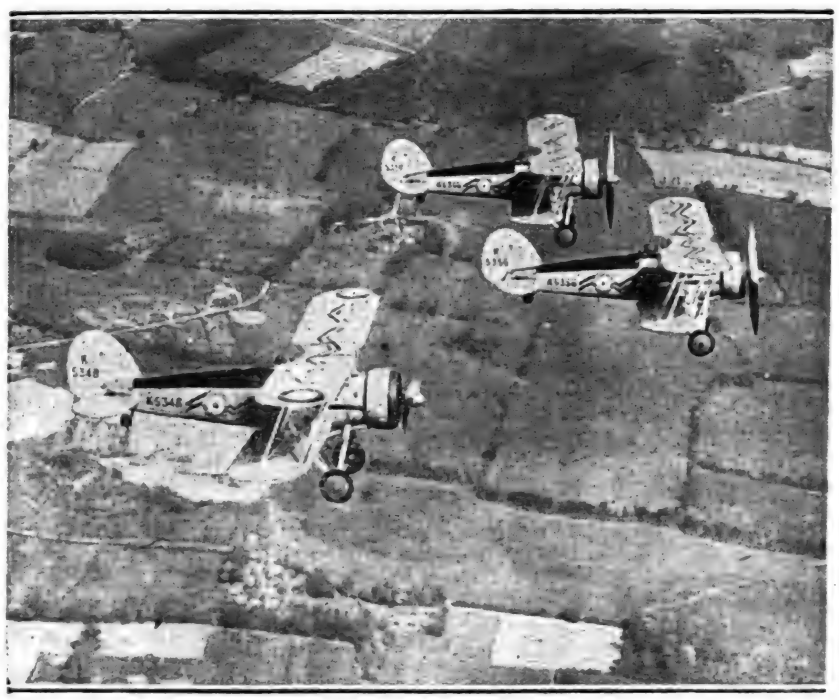
Potato Men Find Markets

FREDERICTON. — Encouraged by development of ne wmarkets in South development of new markets in Southern United States markets, New Brunswick's growers are giving greater attention to seed potato culture. South Africa also has been suggested as a potential market.

Seed potato acreage in the Province this year is expected to double that of 1936, with table stock showing a smaller percentage of increase. Last year 3,3000 acres were sown for seed. The 1937 acreage is expected to be more than 6,000. More growers are entering the seed business in the St. John Valley Counties of York, Carleton and Victoria, while expansion also is anticipated in Restigouche County.

Osculation Leads to Court

MIMICO. — A kiss caused Donald Patterson of Toronto to zig-zag in and out of traffic on Long Branch Avenue last Sunday, according to evidence in Mimico Court recently, when Patterson appeared to answer a reckless driving charge. A girl riding on another man's lap was the cause of the trouble, according to the evidence. There were eight persons in the car, five of them in the rear seat. Patterson paid for his kiss with an $11.50 fine.



Noted Weekly Sold

NEW YORK. — The Literary Digest, weekly news magazine, was sold outright this week to the Review of Reviews Corporation, headed by the veteran magazine editor, Albert Shaw.

The sale brings two of the oldest magazines in America under the same ownership. The Review of Reviews was founded in 1891 and the Digest in 1896.

Practically the entire ownership of the Digest had been in the hands of R. J. Cuddihy, the publisher, and Wilfred J. Funk, who has been editor-in-chief of the weekly.

Britain Takes On Air Of Preparedness

These "Gloucester Gauntlet" fighting planes of the Royal Force, with a cruising speed of 220 miles an hour, are the fastest machines in the service apart from those on the secret list. On May 27th they showed their powers to the public during a display given in connection with the Empire Air Day, when Royal Air Force aerodromes throughout the country were thrown open to the Public. Our picture shows a formation of the "Gauntlets" in flight over Epsom, near Kenley.

NEWS PARADE

Commentary on the
HIGHLIGHTS OF THE WEEKS NEWS —
By Peter Randal

Seventy three day of the most terrible siege in modern history ended this week as the insurgent columns of General Devila began the task of "mopping up" the ancient Basque capital of Bilbao. Fighting from house to house, the defenders still hang on grimly while refugees have moved down in thousands as they attempted to flee the city under the murderous fire of the Italian "Black Arrow" column. An indication that the siege was actually over and that hope of starving off the advancing mercenaries was over, was the departure of the British consul from the city. He was rescued by British sailors from awaiting ship just outside the death swept harbor. Latest reports say that General Franco is transferring his hordes in thousands to the Madrid front where another terrific push is forecast by the orders of the Loyalist commander who has requested all civilians to leave the city.

Financial Courage

After ten months of comparative stale mate, the Fascists seem to be geting somewhere in their attempts to subdue the will of the Spanish people. Just prior to the fall of Bilbao, new hope was injected into their councils by the announcement of a new loan obtained abroad for $1,500,000. The announcement was made by a former tobacco smuggler, illiterate Juan March, chief civilian backer of the revolution. No one seems to know where it is to come from but there are many close guesses.

Germany and Italy are in the position of having to throw good money after bad. So far, the campaign has not been much of a success but further expenditure may turn the day. The fall of Bilbao seems to bear out this statement.

Beauty in Distress

And in Germany, all is not well. Chancellor Hitler's close personal friend and the Director German State Motion Pictures, Leni Riefenstahl has been accused of having "non-Aryan" grandparents. In most countries, such a fault would not be of any particular importance but in Germany where the Nazis are engaged in stamping out their Jewish intellectual class, the accusation is the next thing to ruin. The charge was made by Propaganda Minister Goebbels at a social gathering. It has since been denied as "pure invention". The interesting part for conjecture is just what Chancellor Hitler thinks about it all and just what action he would take if he charge proved to be true. It is well known that all of the women he may have known, which is not many, the beautiful actress is the favourite.

Crisis Averted

And in France, a mild little man has won an amazing victory and proved the strength of his government. Faced by a financial crisis occasioned by a steady drain of gold because of unequal trade balances. Premier Leon Blum has just won a vote of confidence. Votes of confidence are a feature of the French governmental system and supporters of governments more often than not turn against their former colleagues on the slightest pretext. Such was the case when Premier Blum's Communist deputies ganged up against him only to be met with surprising opposition from other section of the Chamber. The Government is now empowered with extraordinary financial powers to support the franc by regulation of the discount rate and a crisis which might have been of world importance in view of the delicate state of affairs has been averted, at least for the time.

Disaster Echoes

Strange how echoes of distant thunder come close to home. Two weeks ago, financial circles were met with the announcement by Canadian paper producers that prices for fine papers and boards were going up from $7 to $10 per ton. Among the reasons given by manufacturers for this rise (amounting to 8% over last year) was the scarcity of sulphite. Sulphite is the bleaching agent in the making of chemical wood pulp. Sulphite is also a prime ingredient of explosives. Apparently, the manufacture of explosives is of more importance in this unsettled world of today than the manufacture of fine paper.

College Holiday

And in the hurry and bustle of international headaches, we almost forgot to mention something which happened right here in Toronto. It will not shake the depths of the nation but it does stand out by contrast with with the other happenings of the week. Of all things it was a party. Imagine if you can, the courtyard of an ancient castle with a party in progress. On a terrace at one end, strings being plucked with old English airs. There may have been wars, struggles in the financial world, economic upsets, but Hart House on the night of the Graduation Ball might have been something out of another century. For those who leave the college halls for the last time, it was to all purposes another war, set apart from the one they have, by this time, entered. The going for college graduates is not always smooth, yet the prospect of more jobs this means, we hope, better things for them.

Home Loans $4,472,000

OTTAWA. — With a record-breaking increase during the period from April 15 to May 15 last, total loans under the Home Improvement Plan of the National Employment Commission amounted on the last-named date to $4,472,800, divided among 11,844 borrowers. The scheme was placed in operation last fall.

According to figures issued by Acting Finance Minister J. L. Ilsley, there were 2,670 loans, amounting to $998,991, during the four-week period ending in May 15, in communities of 1,000 or more population.

Toronto, with 1,018 loans, amounting to $365,556.31 still headed the list on May 15, both in number and amount, although Montreal was not far behind. Montreal loans numbered 692, but amounted to $361,426.03. Vancouver reported 544 loans, totalling $174,497.26, followed by Winnipeg, with 389 loans, for $154,175.72. Edmonton and Ottawa were next in order.

Generally speaking, cities and towns recorded notable increases. The Town of New Waterford, N.S., which has made an outstanding record in H.I.P. loans, reported 174, amounting to $60,630, as on May 15.

Quebec Bars Trucks From Highways on Sunday

QUEBEC. — Motor trucks will not be permitted to convey merchandise of any description on highways of the Province or on city streets on Sunday in future, officials of the Attorney-General's Department announced last week.

Traffic officers throughout the Province have been instructed of the new ruling, effective on Saturday, and have been ordered to see truck drivers and owners conform with the regulation.

Most fleas have no eyes at all, but they get their man just the same.—Neal O'Hara, in New York Post.

Arousing Child's Interest in Work

It's One of the Many Duties Parents Must Undertake

To get children to tackle a job often takes all the ingenuity the mother can summon, not because they are children, but because they are human, and for every child who hates to pitch in, there is his counterpart in the adult world.

There are two kinds of work; the routine occupations of daily life that become second nature and require no particular shove, and the extra-routine tasks that take will and determination.

Now, all children will do the former rather willingly, according to training. Nothing becomes routine, or habit, unless repeated until it becomes part of life. But the trouble with the exceptional job is legion.

School, errands and a few easy chores comprise the child's usual program. Such things are good for him, for otherwise, he would never establish any work habit at all. He is likely, however, to consider any added task outside of his expected responsibilities an imposition.

There are several ways of getting around his prejudice, but each mother will have to study her child's disposition and reach deep into his interest and emotional make-up.

Weird Collection Shipped to C.N.E. Zoo

There is now being assembled in Georgetown, Demerara, South America, a large consignment of strange animals and birds for the children's zoo at the Canadian National Exhibition. Native hunters and trappers have been engaged for months in the rounding up of the collection. It will include giant ant-eaters, jaguars, tapirs, many specimens of gaily plumaged birds and a wide variety of reptiles.

A feature of the collection that promises to "steal the show" as far as the children are concerned is a shipment of tiny marmosets, smallest of the monkey family. The consignment comes in compliance with the request of William Charles, Canadian representative of Booker Bros. & McConnell, Limited, of Georgetown. After the Exhibition the animals and birds will find a home in the Riverdale Zoo.

HAVE YOU HEARD

It is too bad so many people give up dancing after they are married. That's about the only times they put their arms around each other.

First Office Boy — The boss called me into consultation today.

Second Office Boy — G'wah!

First Office Boy — The boss had a dispute with his general manager as to who was leading the league just now in batting.

A fly was walking with her daughter on the head of a man who was very bald.

"How things change, my dear," she said, "when I was your age, this was only a footpath."

Busy Man — Young man, my time is worth $10 an hour, but I'll give you five minutes of it.

Young salesman — In cash, sir?

TRAVEL WITH A SMILE

Life is like a journey taken on a train,
With a stranger passenger at each window pane,
I may sit beside you all the journey through,
Or I may sit elsewhere, never knowing you;
But if fate decree that I sit by your side,
Let's be pleasant travelers, for it's so short a ride.

Man — I'm sorry, but I made it a rule never to lend money. It ruins friendship.

Friend — That's O.K. But we were never what you might call close friends, were we?

The fabled goose that laid the golden egg, got killed, but the stork continues to do business unmolested.

Polite Waitress — Lovely weather we are having today, sir.

Absent-minded Patron — All right, bring me some.

READ IT OR NOT

In Manhattan, New York, annually there are approximately 44,199 births, 37,516 marriages and 32,122 deaths.

Friend — Did some one throw an ax at you?

Man — No, I just got a hair cut.

Friend — Well, sit higher in the chair next time.

A trifle more expended for good-will ointment and not quite so much for sandpaper would make things run a lot smoother in this old world.

Boarder — We've had chicken four times this week.

Visitor — Four chickens! This must be a great boarding place!

Boarder — Oh, it was the same chicken.

The man who does his best today will be a hard man to beat tomorrow.

Diner — Waiter, I want fresh eggs or none at all.

Waiter — Yes, sir. We have some nice pork sausages.

Preparedness is a splendid slogan for humans as well as nations.

Four Cylinder Wins Again!

For the fourth year in succession, a car powered by a four cylinder engine won the American racing classic at Indianapolis, at the rate of 113.580 miles per hour for the 500 miles. The second winning car in this race was similarly powered; the third car had an eight cylinder engine. The real importance of these wins is the stamina and durability over the competing six and eight cylinder cars. These qualities can be readily seen when the Willys 37 engine is studied against other engines of similar capacity.

Prices and specifications subject to change without notice.

Social Credit Leaders

G. L. MacLachlan, chairman of Alberta's Social Credit Board is shown above at left as he arrived on the Cunarder Aurania, with G. F. Powell, personal representative of Major Douglas, founder of the Social Credit Theory. Mr. Powell said that he was certain that Social Credit should be brought into being in Alberta.

Raising Colts Is No Cinch As Luck Plays A Big Part

(By Rusticus, in the Stratford Beacon-Herald.)

Horses like men, get old. No one would expect an old man to be able to keep up his end of the day's work as easily as a young man. Nor can we expect an old horse to pull the plow up and down the field with quite the speed and keenness of a five-year-old. Just as age creeps upon a man and weakens him long ere he is quite ready to admit that he is getting old, so age comes to our horses while we still think there should be a few good years left in them.

During the winter one of the older horses on the farm came to the end of the number of days that were allotted to him. Two more of the farm horses are getting to be very near the same age, and a day's work tells on them to a far greater extent than it does on the younger animals. At best it will be only a few more years till they, too will have reached the end of their period of labor.

On farms where no colts are raised the death of one horse usually means the purchase of another and younger one to take his place. Reasonably sound and typy horses are in good demand and good prices are realized on this class of stock. In theory at least it should be a good policy to raise a few colts to replace the worn out animals. In fact, if colts are regularly raised there ought to be a horse to sell every year or so, and none of the animals need be kept until old age weakens and finally kills them.

• • •

Now mind, that is all theory. It doesn't take into account the number of colts that will for some reason or other, not survive those first trying days of colthood. Raising a colt, as we understand it, is a very different matter from raising a calf. The birth of a foal is a real event on farms where they are raised. Perhaps that is because farmers are more attached to their horses than to any other class of stock they keep.

This spring it was necessary for us to buy another horse. Realizing that in a few more years other horses must be replaced, we decided to find out if raising our own work horses would work out in actual practice as attractively as it does in theory. An in-foal mare was therefore purchased and a week or ten days ago, she presented us with what promises to be a fairly good colt. This youngster is the first foal to be born on this farm in the last 30 years.

Normally the foal should grow and in two or three years become a valuable work horse. That is according to theory, but theory doesn't take into consideration the diseases and accidents that may be visited upon a farm horse of the youngest generation. Today though she is a playsome colt, that shares the box stall with her mother or gallops round while the mare is out on grass a few hours each day, up to date the experiment is 100 per cent successful.

• • •

When you buy a horse you can always ask the previous owner what he calls it, for a horse must have a name. With the foal you raise one has the privilege of picking a name. Now a horse does not want a big family name. Something short and easy to say is far more appropriate. Some horses are inclined to be a bit lazy at times and the driver may feel inclined to give them a yell. At such times a short name like "Mike," "Bill" or "Tom" comes in very nice. If the teamster is inclined to do a of "cussing" should one of the plow steam step over the traces, he does not want to be bothered with a "sissified" name.

So here we are right up against a brand new experiment, as far as this farm is concerned, and since we bought that brood mare we have received as much advice about raising a foal as any city man starting out farming. The general opinion seems to be that there is a good deal of luck attached to the business. Everyone expresses the opinion, that it pays to raise colts, "providing you have luck." In the next year or two we will try to find out if we have any "luck" in raising our own work horses.

Must Save Trees Or Suffer For It

Letter in Toronto Globe and Mail:

—I feel quite sure that your excellent editorials on reforestation are doing much to awaken the people of this Province to the disastrous results of the present lack of proper control in regard to the cutting down and replanting of our wooded areas.

Any one who gives any thought to the subject can hardly fail to wonder why more definite steps are not being taken by means of proper legislation to guard against the inevitable results of this situation. There is ample evidence of the benefits which have been obtained by the methods in use in some of the older countries, which have been realized in time that their forests are not inexhaustible and have taken the necessary steps to conserve them. The fact that by so doing they have placed a great industry on a permanent footing is only one, and perhaps not the most important, point. The effect on the water supply and the preserving of the soil for agricultural purposes is something we surely cannot ignore.

One factor that must have a bearing on this whole question seems to me the tremendous waste occasioned by the annual cutting of literally millions of young trees for the Christmas-tree trade. One can hardly blame our neighbors to the south for being well content to allow us to denude our land as we are doing and sell them hundreds of thousands of good trees at a few cents each. It seems almost absurd that the Government should spend the money they do each year in replanting and permit all their efforts to be more than offset by this one comparatively unimportant bit of trade.

W. H. H. BOSWELL,
Toronto.

Half A Century Since Vancouver Had First Train

Though Vancouver made no fuss about it at all, May 24 was one of the most important aniversaries in the history of the city. It was on May 24, 1887, at 2.45 p.m., that the first transcontinental train, its engine clothed in flags and slogans, and bearing a portrait of Queen Victoria, steamed into the city.

That train, 50 years ago, did a number of things which Vancouver should remember. It forged another link in the chain of Confederation, binding the Pacific province to the provinces on the Atlantic. It tied the baby city on Burard Inlet into the Canadian commercial fabric; and gave it the start which enabled it to make a progressively larger place for itself. It gave Vancouver a position, too, on the "All Red Line", the all-British system of transportation which ties the Dominions and the Motherland together.

Vancouver would do well to remember that first train, for it had not come, while there would still be a city on Burrard Inlet, it would not be Vancouver, and it would not be where Vancouver stands, but farther east, at the Inlet's head.

How the difference in location would have affected the fortunes of the port it is perhaps useless to argue, but there is not much doubt these fortunes would have been affected. The city would have been farther from the sea, farther from the beaches and resorts which have developed, closer to the North Arm and the mountains, closer to the Fraser and the Pitt, closer to New Westminster. It would have been a city with problems different from those Vancouver had had to master. It would very likely have had different people at the start. In short, it would have been a different city.

The Skunk as a Pet

. . . And the skunk, whatever his virtues, is not just the kind of a pet one would like to have running around the garden. He is reputed, among other things, to be a great raider of chicken-coops.

It is with his bad habits, not his virtues, that we have unfortunately become familiar in this province. At the last session of the Legislature there was a somewhat heated debate as to whether the Minister of Agriculture was not being "gypped" in paying the provincial bounty on skunk snouts bootlegged in from the other provinces.

This was a question affecting solely the value received from the money expended. Nobody suggested that the bounty should be abolished for the skunk's benefit.— Charlottetown Guardian.

—And there's a bigger 15c. package now!

P.S.—Your Pipe Knows Ogden's Cut Plug

OGDEN'S FINE CUT

Jean Harlow

Eight years ago she was a schoolgirl in the Middle West. The other day her death was the biggest news of the day—biggest in the sense that it interested the most people.

Few, perhaps, would say that she was a great actress. Her sudden rise to fame and wealth was due not to extraordinary talent but to extraordinary hair. Because of her, every city, town and village in America had its "platinum blondes."

Yet it would be unkind and untrue to deny her credit for what she did achieve. In a field where many aspire and few succeed she succeeded. If the standards by which success in that field is measured are not all that philosophers think they ought to be, it is fair to remember that she did not set those standards. Her "public"—which seemed to have included most of us—set them, and rewarded her because she met them.

He Lost His Kilt

Like all English crowds, London's Coronation crowd maintained its reputation as the most good-humored in the world. It laughed at everything, even when messages came through the police loud-speakers asking for lost children to go to the nearest street corner, statue, or to the police station where their anxious parents were loking for them.

The most humorous episode, however, of the whole celebration occurred at Oxford Circus, where a braw Highlander in a kilt decided that he would descend the escalator sitting. He got half way down and then there was a ripping noise. His kilt had got caught in the stairway and parted company with him! The crowd roared. The Highlander remained seated and he did not move again until somebody brought him a mackintosh!—Vancouver Province.

SCOUTING
Here · There Everywhere

A brother to every other Scout, without regard to race or creed

Contests in bridge building and tent-pitching were competition items of a Brantford District Boy Scout Jamboree. The bridge-building contest was won by the 7th Brantford (Saint Jude's) Troop, and the 10th Troop proved the speediest in erecting the tent.

A Northern Ontario country boy accidentally wounded by a gun-shot died to death because no one knew how to apply a tourniquet. The average Boy Scout knows all about such First Aid, and one on the scene probably could have saved this boy's life. Which indicate the desirability of having all lads enrolled in an organization that provides this necessary training. — The Peel Gazette.

Continued evident of the practical practical value of the Boy Scout training has recently brought the gift of Headquarters Building to Scouts in three Ontario towns. A new clubhouse for the Scouts of Parry Sound was recently opened by His Worship Mayor Jackson and members of the town council, the building in Agricultura Park having been given the Scouts by the Council. At Sarnia Mrs. W. J. Hanna presented a frame building at Elgin Street for use as a Headquarters for the Local Boy Scouts Association, to be known as Coronation Hall. At Tillsonburg the Bell Telephone Company were the donors of a building on the condition that the Scouts removed it to a site given by Miss Cora Anderson. The structure was frame, with a brick veneer. The thrifty Scouts negotiated a sale of the bricks, and at once began stripping them off.

When presenting a large Union Jack to the town of Brampton at a meeting of the town council, Mrs. M. Sharpe, Regent of Peel Regiment Chapter I. O. D. E., paid a tribute to the loyal services rendered by the Boy Scouts in each day raising and lowering the flags for several years. The new flag is presented the town each year by the I.O.D.E.

Following the example of Scout Reforestration Work carried out for some years at Angus, Ont., the Scouts of Fort Erie this spring planted 700 young saplings near the Scout Cabin on Ridge Road, and the Boys of the 1st Beamsville Troop planted 600 trees in the game preserve south of that town.

Rocky Mountain Holidays

The busiest tourist season in years is in store for the Canadian Rockies. Banff Springs Hotel and Chateau Lake Louise, recently opened for the year, are enjoying mid-season popularity, while increasing numbers of visitors are planning holidays at the beautiful chalet-bungalow camps at Moraine Lake, Lake O'Hara, Lake Wapta, Yoho Valley, and Radium Hot Springs.

Attractions such as golf on the championship course at Banff, riding and hiking over spectacular mountain trails, tennis on splendid courts, boating on glacial lakes, and other sports under ideal conditions make the Canadian Rockies Canada's leading summer playground. Add to this scenery unexcelled in the world, excellent fishing, and endless opportunities for camera hunting of big game and the result is Banff, Lake Louise, or any of half a dozen Canadian Pacific bungalow camps set in valleys or by lakes of outstanding beauty.

Each year in the Rockies several feature events are held in addition to the day-by-day amusements. Among them are the Calgary Stampede, July 5 to 10; Indian Days at Banff, July 23 to 25; outing of the Trail Riders of the Canadian Rockies to Mount Assiniboine, July 30 to August 3; outing of Trail Hikers of Canadian Rockies in Moraine Lake district, August 6 to 9; Banff golf week, August 23 to 28; and Yoho Valley reunion camp of the Alpine Club of Canada from July 17 to 31.

PRESENTATION

Continued from first page

Fred Townsend calls off the old-time dances over the radio. And how delighted the dancers were when he was chording on the piano and calling off at the same time. Jim Urquhart also gave good satisfaction directing the dancers.

We were sorry the threatening weather kept some of our Toronto friends away, but the seventeen who faced the threatening clouds were: Mr. and Mrs. Taylor, Mr. and Mrs. Howard and Master V. Howard, Miss M. Black, Mr. and Mrs. Metcalfe, Mr. Fred Haines and Miss Haines, Will Saunders, Wallie Cordingley, Fred Townsend, Bill Crawford, Mrs. McIntyre and son, Joe, Mrs. Carpenter and sister, Lorne Bonham and Mrs. Bonham. At 11.30 the following address was sung and presentation made.

(See Address on page 1)

Then the community club ladies took charge of the lunch and, when they do, we know everyone is served and everyone is satisfied.

Will Cooke was then asked to take charge of the meeting, when the following gentlemen made short, congratulatory speeches: Mr. Howard, Bert Fullerton, father of the groom, Mr. Campbell, father of the bride, and several others.

When the music started the dancers were on the floor again. And neither musicians or dancers seemed to get one bit weary. But that ancient timepiece that never gets weary, warned all that another day was starting on the way.

SANDY.

TOR. TWP. MINUTES

Cooksville, June 7, 1937.

Minutes of the regular meeting of council held on Monday, June 7, 1937, in the council chambers, Cooksville.

Members of council all present, Reeve E. D. Maguire presiding. The meeting opened at nine a.m. and the minutes of the previous meeting were read and adopted.

The following persons appeared before council: Mr. Robt. Salmond re insurance claim; Mrs. Shenton re roads and relief clothing; Mr. Monkman re road gravel; Mr. Brownridge re culverttile; Mr. Cluff re Business Men's Association; Mr. A. Crookes re relief.

By-law No. 1221, being a by-law to purchase a portion of a gravel pit, was read a first, second and third time and finally passed.

The following correspondence was presented to council for consideration: Henry Blower, offer to purchase; Messrs. Briggs, Frost and Birks re tax sale; A. Viney, sheep valuator, re Mr. Monkman; Cooksville Business Men's Association re fire claims; Wm. C. C. Innes re coronation decorations; Judge Cochrane re town hall; Streetsville Review re printing minutes; Charters Publishing Co. re printing minutes; John Malibosky re offer to purchase; G. B. Jackson re clergy reserve and woods; Lakeview Business Men's Association; Henry Arnold re road gravel; Globe Indemnity re tractor insurance; G. B. Jackson re building restrictions on Mineola Rd.; Canadian Automobile Service Association re release of insurance claims, Mrs. Wallace and Mrs. Crozier; school boards of the township re the gift of coronation medals; Salvation Army re grant; Department of Highways re auditors' report on road work; Miss E. Moore, report on school nursing; Board of Railway Commissioners, order for removal of cattle guards; Robertson, Robinson, McCannell & Dick, re relief accounts; A. C. Chaplain re condition of road; Department of Agriculture, re weed inspectors; Mrs. Crooks re building; residents of Mississauga Road, petition for water installation; E. S. Munroe, Mississauga Road, re water installation; Gore, Nasmith & Storrie, re water installation; Chas. Litner re closing of road allowance; Bell Telephone Co. re pole lines; Toronto Township Hydro Commission re Hydro arrears; Geo. H. Foster re damage claim; Rev. R. R. Perdue re indigent family; Mrs. A. Mellor re water course; A. H. Starett re garbage dump; registrar's department; Mrs. Abell re water installation; Mrs. Hattie Solursh re water course on Beechwood Ave.; A. E. Redsell re water course; Ontario Vegetable Growers' Assoc. re persons working on Sunday; Robertson, Robinson, McCannell & Dick, 1937 budget.

The following resolutions were presented to council for consideration:

H. J. Hazard and T. H. Graham—And resolved that the offer of J. Maliborsky to purchase lots 103, 104, 105, Plan K22, be and is hereby accepted and K. Wiszszuk be paid the usual ten per cent commission. Price $475.00. Carried.

T. H. Graham and T. A. Leslie—And resolved that the offer of the Streetsville Review to print 200 copies of the 1936 minutes of council at a price of $1.60 per page be and is hereby accepted. Carried.

T. H. Graham and P. E. Syme—And resolved that the clerk be and is hereby instructed to provide the necessary tables and desks for the use of the Division Court as requested in the letter of May 7th, from Judge Cochrane. Carried.

T. H. Graham and T. A. Leslie—And resolved that the treasurer be and is hereby instructed to pay G. B. Jackson the sum of $42.90 re drawing deeds, agreements, etc., under date of June 7, 1937, and June 4, 1937. Carried.

T. H. Graham and P. E. Syme—And resolved that the treasurer be and is hereby authorized to pay the following accounts re coronation decorations: Provincial Poppy committee, Canadian Legion, $57.90; Mr. Stevenson, work done on same, $1.00. Carried.

T. A. Leslie and T. H. Graham—And resolved that the treasurer be and is hereby authorized to pay Armstrong Bros. Construction Co. the sum of $241.89 as per attached account, same having been certified correct by J. Brett, treasurer Malton Police Village, and that the same be charged to the Malton Police Village account. Carried.

T. A. Leslie and H. J. Hazard—And resolved that the treasurer be and is hereby authorized to receive and place to the credit of the municipality the following moneys: Roads and bridges, $7,887.02; 1937 tax sale redemption, $417.76; 1936 tax sale redemption, $36.19; 1931 tax sale redemption, $160.00; building permits, $6.00; hall rent, $5.00; water installation, $124.24; water accounts receivable, $267.50. Carried.

H. J. Hazard and P. E. Syme—And resolved that the treasurer be and is hereby instructed to prepare a statement of Hydro arrears which have been collected and are owing the Hydro commission and that he issue a cheque to the commission for same. Carried.

P. E. Syme and T. H. Graham—And resolved that the treasurer be and is hereby authorized to pay the Cooksville Business Men's Association the sum of $100 re fire claims of March 12, March 28, April 20 and May 11, 1937. Carried.

P. E. Syme and H. J. Hazard—And resolved that permission be and is hereby granted the Bell Telephone Co. to construct pole lines as per their request of May 5th and May 7th, said work to be done to the approval of the township road supt. Carried.

T. A. Leslie and P. E. Syme—And resolved that permission be and is hereby given the Bell Telephone Co. to construct a pole line on Gordon Drive as per their request of May 13, 1937, said work to be done to the approval of the township road supt. Carried.

P. E. Syme and H. J. Hazard—And resolved that the treasurer be and is hereby authorized to pay the following re sheep claims: W. D. Monkman, May 16, 1937, one sheep killed, $10; A. Viney, valuator on same, $2.00; A. Viney, valuator on inspection D. McKendry, $2.00. Carried.

P. E. Syme and H. J. Hazard—That this council hereby consent to the withdrawal of parcels 234 and 235 from the 1937 tax sale without prejudice to the council's rights in the matter, and that the treasurer be instructed to notify A. W. Briggs accordingly. Carried.

H. J. Hazard and T. H. Graham—And resolved that the offer of Henry Blower to purchase Lot 116, K.22, for the sum of $135 be and is hereby accepted and that the treasurer be and is hereby authorized to issue a deed for same, on completion of payments. Terms as follows: $40.00 cash, balance $20.00 monthly. Carried.

P. E. Syme and T. A. Leslie—And resolved that the clerk be and is hereby instructed to refer the letter of the Vegetable Growers' Association re persons referred to working on Sunday to the Lord's Day Alliance. Carried.

H. J. Hazard and T. H. Graham—And resolved that the resolution passed at the May meeting re the closing of a road at Erindale be and is hereby rescinded. Carried.

H. J. Hazard and P. E. Syme—And resolved that the treasurer be and is hereby authorized to pay Dr. H. C. Sutton the sum of $16.00 re Toxoid administered and treatments to indigent patients. Carried.

P. E. Syme and H. J. Hazard—And be it resolved that the council notify Mrs. T. W. McCracken that this council give notice that the agreement on which the township equipment has been stored shall be dispensed with as from June 30th, 1937. Carried.

P. E. Syme and T. H. Graham—And be it resolved that this council go into committee to pass the several accounts tabled this day. Carried.

On motion the council adjourned.

E. D. MAGUIRE,
Reeve.

J. H. PINCHIN,
Clerk.

Creditors of HANNAH DEVINE, late of the said City of Toronto, Spinster, deceased, who died on or about the 26th day of April, 1937, are required to file their claims with the undersigned on or before the 3rd day of July, 1937, after which date the executor will distribute the assets of the estate of the said deceased.

Dated at Brampton this 7th day of June, A.D., 1937.

GRAHAM, GRAHAM & BOWYER,
Brampton, Ont.,
Solicitors for the executor.

MASONS AT CHURCH

Last Sunday evening, officers and members of River Park Masonic Lodge, together with visiting brethren from Toronto, Port Credit and other places, met at the lodgeroom and paraded to Streetsville United-Church, where a splendid sermon was delivered by Rev. (Bro.) T. D. Jones, the pastor, who took for his text, "Lily Work at the Top of the Pillars." A solo, "The Garden of Prayer," was rendered in good voice by Mrs. Frank Reid. The service was much enjoyed by all present.

ERINDALE

Miss Annie Nottingham, Toronto, received painful lacerations and fractured ribs when a tire on the car she was driving on the Dundas Highway at Erindale, Saturday, blew out and sent the auto into the ditch. She was attended by Dr. S. H. Smith, Streetsville, and removed to the Peel Memorial Hospital, where her condition was reported as not critical. Three passengers in the car escaped with minor cuts and bruises.

The Open Column

Nearly a thousand years ago, as the tenth century drew to a close, the social economy of what was then known as the civilized world disintegrated under the shadow of a long-expected event, the coming of the millenium. At the end of a thousand years from His birth, the peoples of the world who had accepted Christianity expected the return of Christ. His appearance on earth was awaited with a great deal more awe than joy. Adherents of the Christian religion left their plows in the furrows, their crude implements of agriculture unused, and, as the eye of what they firmly believed would be the last day approached, the countrysides were swept with famine. Worshippers crowded into the churches, and those who could find no room within crouched, trembling at their steps. A fanatical order of monks, calling themselves "Millionaires" banded together to install even greater terror of the second coming into a fear-stricken populace.

But the appointed day came and passed, and Christ did not appear. Seeking to explain away the disappointment of their people, the churchmen of the day decided that the Saviour had not returned because Jerusalem was in the hands of the Saracen. The Crusades were directed at the reclamation of the Holy City to the Christian faith. Most school histories depict the Crusaders as men of holy purpose bent on performing a service to mankind. Learned men have written books which would scout this supposition, and have pictured the Crusaders as little better than ravening wolves who journeyed to Palestine for the loot they might win along the way, rather than to deliver Jerusalem from the pagans.

Nearly a thousand years ago, then, the millenium was expected, and failed to appear. At the end of this century, will there still be enough religious faith left in the world to predict the reappearance of Christ? What will the end of the second thousand years disclose?

The economic collapse of 1929 and the subsequent spread of unemployment encouraged great pratings of the application of Christian principles to the social system of modern times. Christ's only commandment to mankind, the Golden Rule, was invoked in aid of destitute men, that they might continue to live.

Unfortunately, those in whose interests this application of Christian principles was made, accepted the dispensation as a social justice, rather than as a physical necessity. They demanded a voice in the government of the world, and proclaimed their God-given heritage of equality with those who still had work, who still produced something. They forgot, it would seem, the common interpretation of the Rule, "Do as you would be done by". None of them would enjoy working without requital, as they expected the producers to work for them.

Christ, it seems to us, was a dictator. And even under the rule of earthly dictators, there is little idleness. Christ said, "Thou shalt". He was a dictator against war and lust and corruption, but he pointed the way to his followers and told them to work.

So, if there is to be an approach of the long-awaited millenium at the end of this century, it is high time that the question of social justice was settled right speedily, and the attention of the world turned to physical problems of far greater moment that lurk in the background of time, waiting to engulf the world.

All men were born free and equal, true enough, but not all men develop into leaders. There must be followers, men who work with their hands, that the men who have the talents shall have time to use their talents. And, until every class takes a pride in its particular ability, and is content with its lot, there can be no millenium and no sense of social justice.

25 YEARS AGO

(From The Review of June 27, 1912.)

Rev. John Black and Miss Annie Ezard of Cooksville, were married on June 19th.

Entrance class pupils of Miss Lawson presented her with two books as an appreciation for assistance rendered. Miss Evelyn Graydon read the address and Miss Ina Drinkwalter made the presentation.

Mr. E. O. Madill sold a 3-year-old colt for $295.00.

Mr. Harry Walcott is relieving Mr. V. White, day operator at the C.P.R. Junction.

Rev. B. H. Robinson preached his farewell sermon in the Methodist Church last Sunday. He has been stationed at Bervie, Ontario.

ENGAGEMENTS

Mr. and Mrs. J. R. Mills, Milton, Ont., announce the engagement of their daughter, Helen D., to Dr. Frederick E. Babcock, son of Mrs. E. J. Babcock and the late S. D. Babcock of Alton, Ont., the marriage to take place in July.

Rev. W. C. Kitto and Thelma Jessie Fraser were married in Grace United Church, Brampton, last week.

Mervin H. Nethercut of Burlington and Miss Edith Mary Tilson of Brampton were married by Rev. C. E. I. Cragg on June 26.

The Agar family held their annual re-union at the home of Norman Ward, Malton, on Saturday, with a good attendance. This was the sixteenth annual gathering.

Mrs. Rose Steers of Port Credit, aged 63, was serious injured on Saturday, when struck by a truck as it backed out of a driveway. She was taken to St. Joseph's Hospital, Toronto.

Mr. Alan Couse and four other members of River Park Lodge A.F. & A.M., Streetsville, motored to Newmarket Friday evening and witnessed the installation of officers of Tuscan Lodge, of which Wor. Bro. Byron Scott is the Master. Byron is a son of Rev. J. F. Scott, who was pastor of St. Andrew's Presbyterian Church, Streetsville, from 1911-18.

"FRIENDSHIP"

"The only way to have a friend is to be one."—Emerson.

"There are no greater miracles known to earth than perfection and an unbroken friendship."—Mary Baker Eddy.

"That is a choice friend who conceals our faults from the view of others and discovers them to our own."—Secker.

"Two persons cannot long be friends if they cannot forgive each other's little failings."—Bruyere.

"It is one of the severest tests of friendship to tell your friend his faults. So to love a man that you cannot bear to see a stain upon him, and to speak painful truth through loving words, that is friendship."—H. W. Beecher.

"The light of friendship is like the light of phosphorous, seen plainest when all around is dark."—Crowell.

The engagement is announced of Edith Madeline, daughter of Mrs. Burkitt and the late Fredk. Burkitt, of Brandon, Manitoba, to Joseph Clarence Cowie, Brampton, son of the late Mr. and Mrs. J. Cowie. The marriage will take place the early part of July.

AGED MAN FOUND

Brantford.—G. W. S. Dawson, aged former Owen Sound newspaper publisher, missing from his home here since last Saturday, is safe and well in Malton, northwest of Toronto, according to a letter received here today. No reason was given for his sudden departure. Police had been asked to search for him.

LET US SMILE

"Tell your boss I've come to see him," said a tall, broad-shouldered man, bursting open the door of the clerk's office. "My name's Daniels."

The office boy, a puny little fellow, gazed awe-stricken at the visitor.

"You're Mr. Daniels?" he exclaimed. "How very awkward."

"Awkward? What do you mean? Is your boss in?

"Yes, but I've got orders to throw you out."

HUTTONVILLE

Huttonville school trustees must now proceed with the building of a school to house pupils who have had temporary accommodation since the beginning of the year in the Orange Hall of the village and in the home of Angus McMurchy.

Overtures made to ratepayers of School Section No. 5, with which section the Huttonville school area hoped to form a consolidated school, were turned down by a vote of 41-2, following bitter attacks on the consolidated system project by Bert Snow and William J. McKinney. The refusal of the No. 5 section ratepayers was made despite the offer of the Huttonville ratepayers to pay all costs of maintaining the school for the next five years.

The Huttonville section must first obtain a school site through a board of arbitration, then build a school. It is considered unlikely that the school will be ready for the opening of the next school term, as present plans for the building call for the erection of two rooms. The section has a substantial sum of money on hand to defray costs of construction, and has already purchased a considerable amount of equipment which is in use in the temporary quarters.

PORT CREDIT

Striking the side of the bridge across the Credit River here, a motor car, stated to have been driven by John Ballantyne, of Toronto, careened down an embankment, stopping a few feet from the river's edge.

Chief Telfer Wilson laid a reckless driving charge against Ballantyne.

Local News

Mr. and Mrs. Philip Dunn and family of Weston visited with Mr. and Mrs. Fred Ward on Sunday.

The Chester family held their annual picnic at Peel Park here on Saturday.

Bethany Sunday School, near Malton, held their picnic at Peel Park, Saturday.

Mr. George James of Toronto visited his mother on the Fifth Line West, on Sunday.

Mrs. Elsie Johnston of Thistletown and Mrs. Kenneth Statia of Toronto were the guests of Mrs. O. R. Church this week.

Mr. Graydon Clipperton is home from Northern Ontario, for the summer holidays.

James L. Norton and Miss Marjorie F. Miller, both of Brampton, will be married on Aug. 7th in Brampton.

Mrs. J. A. Carroll of Brampton gave a splendid address on "The Charm of Personality" at the June meeting of Derry West Women's Institute, and Mrs. Kilpatrick gave a report of the convention held at Guelph.

Horace M. Barnes, Georgetown, and Lillian Evelyn Walsh, of Milton, were married last week by Rev. A. B. Irwin of Milton United Church.

Mr. and Mrs. William Harris, Cooksville, have moved to Guelph.

The annual picnic of St. John's Church and Sunday School, Dixie, was held at Elm Park, Woodbridge, Saturday, June 26.

S. B. Bradley has been elected president, and G. M. Smith, vice-president of the Port Credit Dramatic Society. Miss Winnifred Bradley is secretary.

A big swimming contest will be held at Port Credit on Saturday, July 3rd, with entries from many places in the Province.

Rev. J. A. McDermid of Lebanon and Miss Nora M. Horton were married by Rev. J. Elwood Mitchell of Port Credit, on June 23rd, at the home of Mrs. C. A. McLean, Mississaugn Road.

Hon. Duncan Marshall, Minister of Agriculture, will address a meeting of Farmers' Clubs at the home of T. L. Leslie, Con. 11, Esquesing, on Monday, July 5th.

The Provincial Firemen will hold their convention at Georgetown from July 30 to Aug. 2.

Erindale softball team defeated the Burnhamthorpe team last week by a score of 11-8.

Mrs. A. Tipping of Cooksville entertained fifty relatives and friends on June 19th in honor of her mother's 75th birthday.

Upon returning to the lodgeroom, a vote of thanks was passed to the minister, the choir and the officials of the Church.

The brethren were pleased to have with them, R.W. Bro. P. E. Hopkins, D.D.G.M. for this district, who has just completed a successful year.

ANCIENT GOCART

One of the most interesting exhibits to be used in the historical pageant at Dixie Old Stone Church on 3rd July, will be a two-wheeled wooden baby cart that dates back nearly a century. This has been presented to the Perkins Bull Historical Collection by Mrs. Smith, wife of the rector of St. Mark's, Niagara, who is president of his local historical association. It is a relic of pioneer days, for both the Smiths are of U.E.L. descent, and their families have been settled in the Niagara Peninsula for generations.

Everyone is welcome to this monster pioneer rally, whether they can come in old-fashioned costume or not.

Boneshakers

Mrs. Shipp and Mr. D. L. McClure are scouring the country for an old fashioned high wheel bicycle to take part in the Pageant of Progress that will be held at Dixie Old Stone Chapel on 3rd July.

If a two-seater can be unearthed, so much the better, and perhaps there is still one to be found somewhere.

It is suggested that parties who can do so, arrange to attend in old-fashioned two or three-seated democrats, gigs, dog carts, etc.

Everyone is welcome whether or not in old-fashioned costumes.

Earns High Post

R. G. McNeillie, widely known and popular Canadian Pacific Railway official, who on June 30 succeeds C. B. Foster as passenger traffic manager of the Company with headquarters in Montreal. Mr. Foster retires under the pension regulations after 46 years of service. Announcement of Mr. Foster's retirement and Mr McNeillie's promotion was made by George Stephen, traffic vice-president of the Company.

Local News

Rev. J. Y. Fraser is driving a new Chevrolet sedan. It's a beauty.

R. D. Fleming, Brampton, has made an assignment for the benefit of his creditors.

Rev. E. A. Pinkerton of Fonthill has accepted the invitation to become pastor of Brampton Baptist Church.

The grandstand on Georgetown Fair Grounds was destroyed by fire on Saturday, with a loss of $1500.

William Irwin, 86, of Bolton, passed away in Toronto on June 27. He was buried at Bolton.

Parkdale Baptist Church had a picnic at Peel Park, Streetsville, on Saturday.

Mr. Craib of Woodbridge has erected 270 rods of wire fence on the Broadcasting Corporation Company's property at Hornby.

W. L. Black of Oakville and Esther Bardoe of Milton were married by Rev. Canon Naftel, June 19.

R. G. Liddell of Beamsville and Eleanor M. Linham of Milton were married on June 19 by Rev. Canon Naftel.

A bicycle meet will be held at Georgetown on Thursday, July 1st.

The Galbraith Centennial Year Re-Union will be held at Galt on Saturday, July 3rd.

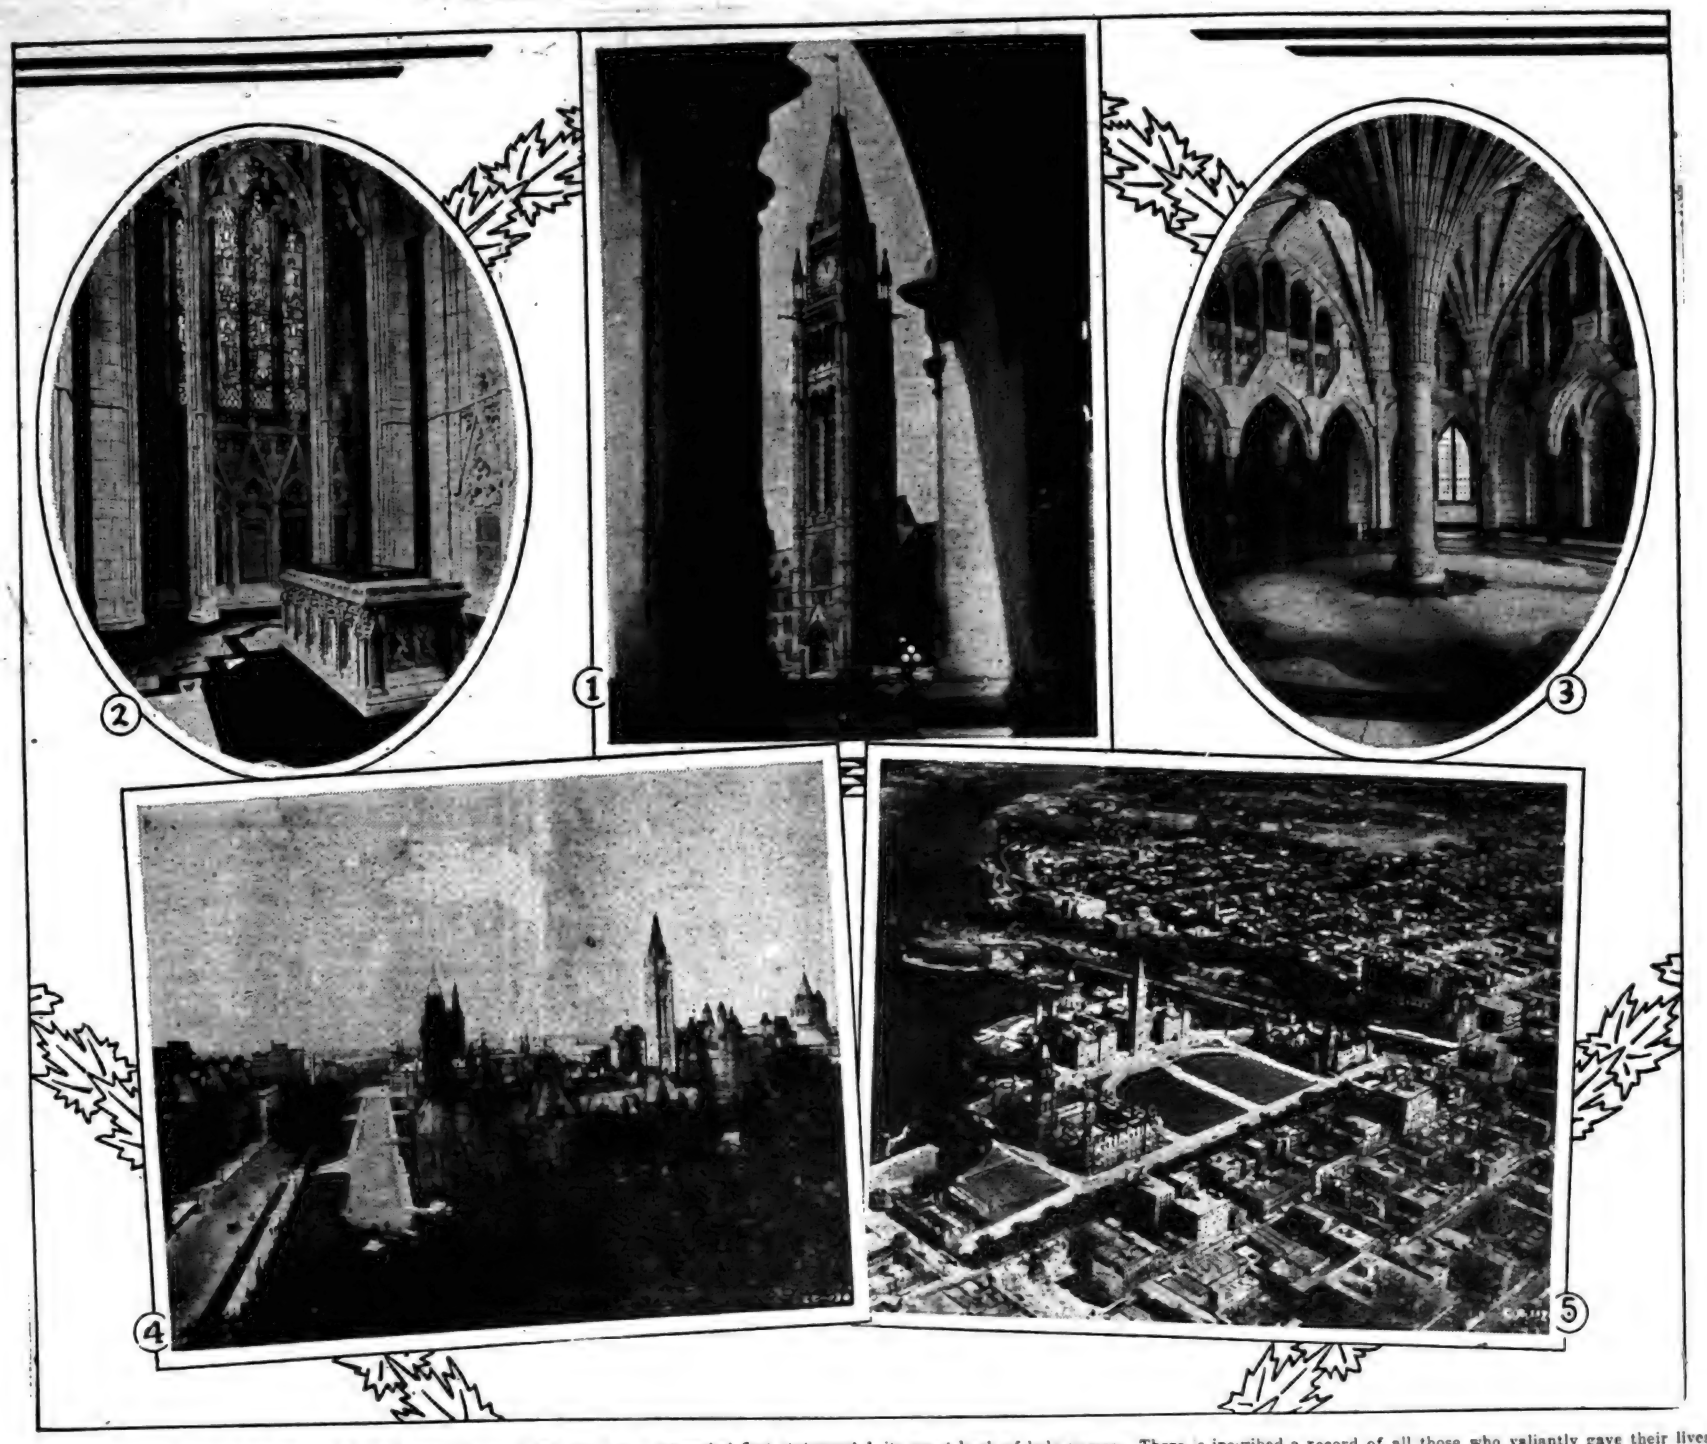
Mr. Anthony Leece is doing some building for Mr. Jack Miller, R.R. 2, Streetsville.

Dr. and Mrs. Harvey Cameron of Clinton, N.Y., visited his grandmother, Mrs. M. E. Falconer.

A number of Oddfellows from Toronto District No. 37 came to Streetsville Tuesday night and visited the local lodge. Games were indulged in and refreshments served.

Mrs. R. H. Greig and Mrs. W. Faulkner have returned home after visiting friends at Hamilton.

It is reported that some person has been stealing milk from doorsteps in the center of the town. It will not be good for the guilty party if he gets caught.



We hear that one of our High School boys gave an address on "Atheism" last week at the school.

Mr. W. E. Watson and daughter, Miss Dora, attended the funeral at Brampton, on Thursday, of Mr. W. M. Reid, employee of the Bell Telephone Co., who was very popular with telephone people.

Canada Passes Another Milestone

Where The Laws Of The Land Are Devised

In the Entrance Hall of the House of Parliament (upper left) there is a triumphal first statement of the gothic theme that re-asserts itself in every corridor and chamber of the splendid buildings as one eloquent figure haunts a fugue.

In the centre is the peace tower, fittingly framed between the vaulting lines of a shadowy arch. High up in the tower is the Memorial Chamber (upper right) in which the Altar of Remembrance stands with its great book of holy names. There is inscribed a record of all those who valiantly gave their lives for Canada in the Great War.

Below are two aerial views of Ottawa. From them it may be seen how well the city was planned. The Government buildings stand on the very summit of the hill. Beyond them a precipitous cliff falls away to the river.

Some Facts About The British North America Act

It brought about the union of the provinces of Canada, Nova Scotia and New Brunswick into one Dominion, forming them into four provinces of Ontario, Quebec, Nova Scotia and New Brunswick.

It vested in the Queen and her heirs the executive government and authority over Canada.

It established the Privy Council of Canada "to aid and advise in the Government."

It vested in the Queen and her heirs the Command-in-Chief of the Land and Naval Militia and of all the Naval and Military Forces of and in Canada.

It established the seat of the Government at Ottawa.

It provided that Parliament must sit at least once every year.

It provided that senators must be:

"Thirty years of age:

"British subjects by birth or naturalization.

"Legal owners of lands worth $4,000 above all mortgages and charges in the province for which they are chosen.

Owners of real and personal property worth $4,000 above all debts.

Residents of the province for which they are elected, and in the case of Quebec residents of the electoral divisions for which they are appointed.

A senator is appointed for life, although he may resign. His seat becomes vacant if he is absent for two consecutive sessions or makes an oath declaring his allegiance to any Foreign Power, or is adjudged bankrupt, attainted for treason or convicted for felony or ceases to be qualified by property ownership or residence.

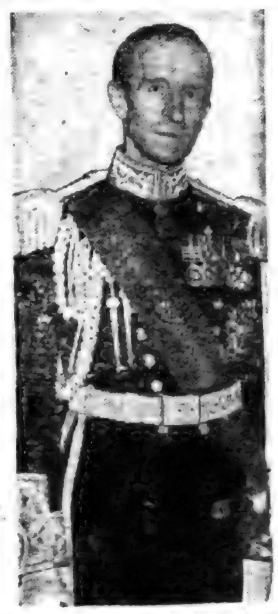
The Governor-General under the Great Seal of Canada appoints the Speaker of the Senate, but the Speaker of the House of Commons is appointed by the members of that House.

The House of Commons may sit for five years without appeal to the people but no longer.

The number of the House of Commons is determined by the census, and Quebec always has 65 members and each of the other provinces has a number of members which bears the same proportion to the number of its population as the number 65 bears to the population of Quebec. Readjustment of numbers cannot take place until the expiry of a sitting parliament.

The Governor-General has power to assent to all bills passed by both of the Houses in the name of the Sovereign or he can withold that asent or reserve the bill for the signification of the Sovereign's pleasure.

The Lieutenant-governors of the provinces are appointed by the Governor-General and hold office during his pleasure. Their salaries are paid by Parliament.



The salary of the Governor-General is fixed at ten thousand pounds a year (about $50,000) payable out of the Consolidated Revenue of Canada.

Special provision is made in the B. N. A. Act for the admission of Newfoundland, Prince Edward Island, British Columbia and the Northwest territories.

Under this Act Canada pledged itself to build the Intercolonial Railway.

Sir John A. Macdonald, Canada's First Prime Minister

Lord Tweedsmuir, the present Governor-General of the Dominion.

Canada Produces

Canada leads the world in the manufacture of pulp and paper with an export value of over $300,000,000.

Canada has beneath her soil one-sixth of the total coal supply of the world.

90 per cent. of the nickel of the world.

85 per cent. of the asbestos of the world.

55 per cent. of the cobalt of the world.

10 per cent. of the gold of the world.

9 per cent. of the lead of the world.

8 per cent of the silver of the world.

Vital Statistics Are Kept By Provinces

Since Confederation each of the provinces has enacted its own legislation regarding vital statistics and administered such legislation in its own way, but the provinces were not equipped to gather and compile all the information that should come under this head not until 1918 when the Dominion Bureau of Statistics was established in Ottawa, following enactment of the Vital Statistics Act, were these facts handled through a central office.

The plan laid in 1918 provided that from 1921 to 1925 all the provinces except Quebec would submit vital statistics to Ottawa, where they would be compiled on a uniform basis. Since January 1, 1926, Quebec has been included in the registration area.

Today it is possible to learn without leaving the capital not only how many births and deaths there are daily or annually in any part of the Dominion, but a thousand and one other facts as well—even to the amount of money annually paid in alimony.

O CANADA!

(Words by R. Stanley Weir)

O Canada! Our Home and Native Land!
True patriot-love in all their sons command.
With glowing hearts we see thee rise,
The True North, strong and free,
And stand on guard, O Canada,
We stand on guard for thee.

O Canada, glorious and free!
We stand on guard, we stand on guard for thee!
O Canada, we stand on guard for thee!

O Canada! Where pines and maples grow,
Great prairies spread and lordly rivers flow,
How dear to us thy broad domain,
From East to Western Sea,
Thou land of hope for all who toil,
Thou True North, strong and free!

O Canada! Beneath thy shining skies
May stalwart sons and gentle maidens rise,
To keep thee steadfast through the years
From East to Western Sea,
Our own beloved native land,
Our True North, strong and free!

Ruler Supreme, who hearest humble prayer,
Hold our Dominion in Thy loving care,
Help us to find, O God, in Thee,
A lasting, rich reward,
As waiting for the Better Day
We ever stand on guard.

O Canada, glorious and free!
We stand on guard, we stand on guard for thee!
O Canada, we stand on guard for thee!

Hon. Mackenzie King, Prime Minister

HER KNEES SWELLED WITH RHEUMATISM

To Go Upstairs Was Agony

There is nothing in which rheumatism is a greater handicap than in doing ordinary household duties—kneeling, stooping, running up and down stairs. How to overcome that handicap, and relieve rheumatic aches and pains, is the subject of the following letter:—

"I have been taking Kruschen Salts for three months. When I started, I had rheumatism in both knees. They were very swollen. I could not rise from a chair without assistance, I could not kneel, and to go upstairs was agony. Now I can run upstairs and kneel as much as I like. Since I have taken Kruschen, I can work like a horse."—(Mrs.) H.S.

Two of the ingredients of Kruschen Salts are effective solvents of uric acid. Other ingredients of these Salts have a stimulating effect upon the internal organs, and assist them to expel the dissolved uric acid from the system.

R.C.M.P. Detachment Feature At C.N.E.

The all-star detachment of the Royal Canadian Mounted Police, which was a brilliant feature of the recent Coronation parade in London, and which thrilled New York at the Madison Square Garden Horse Show, is being specially "prepped" for the Canadian National Exhibition.

Permission has been granted by the Federal Government for the attendance of this extraordinarily fine unit of thirty-two and their carefully selected horses throughout the entire period of the Exhibition, where they will be one of the new attractions at the grandstand show. This detachment of "Scarlet Riders of the Plains," with all they represent of romance and tradition, unquestionably is the finest turnout of the famous "mounties" ever presented for public approval.

The horses alone would be an attraction anywhere.

Only 220 horses are now used by "The Mounted," the expansion of the service and its duties having resulted in the acquisition of four hundred and seventy-five motor cars and over one hundred marine vessels and powerboats. Airplanes, too, now have entered into the patrol service on the Atlantic and Pacific seaboards but the unit to be seen at the Exhibition with their magnificent highly trained horses, will represent the world-famous force which was organized in 1873, to establish and maintain law and order on the plains of the then Northwest Territories.

Newspaper Man Of Old School

(Maclean's Magazine.)

Harry N. Moore is dead in Philadelphia. Few of the younger generation knew him, or perhaps ever heard of him, yet he was of that colorful school of newspaper correspondents who, in days past, made journalism a career of adventure.

A son of the Rev. T. Albert Moore, noted Canadian divine, Harry Moore was a product of the Toronto Telegram, went overseas in 1914 as a war correspondent of the Montreal Star, later joined the Princess Pats, won a commission on the field.

Then began a curious phase of his career. The old Dublin Freeman's Journal, declining from its once great fame, wanted somebody to inject new life in it, and its then proprietor, a Major Fitzgerald, meeting Moore in France, took him to Dublin to become the Freeman's managing editor.

The Freeman's Journal, a Nationalist's journal, was steering a desperately difficult course between Sinn Fein and the Black and Tans. Night after night, Moore sat at his desk with a revolver beside him. The Freeman refused to lower its colors for either side; the penalty was seized forms of the paper, stoned windows, smashed presses. Moore lived in a Dublin suburb. Night after night he drove home through the streets without the police protection that was offered him; lived for months on end with threats against his life.

Eventually the Freeman died, after which Moore acted as correspondent for the British United Press, lived in Paris, eventually found his way to the United States. He was engaged in newspaper work in Philadelphia, but mostly in obscurity and in declining health. He was still a young man—but some of his years had been long.

Plans World's Widest Street

Five blocks of buildings in the heart of Buenos Aires are to be demolished in preparation for the construction of a new north-south avenue, which will be 450 feet wide from pavement to pavement. It is asserted that it will be the widest road in the world.—London Times.

SLICED VERY THIN

By Sixbits

"No Matter How Thin You Slice It — It's Still Bologey"

For the first time in almost ten years a man who looks like a real fighter is wearing the heavyweight crown; for while attempts will undoubtedly be made to belittle Joe Louis, he seems to have what it takes. And when, if and as he meets Maxie Schmeling, we don't mind going out on the bough and predicting that Joe will take the German like Wally took David.

• • •

Looking over the champs since Gene Tunney decided that he would rather have a million bucks and his senses than keep on until his eggs got addled, it must be admitted that they are a fairly scurvy crew.

• • •

First of all they elected Jack Sharkey and Max Schmeling and said that whichever of the two could win would be declared the boss of the heavies. And the aroma of that fight still lingers on like the perfume of a fish and chip emporium on a torrid July day.

• • •

That, in case you disremember, was the fight where the referee awarded the duke to the German on a foul four minutes after he had been knocked flat on his sit-down.

• • •

Then, six months later, the same New York Athletic Commission—or Percentage—which had "elected" Maxie to the title dethroned him because he refused to fight a return bout with Sharkey—and half a year later nominated the latter as champion.

• • •

In 1932 this precious pair met again, and this time Mr. Sharkey won a decision in fifteen rounds.

• • •

A year after than came the "fight" between Primo Carnera and Sharkey at the Long Island Bowl, when the huge Italian was probably the most astonished man present—which is saying a lot—when he knocked Sharkey out with the breeze of a right uppercut by as far as we personally are distant from being solvent.

• • •

Three years ago this month—Maxie Baer—billed as Jack Dempsey the second, probably because he had the same number of eyes and ears as the old Mauler, met big Primo, for the title. The big boy from Mussolniville was up and down like a penny stock—being knocked down, or falling down twelve times in eleven rounds, a fractured ankle very likely being of little help to him.

• • •

That made Mr. Baer—Heaven help us—holder of the crown formerly worn by Corbett, Fitzsimmons, Jeffries, Johnson, Dempsey and Tunney—a belly laugh if ever there was one.

• • •

In June, 1935, for no good reason, Jimmy Braddock was tossed in against Baer—and most folks though it was similar to tossing a juicy Christian to a starving Neronian lion. Braddock was supposed to be all washed up—but he wasn't nearly as thoroughly washed up Baer was burned out. And at the end of fifteen rounds Mr. Braddock discovered himself—much to his own amazement no doubt—the champion.

• • •

Two years he held the title—about as unproductive a two years as a champion ever spent—for his management didn't even seem to have sense enough to gather a few pickings in the way of vaudeville, moving picture, and exhibition ring engagements. It is said that the $31,000 which Braddock earned for beating Baer has long gone the way of all dough, and that he had bitten into Promoter Mike Jacobs very heavily before Tuesday's fight—a bite which will, naturally, have to be plastered out of the takings of the Comiskey Park brawl.

• • •

So now Joe Louis—"no black man will ever again be allowed to hold the title"—is the boss of the heavyweights—and from present indications should hold that title just as long as he cares to keep in reasonably decent shape.

• • •

As we said before, attempts will be made to belittle Louis and his abilities and achievements—just as was done in the case of Jack Johnson, in the opinion of many, including the present commentator, the greatest heavyweight who ever drew on a glove.

• • •

But Joe is a real fighter—make no mistake about that—and the way he softened Braddock down, taking no chances on a stray shot, and then lashing out so suddenly when the precise moment came, was a real masterpiece.

NEWS PARADE

Commentary on the HIGHLIGHTS OF THE WEEKS NEWS ---

By Peter Randal

Spanish Incident

Buried in the week's news, a very small item announces that 104 Americans, volunteers in the Spanish Loyalist armies, are believed drowned from the steamship Ciudad de Barcelona. The ship is thought to have been torpedoed in the open Mediterranean, between Barcelona and Valencia, by a foreign submarine.

Back in 1915 a similar incident occurred when the Lusitania was sunk by a German submarine. Americans lost their lives and a nation, which had been wavering in balances weighted for the Germans, was brought into action against them. Today, the same violation of the laws of the high seas bring nothing but a mention. Perhaps it is an indication that wars have not always been entered from a sense of outraged honor but after a cold consideration of the chances for success. Right now no one wants a war, but the feeling persists that it is not because of honor but rather a desire to live and wait—until the guns are ready.

Popular Trend

Spanish political fashions—whatever their doubtful popularity at home are beginning to go abroad. For a year and fifteen days, a mild mannered little man tried to steer France through shoals both foreign and domestic. He tried to give the working man a forty-hour week, higher wages, social security. This week he was forced to admit defeat and a deficit of $1,800,000,000, for the past six months. Apparently, the average Frenchman doesn't want the things ex-Premier Blum tried to give him. In any event, the little man was turned down by the French Senate when he asked for sweeping powers to level the franc and to secure fresh revenues by control of foreign trade and taxation. Now, they have a Popular Front in France, a mixture of Socialists, Communists, and Radical Socialists led by Camille Chautemps. As usual, Chautemps is optimistic about the future of his government, but it remains to be seen whether he can beat a record of one year and fifteen days—. Twice premier before this present summons, Chautemps' last government, in 1934, lasted two months.

Share The Land

Germany has a new "share the land" plan. The government has announced the redistribution of thousands of acres including much property formerly belonging to the Church. Small holdings will be laid out—holdings grouped into state controlled collectives for use of equipment and disposal of produce. About the only difference existing between the German plan of socialization and the Soviet plan of state ownership will be the nominal ownership of the land by the peasants. Since this ownership will depend entirely upon the use to which they put the land in the opinion of the government, it will readily be seen that the difference is more in name than in fact.

Soviet Achievement

Great things are being achieved by the Soviets and not only in the realm of economic and political science. Last week, three Russian airmen left Moscow for San Francisco by way of the North Pole. After sixty-four hours in the air, they landed just 580 miles short of their goal. The flight was daring but more than that, it was spectacular in the amount of preparation and careful research behind it. For years, Soviet airmen and scientists have been studying weather and flying conditions in the Arctic. Bases have been extended until quite recently one was established at the Pole itself. This last weather observation post, located on floating ice at the world's peak was of invaluable aid in the final plotting of the successful flight. The Russians are justly proud of the work of their scientists and airmen. Their achievement marks a new departure in aviation.

3 Days to Europe !

While the Russians are engaged in the development of a regular air route across the roof of the world, plans are going forward rapidly for the testing of regular trans-Atlantic flight. Simultaneously on July 5th, planes will leave Ireland and the shores of Newfoundland for experimental flights which, it is hoped will result in the establishment of regular air schedules across the last great ocean.

Sky Conquor — And Safety

At such a time, it is interesting to know something of the equipment that is making long distance flight over land or water such an ordinary part of our lives. There is, for example, just brought into service for transcontinental flight. The new plane will shuttle from New York to Los Angeles in slightly over fifteen hours, carry twenty-five passengers and cruise at 218 miles per hour. Comfort, awake or asleep, will be comparable to the best on the ground. Then, there are the new "Ensign" liners, fourteen of which are under construction for Imperial Airways. These twenty-ton, four-motored giants will see service on the European air lanes, to Egypt and farther afield to Calcutta. Luxury and comfort will be the last word while the safety reserve will be greater than that embodied in any ship ever built. The world is surely shrinking—sometimes we think it is shrinking too fast for comfortable living with the neighbors.

Sky Adventuress

Despite the advance of science, there are still adventurous souls on the skyways of the world. At this moment, somewhere over the Pacific Ocean, a woman is flying to keep a speaking engagement in Los Angeles on July 28th. There may be storms or a hundred and one things to prevent her arrival, but Amelia Earhart has calmly planned what she will do when she reaches the American continent. Miss Earhart is expected to keep a radio engagement on Monday night. Lux Radio Hour, at nine!

Amos n' Andy

And, speaking of radio. . . children who have been born during the past eight years will probably remember to the end of their days, the antics of Amos 'n' Andy. The famous pair have just announced the end of their long association with the Pepsodent Company to take place New Year's Day. Right now, they are looking for a new sponsor.

Land of "Never, Never"

In England, the creator of "Peter Pan" has just taken the last journey into the land of "never, never." Sir James Barrie is dead but, wherever Christmas is observed and there are children, his memory will be kept in a little place apart from all the other artists of his day. "Peter Pan" ranks along with "Cyrano" and "Hansel and Gretel" of the children's Christmas musical world. It is interesting to know that children, whenever they go to see their favorites, Peter and Wendy, will be helping others of their kind. Some years ago, Barrie gave the rights to Peter Pan to the Great Ormond Street Hospital for Sick Children, in London, England.

Women on the Tee

We have no intention of prying into the feminine consciousness to ascertain, if possible, why women think they can play golf. There are not so many illusions left, anyway, and if women are able to persuade themselves they can play a game which has tried and licked to a frazzle the souls of many able-bodied men, it ill becomes an academic observer to take them by the hand and gently but firmly explain the folly of their conceit. We intend to leave this question of women's golf to a higher, yes, the highest tribunal. We shall leave it to that court of last resort, from which there is no appeal. Let the score-card pronounce the verdict, as it has in digits that blister in numerals that burn.—St. Louis Globe-Democrat.

BLACKHEADS

Blackheads simply dissolve and disappear by this one simple, safe and sure method. Get two ounces of peroxine powder from any drug store, sprinkle it on a hot, wet cloth, rub the face gently—every blackhead will be gone. Have a Hollywood complexion.

Issue No. 27—'37

A—1

for STIFFNESS

Plenty of Minard's well rubbed in soon eases you right. Soothe the sore part with warm water before you start.

You'll soon limber up !

MINARD'S "KING OF PAIN" LINIMENT

HAVE YOU HEARD

Mr. Pratt—"I'm very much in love with Miss James. Do you think she will accept me?"

Miss Harris—"Don't let that worry you. She always accepts."

When a man comes a long distance to make a speech he generally makes the speech as long as the distance.

Foolish Neighbor—"Do you think that baby of yours will ever make his mark?"

Fond Father—"Make his mark? You ought to see the walls of our home."

You can't blame the doctors if they do sometimes hurry our demise a little; about the only way you can collect a doctor's bill from some people is to collect it from their estate.

Mother — "Now, Junior, you've made me lose my temper."

Junior — "Shucks, mother, that ain't no loss."

Often the trouble with a beau is that he won't stay tied.

A rumor is about as hard to unspread as butter.

A wise wife keeps her temper and her looks.

Borrower—"Will you lend me $20 for a week?"

Let's Not Complain

We all want something we can't have, that's just the plan of life.
Why our desires prompt every scheme, activity and strife.
A baby reaches up and cried for something it can't touch;
And, all through life, things out of reach are those we want so much.
Desires bring forth ambition and oft'times this means achievement.
Our hope, in any aim, gives us more pleasure than bereavement.
So, though our hearts have guided us toward goals we did not gain—
In gratitude for joys we found in hopes—let's not complain!—I.M.

Lender (counting out the money)—"Sure."

Lender (speaking again as they parted)—"Remember, that's only for a week."

Borrower (turning livid red, and screaming)—"You'll get your money. Stop hounding me!"

Some of the men who shape public opinion are bum sculptors.

School Teacher—"Your little girl is rather backward in her reading."

Father—"Backward, eh? I suppose she takes that after her mother. She always reads the last chapter first."

If you think you're not a clock-watcher, remove the clock for a few days.

Read it or not!—William Tell is a myth.

Visitor—"My name is Smith, and. ——"

Native—"You have my sympathy, of course. But, really, I don't see how you can blame me."

A friend of ours who teaches in a grade school in a city that shall be unnamed, told us that one of the parents of the neighborhood, probably one whose little Willie had finally been caught stealing examination questions, had been complaining that the teachers in that school were being paid too much. The complaint was overheard by the janitor of the school, one of those long-suffering, patient fellows to whom the teachers confide their woes. "Say," he sputtered, "it's worth all they get just to smell them kids, let alone learn 'em!"

Husband—"I thought you said you bought low shoes the other day?"

Wife—"I did."

Husband—"They've deceived you again, my dear. The bill came in today and they certainly were high ones."

Clipped:—One thing you can always get plenty of free help to do is wasting time.

Mrs. Rives—"I am very pleased with my new cook."

Mrs. Bridges—"How long have you had her?"

Mrs. Rives—"Her day will be up tonight."

Well Expressed

"Antiquated as may seem this philosophy," says Sir Edward Beatty, "I still believe that the road to maximum wealth and contentment is by the simple process of providing to every man and woman who wishes to earn the opportunity to do so."—Niagara Falls Review.

Beaver dams were important and helpful in controlling erosion in this country before man's arrival.

A MODERN SCHOOL BUILDING FOR STREETSVILLE

By J. H. Craig

The civic pride of a municipality and the status of its citizens is reflected in its public buildings, and a town or village which has good schools and good churches is one which attracts news residents of the better class; residents who spend their money in the local shops and who in many ways contribute to the wealth of the social and economic life of the community. In such centres land appreciates in value and the standards of living are high.

Streetsville, a suburban municipality near a great city and a potential residential district for many city workers, enjoys a wealth of natural advantages. Its setting on the banks of the Credit can hardly be equaled, and its tree arboured streets and well kept residential properties invite the visitor to make it his home. The churches are adequate, but the schools, both of which are obsolete, fall short of the high standards set in other respects. The logical time for replacement was some six or seven years ago but at that time depressed business conditions resulted in a curtailment of all public expenditures and nothing could be done.

We are now entering a period of prosperity and with prosperity, higher prices. Some advance has already occurred, but we are still far short of the 1926 price level. A failure to take advantage of present day building costs to replace the present obsolete school buildings with a modern structure would result in increased taxation at a later date to pay for a building at relatively higher costs. The greater cost is not so easily computed. It is none the less real, however, and it is a cost that the children of to-day must pay to-morrow when they are thrown into competition with others who have been educated under more happy conditions.

No school can attain a high standard of proficiency when its classes are in separated buildings and no high school which served well enough sixty or seventy years ago, when educational requirements were less complex, can serve adequately to-day. School buildings leave their mark on the teaching staffs and pupils alike, and high academic standings cannot be expected where buildings and equipment fail to inspire a high standard of work.

The new school buildings which will house both public and high school training, will reduce operating expenditures to a minimum and will provide facilities for other forms of education of equal importance today to the "book learning" type of education considered to be adequate in the past. Secondary schools are no longer considered to be merely a stepping stone to the Bachelor's degree. It is recognized that they must also be a training ground for manual and domestic pursuits and for business life which so many of the students eventually enter.

The new idea of Functional Education will have its expression in the functional plan and design of the building itself. Probably for the first time in this province has such stress been laid upon functional requirements.

The building, except for the utilizing of mezzanine space off the stair landings and a basement heating plant, will be entirely on two floors, without a basement. The ground floor will contain the four public school class rooms and the second floor the three high school class rooms and science laboratory. This main unit of the school will house those functions which are primarily academic.

Separated by a corridor on the ground floor and extending towards the rear, a one story wing will accommodate the domestic science room, the manual training shop and the combined auditorium and gymnasium. Some of us who did not enjoy the educational advantages which such accommodation affords may be disposed to regard these additions to the school building with distrust and as frills which might well be dispensed with. The truth of the matter, however, is quite to the contrary. Whereas a primary education is essential for every child, something of greater importance is a training in getting on with his fellows in the game of life. The gymnasium and auditorium provides the training ground for gymnastics, competitive sports and for debate, dramatic and musical productions and for assembly and entertainment. An assembly room where the entire school can be brought together by the principal is an indispensible factor in creating a fine school spirit and good discipline. Separate boys' and girls' dressing rooms equipped with showers, are adjacent to the gymnasium and also may be used in conjunction with the stage, when the gymnasium is used as an auditorium.

So much importance is attached to manual training and domestic science by the Provincial Department of Education, that to ensure that the necessary accommodation is provided, a money grant not exceeding ten thousand dollars will be given by the Provincial Government to defray the cost of providing accommodation, and also a large money grant to defray the cost of equipment.

The school will contain modern boys' and girls' toilets separate for the high school and public school. Teachers' rooms, a small library and accommodation for business training will also be provided.

The building will be constructed of brick and the window frames and sash of pine. The corridors and staircases will be of fire-resisting construction as will the partitions between class rooms. The accommodation for cloaks will be in the rear of each class room in the public school rooms, and in steel lockers located in the corridors for the high school rooms.

Where suitable local materials and labour are available they will be employed in the construction of the building, although tenders for the contract will be invited from a group of dependable contractors in order to obtain a building at the lowest cost.

Our Manitoba Letter

Clanwilliam, Man.,
June 16, 1937.

Dear Editor:

Here we are in our summer cottage once more. We left Winnipeg, June 19, in the afternoon, very warm and fine when we left, but after we left Headingly a perfect gale of wind struck us, and Mr. Shaver had the greatest difficulty to keep th car on the road; could make very little headway. He was blaming the gas and I don't know what else, but at last came to the conclusion it was the wind—and I will tell you why we came to that conclusion. Whenever we passed a bluff—the old car would jump ahead in fine style, but it kept with us all the way to Poplar Point, where we spent the night with Mrs. Hextall. Wednesday it was alright, when we started on our journey again; took the MacDonald short cut to Gladstone; it lessens the distance by fourteen miles. Reached Gladstone at noon, had dinner with Mrs. Hyndman, an old friend. When we arrived at Minnedosa, we found our daughter, Mrs. Bailey, up to her eyes in work, cooking for twenty-six men, who had torn down the Bawlf elevator and building a new and larger elevator on the same ground. And there is talk of pulling down the Ogilvie elevator and rebuilding. The C.P.R. is building a coal dock. Minnedosa was the busiest place I have seen for many a long day.

If the weather is favorable, Manitoba will have a big crop. The grain was well away, covering the ground very evenly mostly all the way up. Around Neepawas it seemed very forward. We stayed all night with daughter; came home Thursday afternoon, and found everything all right. Friday, Saturday, Sunday, Monday, it rained every day, so the land has had a good deal of moisture added.

We found every one of our neighbors fairly well. Mrs. George Fletcher has passed away, after a lingering illness. Mrs. Madill, who was 88 last month, is just as busy as ever. She does all her own baking, though she has a girl, but she will never yield the cooking to anyone, as long as ever she can toddle about. She knows Mr. Shaver's weakness for fresh biscuit. She got busy at the biscuit and a bannock, and was going to make him pancakes. I said, don't do it, he will never eat a pancake when he has biscuit. Well, she said, next time. But she is such a dear old lady.

There was a frost that hurt the gardens last week, but does not seem to hurt the grain.

The school children had a field day at Erickson, with fifteen schools, last Monday. It had been postponed several times on account of the rain.

Children are busy collecting gopher tails. They get a cent for each tail.

The SNAPSHOT GUILD

Surrealism Goes Photographic

TWO WEEKS WITH PAY

This table-top photograph was taken with the aid of two photographic floodlight bulbs, "spotted" on the subject at different angles; exposure 30 seconds at f.22. The candles were then lighted, main lights turned off and the lighted candles exposed for 2 seconds. The following text will (it is hoped) explain the title.

"SURREALISM. A French movement in literature and art influenced by Freudianism, purporting to express the subconscious activities of the mind by presenting images without order or sequence, as in a dream."

SO says the dictionary, but we beg leave to amend by inserting the words, "and which has invaded the field of photography." If you don't believe it, cast a psychoanalytical eye on the above photograph and consider whether it does not truly fit the amended definition.

"Images without order or sequence as in a dream." Who will contend that the images in the above picture do not fit that part of the definition?

"Purporting to express the subconscious activities of the mind." Who dares to say that these images do not express subconscious activities quite as intelligently as any of those depicted in the surrealistic concoctions of the painters?

Oh, yeah, but what activities and how?

The fair photographer who took the picture entitled it "Two Weeks With Pay," meaning a vacation, and here, believe it or not, are the subconscious activities purported to be expressed:

The washboard is the psychic symbol of labor left behind. The open handcuffs express release from said labor. The liverwurst ring represents thoughts of summer hotel menus. The bird's nest bespeaks an anticipation of communing with nature. Although the egg in the nest is really a golf ball, thus seeming to show a certain confusion of thought, it is explained that a bird's nest signifies a "birdie" with which a golf ball is always hopefully associated. The festive candles clearly represent the highlights of the vacation but the unconscious cerebration which evolved the electric fan, threatening to blow the lights out, was caused by the thought of probably keeping cooler by staying at home. Could there be any better example of the Freudian frustration complex?

To those who do not like "Two Weeks With Pay" as the title, the suggestion is made that they may try "Maternal Instinct" and figure it out for themselves.

In any case, the picture serves to show that any capable amateur photographer can join the surrealist school without apologies. All you need to do is to pick up a number of incongruous objects about the house, place them in juxtaposition on a table top, spot-light the scene with a couple of photographic floodlight bulbs, take the picture and give it a name. Will that be fun? And if anyone challenges it as not being Surrealism, you can call it Dadaism, or what have you in artistic cults, and get still more fun out of the argument.

139 John van Guilder.

IT PAYS TO ADVERTISE

ADVERTISE IN, THE REVIEW

Water Clock Was Used by Chinese, Hindus Ages Ago

An ancient time-telling device was the clepsydra, or water clock. Like the sundial, it was invented so long ago that there is no authentic record of its origin, observes a writer in the Washington Star. It was used by the Chinese and Hindus from the earliest times, but it was developed most extensively by those clever people, the Greeks. And they had a word for it, for the name comes from the two Greek words meaning "the thief of water." Its simplest form was that of two vessels, one of which had a small vent which allowed water to drop slowly into the other. One of the vessels was graduated, and the height of the water in it at any given time indicated the hour.

The Greeks and Romans installed water clocks in the forums or market squares of their cities, guarded by a civic officer whose duty it was to keep it filled and in order. Wealthy citizens sent their servants around to find the exact time from it, while the poorer classes were informed by the sound of a horn which was blown by the attendant "every hour on the hour." The Romans also installed water clocks in their law courts. The device was filled up when a lawyer started his oration, and when the water ran out he had to stop. "This," said a writer of the day, "was to prevent babblings, that such as spoke ought to be brief in their speeches."

Queen Bee Is Very Busy During Swarming Season

During the swarming season bees reveal most amazingly the intricate functioning of instinct, states a writer in Literary Digest. New queens have been developed in their circular cells. Quality of food determines whether an egg shall become a queen or a worker bee. Queens are fed bee-jelly (propolis) by their nursemaids, workers receive bee-bread, which is largely pollen scraped from the hairy legs of worker bees. The old queen departs with her retinue, leaves the hive to the newly hatched queen.

The virgin queen prowls around looking for the cells of unhatched queens. If the colony is large enough to permit swarming, guards prevent the virgin queen from attacking her sisters who are on the point of hatching. If the hive population is small, swarming inadvisable, the newly hatched queens battle to the death, the fittest remaining to take charge of the hive as ruthless dictator.

When the hive is large enough to swarm, bees leave the colony in clouds to follow their new queen. They gather in great clusters, clinging to one another's bodies, on tree limbs, fence posts, almost any nearby object, and the alert beekeeper must have a new hive ready to entice them into.

In a Velvet Gown

It is a far cry from the Arabs at El Fustade near Cairo to the looms of velvet on this continent, says the Montreal Herald. More than 2,000 years have elapsed since our earliest records of velvets among the Persians and East Indians. From the Arabs the art of velvet weaving went to the Spaniards, then to Sicily, and, in the Sixteenth century, into France where it developed under the skill of the most creative and intelligent hand-looms to power-looms, to meet the volume of demand, the process of weaving has gone on. Velvet is woven in two pieces at a time—face to face and cut with a knife afterward, leaving a straight erect pile—the test of all pile velvets. First, heavy thick velvets were made, later finer types of velvets known as Lyons, then chiffon velvets and after that the slenderizing, draping material known as transparent velvet.

America's Own Cabinet Styles

By the end of the Eighteenth century America had developed fine cabinet-makers and a style of her own. It is true that they were influenced by the great Georgian masters. The American designers of this period almost immediately seized the Empire styles and modified them into American Empire. In America the frills, the paint and the gilt of the French empire were dropped. The natural color and grain of the wood were brought out.

Early Washington Assemblies

The Washington assemblies in the early period of the republic were ceremonious and exclusive affairs. Admission was obtained only by cards of invitation. No gentleman, whatever may have been his rank or calling, was permitted on the floor unless he was attired in full evening dress, with pumps, silk stockings, and flowing cravat, unless he belonged to the army or navy, in which case complete regimentals were necessary.

Associated Metal With Planets

The ancient astrologers associated a certain metal with each planet. Gold belonged to the sun, silver to the moon, iron to Mars, mercury to Mercury, tin to Jupiter, copper to Venus, and lead to Saturn. Lead was a precious metal because it represented wisdom after suffering. It was believed that to wear the metal of your sign brought you good luck.

Local Items

Keep Wednesday, July 14th, open for Trinity Church Garden Party. Further notice next week.

Streetsville Juvenile Lacrosse team defeated Brock Grads last week by a score of 14—3 in a league fixture.

Notices of engagements in this paper are inserted at a charge of 50c and must be paid for..

The officers and members of the Derry West District Loyal Orange Lodge and visiting brethren will attend Divine service at the Trinity Anglican Church, Streetsville, on Sunday afternoon, July 4th. Rev. J.N. Blodgett, B.A., will delivet the sermon.

There will be a Lawn Bowling Tournament in Streetsville next Wednesday, July 7th, at 7 00 p.m. D.S.T. The Greig trophy will be competed for.

I take this opportunity of announcing to the public that on July 5th I take over the business at present operated by Mrs. Milligan, and will appreciate your kind patronage—ALICE STEEN

Miss Marion Cates of Toronto graduated at Toronto University with her B. A. certificate, before she was 20. She is a niece of Mrs Geo. Barton, Streetsville

Thirteen candidates wrote the Entrance Exams at Streetsville High School this year. Eight are pupils of Streetsville P. S.

Mary Ann Carr, 78, passed away at her home, Burnhamthorpe Road, on June 28th. Her husband died several years ago. She is survived by three sons, Howard, Lester and Norman, and two daughters, Lottie and Ann J. The funeral took place to Park Lawn Cemetery.

Mrs. Mary Chesters 91 years pioneer Streetsville resident was guest of honor and oldest member who attended the Foster family Re Union in Peel Park on Saturday

Miss Mysia Graydon has gone to Georgina House, Beverly Street Toronto, to supply for two months as Superintendent.

Mr. and Mrs. Howard Veals and Misses Marion and Katharine Veals of China, spent the week end visiting with Mr. P. Stephens and daughters Edna and Mildred. The Veals family are Missionaries home on furlough to Canada and they will be sailing back to their mission field in August

Nine members of Peel Chapter Order of Eastern Star, Streetsville attended a meeting of District No.10 at West Toronto, Tuesday night. Miss Helen Ross, retiring D.D.G.M. presided, and conducted the election of the District Deputy for 1937—38 when Mrs, Laura Cation, Toronto was chosen. Mrs. Cation is an honorary member of Peel Chapter.

Items received too late for this issue will appear next. We suppose some writers did not see our notice in last week's Review to the effect that we would print a day earlier this week on account of the holiday. The staff will not work on a public holiday—you could not expect them to

Mrs. Maria Frances Stevenson passed away in Toronto on June 28 1937, in her 73rd year. The funeral took place to Erin. Surviving are one daughter, Mrs A. W. Pengelley and a son, Mr. E.B.Stevenson, both of Toronto.

Dr. Ambrose Liston, accompanied by his father and mother, Mr. and Mrs. J.Liston, and sister Helen of Hamilton, visited friends on the 9th Line, Trafalgar, on Sunday. Mrs Liston (formerly Minnie O'Connor) was born on the 9th line some years ago. She is a sister of Mr. George O'Connor

Mrs. M.A. Stewart and Miss Mary Blaine visited at the McGregor Homestead, 9th Line on Monday

Miss Alice Dudley left Wednesday for Midland to train for a nurse.

Streetsville Juveniles had some hard luck at their first home game on Tuesday night when the Brock Grads defeated them by a goal or two.

Shower

About 100 guests enjoyed a very pleasant time on Wednesday evening June 23rd, when Mr. and Mrs J. H. Beattie entertained in honor of Miss Pearl Crozier and Mr. Joe Trimble whose marriage is an event of this week. The guests played progressive euchre the first part of the evening the winners being Mrs. J. Moore and Mr. Lancaster. Lunch was then served, after which the guests of honor were seated under a large wedding bell in the beautifully decorated room and several baskets of gifts were carried in by Miss Lois Ballinger and Master Jack Beattie. Both the young couple expressed their thanks for the lovely and useful gifts. Their friends and neighbors wished them many years of happiness

75 Teachers for Three Positions

Streetsville High School Board advertised in a Toronto paper for three teachers and received over 75 applications. The salaries asked run as high as $2700, but the Board will not pay anything near like that sum Applicants were also asked to state age and experience. Some ladies with accustomed modesty, did not divulge the number of birthdays they have been privileged to celebrate while others, probably not sufficiently versed in the intricate problems of 'rigorous precision' evidently could not concentrate sufficiently upon the amount necessary to finance their sojourn in Streetsville for ten teaching months and the other two at some high class sea side summer resort, so the matter of salary was left to the generosity of the Board of Education. Several teachers made personal applications, and looked good to those members of the Board who met them. Applications were received from Toronto, Hamilton Ottawa, Kingston, St. Thomas Brantford and other places.

The Board expects tomeet very soon to select the teachers.

Cooksville

Port Credit softball team defeated Cooksville in a return game at Port Credit on Monday evening

Miss Clara Hartsock is convalescing after her recent operation.

Mr. and Mrs. H R D.Woodall and family motored to Bognor on Sunday

Cooksville United Sunday School closed on Sunday for the summer. The School will re open in Sept.

The annual S S picnic was held at Elm Park, Woodbridge. There was a splendid attendance and all report a good time.

On Saturday evening last the close neighbors of Mrs. Wm Harris held a surprise party for her. Mrs Harris was presented with a beautiful floor lamp with indirect lighting. Mr. and Mrs. Harris left on Tuesday for Guelph, where they will make their home. They will be missed in Cooksville.

301

TERROR MOUNTAIN

By MADELEINE SHARPS BUCHANAN

Three bandits, known as Ike, Lefty and Stuttar, seize a trans-continental bus and its passengers, and force the driver to guide it up a mountainside to a lonely log shack. A raging forest fire, creeping up the mountain, threatens to trap the group. The bandits are after a secret new explosive formula believed to be in the possession of a passenger, Finley Trump, chemical magnate, and hint that they will kill him unless he "comes across". Among the other passengers, are May Lawrence, pretty trained nurse; young Dr. Nick Strand, who has been attentive to May; Miss Jones, schoolteacher; Amelia Bagnor, a mannish-looking woman; Mr. and Mrs. Kenneth Jenkins; and a small boy, Tommy Archer, traveling with his uncle.

CHAPTER III

Miss Tulsa Jones decided that the most annoying thing about the entire matter was the fact that the bandits had taken away from them everything resembling a weapon. She knew where the arsenal had been placed — in a corner of the living room, behind the battered armchair in which one of their captors always sat.

Now, if they could only get possession of those weapons—

She explored the house. During her visit to the kitchen, she noted that Stutter had placed a fresh pot of coffee on the stove. "We g-gotta stay a wake, s-some of us, all the t-time," he told her. "My j-job is to k-keep this g-going."

At nine-thirty, Miss Jones sought out Tommy Archer where he stood pulling the bark from the front door.

"Tommy, I need you to do something for me." She tried smiling at him. "It is important. When I go into the kitchen in a minute, can you attract the attention of that Stutter creature? I don't want him to see what I do."

"Sure-" Tommy's eyes grew round. "Are you going to shoot him?"

"Certainly not!" said Miss Jones acidly, then added, "I'm going out there now, Tommy. Can I depend on you?"

"Sure,' said Tommy. "I can raise a fuss anywhere."

Gun near at hand, Stutter was seated by the kitchen table, reading a brilliantly colored magazine. The coffee was pushed aside on the stove.

Tommy was punctuality itself, for Miss Jones had scarcely reached the kitchen door before an ear-splitting yell burst forth, just outside the kitchen door.

"Leggo of me!" shrieked Tommy.

With a muttered curse, Stutter sprang to his feet, grabbed his gun, and darted for the door. As he reached it, Miss Jones' bony fingers hovered for a second over the coffee pot.

"Gee!" panted Tommy, when Stutter reached him. "I got my foot in a root. A guy ran past me and I got caught in this and thought he had me!"

Every one came running, and Stutter was the recipient of a sharp reprimand from Lefty.

"Let a kid trick you like that!" the latter growled. He's up to something. You gotta keep your wits about you. And you, kid, behave yourself or we will string you up by your toes!"

"Say, how long we gonna keep this guy Trump here holding out on us?" Ike wanted to know. "I say give him the works now and make him talk. We know he's got that formula with him. We know every move he's been makin' for weeks. We can't afford to fool with this job."

"Who's foolin'?" roared Lefty. "I know what I'm doin'!"

Miss Jones, at this moment, slipped fifty cents to Tommy with the words, "Good work." And Tommy noticeably bucked up. A dollar and a half already and the night still young!

Miss Joner did not sleep on the floor that night. She merely exchanged her dress for a bathrobe, and her shoes for felt slippers, and lay down on top of the covers on her cot. Amelia Bangor slept in the bus, with a lantern burning at the door. May Lawrence had come in late from a walk with Nick Strand, but was now asleep, as was Mrs. Jenkins.

In the living room, Lefty and Stutter were asleep on couch and floor, and Ike was seated on guard before the pile of weapons, with his own gun in his hand.

Shortly after midnight, everything was quiet. Miss Jones, rising from her cot, was about to steal across the room to the door, when a strange, gurgling sound, coming from the living room, stopped her. It was the most hideous sound she had ever heard.

Standing still, she waited until silence again claimed the house, and then moved to the bedroom door and cautiously peeked into the living room. All three bandits now seemed to be sleeping soundly. Ike's head had sunk on his chest, his gun on his lap. Those sleeping tablets she had dropped into the coffee pot had done their work.

Drawing a deep breath, Miss Jones tiptoed into the living room and moved toward Ike. Reaching him, she resolutely possessed herself of his gun.

And then—as she looked at him, her hand flew to her mouth to stifle a scream.

Ike was dead!

He had been strangled with his own bandana. He had been murdered in his sleep in just the way he himself had suggested to his prisoners!

For a moment, Miss Jones stood absolutely still. She had made this murder possible. She had drugged these men! Which of her fellow bus passengers could take life like this? It was a horribly disturbing thought.

A sound from Lefty on the couch made her turn quickly and she saw that he was unmistakably waking up! He had apparently not taken any coffee!

There was no chance to possess herself of the other weapons—as she had intended—but she grasped Ike's gun as she ran soundlessly back to the bedroom.

It had not been Lefty or Stutter who had killed Ike, she felt sure. Lefty was waking too naturally, and Stutter was in a drugged sleep. The dreadful gurgling sound she had heard was accounted for. Ike had been strangling. And it had been one of the bus passengers who had done it! Which—and why?

Wealth From The Sea

A Bromine-Extracting Plant Pumps Up Other Riches

We gasped in admiration on this page some three years ago at the chemical plant which has been built at Kure Beach, near Wilmington, N.C. The mere idea of extracting bromine from the sea and selling it to gasoline refiners who would in turn pass it along to automobile drivers as a component of ethyl gasoline thrilled us. Now come the figures of production for the last 12 months.

Some 158,735,000 pounds of ocean water were pumped through the Kure Beach plant. And in all these pounds there was contained potential wealth appraised at $96,379,460. Here is the itemized statement of values:

Sodium chloride or kitchen salt, 2,140,000 tons, worth $38,200,000.

Epsom salts, 542,500 tons, worth $18,050,000.

Calcium chloride, 61,000 tons, worth $4,880,000, which, if made into fertilizer, would enrich about 1,000,000 acres of soil.

Magnesium, 48,000 tons, worth $33,600,000, enough for 1,500 million photographers' flash bulbs, 100,000 airplanes or 250,000 stratosphere gondolas.

Aluminum, 139 tons, worth $58,200, enough to make the pistons of 68,000 automobiles.

Strontium carbonate, 160 tons, worth $99,600, enough to make a million irrdescent drinking glasses.

Iron, 145 tons, worth $17,300.

Copper, 9.2 tons, worth $2,760.

Three tons of iodine, valued at $10,-300.

Enough gold to make a five-inch cube valued at $42,000.

Silver worth $29,300—enough to make a ball twenty-five inches in diameter.

All these values enumerated were thrown back. Only the bromine was extracted. The plant has been in operation three years. In that time one square mile of water 229 feet deep has been treated in the process of extracting bromine.

Nearly 10,000 Dorset, Eng., agricultural workers are to receive a wage increase of 50 cents a week giving them a minimum rate of approximately $8, the hignest ever received.

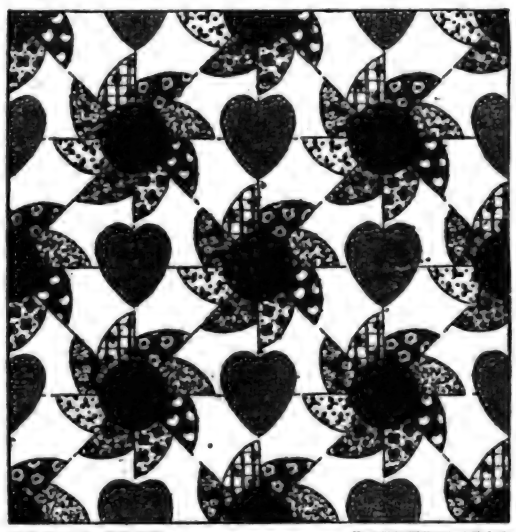
Debunkers Work On Lady Godiva

Discount Story of Her and of "Peeping Tom"

COVENTRY, Eng.— Coventry not only honors its most famous woman, Lady Godiva, but also "Peeping Tom," who was supposed to have been struck blind for peeping on her famous ride through the city streets.

Lady Godiva herself has two statues in Coventry, one in the Guildhall, the other in the Great Hall. Hundreds of tourists visit the two each summer. "Peeping Tom" is also immortalized in Coventry, presumably as a bad example, with several effigies. These are each in a different part of the city, but all purport to mark the exact spot where he was struck blind.

Both Lady Godiva and "Peeping Tom" have come in for their share of debunking in recent years. It now turns out that the legend of "Peeping Tom" did not appear in the first story of the ride, but was added years later as an afterthought.



As for Lady Godiva, a Benedictine abbey founded by her in 1043 once gave proof of her existence. That, unfortunately, was destroyed by Henry VIII, and while most people still admit that she was a real person, they doubt she ever made the ride. No documentary evidence of it turned up until 150 years after her death and such rides, detractors say, are common in old folk traditions. Lady Godiva's name, the debunkers now say, was attached to such a legend to do honor to her piety and goodness.

Million Acres To Be Vacated

REGINA.—Approximately 1,000,-000 acres of sub-marginal lands will be vacated by farmers who will be moved to more suitable ground, J. G. Taggart, provincial minister of agriculture, told a Saskatchewan stock growers' meeting here. It is hoped to complete the transfer by the end of 1937.

Last year 190 families were moved by the Saskatchewan Land and Utilization Board. Mr. Taggart also announced grazing land rentals would be reduced 50 per cent. on the 4,-000,000 acres of range land in Saskatchewan. Present rates are two cents per acre for 21-year leases and three cents for 42-year leases.

Prized by Bride and Mother Alike Is Laura Wheeler Piece Quilt

BRIDE'S PRIZE PATTERN 1506

Good luck's assured the proud possessor of this striking quilt, for what else could be foretold by its colorful, romantic hearts? Prized by the Bride and more experienced homemaker alike, this colorful coverlet is a joy to behold made of gay scraps, forming a wheel of Fortune, the hearts kept uniform in color throughout. Start on this soon! Pattern 1506 contains complete, simple instructions for cutting, sewing and finishing, together with yardage chart, diagram of quilt to help arrange the blocks for single and double bed size, and a diagram of block which serves as a guide for placing the patches and suggests contrasting materials.

Send 20 cents in stamps or coin (coin preferred), for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Write plainly PATTERN NUMBER, your NAME and ADDRESS.

Life Is Tame, Now

A cowpuncher came drifting into High River last week. His sturdy roan horse showed signs of long travel, for the horseman had just completed an arduous trip into the town from a ranch away out in the foothills 30 miles west.

Naturally, the rider's first move was to inquire of a stranger the location of the nearest livery stable?" mused the town resident, and subsequent investigation revealed that there was not a single livery stable left in High River.

Tragedy was averted by accommodating the weary horse for the night in a small barn behind a local residence.

But what has happened to the wild and woolly west when even High River—second only to Calgary as a cowtown in years past—cannot boast a single livery stable?

The wild west has certainly tamed down a lot when a "puncher can't even find a night's lodging for his horse." The gasoline filling station has evidently usurped the place of the last fragrant livery stable, and the west of the pioneers is fast becoming a thing of memory.—Calgary Albertan.

Our idea of tops in optimism would be opening a credit grocery in a trailer camp.—St. Louis Star-Times.

Woman's World

By Mair M. Morgan

It looks good doesn't it? Well, it is good, and good for you too. When you're simply at your wit's end for something for dessert, and dinner is a few minutes away, don't get frantic. You can stir a gingerbread together in a few minutes and while it is baking, whip the cream and you have a dessert that will be relished by the whole family.

We don't mean, of course, that this delicious dessert is just an emergency measure. But it can be mixed and baked so quickly and easily that it does come in handy when you're in a hurry. Its grand too, when a crowd drops in during the evening and you don't happen to be prepared for them. A rich, hot slice of gingerbread, topped with fluffy whipped cream is a treat for anyone, and a delightful change when sandwiches or cinnamon toast are the usual things served on such occasions. People like surprises and to be served gingerbread marks you apart as a resourceful and original hostess.

It won't take any longer, either, in fact not as long, to make this as sandwiches because most housewives have all the ingredients needed, on hand. It's a wise hostess who makes sure of the success of her gingerbread and other cakes by having a good brand of finely milled flour on her cupboard shelf at all times.

2 cups sifted cake flour
2 teaspoons baking powder
¼ teaspoon soda
2 teaspoons ginger
1 teaspoon cinnamon
½ teaspoon salt
1-3 cup butter or other shortening
½ cup sugar
1 egg, well beaten
2-3 cup molasses
3-4 cup sour milk.

Sift flour once, measure, add baking powder, soda, spices, and salt, and sift together three times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add egg and molasses; then flour, alternately with milk, a small amount at a time. Beat after each addition until smooth. Bake in greased pan, 8 x 8 x 8 inches, in moderate oven (350 D.F.) 50 minutes, or until done. Three-fourths cup sweet milk may be substituted for sour milk and soda in this recipe.

Whip ½ cup cream and fold in 2 tablespoons molasses. Top slices of cake with generous spoonful of whipped cream and serve hot.

All vegetables are spoiled by overcooking, the cabbage particularly so, and most likely to cause indigestion, says a writer in New Health Magazine. Instead, then, of boiling our cabbages in much water for a couple of hours, let us try the time-saving method of boiling them rapidly for 15 minutes or so in no more water than would be cooked away during this time. Thorough cutting up before cooking is helpful. A sprinkle of fresh ground black pepper and a few pats of butter added just before serving complete the matter. Fresh cabbage cooked in this way is a delicious accompaniment for most savoury dishes, or it may be served simply with grated cheese for a light yet satisfying luncheon item; or, serve with lightly fried spring onions and fried eggs; or, for a "Vegetable Dinner", along with tiny new potatoes, broadbeans, young carrots and asparagus tips or mushrooms. No protein in this "dinner"? Well, the vegetables contain a little and a tasty cheese sauce enriched with an egg yolk will make amends. A fruity sweet to follow and there is a merry meal enough for those of simple tastes and some regard for good health.

More than 10,100,000 acres in Russia infected with larvae of the malarial mosquito will be sprayed with poison dropped from airplanes this year.

Sales of liquid milk in Britain during April were 2,329,299 gallons more than in April last year, and in the last seven months have increased by 9,-195,606 gallons over the same period of 1936.

SUNDAY SCHOOL LESSON

LESSON I.—JULY 4
GOD HEARS A PEOPLE'S CRY
Exodus 1: 1-22; 2: 23-25
PRINTED TEXT
Exodus 1: 6-14; 2: 23-25
GOLDEN TEXT

"Before they call, I will answer, and while they are yet speaking, I will hear." Isaiah 65: 24.

THE LESSON IN ITS SETTING

Place:—The children of Israel lived, for the most part, during their residence in Egypt, in the land of Goshen, located in the eastern part of Egypt, north of the southern point of the Nile Delta.

Time:—B.C. 1643—B.C. 1578.

"And Joseph died, and all his brethren, and all that generation." Joseph was the one through whose prestige in Egypt the Hebrew people were allowed so many favors, strangers as they were in the land of Egypt. With the passing of any great statesman, or captain of industry, or military commander, there comes, sooner or later, necessarily, a change in the circumstances, organization, and leadership over which the deceased once so completely dominated. It is perfectly natural that the statement of the death of all those of Joseph's generation should be followed by a record of a radical change in the conditions pertaining to Joseph's people.

"And the children of Israel were fruitful, and increased abundantly, and multiplied, and waxed exceedingly mighty; and the land was filled with them." In this verse, the writer employs the very expressions "were fruitful," "increased abundantly," which are found in Gen. 1: 22, 28 and 8: 17. "This points to a strictly extraordinary or miraculous rapidity in the rate of increase, though, of course, miracle has its limits of possibility in accelerating the rate of increase through birth. The following are naturally favoring circumstances for such a rapid multiplication: the proverbial fruitfulness of women in Egypt; the peculiar fullness of vitality in the Israelitish race, which still continues; a prosperous settlement in a good land in circumstances fitted for abundant physical life."

"Now there arose a new king over Egypt, who knew not Joseph." "The Hebrew word 'arose' is almost always used to describe a new commencement, as in Deut. 34: 10; the word 'new' occurs in connection with an entire change (as in Deut. 32: 17; Judges 5: 8); while the expression 'knew not' (Deut. 28: 36) is applied not so much to absolute want of knowledge as to the absence of friendly acquaintanceship."

"And he said unto his people, Behold, the people of the children of Israel are more and mightier than we. Come, let us deal wisely with them, lest they multiply, and it come to pass, that, when there falleth out any war, they also join themselves unto our enemies, and fight against us, and get them up out of the land."

There was absolutely no justification for such a suspicious attitude toward the Hebrew people, for, in the first place, they have never been known as a warlike nation, and, in the second place, they were so favorably situated in Egypt, that there would have been no reason for their rising up to unite with Egypt's enemies. Moreover, the Hebrew people had no alliances with the nations around Egypt, and were, of all people in the world, the most independent, i.e., a people who were bound more by their miraculous out-calling by God than they were by any blood ties with other peoples.

"Therefore they did set over them taskmasters." Literally, these were "captains of labor-gangs," the word mas being "the technical term for a body of men employed on forced labor, as in I Kings 5: 13, 14, etc." "To afflict them with their burdens." The word here translated "afflict" means "to bend," "to wear out anyone's strength," and is the word used in the prophecy in Gen. 15: 13 that this would be the actual experience of Israel in Egypt hundreds of years after the prophecy was uttered. "And they built for Pharaoh store-cities, Pithom and Raamses." Pithom was a town in Goshen in lower Egypt founded by Raamses II, situated on the banks of the canal connecting the Nile River with the Red Sea. "Its ground plan was in the form of a perfect square enclosed by strong walls. Within this enclosure stood a temple dedicated to the god of the setting sun, and subterranean chambers of various sizes, quadrangular in shape, without communication with one another, and approachable only from above. These were lined with walls of brick, made some with and some without straw. There is little doubt that they were intended for the storage of grain and other provisions."

"But the more they afflicted them, the more they multiplied and the more they spread abroad. And they were grieved because of the children of Israel." The word here translated "grieved," should, more literally and more accurately, be translated "had a loathing for." "Contemptuous aversion toward aliens was always a feeling of Egyptians, and is also found among heathen. To Egyptian feeling, the aliens, especially the Semitic, were atheists, because not owning the gods of Egypt. The Israelites were the more disliked, if not abhorred, as belonging to the foreign race of shepherds. When the Hebrews grew into great physical force, that aversion deepened into dread."

"And the Egyptians made the children of Israel to serve with rigor." "And they made their lives bitter with hard service, in mortar and in brick." "The mortal (literally clay, Isa. 29: 16), would be the black Nile-mud, which was used in ancient Egypt, not only for bricks, but also for mortar: in the latter case, it was usually mixed with potsherds." "And in all manner of service in the field, all their service, wherein they made them serve with rigor." The work "in the field" consisted of "constructing canals and dams for conveying water from the Nile to the fields, and in the actual work of irrigation. This was laborious, for the water had to be brought to the high-lying fields artificially by a series of buckets attached to long poles worked on axles, by which it was gradually raised from the one elevation to another, than which nothing was so tiring in the daily work of the Egyptians."

"And it came to pass in the course of those many days, that the king of Egypt died." We do not know who this king of Egypt was. It is hardly conceivable that he could have been the Pharaoh in the first chapter of Exodus. "And the children of Israel sighed by reason of the bondage, and they cried, and their cry came up unto God by reason of the bondage." "This allusion to the complaints of the Israelites in connection with the notice of the king's death seems to imply that they hoped for some amelioration of their lot from the change of government, and that when they were disappointed, and groaned the more bitterly in consequence, they cried to God for help and deliverance."

"And God heard their groaning, and God remembered his covenant with Abraham. (See Gen. 12: 2, 3; 13: 14-17; 15: 4-21; 17: 1-14; 22: 16-18.) With Isaac. (See Gen. 17: 19, 20; 26: 2-5.) And with Jacob. (See Gen. 28: 13-15; 35: 11, 12; 46: 3, 4.)

"And God saw the children of Israel, and God took knowledge of them." Literally, "God had respect unto them." "The knowing means, not simply acquainted with the circumstances of their condition, but compassionate appreciation of it. God entered their case and looked into their heart."

New Case Carries Light Luncheons

NEW YORK. — Sports fans who cannot bear to leave the stands at boat races or tennis matches for something to eat might like to carry a light luncheon with them in a new case built for the purpose. A saddle-stitched cowhide box about ten ins. long and six ins. across can be carried over the shoulder easily on its long strap. Inside are thermos bottle and sandwich tin large enough to hold sustenance for four not-too-hungry persons.

Dangers of the Lawn

To ladies who run lawn mowers we draw attention that a woman in Hamilton cut her hand badly when working one of those contraptions. And to men we bring the reminder that a gentleman suffered a stroke shortly after shoving a lawn mower. Just who should cut the grass we do not know.—Peterborough Examiner.

In any accident the only thing better than presence of mind is absence of body.—Brandon Sun.

Brothers

Calgary Albertan (from the files of the old Calgary Eye-Opener): — An aged and doddering gentleman was on the witness stand in a case involving inheritance of a goodly and long-litigated estate. It was necessary that the fact of the existence or non-existence of other heirs than the old gentleman be established.

"Have you ever had any brothers or sisters?" asked the attorney who conducted the direct examination.

"I never had a sister," piped the old gentleman, "but I had one brother."

"Is that brother still living?"

"No, he is dead."

"When did he die?"

"About, about—let's see—it was about 150 years ago."

"I asked you—you must have misunderstood me—I asked you when your brother died?"

"And I told you about 150 years ago."

"The witness may have the right to set himself right, if possible," said the judge.

"Well, your honor, my father married when he was 17. A year later his wife bore him a child and died. The child died within three months. My father remained single until he was 72, then married a young woman to whom I was born a year later. I am now 95 years of age."

After profuse apologies the examination proceeded.

New Cheese Clause

According to the amended regulations of the Dairy Industry Act, all Canadian cheese destined for export must be held in the curing room for at least eight days after removal from the press before being placed in boxes. The new clauses of Regulation 13, section (d) under part 2 of the Dairy Industry Act read:

(d) (1) No person shall place in boxes within eight days from the date of manufacture any cheese destined for export.

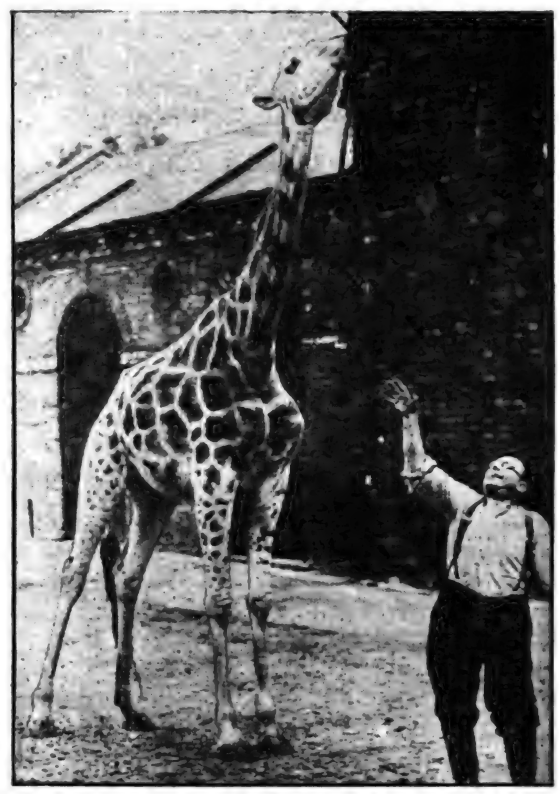
(2) No grader shall grade any cheese until in his judgment it is sufficiently mature to permit of the quality being properly determined.

Twenty-Year Scrub

A mammoth cleaning job is being undertaken at York Cathedral, England. The interior stonework is being cleaned, and it means: Twenty years to complete 4,500 scrubbing brushes used; 6,700 lbs. of soap; 720 lbs. of pumice powder; 2,500 floor cloths. Portions of the cathedral have not been cleaned for 600 years and it has been revealed parts which were always thought to be black are creamy white. The foreman of this mammoth job is R. C. Green, clerk of York Minister office of works. The expense of erecting scaffolding for cleaning in the choir and nave will be higher than the cost of the cleaning.

VANCOUVER, B.C.—Mixed babies in Vancouver's General Hospital are now a thing of the past. In the future all babies will have their names indelibly "sunburnt" on their bodies by a new water-cooled quartz lamp.

Church Head



President Heber J. Grant, head of the Church of Jesus Christ of the Latter Day Saints, who sailed from Quebec with a party of nearly 100 members of the Mormon Church enroute to England to celebrate the 100th anniversary of the Church in Preston, Lancashire.

Found In London Street

This is the latest portrait of Miss Diana Battye, 21-year-old society girl, recently found in London, Eng., after being missing for a week. She was ill apparently suffering from loss of memory. The former photographer's model was discovered walking in a street near the home of Lady Cynthia Asquith, mother of Michael Asquith, to whom Diana's engagement was to be announced shortly.

Brush Up For Lunch

Maybe dinner was late or the giraffe at the London zoo became confused in the rarefied atmosphere, but his groom was out a perfectly good neck broom when the giraffe decided it was good for food.

The End Of An 8,000-Mile Hike

Boy Scouts Juan Carmona (left) and Rafael Petit rest their tired feet on the steps of the Capitol as they arrive in Washington at the end of their 8,000-mile hike from Caracas, Venezuela, to attend the Boy Scout Jamboree. They each wore out eight pairs of shoes.

Movie-radio gossip

By DOROTHY

Connie Boswell is the latest radio singer to succumb to the pleas of motion picture producers. She will warble in Paramount's "Artists and Models." But the most exciting news on the Paramount lot is that Mary Livingstone, the giddy comic of Jack Benny's program and in private life, his wife, is such as inspired screen comic in her first picture that all her supporting players are sulking. The picture, called "This Way Please," was supposed to star Shirley Ross and Buddy Rogers, but Mary is just romping off with all the scenes.

It looks as if Kenny Baker of the air waves will be a strong rival of Bing Crosby's on the screen just as soon as "Mr. Dodd Takes the Air" is released. Walter Wanger, who has been searching for a good - looking young singer to play the lead in "52nd Street" persuaded Mervyn LeRoy to let him see as much of the picture as has been filmed. Immediately, he decided Kenny Baker was just what he had been looking for. Kenny Baker will have Pat Patterson, wife of Charles Boyer, playing opposite him in the Wanger film. That's a break for him, because she is one of the most utterly charming young women in all Hollywood.

Bing Crosby

ODDS AND ENDS . . . Screams of rage and violent protests broke loose on the Paramount set for "Artists and Models" when he-men like Richard Arlen and Rube Goldberg, the cartoonist, found they had to get all prettied up in knee breeches and lace ruffles for a masquerade scene . . . Motion picture producers are trying to argue Barbara Stanwyck and Robert Taylor out of galloping through mountain passes on frisky horses. Barbara took a nasty fall the other day — with the horse landing on top of her. She wasn't seriously hurt, though . . . Motion picture stars can get into accidents anywhere, it seems, because Sylvia Sidney took a header on the slippery floor of a beauty salon and cut her face quite badly . . . Ginger Rogers and Harriet Hilliard have more fun on Sundays when streams of tourists are haunting all the well-known Hollywood cafes. They pack a lunch and go picnicking, and nobody recognizes them.

It is to be hoped Stanley Baldwin did not forget his pipe in the House of Commons.—Sherbrooke Revord.

Dry Humorist's Idea?

You all know what happens to cotton when it gets wet, so we need hardly tell you that Blossom Russet, New York lass, who thinks this processed cotton batting beach costume is great, won't feel so swell about it if ever she should forget and go in the water.

"Around The Dial"

A new feature for this page will start next week. Our radio reporter will give you the spotlight news of the radio world and the "Headliners of the Week".

NON-ADVERTISER

This is a true story concerning an incident which occurred on Queen St. recently. A certain lady, with her husband, was gazing into the window of a local store. Their attention was on a certain item which held a price tag, when friend husband spoke up: "Now look there—$1.59 for that one, and you told me it couldn't be bought in Paisley. You sent to S————'s in Toronto, paid $1.75 and 25c delivery charges plus 3c postage on letter and 10c for postal note. Why didn't you try this store first?" "Well, I never thought of going to this store, for they never advertise in The Advocate." —Paisley Advocate.

OBITUARY

Harry M. Pettit, Clerk and Treasurer of Halton County, passed away in Hamilton General Hospital on June 21st, in his 56th year. He leaves his widow and two sons.

Mrs. J. W. Fleury of Brampton passed away on June 26. Her maiden name was Nellie Harris. Her husband survives.

Mrs. R. J. McInnes of Milton passed away on June 22nd in her 72nd year. Her husband survives.

Mrs. Elizabeth Brown

Pioneer of the Streetsville district, Mrs. Elizabeth Ann Brown, 91, died at the home of her son, Peter Brown, Guelph. Mrs. Brown was born in Streetsville and as a young girl had lived in Richmond Hill and Barrie, before moving to Galt, where she had lived for nearly thirty years. Later she resided in Niagara Falls, and Hamilton, before coming to Guelph to visit her son last September. An Anglican, Mrs. Brown had until a few years ago taken an active part in the work of the Chosen Friends Society. Surviving are one daughter, Mrs. W. B. Call, Hamilton, and two sons, George A., Buffalo, N.Y., and Peter, Guelph.

Mrs. D. Pratley

Mrs. Daniel Pratley, aged 93, for more than sixty-six years a resident of Brampton, and one of the town's oldest inhabitants, died at Brampton on Saturday morning. Mrs. Pratley was born in England.

On July 11 she would have celebrated her sixty-seventh wedding anniversary.

Mrs. Pratley was prominent in the work of the Baptist Church.

She is survived by her husband, who will be 96 in January; two daughters, Mrs. W. E. Coates of Brampton and Mrs. W. Martin of Inglewood, and four sons, Walter of Weston, Charles of Cleveland, Henry of Meadowvale, and Albert at home. There are thirteen grandchildren and fourteen great-grandchildren.

What saith the Scriptures?

And whosoever was not found written in the Book of Life was cast into the lake of fire—Rev. 20:15

Rev. T. D. Jones Preaches to Masons

River Park Lodge, No. 356, A.F. & A.M., with visitors, was out in strength on Sunday evening last to attend the service at the United Church, Streetsville. The Lodge was honoured in having the Rt. W. Bro. F. P. Hopkins, D.D.G.M., present. The night was not too warm and the Church was comfortably cool. Programmes giving the order of the service and with hymns printed in full, were supplied by the Lodge and were appreciated by all, especially by visitors accustomed to other forms of service.

The musical arrangements were splendid. Mrs. Frank Reid sang, "The Garden of Prayer" and the choir sang "Deliver Me," with Mrs. J. H. Hare taking the solo in the anthem. Both pieces were well rendered, appreciation being expressed by the minister. The Rev. T. D. Jones, a member of the Craft, delivered the message and conducted the service. He took as his theme, I Kings 7: 22, "There was lily work on the top of the pillars." He spoke of the crudities of ancient architecture and drew from it symbolism of such as consider physical satisfactions the only worth-while considerations in life. He mentioned "Sparta" and the provisions for physical perfection, the destruction of imperfect and weak children, the development of children to the highest degree of responsiveness in military discipline, but decadent because the life was so dominantly to the flesh. Then he outlined the growth of the sense of harmony, of beauty in simple forms. The ancient crudities gave place to the Tuscan, the Ionic and the Doric orders of architecture. Thus also people came to see that life is more than meat. Food, clothing and shelter are not the only needs of the human for God has set eternity in the heart.

Hence men began to develop culture, and sought satisfaction in Art, Literature, Philosophy, Poetry, Drama, and Music.

Still, man's spirit remained restless and up rose the Corinthian order of Architecture, signifying another step forward. This is beautifully illustrated in the passage, "Lily work at the top of the Pillars." It seemed so useless. The strength of the Pillar did not require the decoration, so why spend time on embellishment? Because man's soul cannot be satisfied apart from beauty. To strength and harmony must be added beauty. He included under this term, Faith, Hope, Love and the outgoings of the soul in service, but merely mentioned them to show that they were not overlooked, and fastened attention upon Fellowship, Sympathy, Courtesy and Charity as adornments vital to the soul of man. His illustrations were apt. Under the idea of Courtesy for instance, he related a story of a Princess who remarked to a sailor who had carried her over a difficult place and depositing her had said, "There you are my little lady!" "I'm not a little lady, I'm a Princess!" Queen Victoria at once interposed, telling the child to say, "Kind sir, thank you, for though I'm not a little lady yet, I hope to be one some day."

Tree Forms Its New Buds Before It Sheds Leaves

The growing periods of trees usually are the same as the periods when the leaves are green. In winter they rest and live economically on what they have laid away, waiting for the return of spring to continue their growth, observes a writer in the Missouri Farmer. It is in this way that the "growth rings" are formed, and when a tree is cut, these rings show the periods of growth and of rest which the tree has lived through.

The buds are inactive during the winter. Most of them were formed before the leaves were shed in the fall. They are protected by cork-like scales, sometimes covered with a wax secreted by the tree. In this way they pass the cold days in snug comfort, resting till the warm days shall lure them to burst from their little houses and spring out as new green leaves.

The roots continue to absorb water unless the ground is frozen all about them. However, they usually have many roots which go down far below the frost line, and are always able to search for water. Since the whole tree is very inactive, it requires very little water compared with the active summer months. The tree is constantly losing water by evaporation, and if the roots are not able to secure as much water as is evaporated from the limbs and twigs, death is likely to result. In summer, one tree may lose nearly a thousand gallons of water in a single day by evaporation. In winter this amount may be reduced to a few pints or less.

Shakers, Serious People, in Sober Gray and White

The Shakers went about the world in sober gray and white, says the Boston Transcript.

Their woolens and upholster's plushes glow with rich color. So, too, with the furniture. Simple in line and mass, it is rich with the warm texture of wood worn smooth by diligent hands.

Just the names show what a rigorously functional culture was the Shakers. A tailoresses' counter, a towel rack, a sewing cabinet, a wood box, wall cupboards, trustees' desk, a mirror and rack (touch of vanity), an infirmary three-drawer washstand, a blanket chest, a dairy counter, a wall clock, a trestle table, a weave chest, a loom board, a loom stool—here are the objects revealing more than words can of the daily existence of the Shakers. It was a life built around the crafts, around agriculture and artisanship. And the craftsmen used the materials of daily life, the native pine, maple, birch and cherry, sometimes staining the wood deeper tones.

Yugoslav Theater Is 324

One of the oldest known theaters in Europe and a relic of the Italian Renaissance influence, which swept Dalmatia in the Sixteenth century, is the National Theater in Hvar island, which ranks, also, as the first Yugoslav theater. Built in 1612, to the order of Pietro Semitelco, Duke of Hvar, it bears a marble plate commemorating the "Second Year of Peace, 1612," referring to the restored peace after a century of civil warfare between Hvar citizens and nobles. Two other theaters were built before it, according to an authority. They are the theater at Venice, built in 1565, and the theater at Vicenza, built in 1585.

Hawaii Got Turkeys in 1815

America is the home of the turkey but Hawaii never saw a turkey until more than 100 years ago. In 1815 Queen Kaahumanu went aboard a trading schooner and saw turkeys Capt. John Meek had obtained in Chile. Never had she seen such large birds before. Upon going ashore she told the king. The king went to the vessel and asked for the birds. Upon refusal he seized the turkeys and went ashore. The birds later escaped. On the slopes of the island's volcanoes and even in the United States national park wild turkeys are fairly numerous, believed to be descendants of those brought to the islands by Captain Meek.

Cannot Live Without Salt

Neither man nor beast can live without salt. It is essential to the health of all living things. The Romans paid wages in salt—whence the word "salary;" "True to his salt" meant loyal to his employer, who paid him his wage. "To spill the salt"—i. e., to lose hard-earned cash—was a bit of bad luck; so grew the superstition that it is unlucky to spill salt. The Jews used salt in sacrifices, and spilling the salt after it had been placed on the victim's head was held to be a bad omen.

Bassoon Reaches Deep Tones

The bassoon is the low voice of the wood-wind group and great skill is required to make it deliver the effects of which it is capable. It has possibilities as an orchestral clown, but is also capable of warm and passionate expression. It is valuable in the orchestra to increase the body of tone and infuse it with warmth. The contrabassoon is a larger instrument with still deeper notes. About sixteen feet long, it is folded six times upon itself.

Orangemen at Church

Orangemen from many parts of the County of Peel were in Streetsville last Sunday afternoon for the service at Trinity Church under the auspices of Derry West District L.O.L. The church was full of people, chairs were placed in the aisles, and many gathered in the Parish Hall. Rev. E.S. Ottley, rector, welcomed all to his Church, and Rev. J. N. Blodgett B.A., Toronto, delivered an eloquent sermon on Orangeism.

After the service the Orangemen reformed on Queen street and marched to the Soldiers Monument where Mr. J. C. Rutledge, on behalf of L O L. No. 263 deposited a wreath in memory of the fallen, and Rev. Mr. Blodgett read the address.

The procession then moved down town, turning at the Public Library and returning to the Orange Hall.

There were many members of the L.O.B.A in the procession and four fife and drum bands furnished the music: Campbell's Cross, Cooksville Port Credit and Streetsville. The young ladies from Campbells Cross were very attractive in their scarlet caps and capes.

There were many prominent people in the parade, including Mr. Gordon Graydon, M.P., Col Hon. T. L. Kennedy, Sam Charters, ex M.P. and present and past County and District officers.

Jas C. Rutledge and W. C. Booker had charge of the parade.

It was the biggest Orange procession that has been seen in this town for thirty years, in fact, when the Glorious Twelfth was celebrated here the last time.

Union Service

The three churches of Streetsville have made arrangements, through the courtesy of Mr. Dawson, to hold an open-air service in Peel Park next Sunday evening at 7 p.m. The United Church Orchestra will lead the singing. Hymn sheets are being mimeographed for the occasion and the three ministers will take part in the service. A hearty invitation is extended to everyone to attend.

The Open Column

Library Board meeting, June 30th, referring to the ban that was placed on the book, Gone With The Winds, a couple of months' ago on motion of Mr. Foster.

At that time it was left until this book could be read by the two Rev. Gentlemen that are on the board and passed on.

Well, this evening, at a meeting of the board, it was moved by Mr. Jones, and seconded by Mr. Langmaid, that it be put in circulation again, with instruction to the Librarian to use some discretion as to whom the book is loaned to.

Mr. Foster still claims that it is not a fit book to be in circulation and loaned to grown up people, let alone to juveniles, into whose hands it may fall, if loaned to their elders.

Streetsville,
July 5, 1937.

Dear Editor:

I see by last week's Review there have been 75 applications for the vacancies on the High School staff. The High School Board—and the people of the village—will be lucky if, out of the 75, they can pick three tachers as fine as the three we have had. They have been fine in every way, scholastic attainment, character, personality, willingness to serve in anything that would tend to build up the village in the highest and best.

If I had a family of boys and girls and they failed in their examinations at school, I would say to them: "What is the matter with you? Have you listened to your teachers or have your minds been on other things? Have you applied yourselves to the work they gave you or have you idled your time away? Have you behaved yourselves like ladies and gentlemen or have you brought discredit and disgrace on your parents and your home training?"

I would see that these questions were satisfactorily answered before I would say to the Board (never to the pupils): "What is the matter with the teachers that my boys and girls have not passed their examinations?"

And I would be far less concerned about whether they could pass an examination in Latin or French or Algebra than I would be about whether they were learning lessons by precept and example, from their parents and their teachers, of honor and truth, kindness and courtesy, justice and unselfishness and a reverence for all sacred things.

I repeat—if the new teachers can "fill the bill" in every way as the last three have, the village will be lucky indeed.

Your sincrely,
MINNIE D. LUNDY.

UNITED CHURCH NOTES

Speaking on Health and the Kingdom of God last Sunday evening, the Rev. T. D. Jones made clear that physical health is only one-fourth the subject, and that while it is reported by the Ency-Brittanica that the annual cost of physical ill health reaches the staggering sum of Fifteen thousand million dollars per year or $125 per unit of population (U.S.A. figures), the cost of Mental ill-health, Moral ill-health and Spiritual ill-health is also considerable.

Health in this manifold form thus forms man's major problem. Mr. Jones quoted the Canadian paper "Health" as saying that the twin social diseases which cause untold physical suffering and cause 45 times as many deaths directly as Tuberculosis or Cancer, could be irradicated in twelve months if all the citizens really meant business.

Pinecrest Camp, Norval, opened on Saturday with about 25 boys in attendance. Maynard Redick of Streetsville is one of the leaders and other Streetsville boys are present.

The Hewson family re-union was held at Huttonville Park last Saturday, and other picnics were there from Dixie, Brampton and Thistletown.

Edward Steers was struck by an auto in Port Credit on Saturday, just a week after his wife had been hit on the same street. He is 75 years of age and was badly injured.

The Ontario Greyhound Association held greyhound races at Cooksville last Saturday, being the first of its kind ever to be held there. Ten races in all were run off. The Credit Valley Lions Club had charge of the event.

Over 4,000 people witnessed the big swim held at Port Credit last Saturday.

Misses Jean Chidley and Clara Ezard of Cooksville have graduated at the Toronto Normal School.

Cooksville softball team defeated Sheridan on June 30th, at Sheridan by a small margin.

Mrs. Harris of Grimsby and Miss Beth Graydon, R.N., of Ottawa, visited friends here this week.

STREETSVILLE PUBLIC SCHOOL PROMOTION RESULTS

The following promotions are announced for the year ending June 29. Names are arranged alphabetically. Results are based on term work and final examinations.

Room 4

Jr. IV.-Sr. IV.—

Honours — Harold Dowling, Joan Jourdan, Billy Lovatt, Olga Trimble, Herbert Workman.

Pass—Harry Arch, Russell Evans, Donald Jordan, Aurea King, Pearl Lepofsky, Betty Spear, Harriet Stewart, Jack Stewart.

Recommended—Mabel Allan, Allan Crawford, Donald Reid, Carman Whaley.

Recommended to Junior IV.—Billy Rice, Philip Scheid.

R. LANGMAID, Teacher.

Room 3

Sr. III.-Jr. IV.—

Honours—Graham Alvey, Ruth Lee.

Pass—Geoffery Alvey, Reggie Arch, Blanche Edwards, Joanne Jordan, Donald MacArthur, Billie McCracken, Bill Moore, Merle Noble, Bill Scheid.

Recommended—Harold Carter.

Jr. III.-Sr. III.—

Honours—Phyllis Lepofsky, Audrey MacMillan, Brenda Redick, Iona Rush, Ernest Towndrow.

Pass—Hartley Bond, Ruth Crawford, Fred Croxall, Ardell Dudley, Bill Graydon, Violet King, Alan MacMillan, Elsa Belle Rutledge, Roma Sheppard, Lorna Spear, Ivy Trimble.

Recommended—Bobbie Rice, Ted Rutledge.

R. W. STANDING, Teacher.

Room 2

Sr. II.-Jr. III.—

Honours—Isabelle Buchanan, Herbie Edwards, Teddy Ellis, Bobby MacArthur, Roy Noble, Jean Raine.

Pass—Garnet Buck, Barbara Culbert, Carl Evans, Charlie Meredith, Leora Pettibone, Gwen Rice, Lois Russell, Leslie Towndrow.

Recommended — Jack Leslie, Willis Pettibone.

Jr. II.-Sr. II.—

Pass—Mary Buckingham, Marjory Carter, Howard Crawford, Doris Johnson, Dorothy Lamb, Mary Rundle, Raymond Stewart.

Sr. I.-Jr. II.—

Honours—Paul Arch, Bobby Cantelon, Kenneth Dudley.

Pass—Roy Dowling, David Hillier, Kathleen Leslie, Helen McMillan.

H. BONHAM, Teacher.

Room 1

Sr. I.-Jr. II.—

Honours—Florence Brighty, Ruth Jourdan, Neita MacMillan, Max Meredith, Rhoda Sheppard.

Pass—Hugh Burns, Tom Dinning, Ronald Ellis, Alvin Lamb, Evelyn Lepofsky.

Recommended—Bernard Aisthorpe.

Jr. I.-Sr. I.—

Honours—Gordon Bentley, Grace Hollingshead, Marion Moore, Betty Rush.

Pass—Adrian Adams, Clyde Arch, Frances Buckingham, Jack Evans, Jimmy Henderson, Jack Lindsay, Harold Portiss, Laura Portiss, Donald Rice, Jean Trimble.

Advanced Junior I.—

Pass—Joan Carter, Jimmy Harrison, Theresa Harrison, Eddie Lalonde, Norman Leslie, Margaret Stewart, Donald Woodruff.

G. Ross, Teacher.

HIGH SCHOOL REPORT

Examinations were finished and school closed this week. The majority of the pupils of Lower School obtained promotion without writing Departmental papers. The students who did not gain full promotion may do so as the result of Departmental Exams this week or by writing supplementals in September. In order of merit, promoted:

Form I.-Form II—Edward Schnurr (h), Norma Rundie (h), Alan Trimble (h), Bob. Fielding (h), Betty Earle (h), Margaret Quennell, Evelyn Wilson, Hazel Aisthorpe, Betty Reed, Ruth Sheppard, Bill Crane, Cleve Green, Bill Miller (Art), Bill Evans, Mary Curran (Art, Alg.), Isobel Workman (Alg.), Jean Rice (Lat.) Maurice Workman (Lat., Fr.).

Form II.-Form III.—Eleanor Steen (h), Mildred Stephens (h), Ilah Featherston (h), Orville Schnick (h), Frank J. Reid (Fr.), James Lumbers (Fr. Arith.), John Fellows (Lat.), Marion Steen (Arith.), Harry Hollingshead (Lat., Fr.), Wilma Hamilton (Physiog.).

General

Lorrine Beattie completed Form I. and passed in half of Form II.

Margaret Gresche completed Form I. and passed in half of Form II.

Hugh Lamb completed Lower School and wrote five Middle School.

Verna Dowling completed Lower School and wrote four Middle School.

Ferne Crozier completed Lower School and wrote four Middle School.

There were twenty-four candidates for Middle School Matriculation and three for Upper School on the three subjects.

Candidates for entrance numbered twenty-two, thirteen of whom wrote at the High School this week. The others were accepted on their year's work.

A few school library books have not yet been turned in. Will those who have any at home kindly hand them to the caretaker or to the Principal by Saturday?

Students who ordered school rings are advised to go direct to Ryrie-Birks, (second floor front), as the designs have been returned to them, or communicate with Doris Waite.

The first name to be inscribed on the Dr. Steen Shield for Lower School proficiency will be that of Eleanor Steen, who has persistently headed her class in both Form I. and Form II. Eleanor, by the way, comes the farthest to school. Congratulations!

The name to go on the MacPherson Middle School Shield will not be available till September. We wish all a successful future.

C. P. McARTHUR, Principal.

ENGAGEMENTS

Mr. and Mrs. Walter G. Perry, Main Street North, Brampton, Ontario, announce the engagement of their younger daughter, Isabel May, to Ralph H. Malowney, son of Mr. and Mrs. W. J. Malowney of Sundridge, the marriage to take place in July.

PUDDLE BREAKS FALL FOR STREETSVILLE MAN

Bowmanville, July 2 (Special.—A puddle of water, less than two feet deep, saved the life of Bob Caves, 52, of Streetsville, to-day when he fell a distance of eighty feet from the old C.N.R. bridge at Stephens's mill, four miles north of here.

One of a gang of six men engaged in removing the structure, Caves overbalanced, clawed desperately for a hold, and plunged downward to what his horrified mates believed was instant death. But fate was with Caves. He fell exactly in the middle of the puddle, flat on his face, and the twenty-four inches of water broke the fall.

Tonight he is in Bowmanville Hospital with both hands broken above the wrists, scalp wounds and minor cuts. But there are no internal injuries, Dr. W. H. Birks of Bowmanville said. And the fellow-workers are saying that Bob Caves must have used up a lot of his share of life's luck when he landed in that puddle of dirty water.

WEDDINGS

Trimble—Crozier

Miss Pearl Isabel, daughter of Mr. and Mrs. George C. Crozier, Streetsville, became the bride of Joseph Franklin Trimble, son of Mr. and Mrs. T. Trimble of Hornby, at a charming lawn wedding at the Crozier home, Wednesday night. Rev. E. S. Ottley, rector of Trinity Church of England, officiated. The service was held beneath an arch of orange blossoms surrounded with large standards of varicolored peonies.

The bride, given in marriage by her father, wore a Mary, Queen of Scots gown of white silk suede lace, cut to a short train, with peplum jacket and high standing collar of the same material, the collar fastened with a cameo brooch, the gift of the groom.

She wore a double veil of lace and tulle, held by a coronet of orange blossoms, and carried a bouquet of Talisman roses and lily-of-the-valley. The bridesmaid, Miss Ruth Earl, Cooksville, wore pink crepe marquisette over taffeta, matched by a chaplet of pink rosebuds, and carried a bouquet of roses, baby's breath and forget-me-nots. Victor Crozier, brother of the bride, was best man.

During the signing of the register, Miss Alice Deacon, Toronto, cousin of the bride, sang "Because". The wedding music was played by Miss Mary Crozier, Streetsville.

At a buffet luncheon and reception, Mrs. Crozier received in royal blue chiffon, with large picture hat and corsage of Talisman rosebuds, assisted by Mrs. Trimble, who wore navy blue georgette, with grey accessories and a corsage of pink and red rosebuds.

A Drumhead service was held at Peel Park on Sunday by Rev. F. Vipond. He was assisted by a Salvation Army band from Toronto; Streetsville Girl Guides; Long Branch Troop of Boy Scouts and a troop of boy scouts from Toronto.

Local News

Mr. and Mrs. W. C. Hubbell of Chatham visited with Mr. and Mrs. F. G. Reid.

Mrs. G. S. Jourdan and family spent a week at Lake Couchiching.

Mr. John Lindsay has moved his family to Toronto.

Mrs. Hicks is spending a few weeks' vacation with Mr. and Mrs. H. G. S. Jeffry, Weston.

The front of Dadd's Bakery has been brightened up with a fresh coat of paint.

There were three baptisms in Streetsville United Church, Sunday morning, when Rev. T. D. Jones baptized the children of Mr. and Mrs. MacArthur, Mr. and Mrs. Pope and Mr. and Mrs. Turney.

Miss Jean McCaugherty, R.N., of New York, visited at her home here this week.

The children of Mr. and Mrs. Wheeler and Mr. and Mrs. Rutledge were christened in Trinity church last Sunday by Rev. E. S. Ottley.

Mr. and Mrs. W. F. B. Switzer visited with Mr. and Mrs. T. W. Beamish, Kingsway, Toronto, on the holiday.

Mr. Wm. McKenna, a former resident here, called on old friends on July 1st.

Mr. and Mrs. H. W. Hope attended a family gathering in Toronto on Monday.

Miss Kay Johnston of Toronto visited with Mrs. Vic Johnston this week.

Streetsville Juvenile Lacrosse team lost to Mimico Monday night in a league game in Streetsville. This was a game that had to be postponed from Friday night on account of rain.

Miss M. Hicks is holidaying with Sir William and Lady Hearst at Beaverton on Lake Simcoe.

Mr. and Mrs. Pryer of Waterloo visited at J. A. Temple's on Sunday.

Miss Bernice Temple of the Toronto General spent Sunday at her home here.

Miss Muriel Downes of Toronto is spending a week or two at J. A. Temple's.

Miss Mary Temple of Schomberg is home for the holidays.

Mr. Charles Hersom and Mr. Graydon Clipperton of Streetsville are attending summer school in Toronto.

Mr. and Mrs. Roy McMillan, Streetsville, attended the annual reunion of the McMillan clan at Puslinch last week, when over 100 members were present. Wm. McCormick of Crief was elected as President and Mrs. C. Wilson of Milton, Secretary. The next re-union will be held at Georgetown.

BRAMPTON

Brampton Foal Club

A Colt Club will be organized for the Junior Farmers of Peel County. These colts will be shown at the Brampton Fall Fair. The membership will be open to farm boys over 14 years of age on May 1st, 1937, and not over 21 years of age on Nov. 1st, 1937. The Club will consist of heavy draft colts. Club members must care for, fit and train their foals for at least two months previous to date of Achievement Day. Foals must be born and raised the property of the Club member, parent or guardian on the farm on which the club member has resided from May 1st, 1937, up to and including the Achievement Day. Meetings of the Club members to study care, management and horsemanship will be held.

The awards will be made on the following basis: 300 points for award on foal, which will be judged at the Club Fair or Achievement Day, on its conformation. 200 points for judging competition and answers to questions. 100 points for showmanship.

Application for membership to the above Club must be made to C. D. Graham, Agricultural Representative for Peel County on or before July 15th, 1937.

CASTORIA

In Use For Over 30 Years
Always bears the Signature of Chas. H. Fletcher

CANADA PACKERS LIMITED

REPORT TO SHAREHOLDERS

The tenth fiscal year of Canada Packers Limited ended March 25th, 1937.

Profit, after Depreciation, Bond Interest, and Income Tax, is $1,522,662.69
Equivalent, on 200,000 Shares, to....$7.61 per Share.
Out of this sum it has been decided to distribute, as Dividends on the Common Shares, during the current fiscal year .....$3.00 per Share..... $ 600,000.00

The Profit applicable to the Common Shares is substantially higher than in any previous year. Shareholders may feel, in the circumstances, that a larger Dividend might have been justified. This was, in fact, considered, but the decision was against an increase because of the policy of Plant expansion to which the Company is committed.

During the year just closed, Plant extensions were made totalling $1,067,030.72
and for the coming year extensions have been authorized totalling approximately 1,150,000.00

In view of these heavy expenditures the Directors thought it necessary to conserve Working Capital.

Shareholders may inquire whether so large a programme of Plant expansion was necessary. The answer lies in the fact that during the nine preceding years (i.e. since the Company was formed) net Plant expenditures had amounted to only..... $707,125.68

During all that time the main objective had been to build up Working Capital, which had increased from—
1927 ..... $3,617,944.44
to 1936 ..... 7,042,457.71

Last year, it was decided to extend operations to the Pacific Coast, and as a first step a Plant was built at Edmonton, Alberta. This Plant cost approximately $1,000,000.00

It is one of the finest industrial Plants in Canada, combining a beautiful exterior with high operating efficiency.

Plans for the coming year include a new Plant at Vancouver, B.C., also extensions and new equipment at several of the existing Plants. When this programme is completed Directors look forward to another period of rest in respect to Plant extension.

. . . . . .

Total Sales for the year were $72,699,519.48
Total Tonnage ..... 774,270,797 lbs.
The Net Profit (....$1,522,662.69....) is, therefore, equivalent to:—
2.10% of Sales
or to 1|5c per lb. of product sold

The above figures relate to total operations, including products other than those derived from Live Stock.

On products derived from Live Stock, Profit is equivalent to:—
16.8c per 100 lb.
i.e. 1|6c per lb.

Sales increased from ..... $63,586,883.36, year ended March, 1936
to..... 72,699,519.48, year ended March, 1937
that is..... $ 9,112,636.12 .... or 14.3%

Tonnage increased from .. 659,706,572 lbs.
to.... 774,270,797 "
that is.... 114,564,224 lbs. or 17.4%

These large increases are due partly to new business deriving from the Edmonton Plant; also to increased exports of Bacon. But all Plants enjoyed an increased domestic volume, reflecting the improved economic conditions in Canada.

That improvement, so far as Agriculture is concerned, is indicated in the following table of prices of farm products.

FARM PRODUCTS
Average Price - Month March
Years 1930-1937

	1930	1931	1932	1933	1934	1935	1936	1937

Over wide areas, Canadian Farmers are still suffering from a succession of crop failures. But in every other respect Canadian Agriculture has emerged from the depression. The low point of the depression fell in the first quarter of 1933—i.e. just more than four years ago. It is difficult now, even to recall how bleak the outlook seemed at that time. Not only were prices of farm products at or near all-time lows, but there were heavy surpluses for which there seemed to be no external outlet,—at any price. That was particularly the case in respect of Wheat and of Cattle.

All this is now changed. The surplus wheat has gone. At the end of the present crop year the carry-over will be less than in any year since 1926. And the price of Wheat (at Prairie points) is more than three times that of February, 1933.

This disappearance of the overhanging surplus and the rapid advance in the price (and with it in prices of other Grains) was the signal which, to the Farmer, marked the final passing of the depression. But this very event brought with it a complication in the Live Stock field:—particularly that of Hogs.

Hogs are produced from Grains. The cost-of-production of the Hog is in direct ratio to the price of the Grains. Between March, 1936, and March, 1937, the price of Wheat advanced from .... 82c to .... $1.40 per bushel,—and other Grains in similar ratio. But the price of Hogs advanced not at all.

This disparity in movement, as between Grain and Hog prices, presented a problem to the Farmer which he had not had to consider for six years. Would he feed Hogs, or would he sell his Grain? The question became acute just at the beginning of the major breeding season, i.e., September. In that month Grains began a spectacular advance, and Hogs declined.

The following table sets forth these prices,—Wheat and Hogs,—(monthly averages), since March, 1936.

	Wheat per bushel	Bacon Hogs F.O.B. Ontario Country Points, per 100 lbs.
March, 1936	$ .82⅛	$8.15
April	.80½	8.02
May	.76¾	7.81
June	.79½	8.52
July	....	8.71
August	1.02¼	8.59
September	1.03⅝	8.13
October	1.10⅞	7.65
November	1.08¼	7.81
December	1.20¼	7.86
January, 1937	1.24¾	8.18
February	1.27	7.93
March	1.40	8.16

Under such conditions it takes some courage on the Farmer's part to breed sows (the progeny of which will be marketed from 10 to 12 months later), unless he has the necessary feed actually in his granary. Many Farmers,—perhaps most,—are not so situated. Hence there developed a good deal of hesitation, and since September there has certainly been some diminution in breedings. As to the extent of this diminution no statistics are to be had, and the scale of it will not be known until the progeny arrive at the markets, July 1937, forward.

On each farm the decision whether to breed or not to breed is an important one. It determines in advance that portion of farm operations for almost a year. (The litter is farrowed four months after breeding, and the Pigs are marketed six to nine months after birth.) The Farmer who breeds, thereby elects to market his Grain through the medium of Pigs. On the other hand, the decision not to breed, is equivalent to that of selling the Grain for cash. But the important factor to consider is clearly not the relative price of Grain and Pigs at the time the sow is bred. It is the average price of Grain for a period of 4 to 10|11 months forward, in relation to the price of Hogs on the marketing day (unknown) 10|11 months away.

If, therefore the Farmer seeks, at breeding time, to determine whether the sows should or should not be bred, he is faced with factors which are not known and cannot be known.

But a study of the past comes to his aid, and enables him to base his decision on other and knowable factors. If a period of years is considered, it is found that, providing feeding methods are efficient, there is an assured Profit in continuously raising Hogs. This is not conjecture, but history. A Farmer cannot know, in the case of any particular litter, whether the Pigs will sell for a greater sum than the value of the Grain required to produce them. Nevertheless, he can be certain that if he feeds Hogs all the time, he will make a Profit, and a good Profit, as against selling his Grain. On the other hand, it is equally a matter of history that the in-and-out feeder generally gets in before a decline and out before an advance.

(In discussions as to the Profit or Loss of producing Hogs, there is sometimes confusion on a most important point. During the last three years Hog prices have been high and stable. The low monthly average price for Bacons, f.o.b., Ontario Country points, has been ....$7.14 per 100 lbs. The yearly averages have been as follows:—

1934	7.85
1935	8.21
1936	8.10

The fundamental fact is that at such prices there is a sure Profit in growing feeds and converting those feeds into Hogs. It may appear that for a certain period prices of Grains may be high; and during that period that Grains would sell for more than the Pigs which those Grains would produce.

In such case the Farmer, if he feeds, would make less Profit. But he would not make a Loss. The feeder who does not grow his Grain, but buys it on the market, would make a Loss. For him the fluctuations of the Grain market are a serious matter. But the Farmer who grows the feeds may continue producing Hogs in the assurance that during the life of the Ottawa Agreement Hog production is the safest activity on the Canadian farm.)

To the Farmer, therefore, who can count on the necessary feed, this conviction makes the problem a simple one. He need not even stop to consider whether he will or will not breed.

But for the Farmer whose crops have failed year after year, it is a quite different matter. Without the Grain he cannot feed. The wide areas of crop failure of the last seven years have appreciably retarded increase in Hog production. Crop failures have in fact been the chief reason why Canada has not yet reached the Quota for Bacon allotted in the Ottawa Agreement of 1932. That Quota was the equivalent of 2,500,000 Hogs per year.

Since 1932 there has been every incentive to increase Hog production. Prices have been high, and the Grain|Hog ratio favourable. And in spite of crop failures production has greatly increased. This is evident from the following table of Hog marketings and Bacon experts:

"In the above discussion no mention is made of the other costs which enter into Hog production, including labour and plant overhead. These items are constants and therefore do not affect the argument, which has to do with fluctuating Grain prices.

HOG MARKETINGS

Month	1935	1936	% Inc.	1937	% Inc.
January	297,325	275,553	— 7.3	320,607	16.3
February	263,005	257,301	— 2.2	345,696	34.0
March	229,822	312,695	36.1	397,213	27.0

November	95,936	130,495	36.0		
December	62,107	146,902	136.5		
Total	1,036,057	1,289,741	24.5		

These figures give ground for thinking that if feed had been plentiful last Fall, and the Hog|Grain ratio favourable, Canada would now be well on the way towards filling her Bacon Quota in Great Britain.

This question as to whether, (and how soon), Canada will achieve her Bacon Quota is the most important one in Canadian Agriculture. As to whether Canada will fill her Quota, there should be only one answer. For Canada is naturally, a Hog producing country, and this Quota gives her the opportunity, on the most favourable terms, of establishing herself in the greatest Bacon market of the world.

The opportunity lies in the fact that the Agreement permits her rapidly to increase shipments, and at the same time assures her a stable price. Such a situation never obtained before, and is inconceivable except under a Quota plan. At any previous time so rapid an increase in shipments would have brought about a drastic fall in price. But no fall has occurred, for the British plan is to keep the total quantity of Bacon approximately constant. As Canadian shipments increased, imports from other countries were correspondingly cut down. Canada's policy should clearly be to establish herself firmly while these conditions last.

That Canadian Farmers have a grasp of the value of the Bacon Quota, is shown by their efforts to increase Hog production. But there is an element in the situation to which they are likely to give less thought than its importance merits, viz.:—that time is of the essence of the situation.

Canada is assured another three years of the Quota. Within that time it is most important.

(a) That she take maximum advantage of the opportunity by filling the Quota.
(b) That she keep in mind constantly the time will certainly come again when Canadian Bacon will have to compete, without preference, with Bacon from Denmark and other European countries. What will Canada's position then be?

Will Canadian Bacon be able to hold its place in such a situation?

The answer hinges on a point which has received too little attention. It will depend upon efficiency in breeding and Canadian feeding methods relatively to those of Denmark and other European countries.

How do the efficiencies now compare?

The answer brings us back to the fact that Hogs are produced from Grain or its equivalent. Exact statistics are not available, but the best informed view is that in Denmark, on average, 3¾ lbs. of Grain produce 1 lb. of Pig, whereas in Canada, on average, 5 lbs. of Grain are consumed in producing 1 lb. of Pig. In other words, that the cost of production in Canada as compared to Denmark

is as — 5: 3¾
i.e. as — 20:15
i.e. as — 4: 3

This means that, providing the price of Grain is the same, it costs one-third more to produce Bacon Hogs in Canada than in Denmark.

Applied to the actual data of production the significance of the above facts is as follows:

Canada will produce this year approximately	7,000,000 Hogs
They will be marketed at an average weight of approximately	200 lbs.
On the basis 5:1 each Hog would take to produce	1,000 lbs. of Grain
On the basis 3¾:1, each Hog would take to produce	750 " " "
The extra cost of producing Hogs in Canada, expressed in Grain is	250
An average price of Grain at the Farm may be taken at ....1¼c.... per lb. In other words, the extra cost-of-production per Hog, due to feeding inefficiency in Canada relatively to Denmark is— 1¼c x 250, i.e.	$3.10 per Hog
on 7,000,000 Hogs	$21,700,000

If the relative feeding ratios are correct, there can be no doubt about this figure. And the statement of ratios is based on the best available information in each country.

But to Canadian Hog Producers the figures have still greater significance.

Many Canadian Farmers, both East and West, actually produce Hogs at a ratio ....3½:1. There is no doubt about this. The statement is based on carefully kept records.

Remembering that Canadian average production is 5:1, it follows that on many farms,—thousands of them,—the basis of production can not be better than 6:1. What then is the difference between the high and low cost within Canada? On the basis of 6:1, the quantity of Grain required to produce a 200 lb. Hog is ..... 1,200 lbs.
On the basis 3½:1, the quantity is ..... 700 "

Therefore, the difference between high and low production is per Hog ..... 500 "
at 1¼c per lb. ..... $6.25 per Hog

Do these 6:1 Farmers realize that a saving is to be made from improved feeding methods equivalent to more than ...2c... per lb.?

The argument of the preceding paragraphs may be summarized as follows:

The Bacon Hog is the farm animal which Canada is best endowed by nature to produce. The most suitable feeds can be grown here perhaps more cheaply than in any other country.

To maintain her Agriculture on a sound basis, Canada must produce many more Hogs than she herself can consume.

The great market for the surplus Bacon of the world is Great Britain. In this market Canada at present enjoys a preferred position of the greatest importance.

For the time being the price of Bacon in Great Britain, (and the corresponding price of Hogs in Canada) is such that even on a basis of production 5:1 there is a large Profit in producing Hogs.

But the high price of Bacon in Great Britain is maintained only by a Government plan of restricting imports. (Under this plan Canada is allotted the large Quota of 2½ million Hogs).

Canada is increasing production at a rate which, with favourable crop conditions, will enable her to fill her Quota within two or three years (perhaps earlier).

Canada's volume of shipments to Great Britain will then be almost on a par with those of Denmark. This will afford an opportunity, by improving Canadian product and service, to popularize Canadian Bacon to an extent never before possible.

This can be done only by making Canadian Bacon equal in quality to Danish.

For this the first requisite is to make Canadian Hogs as good as Danish. A substantial improvement has been made in Canadian Hogs in the last 15 years. The best Canadians are still not so good as the best Danish, but nevertheless they are very good. Canada's immediate problem is to bring all her Hogs up to the standard of her best.

But Canada's chief remaining problem is, during this "protected" period, to prepare herself for the time when she will again have to meet Denmark without preference on the British market.

For this the inexorable requirement is to achieve an efficiency in Hog production equal to that of Denmark.

If Canada does achieve such an efficiency she will then have an advantage over Denmark. For feeds can be produced in Canada more cheaply than they can be bought in Denmark.

The achieving of this standard of feeding efficiency is the most important single objective in Canadian Agriculture. On it depends whether Canada will advance to first place in the British market, or will at some future date be driven from that market as has more than once occurred in the past.

CATTLE:

The record in the Cattle Industry is much more cheerful than in any year since 1930. The pressure on the Cattle market from the year 1930 forward was the difficulty of finding a market for Canada's surplus. That surplus is roughly 200,000 Cattle per year. Exports (live Cattle) for the last 10 years have been:

1927	212,599	1932	25,578
1928	166,874	1933	56,003
1929	160,103	1934	60,193
1930	24,883	1935	109,638
1931	36,308	1936	197,901

The recent relief has come through shipments to United States. Under the Canadian|American Trade Agreement a number of Cattle up to 155,000 may be shipped into United States at a Duty of 2c per lb. This concession was secured from the United States Administration only after prolonged negotiations. It was strenuously opposed by American Cattle Producers.

It is supposed that negotiations are at present under way between Canada, Great Britain and the United States, looking towards an expansion of trade between these three countries. To secure such an expansion concessions will be asked for, and given, by each of the negotiating countries. Canada undoubtedly will be asked to give certain advantages to United States. In return she will expect to receive other advantages. One concession Canada should firmly stand for is in connection with Cattle. If the United States insists on a Quota (as they probably will) she should seek to enlarge that Quota from 155,000 to 200,000 Cattle per year. This number United States can certainly concede as it is only about 1% of the total number of Cattle marketed in United States each year.

But more important still is [illegible] Duty. If United States is to admit any stated number of Cattle [illegible] no difference to the American Producer whether those Cattle pay a 2c Duty or no Duty at all. This is the great modification that needs making in the Canadian|American Agreement. If Canadian Cattle,—up to the Quota number—were admitted to United States without Duty, this concession would automatically add 2c per lb. (approximately ....$20.00.... per head) to the value of all the Cattle in Canada. And the concession would cost United States nothing.

. . . . . .

In this Report to Shareholders, the Directors again wish to pay tribute to loyal and efficient work of all ranks of Employees. During the year there have been two increases in Plant wages. These are now on a basis substantially higher than the rates of 1929. To an appreciable extent these advanced wages have been offset by higher efficiency, brought about by co-operation of Employees. The quality of products is better than at any previous time in the Company's history. This is due to the pride of workmanship on the part of Plant Employees, fortified by co-operation of all other ranks.

J. S. McLEAN,
President

Toronto, 1st June, 1937.

SUNDAY SCHOOL LESSON

LESSON II

God Provides A Leader — Exodus 2: 1-22; 3:1-12

GOLDEN TEXT — "Come now therefore, and I will send thee." Exodus 3:10.

THE LESSON IN ITS SETTING

Place — The events surrounding the birth of Moses took place probably near the city of Tanis, one of the royal residences in the northeast of the Delta near the mouth of the Tanitic branch of the Nile. The call of Moses took place near Mount Sinai, located on the peninsula of Sinai.

Time — B.C. 1578—B.C. 1499.

"Now Moses was keeping the flock of Jehtro his father-in-law, the priest of Midian, and he led the flock to the back of the wilderness." That is, to the west of the wilderness, the east being in front. The wilderness was the tract of country south and west of Midian, reaching to the eastern shore of the Gulf of Akaba. In these years of oblivion, when he was quietly shepherding the flocks, there would be long hours during every day when Moses would be by himself, face to face with nature and God, gaining mental strength and vigor from his contact with the simplicity and solemnity of nature. At the same time, he would be disciplining his body by spare and simple meals, by much constant walking in the open air, by the sleeping on the ground, short nights and early risings; while he invigorated his whole character by communing with himself and with God, and by deep searchings of heart, sharp questionings of conscience, reflections upon his past life and repentance of his sins.

"And came to the mountain of God, unto Horeb." (See also 4:27; 18:5; 24 13) Horeb and Sinai are throughout the Scriptures almost interchangeable This mountain is located on the peninsula of Sinai. The mountain may have had previous sacred associations but we do not know. It may have been called holy in this text because the writer knew of the great events that were later to take place on its sacred heights.

"And the angel of Jehovah." We believe this to be none other than a manifestation of the Second Person of the Trinity, the Lord Jesus Christ. "Appeared unto him in a flame of fire out of the midst of a bush." This bush was a bramble bush, or a form of acacia. "And he looked, and behold, the bush burned with fire, and the bush was not consumed." It should be noted that the manifestation of God was not through the majestic oak or cedar, but through a common bush of the wilderness.

"And Moses said, I will turn aside now, and see this great sight, why the bush is not burnt." Joseph Parker has suggestively arranged some of the words of this verse as follows: I will turn aside, and see — why not. And he remarks that many men turn aside to see why things are. Here is a man who turns aside to see why things are not. God is always looking for the man who asks How. When a man takes life seriously enough to ask the reasons of things, God is all ready to grant him his desire.

"And when Jehovah saw that he turned aside to see, God called unto him out of the midst of the bush, and said, Moses, Moses. And he said, Here am I." God calls to men in different ways, sometimes by sending an angel, sometimes by misfortune, sometimes in great opportunity, sometimes in an hour of defeat, overwhelmed by a great sin, sometimes when travelling and a great vision of work is opened, often when reading a book, and most of all, when we are engaged in meditating upon his word.

"And he said, Draw not nigh hither and put off thy shoes from off thy feet, for the place whereon thou art standing is holy ground." God is about to call Moses to a great life-work; one thing is needed before God speaks — a bowed and reverant heart. The command of God to Moses to put off his shoes may be accounted for from the custom in the East of wearing shoes or sandals merely as a protection from dirt. When entering holy places the Arabs and Samaritans, and all Mohammendans, take off their shoes that the places may not be defiled by the dirt or dust upon them.

SLICED [Map] ERY THIN

[that] [exhibits]

"No Matter How Thin You [ar-] Slice It — It's Still Boloney"

Why these corporations and individuals keep on bringing suit against the Ontario Government is more than we can fathom, unless the lawyers are doing it for exercise. For the way Mr. Hepburn's Govt. acts reminds us very much of a boy who used to live in the village of our nativity.

(By the way we have just heard that the citizens of that village have put up a tablet on the house in which we were born. It reads "Main Street.")

Anyway this boy was a lot bigger—and huskier—than the rest of us kids, and bossed us around no little. And when playing baseball—or what we fondly thought was baseball—he dearly loved to bat, and hated to field.

So the way he ensured a permanent turn at bat was like this. Whenever he was struck out, or caught out, or put out in any other wise, he would promptly stop the game and change the rules—making said change retroactive. And if any of the rest of us would protest he would threaten us with a swell bust in the snoot.

If we remember he got away with these tactics for some considerable time—in fact, till a new kid moved to town who turned out to be even tougher than he was.

After the fight which ensued, our batting-loving friend played the game strictly according to the old rules—and took his turn in the field just like the rest of us.

After almost a hundred years they have changed the rules of the famous Diamond Sculls so that "artizans" as they phrase it are now allowed to mingle with and compete against "gentlemen." Formerly only those who had never soiled their hands with vulgar toil were allowed to take part in this sculling classic.

Which reminds us of the time when Lou Scholes went over to Henley to compete in this event—which he was good enough to win. But when he got there the question arose as to his status—whether, as the son of a hotel-proprietor—we suppose they said ovah theah, "pub-keeper", he was fit to match oars against the Oxf d and Cambridge graduates who regularly won this event.

Somebody told old John L. Scholes—Lou's paternal parent—about this trouble, saying that the English authorities were in doubt as to whether Lou was a workman or not.

Said John L. "They can set their minds at ease, because I'm willing to take my oath he never did a stroke of work in all his life."

Just what one good and colorful performer can do to boost any sport—and especially the sport of wrestling—is shown by the way business has perked up since the appearance of this new Masked Marvel, or whatever they call him.

That Masked stuff is very ancient—in fact it was tried and tested around here till the public no longer took any interest. But this present mysterious stranger seems to have what it takes—in other words he can put on a show even without the aid of his disguise, with the result that once more the folks are flocking to the shows.

Wrestling, modernly, in Toronto started with such performers as Zbyszkos—real wrestlers if ever there were any—Renato Gardini and several others whose names for the moment escape us.

But it wasn't till Ivan Mickailoff brought here that master showman—the unforgottable and unforgotten Stasiak—that the crowds started to bulge out the sides of the auditoriums.

Gus Sonneberg kept up theg ood work, and while probably neither he or Stasiak—from a standpoint of real skill—belonged in the first ranks, they had the color that makes the cash register jingle.

And when Gus the Goat lost his title, and Stasiak died, wrestling hereabouts started to slip. It is true that Danno O'Mahoney drew big crowds for a while, but it got so that even some of his compatriots began to notice that Danno's opponents weren't playing for keeps against him.

The funny thing about it is that Danno is a far better wrestler now than he was when he was flailing all and sundry with his "Irish Whip"—but that's the way it goes.

Anyway, we are glad to see wrestling on the up-grade, because we have had plenty of fun at wrestling bouts, although we must confess that we got far more pleasure sitting in the dressing room talking to the performers than we ever did at the ringside watching them squirm and listening to them grunt.

Building

It's wonderful for men to build,
With hammer, drill and forge,
A bridge to span the cataract
That rushes through the gorge.

It's wonderful to write a book,
To paint an amber sky,
To give the world those deathless things
That never fade or die.

Girl Presses Fight For Chieftainship

Claim Now Before Courts Over Year Includes Mass of Evidence — Call for Clear Title.

EDINBURGH — A weighty mass of evidence under examination by the court of session may decide whether Miss Catriona Louise MacLean of Ardgour, 17, is to succeed in her claim to be declared chieftainess of the MacLeans of Ardgour.

Her claim, before the courts for more than a year is contested by the Lieut-Commander,, H. H. MacLean of Windhover, Bursledon, Hants.

In the case the Lord Lyon King of Arms, Sir Francis Grant, held that he had jurisdiction to try Miss MacLean's petition to be recognized as chieftainess of the branch of MacLean of Ardgour. Commander MacLean's appeal to the court of session is against this decision. Judgement was reserved.

The pleading was amended during the hearing by altering the phrase, "house, branch or family of MacLean of Ardgour" and by altering the word "chieftainess" to "chief."

T. Innes, counsel for Miss MacLean said she wanted more than the arms, she wanted a record of the character in which the Lyon awarded them. It might be held against a son or a grand son that the petitioner had only a life rent and that when she died the arms passed in another direction.

Lord Mackay said if everyone was granted arms was recognized as a chief of his descendants there would be possibly some 5,000 chiefs in Scotland now.

Commander MacLean contended the chieftainship passes to the male heir in preference to the heiress of the line. The former chieftain of Ardgour was Miss MacLean's father, who died in 1930.

When Charles I. Rooney's automobile killed a mother cat, at Olean, N.Y., a neighbor told him it was his "duty" to take care of the four surviving kittens. Mr. Rooney ordered an extra bottle of milk left on his doorstep daily.

Issue No. 28—'37

U.S. Gunboats Will Visit Exhibition

Two United States gunboats will visit the Canadian National Exhibition this year and from their anchorage off the seawall will fire a salute in connection with the Warrior's Day Parade. The latter this years takes on added international aspect because of the attendance of numerous posts of the American Legion with their bands and drum corps from various points in the north-central area of the U. S.

The naval secretary of the Department of National Defence had informed Exhibition authorities that the gun-boats will be the U.S.S. Wilmington, Capt. Anthony Nicklett, U.S.N. R., and the U.S.S. Dubuque, Lt.-Commander Richard T. Broadhead, U.S. N.R.

HAVE YOU HEARD

Nothing is really work unless you would rather be doing something else.

"Let joy be unconfined," even if there are slip-ups here and there.

Mandy had been given leave to attend her sister's wedding, and on her return entertained her employer with a full account of the proceedings. After listening to a glowing description of the gowns; the wedding breakfast and the guests, Mandy's employer said:

Employer — "You haven't told me anything about the bridegroom, Manry. What is he like?

Mandy — "Why, ma'am, dat man never did show up.

I WILL SUCCEED

If you keep your faith in me,
Though life be like a stormy sea,
And difficult my task may be —
I will succeed!
If you will look with smiling eyes,
Let days be dark with lowering skies
And nights be fraught with weary sighs,
I will succeed!
If you speak a word of cheer,
Though harassed oft by doubt and fear,
An ugly failure bover near —
I will succeed!
Grenville Kleiser.

Farmer — "Yes, we've got all the new-fangled machinery there is. Our latest buy was two milking machines.

City Miss — "How interesting. But tell me, do they really give as good milk as the cows?"

Unless he has the ambition to fit himself for a better job, he has not the ability to acceptably fill the one he now has.

Postman's Wife — "Why Pa, you look all tuckered out!"

Postman — "I sure am. I have been all over town looking for a guy named 'Fragile'."

Read It or Not!

That lightning does not strike even twice in the same place is erroneous. It is of record that it struck five times within thirty minutes.

Salesman — "I understand that you and your husband have both lost several pounds since you bought one of our reducing machines."

Customer — "Yes, we've had to starve ourselves to keep up the payments on it."

Cooper (at summer resort) — "And when did you discover that you loved me?"

Agnes — "When I found out that you were the only unmarried man here."

Habits seldom stay the same. They either grow or lessen.

Young Doctor — "Say ah-h-h-h.

Sweet Young Thing — "All right, I will say it, but remember, I don't mean it."

From an exchange we clip: "It is suggested that movies be flashed on the ceiling in the work shop of dentists, and the minds of the patients may be distracted. The patients will furnish the sound effects, it is assumed."

Mary — "Well, leap year passed and we're still single.

Martha — "Yes, but lap year is always with us."

The following letter was received by a firm that manufactures corn syrup, saying: "Dear Sirs: Though I have used six cans of your corn syrup, my feet are no better than they were before."

Indignant Caller — "What do you mean by saying in the paper that I looked quite nutty as I stood on the speaker's platform?"

Reporter — "Nutty? My dear sir, I am very sorry, I wrote 'natty.'"

Four ewes of Lord Leconfield's Skidow Forest, Eng., flock were rescued alive from a snowdrift after being lost 37 days. This is said to be a

Weeds Beset Many Fields In Ontario

Leafy and Cypress Spurge Is Bad In Shakespeare and Monkton Areas

TORONTO. — Ontario fields, soaked by heavy rains this month are being beset by weeds, the Ontario Department of Agriculture reported today.

The "leafy Spurge" and his smaller but equally destructive brother weed "cypress spurge" are responsible for considerable trouble to farmers in Western Ontario and some other parts. The former, which chokes out everything else is to be found in every county of Western Ontario and it particularly is bad in Guelph, Shakespeare, Monkton, St. Thomas, Beachville and Oil Springs districts.

It takes two years of black summer fallow to combat the leafy spurge and even then the results are not certain, the department recommending spraying as the best remedy. "We must have complete eradication of this weed if Ontario crops are to be safe in future years," the department noted.

The leafy spurge grows two feet high, with small yellow flowers at the top. The cypress grows eight to ten inches and is sometimes known as "graveyard moss". Some kind soul planted it on a grave in Braeside, near Arnprior, and today the weed covers the whole village, and 700 acres are covered with it in Berulam township, Victoria county.

All spraying should be done before the end of July, the department added, with a mixture of 1½ pounds of sodium chlorate to a gallon of water.

Canada Gives U.S. Lesson in Justice

Friendly borderers in spite of the proverb, Canada and the United States have long had what Chief Justice Hughes has called "the habit of peace," notes the New York Times. They also have the habit of democracy; as Lord Tweedsmuir has just said, the are "engaged in the same job." Politics in the Dominion has all the heat and fury and humor and hum-bugging of ours. After an election there is the good temper which marks or used to mark the end of American battles on the stump. Both nations are federations, if Professor Turner was right in his theory of the federation of geographical sections rather than of states and provinces. The Prairie Provinces might be compared profitably with the Middle West. The attacks on big business, the wrath against the bankers in Montreal and Toronto, recall the hymn of hate which our politicians have chanted so long against Wall Street.

Relief and rehabilitation are Canadian problems as they are ours; and now the organization of labor is bothering Canadian statesmen. Both nations have to deal in their democratic ways, essentially the same for all their differences, with the same matters of national movement.

The Canadian method is niways worth watching. Lord Tweedsmuir was too modest when he predicted that in time the United States would "get"—that is, "learn" a good deal from Canada. She taught us much about prohibition. One sorely needed lesson she is giving us every day seems little taken to heart. In that country of immense range the criminal law, whether in cities or isolated communities, is executed speedily and effectively. Trials are short. The courts are not theatres of cheap emotionalism, windy oratory, pettifogging tactics to delay or defeat justice.

Lord Tweedsmuir spoke of "the physical frontier" of Canada. The frontier of the United States disappeared more than 40 years ago. According to Roscoe Pound, our scandalous criminal trials are inheritances of the frontier. In Canada judges are appointed for life and are not susceptible to political influence. There is no haggling for weeks in an effort to select a jury. There is no string of appeals to save a criminal's neck. Here too often he wins and the public loses.

We ought to learn from the Canadians how to administer criminal justice, but are we likely to? There are pessimists who hold that the great sprawling, easy-going, sensation-loving American public looks on a criminal trial as a show, spectacle, melodrama; pulp story, and bothers itself mighty little about justice so long as it has plenty of excitement.

Figure Problems Easily Solved

Sports and Games in Moderation Keep One Healthy and Fit

Modern experts now agree that sports and games, in modernization, keep the body just as beautifully sleek and trim as deep knee bends and other monotously routine reducing exercises. This should be a cheering thought to the woman who has figure problems but who is so bored by regular exercises that she simply refuses to do them at all.

The authorities warn against overdoing the business of active sports to the point where you become too muscular, of course. They simply advise their clients, especially the ones to whom setting-up exercises are anathema, to swim, play tennis, golf and badminton, or any other sport which is enjoyable. Older and less energetic customers are told to take long, brisk walks.

If you do not have access to a golf course, tennis court or beach, use your imagination to figure out some kind of exercise that will keep your skin and muscles firm and young and at the same time be fairly amusing to do. How about skipping rope in the backyard or, if you like, right in the house? Or borrowing your son's bicycle for an hour a day? Or learning to enjoy a brisk walk? Or re-budgeting your movie and candy money to allow for a couple of swims a week in a pool?

Whether she wants to lose weight or not, every woman needs exercise —and a generous amount of it, too. The most atractive mature women are those who walk lightly and who do not feel like groaning every time they have to get up quickly or are faced with the necessity of climbing a flight of stairs. Exercise, and only exercise, keeps waistline and leg muscles slender and prevents neck and arms from looking flabby. And it's sad but true that walking about the house and doing regular household duties do not provide the right kind of exercise.

Plain ordinary stretching is good for waistline and arms and it does improve posture. Certainly there is no one who does not have the time or energy to stretch and yawn before getting out of bed and to stretch five or six times during the day. This won't keep you slim, but it will ward off middle-aged stiffness about your middle.

Pension Curiosities

Writes the Charlottetown Guardian :— In the United States last week they observed Memorial Day. One American kept it by pointing out in the New York Times that since the Revolution the Government has paid war veterans over $21,000,000,000.

Some of the things noted by this writer are extraordinary, to say the least.

The War of 1812 ended 122 years ago. Yet at the beginning of the present month Mrs. Caroline King, widow of Private Darious King, of the New York Militia, received her monthly cheque of $50 and Mrs. Esther Ann Hill Morgan, daughter of Private John Hill, of the New York Militia, received her monthly cheque of $20—both pensions going back to the War of 1812.

The Mexican War was fought in 1846-48. At the close of last month 226 widows of soldiers who fought in the Mexican War were still on the pension rolls.

The Civil War was over and done with 72 years ago. Last month Washington mailed out cheques for 78,000 persons on account of the Civil War. In addition there were nearly 5,000 veterans, widows and orphans of the Indian wars drawing pensions, over 2,000 veterans of the Spanish-American War drawing pensions.

Finally, there are Great War pensions. United States World War veterans have thus far collected $3,250,000,000—and are still collecting. This in addition to $3,621,000,000 they received through bonus cheques and for medical and hospital care.

Fourth Re-Union Graydon Family

A E Graydon, Streetsville Elected President

On Saturday last over 100 descendants of the late Thomas Graydon gathered in Gage Park and the Orange Hall at Brampton for their fourth family reunion since 1926. Previous reunions have been held at Streetsville. The Graydon clan assembled from many points including Ottawa, Detroit, Lucknow, Wingham, Toronto, Mimico, Erin, Streetsville and Brampton. It was the largest assemblage of the family so far held and included many who had not attended the reunions before.

This year those in attendance were treated to a tour of inspection of the champion Jersey herd of B. H. Bull and Sons and the Dale's Conservatories after which a program of sports was held in the town park. This latter feature was handled by a committee comprising Graydon Clipperton, Wix Atkinson, both of Streetsville and Sam Graydon of Toronto. The prize for the oldest person in attendance went to William Graydon of Toronto and that for the youngest to Graydon Petty of Streetsville while Beth Graydon of Ottawa won the prize for the person travelling the longest distance to attend.

After posing for a family group photograph, those in attendance sat down to a supper in the Orange Hall which was furnished by Queen Alexandra L.O.B.A. The head table guests included Gordon Graydon, M.P., President of the Graydon Family Reunion Association; W. Hector Graydon, of Streetsville, secretary; Mervin Graydon, of Mimico, treasurer; Mr. and Mrs William Graydon, of Toronto; Dr. and Mrs. W. L. Graydon; Mr. and Mrs. Austin Graydon, of Streetsville; and Mayor W. J. Abell, of Brampton, who welcomed the visitors to the town in an appropriate address.

Musical selections were rendered by Mr. and Mrs. Alfred S. Thomas, of Brampton; little Miss Carol Graydon, of Brampton; Mr. Reubert Graydon, of Etobicoke and Mrs. W. G. Fulton. An exhibition of toe dancing was given by Miss Charlotte Thomas. Addresses were given by the following: Austin Graydon, Dr. W. L. Graydon, W. H. Graydon, Mervin Graydon, John T. Graydon, Henry Gardner of Lucknow, James Craig of Wingham, Ernest Gardner of Lucknow, Mrs. May Kellam of Detroit, and Mr. and Mrs. John McKenzie of the same place. Motions of thanks were passed for transmission to B. H. Bull and Sons and Dale Estate Limited for their courtesy and kindnesses while a vote of thanks was also tendered to the Orange Ladies, who catered and which was received by Mrs. Herbert Bailey, Worthy Mistress of the lodge. Letters to two members of the connection were instructed to be sent, one to Mrs. Sarah J. Magill and the other to Mr. W. G. Fulton, expressing hope for their permanent and speedy restoration to health.

A comprehensive and detailed historical outline of the Graydon family was given orally by Gordon Graydon, M.P., from information he has been busy collecting for some time. He revealed that the Graydons came originally from Scotland in the seventeenth century and settled in Northern Ireland, in the County of Fermanagh, near Maguiresbridge. The common ancestor of the Graydons in Canada was Thomas Graydon, a farmer in the old land. Thomas never saw Canada although three of his children did. He had a family of six including John, whose descendants are unknown, Minnie, who died in Canada unmarried, William, whose descendants are to be found around Streetsville; Sarah, who married William Gardner and whose family are mostly residing on farms near Lucknow; Joseph, whose descendants can be found in Western Canada, Toronto and Ireland; and James who settled on a farm in Chinguacousy township in 1848.

William came to Canada about 1838 and to him was given the warrant which now hangs in the lodge at Streetsville, of L.O.L. No. 263. He evidently took the warrant to Streetsville in 1843 after living in York for awhile. He had two daughters and three sons. One daughter Sally married Joseph Fulton and the other daughter, Mary, married John Armstrong. One son, William, was a shoe maker in Streetsville, a prominent Orangeman, and on the High School Board for over 30 years. It was he who was shot three times by robbers in 1888, when they attempted to enter his house. Another son, Robert, was postmaster, customs collector and general storekeper in Streetsville for many years. He served in the Fenian Raid in 1866 as a militia volunteer from Streetsville. The other son, John, was one of Peel's leading businessmen in his day, carrying on as a builder and contractor. He was largely responsible together with James Gooderham for the extension of the Credit Valley Railway which was completed in 1879. John was offered the Conservative nomination in Peel in the nineties, but declined the honor. He was for 40 years superintendent of the Methodist Church at Streetsville previous to his death.

James, who settled in 1848 on lot 19, Second Line West, Chinguacousy, married Elizabeth Oalas, daughter of a well-known family in the vicinity. In 1860 within 10 days four of their sons died of the black diphtheria plague as the little markers in Home Church Cemetery reveal. In 1861 Sarah Ann, who later married Geo. McCulloch was born and on June 22nd 1870, William, a son, first saw the light of day. The only child of William was Gordon, who was born in 1896. This family of Graydons lived on the Chinguacousy farm until William died in 1925. The only son of William is now the Federal member for Peel, having been elected in 1935.

Joseph never saw Canada, but several of his sons came out while Sarah's family may still be found in considerable numbers at Lucknow, Cochrane, Winnipeg and Detroit.

The new officers of the Family Reunion Association, elected at the gathering were as follows: President, Austin E. Graydon, Streetsville; secretary, Albert Graydon, Toronto; and treasurer, Henry Gardner, of Lucknow. Plans were laid to celebrate the 100th anniversary of the settling of William Graydon in Streetsville in 1943.

Twice, within the past month, close personal friends of ours, young people for whom we had and still have a good deal of regard, have popped up, suddenly, with the announcement that they were married some time ago, and had been keeping it dark for various reasons.

The chief reason for their failure to announce their weddings was that they had too little money to set up housekeeping. They had married, not because there was any pressure upon them to do so, as is all too frequently the case, but simply because they were tired of postponing their marriages, yet had no immediate prospect of leading a normal married life.

There are also more than a few persons of our acquaintance, some of them personal friends, who should be married. Whatever their relationship to each other, the members of these couples should be joined in wedlock because they are missing some of the best things of their lives by having to at least retain the semblance of living as single units of the social system.

Yet, unfortunately, they feel that they cannot get married because they have not enough money. Social pretense has imposed a great many restrictions on marriage in the last few years. There are so many more things that a young couple must have, now, to be happily married, it would seem, than a score or more years ago.

On the one hand, the churches tell us that we must maintain our sexual morality at all costs until we have entered the happy bands of those who could afford marriage. On the other hand, the economic conditions of the day are such that few young men are able to afford the many things that the prospective bride has been led to believe should be provided for her. Many couples get married anyway, and, human nature being seldom content with the mere necessities, many of these couples have a very poor time of it.

There are too many young men and young women being paid too little for doing work for which they are none too well fitted for there to be any immediate settlement of the marriage question. And, sadly enough, it would seem that there is little to be done about the situation short of a complete rebuilding of the economic system.

Several political leaderships have preached the above doctrine, but, unfortunately, their preachings stopped short at the statement that certain things should be done, and that they, the leaders, would "see if they could try and do something about it". Meantime, many of the youngsters who would like to get "hitched" can't afford to.

Most of the girls have jobs which are keeping them without being dependent on their parents. If they could get married, the majority of them would throw up their jobs, which would leave work for many women now unemployed.

For some years past we have been subsidizing unemployment. It would appear to us that it is high time that we started subsidizing marriage.

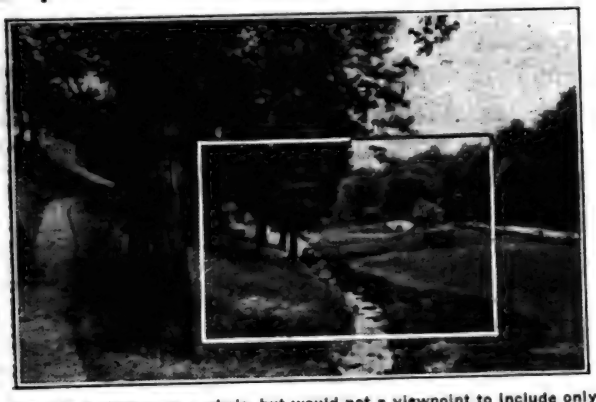
TELEPHONE TALKS IN THE WATSON FAMILY

"Here's Dad, it's his turn now!"

Friday night's a special night with the Watsons. Promptly at eight the telephone bell tinkles and Bob's hearty voice comes booming over the wire — then Muriel's and the youngsters'. "Long Distance keeps us young," say their grandparents. "It's the cheapest pleasure we know of."



Like the Watson family, you too will find Long Distance the ideal way of keeping in touch with out-of-town relatives or friends. The low cost will surprise you!

The SNAPSHOT GUILD

CURING PICTURE BLINDNESS

Not a bad picture, as a whole, but would not a viewpoint to include only the section marked in white have been better?

ARE you picture-blind? Do you have what it takes to see a picture?

"None so blind as those who will not see," says an old maxim, which, applied to picture taking, means none so blind as those who don't know how to see and will not learn. In this respect camera users are, of course, differently constituted. There are those who are quite satisfied with snapping good *record* pictures, likenesses of their friends and relatives, their pets, treasured objects and the houses they live in. In many cases, that seems to be as far as they can go in seeing pictures, because they lack the instinct for picking out artistic composition in nature or recognizing picture elements in human activities when they encounter them. Artistic sense and the feel for human interest, both are qualities with which some are endowed more generously than others.

Driving along a country road on a summer's day, picnic-bound, camera in the car, one person comes upon a group of men and women in a farmyard. They are gathered about a shirt-sleeved man standing in a cart. The man is gesticulating and pointing to a mowing machine. Other farm implements are about the place. To the left of the group stands a lofty haystack, like a giant mushroom. To the right, a dilapidated old barn. A dog and some chickens are running about. Behind the scene fields stretch to a patch of woods and above big lovely clouds are drifting.

"Only a farmer's auction," he says and whizzes by. But the next fellow halts his car, snaps picture after picture of the scene, close up and from a distance, making some shots with a filter over the lens so as not to lose the clouds. For human interest, artistic setting and universal appeal, he is proud to match these pictures of a country auction with the other fellow's picnic pictures, precious indeed though the latter may be as souvenirs of a good time and memory pictures of friends.

For those who miss pictures the other fellow instinctively sees and are envious of his success, the solution is to learn, because it certainly can be done. Many have surprised themselves and achieved success by mentally framing sections of scenery as they travel about and asking themselves, "Will that make an interesting picture? Has it pictorial value?"

Practicing picture taking and comparing your prints with accepted examples of good pictures is another way to learn. And here is still another suggestion:

Many amateurs take good pictures without knowing it. Time and again, a well composed picture may be found in a small area of a print that as a whole is pictorially poor. Get out your old snapshots and search for small areas you think have the elements of good composition. Then from the negatives have enlarged prints made of these particular sections. You will not only learn a lot about composition, but chances are that among these enlargements you will get some amazingly good pictures you didn't know you had.

John van Guilder.

IT PAYS TO ADVERTISE

Lightning Takes Course Like River Shown on Map

The ancient Greeks believed that lightning consisted of heavy spear-like projectiles which had been heated white-hot and cast at offending mortals and objects, with none too accurate aim, by their head god Zeus.

The primitive Germans attributed lightning to bolts thrown by a malicious god named Loki while the dull-witted war god, Thor, pounded on the sky with a hammer to make thunder. In fact, writes Dr. Thomas M. Beck in the Chicago Tribune, almost all primitive peoples believed lightning was a sort of material missile hurled by a vindictive god. This theory died out in Europe with the rise of Christianity, since it was difficult to reconcile the idea of lightning as a manifestation of divine wrath with the observation that it seemed to strike church steeples more often than anything else.

Still we should not smile too much at the mistaken beliefs of these long-dead Greeks and Germans. We are not very well informed on it ourselves. The average man knows that it consists of electricity, that it zigzags in Z-shaped straight lines, and that it never strikes twice in the same place. Armed with this knowledge, he is two-thirds wrong. Lightning is certainly a discharge of static electricity, as Benjamin Franklin showed many years ago.

But there is nothing at all straight about a bolt of lightning, although apparently this fact was not known until lightning was actually photographed. Actually it follows a meandering course like that of a river as shown on a map.

This figure is correct in other respects than appearance, for lightning is actually a river of electricity. Just as water follows the course of least resistance in flowing from a high altitude to a low, so does electricity move from a high to a low voltage.

Gates Fort, Bermuda, Is Named for Old Virginian

Ancient Gates fort, which is a mile and a half from St. George, Bermuda, and which antedates the landing of the Pilgrim Fathers by a decade, is the site of this ruined fortification, built by Sir Thomas Gates, governor of Virginia, shortly after he was shipwrecked there in 1609, and while his famous vessel Deliverance was being constructed to carry colonists on to their original destination, Jamestown.

Excavations made by members of the St. George Historical society, writes a St. George, Bermuda, correspondent in the Detroit Free Press, disclosed the original plan of the fort which had been buried with solidified sand. Embrasures were restored, old guns re-mounted in positions from which their gaunt muzzles spelled authority to invading Spaniards, French, Dutch and Portuguese, and later to blockade runners and ships from the North and South which used Bermuda as a base for supplies during the Civil war.

St. George itself is the oldest English settlement on this side of the Atlantic.

Rivers Flow Underground

Although it is frequently printed that Barbados has no rivers, this assertion is entirely untrue. There are a number of rivers, but they all flow underground. From these subterranean streams the towns are supplied with pure water. It is nevertheless true that one may travel from end to end and from side to side of the island and never see a stream or pond worthy of the name. So easy is it to tap one of the many subterranean rivers of Barbados that upward of 300 miles of pipes carry the water to all towns and hamlets on the island.

"Going to Putney on a Pig"

The saying "Going to Putney on a Pig" had its beginning in the playful chaff on the road to the University Boat race. In the early days of the race, says a writer in Pearson's London Weekly, it was usual to use all kinds of vehicles to get to Putney, including the small cart drawn by two dogs, the costermonger's barrow and donkey, and every other type of conveyance. The singularity of some of the turn-outs, no doubt, suggested the comical idea of going to the race on a pig.

Salt-Cellar a Massive Piece

In medieval days the family saler, or salt-cellar, was a massive piece of silver, placed half-way up the long table at which the head of the family and his guests and retainers dined. Persons of distinction sat nearer the head of the table, above the salt-cellar; the more humble folk near the foot, below it. So came the expression of compliment or respect, "to sit above the salt."

Dutch Traders Successful

Of the many attempts made by European nations to trade with Japan in the Sixteenth, Seventeenth and Eighteenth centuries all failed excepting that by the Dutch, who cepting that by the Dutch, who had a curious arrangement whereby the necessary Japanese interpreters were trained to carry on an oral conversation in Dutch, but were forbidden to learn to read or write Dutch under penalty of death.

10.00 a. m. Sabbath School.

11 a.m. Divine Worship

The minister will preach

7 p.m. United open air service in Peel Park

Veterans' Garden Party

Streetsville War Veterans had a very successful garden party in the village on Dominion Day, with a good attendance

A splendid program was given by Toronto talent as follows: Connie Vernon, commedienne, Jackie Mc Credit, Zylophonist: Bill Harding Impersonator, Florence Davis, clever acrobatic and Tap Dancer, and others

Great amusement was taken out of the Bingo and Cocoanut games.

Cooksville

Miss Ethel Johnson held her S. S class picnic on Saturday afternoon at Steen's flats, Meadowvale.

Misses Dorothy and Winnifred Campbell and Robert Raine are taking a 3 weeks' course at O.A.C. Guelph

Cooksville Girls ball team went to Erindale on Monday evening and defeated the Erindale team by the score of 29—20. This game proved very exciting at times.

Cooksville boys played Sheridan at Cooksville on Monday evening. The boys say it was the best game they played this season. The score at the end of the game was — Cooksville 22, Sheridan 4

Miss Helen Forden fell and broke her left arm last week.

Miss Winifred Campbell has been engaged to teach school in the Haliburton district

Miss Eva Allen spent the week end in Churchill.

Miss Evelyn Baldwin is home for the holidays, from Hamilton

Mrs. W. Roy and her daughter Margaret, of Toronto, visited friends in Cooksville on Monday

Miss Pearl Heron has infection in her arm as the result of scratch from a cat

Cooksville Business Men will hold a picnic on Monday, July 19th, at A.W Miles park, West Erindale.

COMMUNITY CLUB

Mrs Elmer McDowell entertained members of the Community Club on June 30th

A contest on Current Events was won by Mrs. Hensley and in another one Mrs Steen was the winner. A reading was given by Miss Ruth Lee.

Next meeting to be held at Mrs Ball's

Thursday, July 8, 1937

The Review office will be closed for business every Saturday afternoon.

Local Items

Streetsville Orangemen will go to Bolton on July 12th.

Miss Allie Sinclair has gone to Lake Rosseau for several weeks

Keep Wednesday, July 14th, open for Trinity Church Garden Party. Further notice next week.

Miss Mabel Graydon (not Miss Mysia Graydon) as stated in last week's Review, has gone to Georgina House, Beverly Street Toronto, to supply for two months as Superintendent.

Miss Kathleen Marshall, Toronto, is visiting with Mrs. Vic Johnston.

Mr. T. H. Goodison is here from London on a short visit

Miss Ora Watson is visiting with friends at London.

Miss Ann Sinclair and Bertram Lyons are to be congratulated on their success in passing with high honors Grade II piano at the Conservatory of Music. Both are pupils of Miss Allie Sinclair.

Mr. H.F.Staley, Mrs. M. Dufton Miss Alice Waite, and Mr. Unitt Bailey attended the Bamford Re Union at Stanley Park, Post Stanley Sunday last

There will be a Lawn Bowling Tournament on the local greens tonight, Thursday, with Oakville, Port Credit and Streetsville rinks competing for prizes. All greens will be filled.

Mr. Will G. Fulton of Brampton motored to Streetsville on Tuesday to visit his sister, Mrs. Lundy. His many friends will be glad to know he is able to be out again

Garfield E. Turner, 45, only son of late J.H. Turner, of Trafalgar Tp died in Hamilton Hospital on July 6. Buried at Milton

Mrs. Henry Walker, 71, widow died in Toronto, on July 6th. Buried at Malton.

Mrs. Bert Brighty and daughter Florence have gone away for a few holidays

Mr. A. E. Buckle of Waterford has been appointed Principal of the Streetsville High School. He is a young married man and will move to the village shortly

Mr. Thomas H. Wilson, has started preparations to build a house on the lot he bought from Miss V. Bowie. We believe Mr. W. C. Arch has the contract.

Mr. G. A. Charlton of Winnipeg is visiting his brother, Mr. R. G. Charlton, and friends.

A grand Garden Party under the auspices of Burnhamthorpe United Church to be held on the Burnham thorpe School Grounds on Friday Evening, July 16th, at 8 o'clock D.S.T. The Entertainment is in the form of an Amateur Contest. Admission 25c & 15c.

Juvenile Lacrosse

By Alex Grabb

Well, fans, we haven't much for you this week. We played Mimico Monday night and lost 13—3, and last night Brock Grads beat us in a hard, close game by 9—6. However making allowance for the scarcity of players and the fact that three of these have been away for the past week, the boys did pretty well, most of them playing about forty minutes of each game.

We'll be at full strength against Brampton on the 13th, so watch for results

Both Jaws Fractured

Hazel June Aisthorpe, daughter of Sgt. Major Aisthorpe, D. C. M., M.M., Streetsville, met with a painful accident this week on the Indian Trail Hill, just south of the Dundas Highway, Erindale. She was riding her bicycle when her foot slipped off the pedal and went through the front wheel. She was thrown heavily to the roadway, alighting on her chin and elbow. Friends assisted her to her home. Dr. Montemurro gave her first aid and prepared her for the hospital. She was taken to the Western, Toronto, and left in charge of Dr. Fulton Risdon, who operated on her. The X Ray taken yesterday showed that there was a double fracture of both jaws The many friends of this young lady extend sympathy in her misfortune.

Douglas - Steen Re-Union

Dominion Day will long be remembered by those who gathered on the beautiful grounds of the old Steen homestead, where Mr. and Mrs. Jas. D. Steen now are living. For more than 100 years this farm, situated on Second Line west, and north of the Britannia Sideroad, Toronto Twp., has been in the Steen name. During this time three different houses have been built, and in these, different members of five generations have lived.

From Toronto, Caledonia Hamilton Streetsville, Meadowvale, Alberta Manitoba, Caledon, Brampton, Hillsburg, over 150 came to renew old acquaintances.

During the afternoon different sports were enjoyed which prepared all for the delightful picnic lunch under the trees.

The officers elected were the same as for last year: President, James D. Steen: Sec.-Treas., John Douglas; Sports committee, Roy K. McMillan, Wilfrid Steen, Beattie Douglas.

Dr. Oliver Steen, and Mrs Steen, the newly-married couple, were given the place of honor at the table,

TERROR MOUNTAIN

By MADELEINE SHARPS BUCHANAN

Three bandits, known as Ike, Lefty and Stutter, seize a trans-continental bus and force the driver to guide it up a mountainside to a lonely log shack. They are after a secret new explosive formula believed to be in the possession of a passenger, Finley Trump, chemical magnate. Meanwhile, a forest fire, creeping up the mountain, threatens to trap the group. Among them are May Lawrence, pretty trained nurse; young Dr. Nick Strand, who has been attentive to May; and Miss Jones, school teacher. On the first night, Miss Jones drugs the bandits' coffee and, when they are asleep in the living room, creeps in and takes Ike's gun. Then, to her horror, she sees he has been strangled—with his own bandana. As Lefty starts to wake up, she hastens back to the women's bedroom.

CHAPTER IV

Clutching the revolver, Miss Jones listened tensely to Lefty's startled curses as he discovered what had happened to Ike. She heard him trying to rouse Stutter, shouting at him.

"So you did in Ike, did you!" he snarled. "So that there'd be one less to share! Ike trustin' you, you dirty—"

But apparently, Stutter was not rousing. Then, another voice joined Lefty's in the living room.

"What's doin' here?"

Miss Jones recognized the voice of Red Doyle, and peeked through the doorway. Doyle stood in the centre of the room. Behind him was Jim Somers.

"Say!" said the bus driver, peering into Ike's face. "This bird is dead, Mr. Doyle!"

"And my pal here did it!" roared Lefty. "Now he'll probably try it on me! But who took Ike's gun? That's what I wanta know."

"Well, well!" said Doyle, bending over Ike. "So he's been strangled. Perhaps, as you suggest, you're next, Lefty."

"The devil I am!" said the bandit.

"With his bandana," mused the bus driver. "Imagine that! Just like he suggested before supper. His own idea."

"You wise guys shut up and get the rest of your pals," snarled Lefty. "I gotta find Ike's gun." He looked at Stutter again. "Say, he acts like he's been doped! Get the gang out here!"

May Lawrence, awakened by the voices in the living room, had stolen to Miss Jones' side at the door. Mrs. Jenkins still slept.

"Somebody murdered Ike," Miss Jones whispered to May. "With his own bandana."

May suddenly remembered Nick Strand's words—"I'd like to do for those dogs with my bare hands!" A chill shot through her. And he had not answered her questions about Trump and the formula. . . .

Her eyes dropped to the gun in the school teacher's hand.

"How did you get it?"

"Took it," said Miss Jones promptly. "Lefty thinks Stutter killed Ike."

"Of course!" May drew a breath of relief.

"But Stutter couldn't have done it," continued Miss Jones. 'He was drugged. I drugged him."

"What!"

"Child, something had to be done. I put some sleeping tablets in the coffee and did my best to get the weapons, but I suppose Lefty doesn't care for coffee—he woke up."

They went into the living room, where the others had assembled

"Where," Miss Jones asked suddenly, "is Amelia Bangor."

"Nobody would kill Miss Bangor," said little Mr. Jenkins, timidly.

"They'd have a time," said Mr. Trump.

Doctor Strand, after one look at Stutter, had made no move to arouse the man. Miss Jones touched his arm.

"Let's go out and look for Amelia Bangor," she suggested.

As she spoke, Red Doyle, who had been moving aimlessly about the room, made a sudden leap and fell upon Lefty. Jim Somers, as though at a signal, sprang to his assistance, through a rain of bullets from Lefty's gun. In a moment they had disarmed him and overpowered him.

It had been done so quickly and with such cool nerve, that the bandit hadn't a chance. He was quickly bound, and then, the sleeping Stutter was also bound, with ropes that Jenkins brought from the kitchen.

"Good work!" said Strand.

Miss Jones touched his arm again.

"I'm worried about the Bangor woman," she said.

Strand turned to her at once. "Let's go," he agreed.

The lantern still burned at the door of the bus, but all was silent within it. Miss Jones felt slightly faint. A dead Amelia Bangor would be far worse than a dead bandit. But "dead asleep" better described her. She had arranged a bed upon two seats and, with a robe thrown over her, was sleeping heavily.

"Look's as though she, too, might have been drugged," said Strand. "I can't understand—"

"I did it," said Miss Jones. "And I got Ike's gun." She pulled it from the pocket of her robe.

Then, in a few words, she related her adventure of the night.

"And tell that girl of yours you didn't strangle that man," she finished. "I think she thinks you did."

"Certainly I didn't!" said Strand in amazement.

"Amelia Bangor must have had some of that coffee," mused Miss Jones.

"Yes," agreed Strand. "But the less we say about drugs, the better, with a killer in our circle."

They started back to the house.

"Stutter could not have strangled Ike." Strand considered. "He's undoubtedly drugged, and Ike had been dead only a few minutes before we found him. Lefty might have done it. But you say that he seemed genuinely asleep. The only conclusion is that one of us did it."

"You might suspect me," said Miss Jones.

"But I don't," said Strand grinning.

A little later, unable to sleep after all the excitement, Strand went out alone into the fire-swept night. If he could only find a way out of this for them all—out of a situation hourly increasing in horror—

Walking down the uneven narrow road, he kept looking for an opening he had noted through the dense growth. Presently, he found it and started down through it, pushing his way slowly and climbing over boulders, with the descent growing ever steeper.

The fire appeared to be off to his left, and there was just a thin chance that there might be a way of escape across which the greedy flames had not yet flung a barrier. Then—his heart sank, and he stopped. The fire was at his feet. As far as he could see, he was rimmed in by flames. There was no opening. He had been a fool to hope. Before long, that mountain-top would be a torch.

Suddenly, he became aware of danger—not from the fire but from above him!

Not a second too soon, he threw himself, stumbling, out of the path of an enormous boulder that came tumbling down upon him, grazing him and hurling him to the ground. He was momentarily stunned and, as he slowly regained his senses, he had the impression of swift fingers upon him, of a thorough search of his person, of something binding over his eyes.

Then, he came out of it, to find himself blindfolded.

(TO BE CONTINUED)

BLACKHEADS

Don't squeeze blackheads — dissolve them. Get two ounces of peroxine powder from any drug store and rub gently with wet, hot cloth over the blackheads. They simply dissolve and disappear by this safe and sure method. Have a Hollywood complexion.

Ladies

Send us your name, and receive absolutely FREE, sample of our Highest Quality, Hospital Sanitary Napkins. Hygeia Products, London, Ontario.

Getting a Tan

No one has been known to consult his physician before acquiring a fast suntan, but many have had to do so later.

A deep bronze will shortly be the most popular shade and it will be sought heedlessly by many. Doctors say a bad case of sunburn is more than skin deep and that its ill effects are lasting. We do not know the medical terms covering these results, but, in ordinary language, suntan makes you worse than miserable.

Its prevention hardly requires a doctor's advice. Gradual exposure to the sun's rays rather than a quick tan should be the guiding rule on the first day of vacation.

It is only natural that the most will be made of the holidays but they should be made a time for recreation rather than an ordeal by fire. This is especially pertinent advice to those holidaying by lake or river, for sun rays are reflected off water with extraordinary burning power.

Two Centuries Of Bridal Costumes

Woman Brings Research Of Museums Into Theatres

BOSTON. — Their costumes described in detail by Mrs. Helen Virginia Meyers, brides of two centuries paraded the stage of the Metropolitan Theatre for a large and delightful audience. Mrs. Meyer is described by a newspaper writer as "one of the few women to bring costume research out of the museum into the theatre."

The range of the wedding gowns was from 1736 to the present year. One of the girls wore a replica of a second oldest American wedding dress, worn originally by a Salem bride of 1736. Another gown was a copy of one worn by a Boston bride given away by Lafayette, who had come to lay the cornerstone of Bunker Hill monument.

Cotton was first used for a bridal gown in the south, a decade before the war between the States, at a time, Mrs. Meyer discloses when southern women became aware of home industries.

The Civil War wedding took place in Atlanta just when Sherman arrived. The bride had the presence of mind to lock up the groom, the wedding cake and refreshments in the cellar, but the northern soldiers lifted the silver.

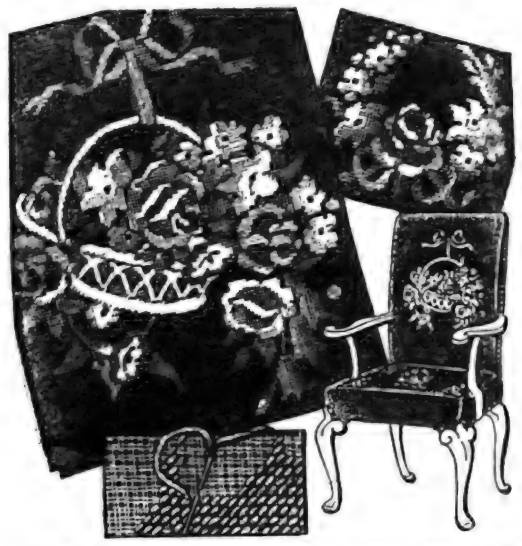
There was an original gown in the lot. Mrs. Meyer called it "the tragedy bridal gown," as it was made by a girl whose fiance was one of the last casualties in the Spanish-American War. The Gibson Girl period gown was worn at the Metropolitan by a young woman with glorious red hair, which she adroitly arranged in pompadour style.

The 1937 wedding gown was an unusually charming model of white mouseline de soie, in the Empire style. A short veil of sheer, starched lace was worn over a tulle veil seven yards long.

Looks Like Break For Teachers

The development of a gadget to correct and grade examination papers automatically may revolutionize education. At least it will simplify the tasks of teachers many of whom do work long hours after school is closed to mark the examination papers of their students. The teachers do not have the short hours which many do claim they have owing to the dozens of other duties necessary in connection with their position and mainly the marking of examination papers. So if and when the new gadget becomes universally employed, the overworked employees of places of learning may throw their hats into the air and give three hearty cheers.

The device, which has been sponsored at Athens, Ga., is said to work with the speed of electricity and will correct an examination paper of the true, false or selective questions variety and show the grade on a meter. F. S. Beer, examiner of the university system of Georgia, who had a hand in promoting the machine's development, reports that it works on the principle that a soft pencil mark is electrically conductive. The current of electricity flowing through the pencil marks made by the student causes the recording device to function.



Truly such a device should result in a great saving of time. In connection with the operation of the device, the student writes his answers in one or two or more optional columns on a standard printed form. As each paper is inserted in the machine, electrode blades descending on the paper determine which questions have been answered correctly. Time will tell whether the device can be made to function accurately.

Recipe For Safety

The lunatics—whether their lunacy is due to speed mania or congenial carelessness or sheer incompetence, should be removed from the highways. How can this be done? There are several methods. Eyesight tests and driving tests would weed out the incompetents. Those who have proven themselves reckless can be removed by suspending their licenses. And a proportion of those who have persistently got into accidents but have not collided with the law can be discouraged by the insurance companies. If every driver had to show an insurance policy before being allowed on the highway, it would simplify the process of making the highways safe.—The Vancouver Province.

The circus has just signed a labor agreement. The week's greatest instance of exhaustion was the case of the union man delegated to picket the man on the flying trapeze.—H. I. Phillips, in New York Sun.

Needlepoint Is Ever So Simple! Let Laura Wheeler Show You How

NEEDLEPOINT MOTIFS PATTERN 1509

Do needlepoint! It's easy—just half a cross-stitch done in wool on canvas. Now and in years to come, you and your children will treasure the fire screen, chair, purse or pillow of needlepoint which today offers such pleasant stitchery. The design is given in line with colors clearly marked. Pattern 1509 contains one motif 11½ x 14 inches; one motif 5½ x 6½ inches and two and two reverse motifs 4 x 4½ inches; a color chart and key; material requirements; illustrations showing how to do needlepoint.

Send 20 cents in stamps or coin (coin preferred) for this pattern to Needlecraft Dept.,-Wilson Publishing Co., 73 West Adelaide St., Toronto. Write plainly pattern number, your name and address.

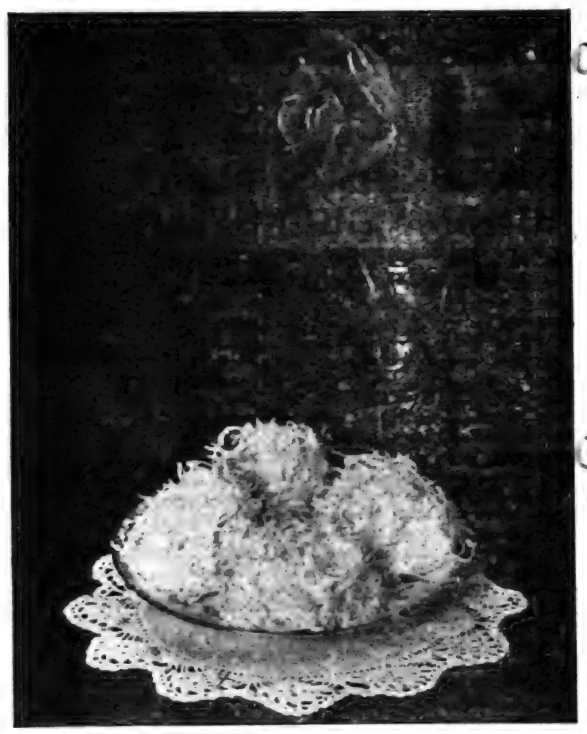
Ginger and Fred Are "Knock-Kneed"

PASADENA, Calif.—Ginger Rogers and Fred Astaire both are knock-kneed!

The California Osteopathic Association was told it was one of the secrets of their dancing success.

"Their dexterity, or the grace of ballet and esthetic artists like Theodore Kosloff or Fanchon Wolfe," said Dr. William F. Madsen, of Pasadena, "is due to the fact that they are knock-kneed.

"In fact, one could make the startling assertion the best dancers are knock-kneed. The anatomy of the pelvis, thighs, knees and legs put these members in a knock-kneed position when they properly support weight."



As construction of the International Thousand Islands bridge proceeds, the wiseacres who said it would never be built are being given their answer.—Brockville Recorder and Times.

Woman's World

By Mair M. Morgan

Coconut Dainty

Coconut, in almost any form, is a favorite. There are so many uses for these delightful, moist shreds of goodness that every housewife should keep a carton or sealed tin of it on hand. She should also be careful how she buys coconut because its goodness is lost if it isn't perfectly fresh. The only way to be sure that what you buy is the best is to get it in sealed tins or cartons which are especially constructed to retain all the moisture and freshness of the coconut.

There are two kinds of coconut, Southern style and premium shred. The first is used for topping desserts, sprinkling over frostings and fruit cups, for fluffy whips and meringue mixtures and the second is used more for fluid or semi-fluid mixtures, such as pie fillings, custards and puddings and as an ingredient in cookie mixtures. Though in most recipes, either style may be used, it is best to use the kind called for, as it is especially adapted to that particular recipe.

Here is a delicious idea for the tea hour in the form of fluffy coconut balls which are a treat when made with fresh coconut, and fresh coconut is the real secret of the success of any recipe calling for coconut.

Coconut Jelly Balls

1 cup sifted cake flour
1 teaspoon baking powder
3 eggs
1 cup sugar
2 teaspoons lemon juice
6 tablespoons hot milk
3-4 cup tart jelly
2 can coconut, southern style.

Sift flour once, measure, add baking powder, and sift together three times. Beat eggs until very thick and light and nearly white (about 10 minutes). Add sugar gradually, beating constantly. Add lemon juice. Fold in flour, a small amount at a time. Add milk, mixing quickly until batter is smooth. Turn at once into small cup-cake pans which have been greased very lightly on bottoms. Bake in moderate oven (350 Deg. F.) 20 minutes, or until done. Remove from pans. Beat jelly with fork until of right consistency to spread. When cakes are cool, spread with jelly; roll in coconut. Makes 36 cakes.

Dirty Cities

Letter to the Calcutta Statesman:—Sir:—I must protest most vigorously against the claim made in your news columns today, and encouraged in your editorial columns, that Lahore is the dirtiest city in the world.

Pride of place belongs to Calcutta. Almost every overseas visitor who comes among us comments on this distinction and their views have been abundantly borne out over the wireless, in the Press and in letters to the authorities. I know Lahore and I agree that it has claims to an honorable mention, but in the matter of real, all-pervading muck it cannot hope to come within hailing distance of Calcutta. It would, indeed, be wise not to come within hailing distance.

And another thing, the dirt of Calcutta is the dirtiest dirt in the world.—Yours, etc.—Mrs. G. F.—Kidderpore.

THE WORLD AT LARGE

CANADA

Salary Problem Banished

St. Marys Public School Board has taken a forward step in putting into force a definite salary schedule. Under the new arrangement teachers will have an understanding of their future prospects and will have an incentive to merit a gradually increasing salary through efficient services. As the committee says:—It should afford for teachers and Board a happy release from the yearly recurring vexatious salary problem. — St. Marys Journal-Argus.

A Borden Story

Sir Robert Borden never took himself so seriously that he could afford to be "chaffed." On one occasion, when he remarked that he was not contemplating an election, but proposed visiting the battlefront, a Liberal correspondent chided him that he would "sooner meet Hindenburg than the electors." He liked that.—Ottawa Journal.

Type of Settler

This is Canada's century. We do need population if the country is to develop and prosper as it should, but the class of settlers we want can be secured in the British Isles, the Scandinavian countries and from Northern Europe; sturdy, persevering men and women who can go on the land and make a success of farming; not the riff-raff of European cities who flock to this country to breed crime.—Guelph Mercury.

Boost Home City

Every citizen ought to be a publicity commissioner for his home city. Doing everything for its good and nothing for its hurt is a worthwhile ideal.—Guelph Mercury.

Bad Roads

We are in danger of losing our capital investment in roads by letting them run down beyond repair. As a result, business suffers; motorists incur heavy depreciation of their machines; motoring, regarded by many as a pleasure, tends to become mere transportation and an unpleasant chore; and we are in a fair way to do lasting damage to our valuable tourist trade.—Winnipeg Tribune.

What's In A Name?

Edgar Allan Poe is a neat little lawyer practising in New York visiting London recently with Mrs. Poe for the Coronation, said: "Can't write to save my life, but it's a family tradition that all male members shall be named after the poet." Shares the honor with two others, like himself great-nephews, of Edgar Allan Poe No. 4.—Montreal Weekly Star.

"Right" To Drive

Why is traffic, after all these years, getting constantly more dangerous instead of safer? Perhaps the chief reason is that a far greater number and range of persons now drive. Not merely are there more car-owners and in direct consequence more car drivers but also more persons within an owing family drive. The handling of a car is not left to the one, or perhaps two, members of the family assumed, in pursuance of the ways of horse-driving days, to be specially skilled or adapted to the task. Nowadays almost everyone feels that he or she is able and has the right to drive.—Kingston Whig-Standard.

The Nation's Health

When Chief Justice Mulock, keeping his 93rd birthday, was asked by a reporter for a message, he said:—"Young man, there is but one bit of advice I would like to give you, and all others. It is that you take care of your health. Few greater blessings can be had by one on this earth."

The great work of the Canadian Public Health Association up to this time has been in impressing upon people and governments the importance of health. Perhaps its most important task in the future will be in seeing to it that the State, in approaching the health problems, approaches them in a scientific way. The Association, judging from papers given before it at its recent gathering, happily seem conscious of the new responsibility.—The Ottawa Journal.

Enforcing the Law

Every person in the community will agree that one of the essential needs of any city is a competent police force, composed of officers who will enforce the law without fear or favor. But police are popular only when they are enforcing the law against the "other fellow."

A correspondent to the New York Times tells of an incident observed in that city. A traffic policeman was writing out a summons. He was a clean-cut, decent-looking, quiet-spoken man. The couple in the high-priced touring car were spelling each other telling him what they thought of him; the man with sneering innuendoes as to what he could and would do, the woman with straight-from-the-shoulder abuse unworthy of her refined face and beautiful clothes.

That is what policemen have to contend with every day in the year. Any one who is or connected with "somebody" can at least damage their record with vicious statements.

It is that same public that demands the strict selection of high-class policemen "that are fit to meet the public."

Consistency is a jewel—but there are a lot of people who don't like jewellery.—Chatham News.

Best Friend

A gasoline tax of eight cents a gallon gave New Brunswick $1,175,332 in 1936—or 35 per cent of the total taxation. The horse has been called man's best friend; the automobile appears to be the tax collector's best friend. — Montreal Financial Times.

Discipline Does It

Lord Tweedsmuir says journalists seem to him 'to suffer less from spiritual pride" than men of letters. Perhaps because many men of letters have not experienced the training of a good city editor—the discipline that makes a newspaperman out of a journalist.—Ottawa Journal.

Cobalt's New Chief

Just imagine! Cobalt—"the best old town"—the original North Land town with hard-bitten pioneers—has a new chief of police—a young fellow of 24! And his first name is Clarence! Surely the old-timers of Cobalt will fairly revolve in their graves at the thought of calling the chief constable "Clarence!" But his second name is Connolly—a fighting Irish name—and he is a native of Cobalt, stands six feet one inch and weighs 210 pounds. So after the first shock the old-timers may slowly cease turning!—Timmins Advance.

Record Freight Traffic

The other day the local way freight train on the Michigan Central Railway left the St. Thomas yards with 94 cars for distribution at points between here and the Niagara border. This is said to constitute an all-time record. Railwaymen who felt that local traffic was slipping away from the railroads must feel encouraged at this revival of business, which is said to extend to branch as well as main lines. It shows that conditions are greatly improved by the handling of building materials, highway materials, livestock, oil, etc., and also that shippers have not lost faith in the usefulness of the railways. Through and long-destination freight traffic is, of course, the mainstay of the railways. But a good healthy local business is most desirable and will do much to take the railroads "out of the red." —St. Thomas-Times Journal.

THE EMPIRE

Worthy of Their Hire

No money could possibly recompense a man for the worry and fatigue of high office, where responsibility definitely takes a toll from health and life. But to perform the duties of high office, which include the many social duties, a man must have adequate means and freedom from financial worry. From the law officers a great professional skill and experience is demanded. If a man capable of filling a law office is to be attracted to it from the large sums he might command in private practice, the remuneration must be such that he does not penalize his family to gratify his political ambition. Whatever money is paid to ministers of state, they sacrifice much for which no money can compensate.—London Sunday Dispatch.

Sartorial Note

Maybe it's those Teuton tailors, but Herr Hitler could stand a good $150 United States custom-made suit. And some one ought to tip Adolf that a well-dressed dictator always wears a waistcoat in public.

Marie Antoinette's Gems For Sale

The necklace once treasured by Marie Antoinette of France has been set up for sale in London (Eng.), by its present owners, the Archduchess Blanca of Austria and her sister, the Princess Beatrix of Massimo. It is said to be valued at $100,000. The diamonds are considered unusually fine.

News In Review

Drought Area Receives Aid

TORONTO—Since Oct. 1 last year approximately $450,000 over and above ordinary receipts have been contributed to the Ontario Red Cross in connection with the Western prairie drought, Dr. E. W. Routley, director of the organization, told members of the Executive Committee this week. It has been an unusual year for emergencies in Canada, Dr. Routley declared.

Outside of district relief, the largest individual expenditure reported by the Ontario divis on for the first six months of the fiscal year was $110,907 for Red Cross outpost hospital service at the twenty-nine hospitals and nursing centres operated in frontier districts of Northern Ontario.

Poultry Protection

HAMILTON.—James Waldron, of Hamilton, was acquitted of cruelty to animals, Magistrate H. A. Burbidge holding that accused was justified in protecting his poultry against the attack of a wire-haired terrier which Waldron admitted killing with a rake handle.

Waldron said he struck two blows to ward off the animal, and one broke its neck. Controller Donald McFarlane was special prosecutor for the Society for Prevention of Cruelty to Animals. Waldron produced an injured rooster to show the result of the dog's visit, and said another bird was so seriously injured he had to destroy it.

Use of Air Mail Strongly Urged

OTTAWA. — The Department of Trade and Commerce strongly advises Canadian exporters in the case of urgent correspondence, particularly with outlying parts of the world, to take advantage of the air mail facilities which are now available from Canada. As illustrating the saving of time that can be affected by this means in comparison with non-air routing a table has been prepared showing that from Toronto or Montreal to Bombay, India, there is a saving of eight days by air mail. From Toronto or Montreal to Capetown, South Africa, an air mail letter will go in 17 days, compared with 25 days by steamer. To Crystobal, Panama, there is a saving of six days by air mail; to Rio de Janeiro, a saving of eight days, and to Buenos Aires, a saving of twelve days.

U. S. Farmers Visit Quebec

QUEBEC.—A party of eighty-six farmers from Nebraska, Colorado and Iowa arrived in Quebec this week for a visit and spent the day sightseeing. Later in the day they left for Montreal and will visit Niagara Falls, Ont., Detroit, New York and Washington on their way home.

B. C. Reduces Relief By 27 Per Cent.

VICTORIA.—The British Columbia relief department announced last week relief rolls in May of this year were 27 per cent. less than in the same month of 1936. Monthly statistics issued by the department showed 65,223 persons dependent on unemployment relief during May, 1936, compared with 88,090 in May a year ago. In April this year 73,825 persons were receiving assistance.

Homework For Teachers

TORONTO. — More than 6,000 teachers in Ontario will give up a part of their summer vacation to take refresher courses or to improve their professional and academic status. The number this year is nearly twice as many as in 1935, and many more than twice as many as in 1934.

Agrostologists to Meet at Aberystwyth, Wales

TORONTO.—Delegates from Canada and the United States will meet other eminent agrostologists from all the principal countries of the world at the fourth International Grassland Congress, which will be held at Aberystwyth, Wales, in July, 1937. The congress will consider different aspects of the grassland problem, including ecology, pasture and range management, seed mixtures, plant breeding, genetics and seed production, manures and fertilizers, nutritive value of pastures, fodder conservation and grassland economics.

Cow Has Quadruplets

BETHUNE, Sask. — George Seigmeth's purebred shorthorn cow has done tis best to help him through a bad year on his southern Saskatchewan farm. She gave birth to quadruplets last week. Two of the calves survived and are doing well.

To Aid Flying

OTTAWA.—A radio and meteorological reporting station will be constructed at Port Harrison on the east coast of Hudson Bay, Hon. C. D. Howe, Minister of Transport, announced this week.

"The inception of the trans-atlantic and trans-Canadian services has made it necessary that reliable weather reports covering conditions over wide areas should be available at all times," the Minister said. "Meteorologists are of the opinion that a station at this point will help greatly in making these reports more complete. Port Harrison is roughly half way between Churchill, Man., and the Labrador coast, and will provide a quick means of communication with the outside world for this part of Canada.

"This station will be of value as an aid to navigation in Hudson Bay, and of service to the Department of Mines and Resources; also to the Mounted Police in connection with the administration of their services. It will be equipped with long and short wave transmitters of the latest design, providing for transmission both by radiophone and international Morse code.

Exorts Women To Bear Children

Mussolini Inaugurates Italy's First "Baby Fair"

ROME—Premier Benito Mussolini, speaking from the balcony of Venice Palace recently, exhorted 60,000 Italian women to concentrate on providing "numerous and sturdy babies" for the glory of the Fascist Empire.

Inaugurating Italy's first "Baby Fair," Mussolini stirred the women to hysterical demonstrations as he urged them to overcome the nation's falling birth rate.

Cheers of the women, packed in Venice Square, forced him back in the balcony several times to return the Fascist salute.

The hamburger sandwich is being introduced from the United States into Great Britain. Just when relations between the two countries had become so cordial.—Toronto Saturday Night.

About as bright as the clerk who, asked "What have you in the shape of cucumbers?" answered, "We have some very nice bananas!" — Owen Sound Sun-Times.

John D. Rockefeller was a mere tenant during the last 12 years of his life. But he at least know where he could find the money when rent day rolled around.—Stratford Beacon-Herald.

NEWS PARADE

Commentary on the
HIGHLIGHTS OF THE WEEKS NEWS ---
By Peter Randal

Karl Radek, noted Soviet political commentator sentenced, to ten years at hard labor for alleged Trotskyist activities, last January, was released last week and is living in a small village near Moscow. Radek is said to have been granted his freedom by the Political Bureau of the Communist Party for exposure of military espionage activities.

Since that sensational trial, eight generals have heard the famous "seventy-three-hour sentence" passed upon them by their comrades of the highest military command and—there was no appeal.

Many political commentators have tried to weight the significance of these trials. Do they mean the growth of an organized opposition to the personal leadership of Stalin? Do they represent the activities of a foreign power? Are they actually connected with that famous and most unwanted man in the world, Trotsky? No one seems to know the answer but there is a great deal of guessing being done.

Walter Duranty, for many years special correspondent for the New York Times in Russia, thinks the recent trials may be one indication of an increasing desire on the part of the Russian masses for a bourgois democracy. Quite conceivably Trotsky may have had something to do with the turn of events. It is well known that he is eating his heart out in exile. But whether or not he was the mainspring, Trotsky forms the focal point for all forms of opposition to the existing regime. Many regard the wholesale trials on all charges as a government exhibition which serves the double purpose of ridding it of uncomfortable opponents while impressing the masses with its power. Radek's part may well have been that of a great actor playing, as he thought, for the good of his country.

A Torpedo Started It

Diplomats have long ears when it suits their purpose. Last week, the officer of the German cruiser Leipzig thought they heard the passage of a torpedo near the ship. The German Government promptly assumed that the ship had been attacked by Loyalist forces, withdrew from the Non-Intervention patrol, though still remaining a member of the committee and announced that nothing short of a rebel victory would be satisfactory. Now all this action seems rather drastic to be occasioned by some body passing swiftly through the water in the neighborhood of a warship. Chancellor Hitler made it clear why Germany was taking such action. It was at a gathering of 80,000 Bavarian Nazis. The real reason was not the Leipzig incident, but German cupidity for the iron ores of Bilbao. The mines in this region are little damaged and Franco is said to be putting them into operation again as swiftly as possible. That Franco may now hold a trump card in his hands is indicated by Britain's need of the same Bilbao ore as the essential raw material for most of her tremendous rearmament project.

18 Years After

And as Europe struggled vainly on the verge of a second world war and as a British Prime Minister addressed an appeal to the dictators of Europe for "cool heads and calm judgment," there were those who recalled the signing of a treaty whose eighteenth anniversary was celebrated last week. There isn't much left of that famous treaty signed at Versailles. Germany has regained her national independence in every respect. There only remains a matter of 1,803,879 miles of territory in Europe, Asia, Africa, and the Pacific Islands and about 17,000000 people who should be Germans but for the signing of the troublesome treaty. Both of these Chancellor Hitler swears he will regain. Just how long it will be before he has sufficient strength to make his bluff a reality, no one rightly knows.

Anglo-American Friendship

And while the dogs of Europe strain to reach imaginary throats across international boundaries, the great English speaking countries of the world tried to reach some form of common economic ground. The Anglo-American Treaty seen as a possible outgrowth of the Imperial Conference is said to be progressing to a point where definite action may be expected before the end of the year. Canada, while affected through possible concessions on lumber and fruits is hoping for a new deal on American-Canadian reciprocity. New Zealand and Australia think of the political angle with eyes aslant at Japan and the necessity of a good friend in time of need. South Africa is favorable to a nation which is her best gold customer. And so the bargaining goes on between nations even as between you and me.

Mystic Power

The United States is said to be the richest nation in the world today. It is the only country which could develop swiftly by encouraging the digging of precious metals from the ground in the days of the last century only to reserve the policy by putting the metal back into the ground in the recovery days of 1937. When brokers talk of gold stabilization and sterilization, they refer to that quaint habit of the national miser—filling a hole in the ground at Fort Knox with gold bars. Back in '49 the digging of gold set the world on its feet; will the opposite policy succeed today? Roosevelt and his Secretary of State, Cordell Hull, are hoping so.

Only a rich nation could afford a national debt such as that possessed by the United States. Present figures stand at $36,000,000,000, a trifling matter of $1,300,000,000 above the Presidential estimate in January.

Employment Index

And here is a big Canadian figure that is going to please a lot of people. Canadian employment figures for June are higher than they have been at any time since 1930; 10,178 employers report payrolls aggregating 1,087,735 or an increase of 7.5 per cent over the same period last year. The stock market may be flat, there may be international jitters, but there are a good many more pay cheques going home on Saturday night and that means something to the man on the street.

The world area under barley has declined irregularly since 1929. The reduction within the British Empire, which accounts for about one-seventh of the world's total, has been more pronounced, owing chiefly to the small areas harvested in India and Canada, but the area in the United Kingdom has also fallen.

Dating Bureau Pleasing to Girls

Incorrigibles Turn Into Angels Says School Superintendent

TECUMSEH, Okla. — A dating bureau at the Oklahoma training school for girls is promised and the prospect of dates with their boy friends has 240 inmates on their best behavior.

A plan of Mrs. Creighton Burnham, superintendent, approved by the State Board of Affairs, is this:

Thirty of the more eligible young girls with exceptional records will move into a trim cottage set apart from the rest and the superintendent will arrange dates with nice young men.

"Already," said Mrs. Burnham, "the idea is providing incentive for better behavior. Why some of our most incorrigible girls have decided they want to be 'angels'."

And how about the supply of young men?

"Why," said Mrs. Burnham, "we have had applications from three young men already."

One young swain, intent on being among the first into the parlor said he had always been an admirer of one of the girls.

And what if love and mayhap matrimony should enter the cottage?

Mrs. Burnham wasn't certain, but she indicated she might release the bride-to-be.

Quadruplets Don't Make Much Money

NEW YORK — While Canada's quints make thousands, America's quads haven't been doing so well. The four Keys girls of Hollis, Okla., might have made money but their father refused all offers. Now, however—22 and just graduated from Baylor College, Texas, America's oldest quads are going on the air for cash.

The Morlok family of Lansing, Mich., also shied away from commercialization when four daughters were born seven years ago. But the city gave the jobless father a $200-a-month job as constable and he was re-elected on a "quadruplets" platform.

When quadruplet boys were born to the Kasper family of Little Ferry, N.J., a year ago, the quintuplets were very much in the news. So the family was showered with cash. The first year's total, reportedly $7,000, included $50 a week from a newspaper and $100 a month from a San Francisco woman in memory of her son, who died on the quads' birthday.

a Real Saving

FOR READERS OF THIS PAPER

FRIENDS! We are combining our newspaper with these two great magazine offers, so that you can realize a remarkable cash saving on this year's reading. Either offer permits a choice of top-notch magazines with our paper, and, regardless of your selection, you will say it's a bargain.

A HOT WEATHER REMEDY

ATHLETES, as well as workers in high temperature industries such as foundries, mines, boiler rooms, laundries, etc., are adopting what medical authorities the world over agree to be one of the most effective means of preventing heat prostration—the use of an occasional pinch of salt in their drinking water. The secret of the use of salt in hot weather lies in the fact that it replaces the vital saline which exudes from the body in perspiration, thereby causing weakness and exhaustion.

Numerous high temperature industries have installed salt tablet dispensing machines in their plants and advise their workers to take regular doses. Tennis clubs, baseball grounds and other sporting organizations are following the lead given by industrial medical supervisors in protecting the health and comfort of their members.

The Women's Association and W.M.S. of Wesley Church held an afternoon tea on June 22nd at the home of Mrs. R. K. Gibson, (Stranger's Secretary of the W.M.S.), which was in the nature of a reception to the ladies and children of the families who have moved into the community during the last few months. Thirty women and nineteen children, including five babies were present. A short program was given by several members followed by an enjoyable social hour during which refreshments were served.

Mrs. Franklin Wilson entertained in honor of her daughter's, (Miss June), fifth birthday on Saturday afternoon. Twenty guests, the younger girls and boys of the community, were present.

Mrs. J. T. Walker, the eloquent public speaker for the W.C.T.U. for Ontario and Saskatchewan, gave the address at the union service of Trafalgar Circuit at Sheridan church on Sunday morning. Mr. and Mrs. Edwin Walker, Meadowvale, and Mrs. E. P. Lunau, Dr. M. E. Lunau and Lloyd Lunau, of Oakville, relatives of Mrs. Walker, were present at the service.

Prior to her leaving for Toronto, Mrs. G. J. Osborne, of Whitby, who has been visiting Mrs. A. Fish for three weeks, was guest at a tea held in her honor by Mrs. Fish's sister, Mrs. George Sitter, of Oakville.

Miss Evelyn Lunau has been successful in passing the Ontario provincial May examination for nurse registration as required by the Department of Health. She is now entitled to sign Reg. N. after her name.

Miss Phyllis Fish was guest soloist at the meeting of Bethel Church Young Women's Mission Circle, which was held at the home of Mrs. Emerson Ford, sixth line, on Saturday afternoon.

Following the service at Sheridan Church on Sunday, Mrs. J. T. Walker was the guest of her cousin, Mrs. Cecil Fish.

Union service for Trafalgar circuit will be held at Wesley Church on Sunday morning, July 4th, at eleven o'clock standard time. The sacrament of the Lord's Supper will be observed.

Mr. and Mrs. Burkholder of Markham were visitors on Sunday with Mr. and Mrs. Cameron Pickering.

Miss Minnie Pickering is visiting at the home of her sister, Mrs. W. C. Andrew, Streetsville.

Miss Eleanor Hutton, who underwent an operation for appendicitis last Wednesday at the Western Hospital, Toronto, is progressing favourably.

Miss Helen Gibson is holidaying at Camp Franklin, Georgian Bay. On her return from holidays, Miss Gibson purposes motoring back and forth daily to business in Toronto.

DRUMQUIN

In order to forecast the weather with a reasonable degree of accuracy, all you have to do is predict anything you don't expect.

The Ladies' Aid and W.M.S. of Bethel Church will hold their regular monthly meeting at the church instead of the home of Mrs. Emerson Ford, as stated on Wednesday. This being the meeting in which the ladies entertain the children. All are to bring lunch suitable for them.

Mr. and Mrs. Gerald Neil, accompanied by the former's brother from Sheridan, attended the Neil reunion at Glen Allen.

Mr. and Mrs. Lunau attended the Lunau reunion last week at Markham.

Our gardeners are busy gathering that precious fruit — strawberries, which are a bumper crop owing to the copious rains, although there is also considerable waste through the dampness.

Mrs. Fuller has returned home after a pleasant visit with friends in Detroit.

We are sorry to report that Johnny Lister, who has spent four months in St. Michael's Hospital, Toronto, through a fractured bone in his leg, is not doing very well and is again confined to his bed. John has the sympathy of a large circle of friends here, who hope for better news later.

Miss Peddie, our popular teacher, is again engaged for S.S. No. 9, for the ensuing year.

Congratulations to Miss Lois Biggar in capturing her home school—Munn's.

Much sympathy is extended Miss Maxwell, teacher at Snider's Corners, in her recent illness at Guelph, and hope she may soon be able to return home.

REPORT OF S.S. N. 16. TORONTO TWP.

Jr. IV.-Sr. IV.—Eleanor Crozier (h), Joyce Pickett (h), Carl Crozier (p), Doris Earle (h).

OBITUARY

Miss Isabella Davis, life-long resident of Port Credit, aged 75, passed away on July 3rd. Interred at Trinity Church cemetery, Port Credit.

Richard Parsons, 52, was instantly killed on Saturday by an explosion at the Gypsum, Lime and Alabastine Plant at Milton Heights. He leaves a widow and six sons.

G. W. Oughtred passed away at his home at Clarkson on July 6th, in his 56th year. He is survived by his wife, formerly Alice E. Savage.

Mrs. Lizzie A. McCraney Chisholm died at her home in Oakville on July 5th in her 71st year, and was buried in Oakville cemetery.

PERSONALS

Miss Drysdale of Toronto visited at the home of her sister, Mrs. O Turney, on Sunday.

Miss Edna Johnston of Castlemore, Peel County, was married to Mr. Herbert T. Bell last week.

George H. Savage and Edith May Garbutt, both of Brampton, were married by Rev. R. W. Allen on June 30th.

Mr. and Mrs. Wm. A. Skinner of Simcoe and Miss Bessie Skinner of Hamilton, spent Monday visiting at the United Church Parsonage, and attended the Steen-Douglas Picnic in the afternoon.

TRINITY CHURCH NOTES

An introduction and presentation was held in Trinity Church Parish Hall, by the members of the Parish, last Friday evening, for the Rector, Rev. E. S. Ottley, and Mrs. Ottley, who is a new-comer to our midst. Over a hundred were present, and an entertaining programme was given, consisting of selections from the Burns Boys, Hillier Boys, a number from the six young Choir Boys, and a solo by Miss Hilda Haddon. Mrs. H. Graydon and Miss Mary Crozier assisted at the piano, and Mr. J. C. Rutledge was the Chairman. Short speeches were given by different Church members. Mr. and Mrs. Ottley were then called to the platform and on behalf of the members of the congregation, Miss Castle presented a beautiful bouquet of roses to Mrs. Ottley, and a purse of money to Mr. Ottley as a wedding gift from the members of his Parish. Mr. and Mrs. Ottley thanked the members for their generous gift. After all the members were introduced to Mrs. Ottley, refreshments were served, after which Mr. Burns and Mr. H. Graydon led in a short sing-song. A very pleasant and happy evening was brought to a close with the singing of "God Save the King."

At this gathering also, Mr. Arthur Arch, presented to Miss Hoople, on behalf of the members of the A.Y.P.A., a gold A.Y.P.A. brooch. Miss Hoople, who has been a help in our work, is leaving our midst. Miss Hoople replied in her usual good style.

UNITED CHURCH Y.P.S. NOTES

The volley-ball court, being erected behind the United Church, is well under way and will soon be completed. A few more helpers would be welcome. Games will commence as soon as the court is finished. We need some strong young men to roll the court and make it even.

The Mission Band picnic will be held at Mrs. Caslor's on Thursday afternoon, July 8th. Cars will leave the United Church at 2 p.m.

"GOODNESS"

"He who loves goodness harbors angels, reveres reverence, and lives with God."—Emerson.

"There is but one way of doing good, and that is to do it! There is but one way of being good, and that is to be good!"—Mary Baker Eddy.

"Nothing can make a man truly great but being truly good, and partaking of God's holiness."—M. Henry.

"Goodness consists not in the outward things we do, but in the inward things we are.—To be good is the great thing"—E. H. Chapem.

"Goodness is love in action, love with its hand to the plow, love with the burden on its back, Love following his footsteps, who went about continually doing good."—J. Hamilton.

"The beauty of holiness is but one beauty, but it is the highest.—It is the loss of the sense of sin and shame that destroys both men and nations."—Independent.

LET US SMILE

Mrs. Wilkins—I suppose you're getting a good big fee for attending that rich Brown's boy?

Doctor—Yes, pretty good. But why do you ask?

Mrs. Wilkins—Well, I hope you won't forget that my little Johnnie threw the brick at him.

Mr. and Mrs. James Norman of Kitchener are visiting at the home of Mr. J. H. Atkinson.

Home-Made Glasses Used When Eyesight Grew Dim

Not for a moment must we believe that all of our ancestors' eyes were so perfect that some eye help was not needed, for many old spectacles testify that the tinkerer at least tinkered himself spectacles when the letters grew dim. Window glass was often the only lens available for the home-made frames and eye-charts did not come into existence until the 1860s. If a man had a forge he could hammer out a pair of iron frames, or twist some of pewter and make himself specs which could be "heired" for several generations, says a writer in the New York Sun.

But there were difficulties. Well enough, said the old tinkerer, to fix a contraption to hold two pieces of glass, but how to make 'em stick? A leather strap was one answer; two short sticks for "temples" running up under the hair was another; the straight bow with rings in the end holding strings for tying behind, another; then came bows which slid upon themselves; and finally, there was the bow which curved enough to fit the head and cling, without thong or string.

There was a time in the 1700s when lenses were extremely small, not for seeing but for giving the appearance of learning. In the 1830s we had gone back to these inch-long lenses, oblong, hexagonal and octagonal. Then some one thought of a frame which supported the lower half of the glass and left the upper part free, and we were on our way to the rimless specs. Another thought up green glasses and they were worn in shining steel frames; and some other made specs with fine wire which crisscrossed to form the nosepiece.

Moon Has Varying Pull on Oceans and Currents

According to a famous American astronomer, the moon has a tremendous effect upon the earth. It can, in fact, entirely alter the fortunes of mankind through its influence on the weather and oceans. Its other powers are still vague mysteries.

The solid earth actually shifts under the moon's gravitational pull, and for this reason a scientist declares that lovers under the moon light are thrown off their balance in more ways than one.

Drouths, famines, and hurricanes can all be brought about by lunar action, and the ancient superstition concerning the moon's share in cold weather is based on solid fact, asserts a correspondent in Pearson's London Weekly.

In circling around the earth, the moon moves northward for just under nine years, and then swings southward for an equal period of time. This is a fixed and regular cycle. The northward movement brings unusually cold weather in Europe and the U. S. A., while the southward trend means mild conditions. This is because of the varying pull which the moon exerts on the oceans and their warm currents.

Panda, Asiatic Animal

Few if any mammals are more rare than the giant panda, an Asiatic animal of most unusual and striking appearance.

The giant panda has been characterized as an animal with a face like a raccoon, a body like a bear, and feet like a cat. While such descriptions are not scientifically accurate, they have some basis in fact, states an authority, adding also that the animal's teeth have a certain resemblance to those of a pig. The giant panda is about the size of a black bear, has a white head and body, large black circles around its eyes, black legs, and a broad black band around its shoulders.

Fashions in Early Days

Fashion played an important part in the early social life of this country. At exclusive dances and parties, called "assemblies," the fashionable gentlemen wore "Bolivar" frock coats of some gay colored cloth, blue, or green, or claret, with large lapels and gilded buttons. Their linen was ruffled; their "Cossack" trousers were voluminous in size and were tucked into high "Hessian" boots with gold tassels. They wore two and sometimes three waistcoats, each of different colors.

Ostrich Is Pampered

The most highly pampered farm animal in the world is the ostrich, owing to the sensitivity of its growing feathers. Of the numerous conditions that mar them and lessen their value, says Collier's Weekly, none is more incredible than the normal fluctuation in the blood pressure of the bird each day and night. This slight change is often "recorded" on the plumes in alternating densities.

First to Get U. S. Patent.

Senator John Ruggles of Maine was the first man to get a patent in the United States after the creation of the patent office in the department of state on July 4, 1836. It was for a system of cog gears. Dental plates were first patented in this country in 1840, the player piano in 1889, the dial telephone in 1892.—Time Magazine.

LET US SMILE

Earth flew in all directions as the crimson faced would-be golfer attempted to strike the ball. "My word," he blurted out to his caddie, "the worms will think there's an earthquake."

"I don't know," replied the caddie, "the worms round here are crafty. I'll bet most of them are hiding underneath the ball for safety."

ENGAGEMENTS

Mr. and Mrs. Harry Ezard, Mono Road, Ontario, announce the engagement of their daughter, Mary Viola, to Mr. John W. Budge, Owen Sound, son of Mr. and Mrs. John Budge, Owen Sound. The marriage will take place the latter part of July.

"REPENTANCE"

"To do so no more is the truest repentance."—Luther.

"True repentance is to cease from sinning."—Ambrose.

"Examine yourselves, and see what and how much sin claims of you; and how much of this claim you admit as valid, or comply with. The knowledge of evil that brings on repentance is the most helpful stage of mortal mentality."—Mary Baker Eddy.

"Repentance without amendment is like continually pumping without mending the leak."—Dilwyn.

"A true repentance shuns the evil itself, more than the external suffering or the shame."—Shakespeare.

"The slightest sorrow for sin is sufficient if it produce amendment, and the greatest insufficient if it do not."—Colton.

"Of all acts of man repentance is the most divine. The greatest of all faults is to be conscious of none."—Carlyle.

The Open Column

Don't you think it is about time that our Council should pass a By-law to prohibit boys and girls from appearing on our streets improperly covered, the regulation bathing garments we understand calls for to be covered from the neck to the knee. You know what we see on our streets.

THE AGES OF A HORSE

(From the "Agricultural Journal)

To tell the age of any horse,
Inspect the lower jaw, of course
The six front teeth the tale will tell,
And every doubt and fear dispel.

Two middle nippers you behold,
Before the colt is two weeks old,
Before eight weeks two more will come;
Eight months the 'corners' cut the gum.

The outside grooves will disappear
From middle two in just one year.
In two years, from the second pair;
In three the corners, too, are bare.

At two the middle "nippers" drop;
At three the second pair can't stop;
When four years old the third pair goes,
At five a full new set he shows.

The deep black spots will pass from view
At six years from the middle two;
The second pair at seven years;
At eight the spot each "corner" clears.

From middle "nippers" upper jaw,
At nine the black spots will withdraw.
The second pair at ten are white;
Eleven finds the "corners light."

As time goes on the horsemen know
The oval teeth three-sided grow;
The longer get, project before
Till twenty, when we know no more.

Twelfth at Bolton

Three thousand Orangemen and Orange women attended the big celebration of the Battle of the Boyne at Bolton on Monday, held in McFall's Park.

The guest speaker was Rev. F. J. Dunlop, Laurel, Grand Chaplain of Ontario West, who was introduced by Gordon Graydon, M.P. for Peel. Other speakers were: Col. Hon. Tom Kennedy, Rev. G. W. W. Rivers, Rev. J. C. Ross, and several Orange officials of Peel. Lodges from Alton, Campbell's Cross, Bolton, Port Credit, Milton and Streetsville, were the prize winners. Oldest man present was Thos. Mara, 88, Brampton. Lodges were present from Peel, Halton, Simcoe, York and Dufferin. The day was a great success.

—Don't miss the Peel District Jersey Club Barn Dance on Thursday, July 22nd, at Hunter Arnott's. Tickets 25c.

Snider's

The July meeting of the "Brighten-the-Corner" Mission Band was held on Wednesday, July 7th, at the home of Mrs. Cecil Fish, with an attendance of fifty-three, which included many members of the Wesley W.M.S. Miss Phyllis Fish presided during the opening exercises and contributed a reading on the life of Fanny Crosby, the blind writer of hymns, two of whose compositions were sung during the meeting. The leader, Mrs. E. F. Wilson, gave a short talk on "Give us this day our daily bread," from the Lord's prayer, which is the Bible study theme. Mrs. Wilson continued the story of Joan and Rae's aeroplane trip, with a description of China in which country they were then visiting. Shirley Pickering and Donald Albertson, in Chinese costume, sang a duet about Chinese customs. Eva Pickering gave a reading and Lois and Jack Williamson and Maurice Post rendered guitar numbers. The birthday offering, to which the Band members contributed a cent for each year of their age was taken while the children marched to the playing of "Hear the Pennies Dropping." Following the meeting refreshments were served, the younger members enjoying this part of the entertainment on the lawn.

Miss Elsie Teskey, of Timmins Public School staff, has been visiting for a week at the home of her friend, Mrs. E. F. Wilson, and assisted with the program of the Mission Band on Wednesday. Miss Wilson is music supervisor of one of the schools in Timmins, and during the Coronation Day program, conducted the chorus of 500, selected from the Timmins and Porcupine schools.

The union service of Trafalgar circuit was held at Sheridan on Sunday morning, with Hughes Cleaver, K.C., M.P., for Halton, as speaker. The service was arranged by the W.A. of Sheridan Church. Cecil Hopecraft assisted Mr. Cleaver and Misses Grace and Lillian Hardy sang. Next Sunday's service will be held at Munn's at 10.30, standard time. Mr. Geo. Emory, of Acton, will speak.

Miss Myrtle Railton, of Ottawa school staff, formerly teacher at Snider's school, is a visitor at the home of Mr. and Mrs. Earl Albertson.

Mrs. Franklin Wilson and little daughters accompanied Miss Teskey when she left by motor for her home in Chatham on Saturday.

Mr. and Mrs. H. W. Albertson, who have been visiting their sons in Southern Saskatchewan, returned on Friday. They report conditions there to be worse than any year yet.

Mr. D. Turner and Stanley Turner attended the funeral of their cousin, Garfield Turner, Milton, on Thursday.

Mrs. Hugh Calverley and children are holidaying at their summer home near Barrie.

The young people of Wesley church and Snider's community gave a surprise send-off to Miss Grace Fish at the home of Mr. and Mrs. J. E. Dunn on Saturday evening prior to her leaving to take a course at the Thistletown Convalescent hospital for children. The young people presented her with an electric clock.

Mrs. William Cross entertained recently for her daughter, Miss Peggy Cross. The guests were the young people of the community and during the afternoon a dip in the swimming pool which Mr. Cross has had constructed was enjoyed.

Mr. and Mrs. Cecil Fish and Miss Phyllis Fish were visitors on Sunday with Mr. and Mrs. Emory Sibbald, Hatchley. Miss Phyllis is staying for a longer visit.

—Dance to Bill Thompson's Blue Blazers on Thurs., July 22nd, at the Jersey Club Barn Dance to be held at Hunter Arnott's, Fifth Line and Side Road West.

Miss Dolan, who has taught for seven years at S.S. No. 5, Clarkson, has been transferred to a Toronto school.

District News

Hornby L.O.L. will attend divine service at Omagh Anglican church on Sunday, July 18th.

Burnhamthorpe United Church will hold a big garden party, Friday evening, July 16th.

A Toronto man was sentenced to 30 days in Brampton jail for "a drunk while driving" charge, by P.M. L. J. C. Bull. People like him should not be permitted to drive any more.

Dr. Hugh S. Douglas, Toronto physician, passed away suddenly at his summer home near Lorne Park, on July 10th, aged 41, and the funeral took place to London on Tuesday. His wife and two children survive.

Frank Doyle, age 30, of Tottenham, was sitting on the C.P.R. track at Brampton, when hit by a train. His skull was fractured, and there is no hope for his recovery.

—Remember Jersey Club Barn Dance at Hunter Arnott's, Fifth Line and Base Side Road W., near Huttonville, July 22nd.

John J. Curtis passed away at his home in Toronto on July 10th and was buried in Dixie cemetery.

The funeral of the late Alex. Robinson of Port Credit, took place to Dixie cemetery, on July 12th. Three brothers and one sister survive.

Rev. Thos. Merryweather has been inducted as pastor of Malton United church.

William McDonald was instantly killed while at work on the Middle Road Highway at Appleby, when crushed by a gravel truck. It was purely an accident. No inquest will be held.

I.O.F. Church service and parade from O.C.C. Hall to Grace Church, Brampton, on Sunday, July 18, at 2.30 p.m. Brampton Band in attendance. Rev. C. E. J. Cragg, M.A., B.D., will conduct the service. All Foresters and friends cordially invited to attend.

Mrs. Harry Hugill, widow, passed away in Toronto, on July 6th, aged 57 years. She was a native of Woodbridge, her maiden name being Eva Elliston.

Murray H. Williams, Oakville, hotelkeeper for fifty years, passed away last week. He is survived by his wife, three sons and five daughters.

Miss Myrtle Speck and Miss Gladys McCleary of Sheridan are making an extended trip through the United States and will return home by way of Vancouver and Winnipeg.

Mrs. Minnie E. Gray, widow, passed away in Toronto last week, at age of 64. She is survived by three daughters, two sisters and three brothers, one of whom is Thomas Watson, Streetsville. Deceased was born at Shelburne.

Albert Bagg, aged 66, passed away at his home, Grahamsville, Toronto Township, on July 12th. Funeral took place to Brampton cemetery. Deceased is survived by his wife, who was formerly Bella Jane Wright, and a grown-up family.

DRUMQUIN

Collector for nearly two score years, A. G. McNab of the Seventh Line, Trafalgar Township, has gathered together an interesting array of pioneer articles and examples of the taxidermist's art.

Many of the birds and animals in his collection he prepared ,stuffed and mounted, having taught himself much of the profession of taxidermy.

His private museum is the pride of the neighborhood, and many of the residents of the district have assisted him in collecting relics which they considered to be of more than ordinary interest. The fame of the collection has spread over much of central Southern Ontario, and callers at his home are numerous.

Born in Mono Township, son of the late John McNab, and grandson of a family which settled early in that township. Mr. McNab found that he was in a locality teeming with the earliest examples of tools and utensils used in the pioneer development of the province, when he moved to Hornby nearly twenty years ago, and he began at once to accumulate these simple implements, until his home is almost crowded with show-cases containing arrow-heads, other weapons, tools and utensils.

In the horns of different animals he has found material for settees and chairs, one settee being fashioned with a back made from a pair of huge moose antlers. A second pair of horns support the seat, made of polished hardwood. Curly sheep's horns and cows' horns, polished to a mirrow-like smoothness, are used in the manufacture of armchairs and other seats.

WEDDINGS

Honsberger—Broadbear

Miss Elva Eleanor Broadbear, daughter of Mr. and Mrs. Frank Broadbear, of Streetsville, became the bride of G. Vernon Honsberger, son of Mr. and Mrs. George H. Honsberger, Toronto, at a ceremony at the home of her parents on Saturday. Rev. T. D. Jones, pastor of Streetsville United Church, officiated.

Given in marriage by her father, the bride wore a gown of satin-striped white organza, cut on long, flowing lines. Her shower bouquet was of white Kilarney roses, and she wore a halo of white sweet peas. Miss Lillian Gaines, Toronto, was bridesmaid, wearing white organza with pink satin striping, and a halo of pink sweet peas, and carried a bouquet of Premier roses. Mr. Frank Gaines, Toronto, was best man.

The bride's mother received in a gown of figured cornflower blue chiffon, with corsage of Talisman roses. She was assisted by Mrs. Honsberger, who wore navy and white sheer georgette, with a corsage of mauve and cream sweet peas.

On a motor honeymoon through the New England States, the bride travelled in an ensemble of sheer white crepe with matching white accessories. On their return, Mr. and Mrs. Honsberger will make their home in Toronto.

Patey—Beamish

The marriage took place Saturday afternoon in Morningside Presbyterian Church with Rev. John Y. Fraser of Streetsville officiating, of Olive Violet Steen, youngest daughter of Mrs. Beamish and the late Mr. J. H. Beamish, of Islington, to Mr. M. Kenneth Patey, only son of Major M. H. R. Patey, of Bournemouth, England.

The bride entered the church with her uncle, Mr. A. H. Forster. She wore pale pink suede lace over satin fashioned with train and tiny jacket, a matching hat of lace and seed pearls and carried a bouquet of white roses and baby's breath. Miss Phyllis Rowland of Guelph, bridesmaid, wore a becoming jacket frock of pale blue mousseline de soie with picture hat of the same shade and carried a bouquet of Johanna Hill roses.

Mr. Philip Tyas was the best man and the ushers were Mr. Lloyd Hill and Mr. Jim Beamish. During the signing of the register, Mr. W. H. Walker sang "I Love Thee."

At the reception at the Old Mill, Mrs. Beamish, wearing black lace with black picture hat, received with the bridal party. For going away the bride donned a brown triple sheer suit with white and brown accessories. After a trip to Muskoka, the couple will live at 60 Gothic avenue.

PEEL AND HALTON PEOPLE

PICNIC AT SOURIS

About one hundred and fifty former residents of Peel and Halton Counties, Ontario, met at the park in Souris, Manitoba, on Wednesday, June 23, and enjoyed their eighth annual basket picnic. The weather being quite warm, many of the younger people enjoyed a dip in the river while the older ones sat on the benches and talked over events that happened fifty years ago.

Mr. J. W. Breaky, M.L.A., extended a civic welcome on behalf of the town of Souris, and asked the visitors to come to Souris with their picnics every year. Dr. J. H. Riddell replied to the address of welcome and thanked Mr. Breaky and the people of Souris for their hospitality.

Visitors were present from Winnipeg, Souris, Brandon, Kemnay, Minto, Hartney, Hamiota, Oak River, Crandall, McConnell, Carlyle, Forrest, Strathclair, and Chungking, China.

The guest speaker was Dr. J. H. Riddell of Winnipeg, who spoke of the spirit of the old times in Peel County. He spoke of the early pioneers of Albion who by hard work and careful management had been able to hew out a home from the bush for their families. He spoke of how the early pioneers had taken their religion and politics very seriously and in fact were so serious in their political views that they did not fraternize with their political opponents for several weeks before an election.

The following officers were elected: Hon. President, Dr. H. A. Croll; Hon. Vice President, Mrs. George Taylor; President, W. P. Brown; Vice President, Mrs. John Bowles; Sec. Treas., John Sparrow; Chaplain, Rev. J. B. Francis.

Mr. J. T. Neelands was appointed to attend the Peel and Halton picnic in Saskatchewan. It was decided to hold the 1938 picnic in Brandon.

HIGH SCHOOL

Streetsville High School Board met Tuesday evening, with every member and the new Principal, Mr. A. E. Buckle, present.

Miss E. M. Henry, Toronto, was engaged as first assistant teacher, at $1,400 a year, and Miss Irene Bonham, Streetsville, second assistant, at $1,200 a year.

There were 44 applications for the position of lady teacher.

Agriculture will be taught when the term commences in September.

Local News

Mrs. Hec. Wright and son, John, are spending a few holidays at Algonquin Park.

Ross and Frank Hollingshead, Geo. Schnurr, H. Wilson, B. Saul and R. Hansen, and William J. Tracey who were with the Lorne Scots Regiment at Niagara have returned home.

St. Andrew's Presbyterian Sunday school held their annual picnic at Centre Island, Toronto, last week.

Several friends from Toronto and surrounding district visited Miss Grace Wolfe and Miss Lorna Hawkins, at their cottage in Muskoka.

Miss Flo Burns, Toronto, visited her brother, Mr. Leslie Burns, here, last week.

Mr. and Mrs. Malcolm McLellan and family of Brantford are spending a few days at the old homestead on William Street, Streetsville.

Mrs. George Hawkins and Mrs. Lin Dubois, of Montreal, have returned home after spending a very enjoyable week with Misses Grace Wolfe and Lorna Hawkins in Muskoka.

Mr. Harry Hope, W.M., and other officers of River Park Lodge A.F. & A.M., Streetsville, will attend Grand Lodge at Ottawa, next week.

Rev. T. D. and Mrs. Jones and Mr. and Mrs. A. E. Graydon attended the funeral of the late Rev. Levi Halfyard on Friday at Queensville. Deceased was formerly the pastor of a church which Mr. and Mrs. Graydon attended up north.

Streetsville Orangemen gathered at their hall Monday morning and motored to Bolton for the annual celebration of the Battle of the Boyne. Before leaving, the O.Y.B. Fife and Drum Band marched up and down Queen street playing real Orange tunes. One reason the 12th was not celebrated in Streetsville this year is because proprietors of some parks would not cater to them for refreshments.

A WICKED STORM

On Friday and Saturday the weather was terribly hot, and thunderstorms followed, with disastrous results. A large tree at the Public School was broken off at the ground, fell across the roadway and had to be sawed up and removed. Some cellars were flooded and many branches broken off trees. Crops were levelled and will be hard to cut. Large hailstones accompanied the rain. The O'Hara barn, Ninth Line, Trafalgar, was burnt to the ground, and another barn near Malton was destroyed. Lightning hit the barn on the J. B. Ross farm, second line West, knocked down several head of cattle and Mr. Ross, the owner, was stunned by the bolt. Martin Treanor was standing near a tree when he was hit and one boot torn off.

25 YEARS AGO

From The Streetsville Review, July 11, 1912.

J. C. McLellan, B.A., teacher at Essex St. School, Toronto; W. H. Clipperton, Givens School, Toronto; Malcolm McLellan, Meadowvale Public School, and Principal J. H. Beamish, King George School, Toronto, have been attending camp at Niagara-on-the-Lake for a week.

Members of the two local Orange Lodges and visiting brethren attended service at Trinity Church Sunday evening. Rev. T. O. Curliss conducted the service. The local brethren go to Woodbridge on July 12th.

Only 43 people voted on the waterworks by-law on Monday—38 for and 5 against.

Miss Eva Cook, teacher of No. 9 school, was presented by the entrance class pupils with a beautiful bracelet as a token of their appreciation.

SUNDAY SCHOOL LESSON

LESSON III
GOD ENCOURAGES A LEADER
Exodus 3: 13—6: 1.
Printed Text — Exodus 3: 13-16; 4: 10-16; 5: 1.
GOLDEN TEXT—The Lord will give strength unto his people.—Psalm 29 11.

THE LESSON IN ITS SETTING

Place.—The call to Moses occurred near Mount Sinai (or Mount Horeb) on the peninsula of Sinai; when Moses went back to Egypt, he went back to the court which he had fled from forty years before, which was probably at the city of Tanis.

Time.—B.C. 1499.

"And Moses said unto God, Behold, when I come unto the children of Israel, and shall say unto them, The God of your fathers hath sent me unto you; and they shall say to me, What is his name? what shall I say unto them?" The names of God express God's character, God's purposes; to know the full meaning of the names of God is to know the character of God. What Moses now wanted most of all was such a revelation of God, vouchsafed to him in the of God's great names, that the Hebrew people would know for certainty that Moses was God's true messenger in this momentous crisis.

"And God said unto Moses, I am that I am: and he said, Thus shalt thou say unto the children of Israel, I am hath sent me unto you." This name, of course, reveals God as an individual, a person; this person is self-existent, i.e., has life, his life does not depend upon someone else; he is independent of all external forces and of all other beings in the world.

"And God said moreover unto Moses, Thus shalt thou say unto the children of Israel, Jehovah." The name Jehovah means the self-existent one, literally, "he that is who he is," and thus we have in this name the full revelation of what God had just told Moses, that he was the I am. The word "Jehovah" occurs hundreds of times in the Old Testament and is not found here for the first time. The first reference is in Gen. 2: 4. "The God of your fathers, the God of Abraham, the God of Isaac, and the God of Jacob, hath sent me unto you." Here the God about to deliver Israel, the God Moses is to follow, the God whom the Israelites are to trust, is not some new deity like one of the many gods of pagan Egypt, but the eternal God of their fathers, who truly led them in ages gone by, who revealed his power, his wisdom, and his love to them, who had made promises to them which were now to be fulfilled.

"This is my name for ever, and this is my memorial unto all generations." "This statement contains a very important truth, a truth which many professing Christians seem to forget, namely, that God's relationship with Israel is an eternal one. He is just as much Israel's God now as when he visited them in the land of Egypt. Moreover, he is just as positively dealing with them now as then, only in a different way."

"Go, and gather the elders of Israel together, and say unto them, Jehovah, the God of your fathers, the God of Abraham, of Isaac, and of Jacob, hath appeared unto me, saying, I have surely visited you, and seen that which is done to you in Egypt." The elders of Israel were the older and leading men of the different families among the Hebrew people. We should notice throughout this declaration by God of his purpose for Israel that everything is to be done logically and in order. Moses is not to appeal to the mob, nor yet to confront Pharaoh without authority to speak for them, nor is he to make the great demand for emancipation abruptly and at once. The mistake of forty years ago must not be repeated now."

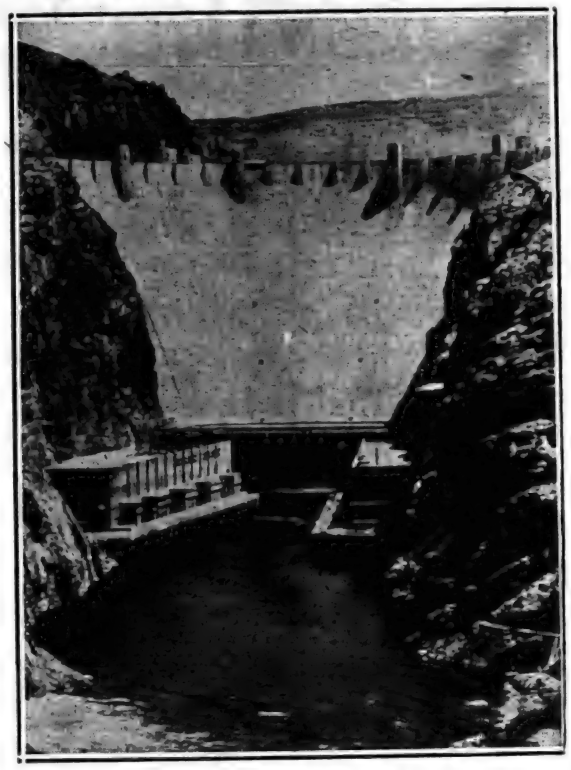
4:10. And Moses said unto Jehovah, Oh, Lord, I am not eloquent, neither heretofore, nor since thou hast spoken unto thy servant; for I am slow of speech, and of a slow tongue. It may be that Moses had a natural hesitancy of speech; it may be that he had lost a fluency of speech which once he had, by long years of semi-solitude tending sheep in Midian; it may also be that Moses was exaggerating his own short-comings—that he thought an eloquence was needed for the task greater than the task really called for. "Without God, no amount of human eloquence would have availed; with God, the merest stammerer would have proved an efficient minister."

11. And Jehovah said unto him, Who hath made man's mouth? or who maketh a man dumb, or deaf, or seeing, or blind? is it not I, Jehovah? 12. Now therefore go, and I will be with thy mouth, and teach thee what thou shalt speak. God never sends any servant of his on any errand unless, at the same time, he fully equips him for the accomplishment of the task which he has given into his hands for doing. If it were words that Moses needed, when the hour came for him to stand before Pharaoh, those words God would certainly give him. What a wonderful comfort to Sunday-school teachers, leaders of missions, workers in the hospital, all who feel that God has placed a certain task upon their hearts, to know that the God who sends is also the God who will adequately and assuredly equip!

13. And he said, Oh, Lord, send, I pray thee, by the hand of him whom thou wilt send. "Moses assents, but unwillingly and ambiguously."

14. And the anger of Jehovah was kindled against Moses. Only once again in the long life of Moses do we have recorded the fact that God was angry with his prophet, at the waters of Meribah, when Moses arrogantly manifested an undue assumption of power (Num. 20: 19-13; Deut. 1:37). And he said, Is there not Aaron thy brother the Levite? I know that he can speak well. And also, behold, he cometh forth to meet thee: and when he seeth thee, he will be glad in his heart. "As Moses, equally with Aaron, belonged to the tribe of Levi (Ex. 2:1), the term, as applied to Aaron, must denote not ancestry, but profession. It was the official title of one who had received the training of a priest, whose duty it was to give oral direction to the people; hence some power of language might be presupposed in him."

15. And thou shalt speak unto him, and put the words in his mouth: and I will be with thy mouth, and will teach you what ye shall do. 16. And he shall be thy spokesman unto the people; and it shall come to pass, that he shall be to thee a mouth, and thou shalt be to him as God. While it is not wise to say what would have happened if such had not taken place, yet it would appear that Moses' reluctance to assume full leadership at this time had in it consequences more or less harmful to Israel in the days that followed. "Moses lost the possession of high gifts which God was ready to confer upon him. God would have made him eloquent, though he was not so by nature; and had the faith of Moses been sufficiently strong to overcome his self-distrust, he would have added eloquence and persuasive speech to his other splendid endowments."



Ex. 5:1—6:1. 5:1. And afterwards Moses and Aaron came, and said unto Pharaoh, Thus saith Jehovah, the God of Israel, Let my people go, that they may hold a feast unto me in the wilderness. "After forty years of obscurity and silence, Moses re-enters the magnificent halls where he had formerly turned his back upon so great a place. The rod of a shepherd is in his hand and a loyal Hebrew by his side. Men who recognize him shake their heads and pity or despise the fanatic who had thrown away the most dazzling prospects for a dream, but he has long since made his choice, and whatever misgivings now beset him have regard to his success with Pharaoh or with his brethren, not to the wisdom of his decision, nor is be known to repent of it. The pomp of an obsequious court was a poor thing in the eyes of an ambassador of God."

Of course, as God had told Moses, Pharaoh refused to allow the children of Israel to go, asking impertinently who this person might be, the Lord God, of whom Moses spoke, for this God was not included in the vast pantheon of deities in Egypt with which he was acquainted. He did not know this God, and he frankly asked why he should obey the command of such a strange deity. "The point of the reply lies in that word obey. He say that these men did not present him with a request, but with a mandate from one of greater authority than himself. This stung him to the quick. He also was a god. How dare they, a parcel of slaves, speak of their paltry deity in his presence and in the midst of priests, courtiers, and high officers of state!"

Instead of granting permission to be excused from labor for three days that they might offer sacrifices to their God in the wilderness, the Hebrew people were more bitterly and unmercifully burdened with exhausting toil and demands impossible to meet, by the Egyptian task-masters, as though Pharaoh would say, "If these people do not have enough to keep their minds occupied and to keep them from this mood of rebelliousness, we will se that their very spirits are broken, so that this haughty pride of theirs will be utterly crushed." Those who remained to make the bricks must attempt to make enough bricks day by day to make up for the amount which those out looking for the straw were expected to make themselves. The task, of course, proved too great, and the Hebrew scribes, whose business it was to record the amount of bricks made and the hours every man worked were beaten for their failure to fully meet these increased demands.

No doubt the action of Zipporah as Moses was about to leave Midian was a great disappointment to him. Now he is about to experience another and far greater one. The very people whom he has come to deliver turn upon him and blame him for the increased severity of the oppression which the Hebrews were suffering.

Power Houses Dwarfed by Dam's Mighty Face

Seen from downstream, the face of Boulde: Dam resembles a monstrous sea shell as it dwarfs the power houses in the Nevada wing (left), where four mammoth generators supply about 100,000,000 kilowatt hours of electricity to Los Angeles each month. Water for irrigation is released from outlet at lower left.

New Zealand is to spend four years and $900,000 in adding 200 square miles to her agricultural land, reclaiming the great Taupuri bog. Aside from its economic importance the project has great scientific possibilities. Savants at Wellington believe that the bog covers a world of vanished life. While it now exterminates life it is a marvelous preservative of forms that once existed. Scientists are hoping that the remains of ancient man will be found in addition to the dead forests and fossil animals certain to be uncovered during the course of the work.

This is always one of the inevitable experiences of leadership, a price that has been paid by every great leader of every age, namely, that when anything goes wrong, the leader will be blamed. Most men cannot see farther than the day in which they live. They are not willing to suffer a little for ultimate freedom, and any hardships endured by the multitude who groan for deliverance will be immediately blamed upon the leader who has come to lay down his life for such deliverance. The bitter accusations against Moses were experienced in an even greater and deeper way by another who come from heaven to free men, to deliver them from their bondage, and died in executing such a mighty work, the Lord Jesus Christ.

An explosion on the sun, loud enough to reach the earth, would not be heard by us until about 15 years afterward.

Heads Doctors

Dr. Kenneth A. MacKe. zie, of Halifax, N.S., was chosen president-elect of the Canadian Medical Association for 1938-39 at the medical convention now in progress in Ottawa. Dr. MacKenzie is professor of medicine at Dalhousie University, his own Alma Mater.

Farm Problems

Conducted by
PROFESSOR HENRY C. BELL
with the co-operation of the various departments of Ontario Agricultural College

Bot Flies Can Be Controlled

The active horse annoying bot fly of today, came from an egg that was laid on the hair of a horse a year ago. The bot-fly egg hatches after a period of ten or more days on the hair, to become a larva or grub. The grub spends ten or more months in the stomach or intestines of the horse, developing to full larva maturity. Leaving the horse the larva goes through a pupation or development stage, to emerge in about 30 days as a fly capable of reproducing its kind. If those caring for horses would make it a regular practice to remove the hair all bot-fly eggs or destroy them with a wash or spray made of any light oil or disinfecting solution capable of soaking into the egg, there would not be any bot-flies to annoy the horses. The egg-laying period June to October each year is the "weakest link" period in the life of bot-flies. An opportunity to destroy this horse pest is therefore given to horse owners to destroy the eggs, which if allowed to remain alive on the horse produce the bot-flies of the succeeding year. A fine steel comb will remove the eggs. A two per cent. carbolic solution or one made from a good stock dip or fly spray will prevent the eggs from hatching. No hatch, no grub, no fly. Go over the horses and colts, once every ten days this summer to prevent trouble next winter and summer, from bot annoyance.

Animal Pests

The animal pests that we speak of as worms, come from eggs that have been deposited in food waste, either before or after such waste left the body of an animal. Hence the danger from the presence of fecal matter that is permitted to accumulate in yards, pens and small pasture areas. The fecal matter containing worm eggs may contaminate food or water and reach the stomach or intestines of trough fed or pastured animals. If those in charge of live stock would keep in mind that the manure of animals is the dangerous source of worm eggs and disease promoting egrms it would be better for the industry generally. It would be better for the live stock, if manure were disposed of in such a way as to remove all responsibility of it contaminating food or water. What sanitation has done for the human race it will do likewise for our domestic animals.

Colts Need Protection

Colts that become worm and bot infested early in life carry a handicap, usually a heavy one. The worm handicap may interfere with general thrift and growth, it may result in violent colic and death. Colts are very susceptable to worm infestation during the first two years and very much so while still taking milk. The new born colt instinctively searches for udder and teat to obtain nourishment. If the teat and udder are contaminated, the colt will unknowingly remove in the act of sucking worm eggs, which it swallows with the milk. Later, infective worm eggs may be picked up while feeding or drinking, when enclosed in contaminated premises. Bot flies pester colts when attempting to deposit their eggs, which they usually succeed in doing. The bot larva invade the tissues and stomach of the colt to cause some distress. The two pests bot larvae and round worms cause unthrift and frequent pain. Colts should be protected against these pests by those responsible for their care. The simple matter of egg destruction will protect the colt, from the invasion of pests.

Around The Dial

RADIO HEADLINERS OF THE WEEK

G. C. MURRAY

Well folks, "Buck Benny rides again, not as in his radio sketch but up to the head of the poles in the annual Radio Guides "Star of Stars Election." Leaving all other competitors far behind Mr. Benny has again ridden into No. 1 spot, ranking every other radio performer for the third successive year.

Benny's hated late rival, Fred Allen showed up in 11th place. Hard on Benny's heels came Nelson Eddy, baritone. Frances Langford topped the feminine entertainers, finshing in fourth position, although Mary Livingston probably shares first place honors with Jack Benny. Jessica Dragonette, a songbird, finished in 10th place in the pole. Don Ameche not listed last year, got under the wire in 12th and last place.

Harry McNaughton, who is known as Phil Baker's "Bottle" on the air, will make his first microphone appearance under his own name later in the summer as a guest on Harry Von Zell's variety program. He used to be a stage comic in his own right before he turned to stooging.

Harry Conn who wrote Jack Benny's material for three and a half years, is scheduled to collaborate with Walter O'Keefe when the latter starts subbing for Fred Allen on Wednesday.

Charlie McCarthy, Edgar Bergen's famous dummy, celebrated his 15th birthday on July 3rd. Sort of a wooden anniversary, what?

Smoking is not permitted, at any time, in NBC studios, which explains why the studio patrol officer keeps a skeptical eye on Joe Laurie, Jr., comedian on Rudy Vallee's variety hour. Joe smokes 12 to 15 cigars a day, and at rehearsal, keeps an unlighted cigar in his mouth. "He's afraid I'm going to light it one of these days," Joe said.

It is rumored around that our old friends Amos and Andy of the toothpaste fame will have a change in programs on the first of the year. It seems that while their sponsors are not tired of the Negro wit and humor they think that some other sketch would at the present time bring them more dividends, so they are on the lookout for a kid show to replace the blackface comedians. Meanwhile it is said, the A and A combination already has a sponsor (name undisclosed) who wants them to sign on the dotted line.

The Metropolitan Opera Auditions of the air, which were so very popular last fall, are planning to return to the air on October 3rd and it is stated that all the preliminary tryouts as well as the station auditions will be handled by Wilfred Pelletier. Wilf, by the way, was just recently married to the opera star Rose Bampton.

And now for sport lovers. There are to be no less than four great sport events broadcast via the radio this month, the most outstanding I think is the Vanderbilt Cup Race, which is run at the Roosevelt Raceway, and will take the air over the WJZ chain; then there is the "All Star" Baseball game and the Anglo-American track meet, and finally the America Cup race which while of quite long duration should be very interesting to all sport fans.

The Anglo-American track meet which is held at Cambridge, Mass., is to be handled by Bill Stern and his group of announcers who will travel to that city and tell the world of the prowess of the English chaps from Oxford and Cambridge and of the American boys from Harvard and Yale. This meet is scheduled for 3 p.m., July 10th. Then there is the big boat race which is run at Nantucket, Mass., and is between T. O. M. Sopwith, English challenging yacht and the American defender, the time for this great event will be broadcast at a later date.

Annual Poll Radio Favorites

Tabulation of the 1,500,000 votes cast in Radio Guide's annual "Star of Stars" election, just completed, shows that the American radio audience still prefers comedy to everything else on the air. Jack Benny, winner of the "Star of Stars" title, also came out on top in the comedians' division, just ahead of Eddie Cantor and Milton Berle, and he carried Don Wilson to the top of the announcers' bracket. Tiny Ruffner and Jimmy Wallington placed second third.

The national radio weekly's poll showed increased appreciation of semi-classical music at least as far as songs are concerned. This is indicated by Nelson Eddy's amazingly high vote in several classifications. Second to Benny for the "Star of Stars" honor, Eddy was top in the classical division, second to Don Ameche among the actors, fourth in the popular singers' rating. And Vick's Open House, which featured Nelson Eddy, ranked second among all musical programs, finishing just behind Showboat!

Wayne King's waltzes floated to the top of the orchestra pool, as usual, with Guy Lombardo second and Shep Fields third. Bing Crosby topped the male popular singers, followed by Lanny Ross and Kenny Baker. Frances Langford took top honors on the feminine side, with Kate Smith second and Jessica Dragonette third.

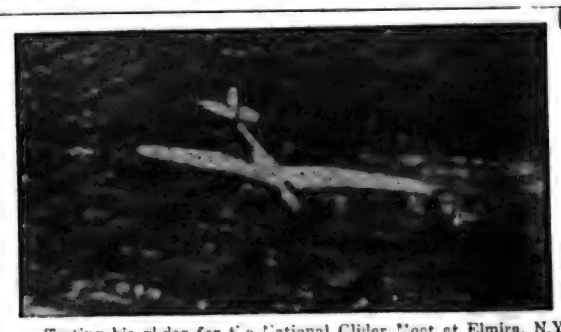
Boake Carter was first in favor among the commentators, and Deanna Durbin was voted the "most promising star."

Paul Whiteman Feature

Paul Whiteman, dean of modern music and glorifier of jazz, is now heard over the networks of the N. B.C. in a new Summer series of programs presented twice weekly through this month, August and September.

This will be the first time the famed conductor, who set America dancing to the tempo of jazz following the World War and then clothed the "noise" in symphonic dress, has been heard in regular network broadcasts for almost a year.

Jimmy Brearly, Whiteman's sensational high tenor discovery, and the "Swing Wing," the Three T's, is featured. In the "Swing Wing," Jackson Teagarden is the trombonist; Charles Teagarden the trumpeter and Frank Teagarden, the saxophonist.



Boake Carter Statistics

Statistics and Boake Carter, CBS news analyst and commentator, are affinities at heart. Boake likes nothing better than juggling with elusive figures, and colossal rows of numerals seem to like Boake, for he has as neat a row of statistics to show for his eight years on the air as any one extant.

Boake Carter figures that if all the words he has used since first facing the stony-faced "mike" were laid end to end in 10 point Caslon they would reach 45 miles, or the distance from New York City to New Brunswick, New Jersey.

In his eight years of dispensing his news comments he has missed only two broadcasts, and during one week's illness in a Philadelphia hospital he broadcast his programme from the bedside.

Because snails have become so troublesome in the gardens of Canberra, Australia, the Government's health officials have imported English thrushes to war on the pest. The birds were obtained in New Zealand, and their presence has resulted in a second war. Those who oppose the plan declare that the thrushes are apt to become a greater pest than the snails. Natural history societies have taken up arms against the invaders. Basset Hull, secretary of the Royal Zoological Society of New South Wales, who is leading the attack, believes that the birds, after eradicating the snails, will create havoc in orchards and hasten the extermination of native birds.

Testing his glider for the National Glider Meet at Elmira, N.Y., Peter Riedel, German pilot soared over New York after take-off from Randall's Island. Here's how glider looked from following plane.

Her Limbs Were Almost Crippled

Suffered with Sciatica for 25 Years

Those who are subject to sciatica should read this letter from one who suffered for years before she found out how to obtain relief:—

"For 25 years I suffered from sciatica in my right side, and I had backaches which forced me to remain in bed for two or three weeks at a time. When I got up in the mornings, my arms and legs used to pain me almost unbearably. One day I heard of Kruschen Salts. I took a bottle of them without feeling much improvement. I tried a second bottle, and that time I felt better. I have kept on taking Kruschen ever since." —(Mrs.) H.L.

The pains of sciatica are frequently caused by an excess of uric acid in the body. Two of the ingredients of Kruschen Salts are notable for their work in dissolving uric acid. Other ingredients of these salts assist the internal organs to expel the dissolved acid from the system.

Large Dogs Are Most Dangerous

Should Not Be Kept in Town Or City Unless Properly Exercised

Chief Shane has declared war on unlicensed dogs, and is advocating a $25 license for police dogs.

This followed an attack on a citizen by two of the animals. Not the first on record, by any means.

The main trouble with dogs is that probably 60 per cent of the people who own them do not understand them. It takes time and patience to train a dog, and the large animals, particularly, should never be kept in a town or city unless properly and systematically exercised or kept in a yard.

Naturally, a community of two-legged animals cannot be sacrificed for a community of four-legged ones, and as the majority of the two-legged cannot properly control the four-legged, there have to be measures taken.

In the old days there was an argument for keeping dogs in this mining community—they were largely used for teaming.

But dog teams in Kirkland Lake these days, and what dog teams are comparatively few in number there are do not appear to be entirely composed of police dogs, or that assortment of breed which falls under the category. As a matter of fact, it is the large mongrels, mostly uncared for, which are the most dangerous.

It is hard on the few real dog trainers in town who keep their large beasts under good control to have to pay such a heavy tax, but certainly something has to be done to eliminate the danger and nuisance which at present exists.

At the same time all animal lovers who feel sorry for the animals who through no fault of their own, but for lack of training and care, become dangerous and nuisances. There is to the extremist, a parallel in the bringing up of children.

Ontario Highways Need Beautifying

One Great Fault Is Bareness, Says Niagara Falls Review

One great fault with Ontario highways is their bareness, no great effort having been made to beautify them. They stretch like long ribbons, fine roads, but with nothing attempted in the way of landscaping in too many cases. That fault is not being copied in Australia where a new road is being built. The road will have a setting of lawns and of gardens, trees and flowering shrubs, with two wide lanes for ordinary traffic and bicycle tracks off the pavement.

A garden committee has been appointed—the job of which will be to supervise the planting of the flower beds which will be a blaze of color all the year round. Of course, in Canada we cannot expect such blazes of color all the year, our climate forbids; but there seems no good reason why all our highways should not be tree bordered, and the new islands beautified by flower beds and flowering shrubs, at least in summer. That new road in Australia will be a thing of beauty and long will remain in the memory of those who drive along it, quite different from our bare highway surroundings.

Not enough has been done in Ontario to improve the property adjacent to highways. Here about the only thing which breaks the monotony of the roadside on some highways are hideous erections where hot dogs and other succulent morsels may be bought by the passer-by.

Quite likely, in Australia, provision has been made to have buildings, alongside the new road keep in character with the surroundings. Not much use is it to build a fine road and have it spoiled by ugly haphazard erections. A new road enhances the property it passes and it is not too much to insist that property-owners must conform to certain standards of architecture for all buildings facing the highways.

Advises Outdoors As Youth Builder

Baden-Powell Commends Free Air and Good Meals for Health

LONDON— Plain food and plenty of out-of-door exercise are preferable to gymnastic training for the physical fitness of the youth of Britain, according to Lord-Baden Powell, world chief scout. Baden-Powell is also associated with Lady Baden-Powell in the Girl Guide movement.

"The finest men I have ever met have no gymnasia," said 'B. P' at a dinner here. He said physical training for underfed boys was not the right way of developing a strong and healthy nation, because no two boys were alike in physical ability and a great many were not fit for the work given to a whole squad.

Commenting editorially on the address the London Morning Post said:

"Unlike many men of his age (80) the Chief Scout has the satisfaction of knowing that the ideas underlying his most memorable work have not been superseded by new fashions.

"The importance of bringing a vigorous outdoor life within reach of town bred boys—which 'B. P.' appreciated more than 30 years ago—is now being acknowledged, rather belatedly, by the whole nation.

"Innumerable grown men, not only in England but throughout the entire world, are indebted partly to the Scout movement for their present good health and physical fitness."

Much Ado For John

Dr. Alison Gaw, of the University of Southern California, congratulating John Barrymore on his recent broadcast of "Richard the Third" as other Shakespearean authorities and Mrs. Elaine Jacobs Barrymore join the admiration party. In rear (L-R) are Dr. Victor L. Clittick, Read Institute; Dr. John B. Cook, USC, and Dr. Edward Mims, Vanderbilt.

Smelter Adopts Famous Cow

Among agricultural problems, like the ups and downs of the price of milk, which confuse the urban dweller, may be included the cow at the smelter. This cow, Picken's Patty, is an Ayrshire which has mined milk out of herself till medals have been hung on her. In a life-time of six lactations she has produced 106,422 pounds of milk, comments the Winnipeg Free Press.

This production gained Picken's Patty membership in the Hundred Thousand Pound Club of American Ayrshire Breeders, and so must be notable even for a copper smelter. It is a tribute to Picken's Patty. It is a greater tribute probably, to Patty's Picken. For it seems a fact that when large industrial concerns take stock and gardens into their keeping, they do their animals well and they care for their roots and flowers, as may be noticed in many railway stations.

If others, however ,could care for their bossies as Consolidated Smelter cares for its Picken's Patty, there might, too, be a notable increase in the milk and butter-fat production. For though this Patty must be a pretty beast, she is almost certain to have the advantage of less favored kine, and be fed with that cunning care for the concentrates which makes for lacteal production.

These companies, rurally blissfully inclined, and sniffing copper fumes mingled with the healthful aroma of the farmyard, demonstrate in their own way how to get big yields. They say they do it in their smelting, so why not in their milking? This appeals to their passion for system, and encourages an accounting department to take interest in a cow whose production figures are twice-daily problems. Picken's Patty would be an ungrateful beast if she did not respond to the vice-presidential memo to chew a little overtime to increase her milk production. And when turned out to pasture, after having her hooves trimmed, she browsed in pastures treated with carefully selected fertilizer to give the better feed ordered by a direcorate anxious for her efficiency.

A bovine boudoir is not usually expected to be found in a smelter plant, nor are the rural airs of the barn expected to be sniffed where the fumes of copper are what make the dividends. But amid them, Picken's Patty flourishes. Her honor gained may be a tribute to herself for staying on the job. Or it may, and possibly is, a greater tribute to the care given her. Which is understood in cow barns generally to be another proof of the fact that, even without the help of a smelter, most cows respond to better feeding and proper handling.

Control Measures Stop Timber Destruction

It is computed that, while fire destroys 230,000,000 cubic feet of merchantable lumber and the young growth on 550,000 acres in Canadian forests every year, insects, fungi, and windfall account for the loss of at least 700,000,000 cubic feet. The destruction caused by insects and fungi would undoubtedly be substantially greater, were it not for the preventive and control measures that are taken by the Dominion and Provincial Entomologists and Botanists.

Following the example of the reforestation work carried out for some years at the Scout Forest near Angus, Ont., the Scouts of Fort Erie this spring planted 700 saplings on property near their Scout cabin. Beamsville Scouts planted 600 trees in the game preserve south of that town and a group of Ottawa Patrol Leaders planted the same number on a reforestation project at Carlshad Springs.

The King's Coronation Honours list included many distinguished figures prominent in Scouting in many parts of the Empire. In addition to Lord Baden-Powell who received the Order of Merit, and His Excellency the Lord Tweedsmuir, who was made a Privy Councillor, the list included the Hon. Sir Patrick Duncan, Chief Scout for the Union of South Africa; Viscount Galway, Chief Scout for New Zealand; Baron Gowrie, Chief Scout for Australia; Sir Herbert Emerson, Provincial Chief Scout for the Punjab; the Raja of Khilchipur, Chief Scout for Khilchipur State, and Sir Bernard Bourdillon, Chief Scout for Nigeria.

One of the after-stories of the London, Ont., flood concerned the services of many kinds rendered by the Boy Scouts. Within half an hour of a radio mobilization call, at the request of the police, 250 boys and leaders had reported for orders at Scout Headquarters. They relieved officers on point duty, and handled traffic efficiently. They watched bridges, manned boats, and kept sightseers from coming into the city. At the police station they took over the telephone switchboard, releasing officers for other work. A staff of six older Scouts assigned to the fire department, went out on all fire calls, to handle traffic and the crowds. Red Cross Headquarters at the City Hall was supplied with runners. At the clothing depot messengers were furnished the different departments, and other Scouts kept the refugees in line. At the Armouries, crowded with refugees for several days, Scouts helped prepare the meals, supplied children with boiled drinking water, took charge of lost children, ran messages, swept the floors. Generally, "Their smiles, courteousness, willingness and quiet discipline earned appreciation and commendation on all sides." In other words, London's Scouts lived up to the best Scouting traditions when suddenly confronted with a serious test.

Microphotography To Aid Libraries

NEW YORK.—Prediction that microphotography—or the art of making photographic reproductions of writings—will become a universal practice of libraries and scholarly institutions in preserving rare volumes and manuscripts, was made at a conference of the American Library Association here.

Microphotographic reproductions of print were cast on a screen at the conference to give librarians present an insight into the possibilities of the technique. The print projected on the screen was moved slowly along by a motor which could be adjusted to keep pace with the eye, attached to the projector. Projectors operated by hand were also displayed.

An entire issue of a daily paper can be reproduced on two feet film and more than two complete copies of a telephone book can be photographed on a film area less than the area of one page of the book, the conference was informed.

MILL RUNS GIVE HIGH GRADE RETURNS ON NEW SPLIT LAKE GOLD ORE

Average $41.65 Per Ton

RECENT mill runs made of ore from the high grade ore shoot on the Bigstone Bay property of Split Lake Gold Mines Limited showed average mill heads of $41.65 and an average recovery of $39.55 in gold per ton of ore. The ore shoot has been stripped and blasted for a length of 85 feet and shows an average width of three feet. The ore for the mill runs was taken at regular intervals along the full length so far exposed. The vein is nicely mineralized with fine sulphides, and native gold can be seen disseminated through the sulphides.

Recommendations of the company's geologist call for shaft sinking, immediately, on this high grade deposit and with this first shaft to be sunk directly on the orebody, information regarding the downward continuation of the high grade should be forthcoming almost daily.

In view of the results so far obtained in the form of consistently high average values over important length and width, the underground development program may reasonably be expected to quickly place a sufficient tonnage of high grade ore in sight to permit establishing the mine on a producing basis

NEW HIGH GRADE DISCOVERY

Since the above, word has been received from the property that a new find with heavy showings of gold has been made at a point 1,300 feet along the strike of No. 3 vein. No. 3 vein is located about 400 feet from the first deposit referred to in this advertisement. Regarding this new find, the company's engineer states it is undoubtedly the continuation of No. 3 vein and that it appears to be the most important discovery on the property to date.

Present Public Offering at 20 cents per share

200,000 shares are being sold at 20 cents per share. A portion of this offering is open for public subscription. The right is reserved to reject applications in whole or in part and also to award in any case a smaller number of shares than applied for. The offering is also subject to close without notice. Applications should be mailed direct to Split Lake Gold Mines, Limited, Bank of Hamilton Building, Toronto, Ontario.

MINARD'S "KING OF PAIN" LINIMENT

Independent Test Proves That "VOL-O-PEP" TABLETS

INCREASE GASOLINE MILEAGE UP TO 25%!

In a test run of 507.6 miles a 1936 Chevrolet Master Six Coach consumed 18 gallons of gasoline to which Vol-o-Pep Tablets had been added—an average of 28.2 miles per gallon. Without Vol-o-Pep Tablets the mileage was 22.2 miles per gallon. The increase per gallon effected by Vol-o-Pep was 27%. The same gasoline was used on both runs over the same roads and no adjustment of the carburetor made. Tests were conducted by a well known Toronto firm of Inspecting and Testing Engineers, whose name will be furnished on written request.
Vol-o-Pep is in a convenient tablet form. Dropped in gasoline it completely dissolves, leaving no sediment whatsoever. Recommended for use in autos, trucks, motorcycles, tractors and all gasoline and diesel engines.

Send one dollar for a tin of Vol-o-Pep Tablets (65 tablets treat 65 gallons), use ten tablets and if you can not notice improvement in your car, return the balance and get your money back in full. Mail $1.00 to

THE VOL-O-PEP CO. OF CANADA
36 Toronto St., Toronto.

The SNAPSHOT GUILD

PATTERN PICTURES

An exposure of 1/100 second at f.5.6 on chrome type of film caught this water pattern.

NATURE has a mysterious way of creating patterns, designs. She seems to abhor plainness as much as she abhors a vacuum.

Consider that every cell that is the substance of matter is fashioned in some kind of pattern. The snowflake has a pattern. Liquids crystallize in patterns. The wind arranges snow drifts in patterns as it does the sand on dunes and deserts. The tide goes out and leaves the sea bottom rippled with designs. Calm water disturbed makes rhythmic designs on its surface. Shadows make patterns. Leafy boughs against the sky, moss on the rocks, tiger skins, wings of birds—what is there unadorned with some kind of pattern? Nature is full of them, evidences of a seeming purpose to maintain rhythm, beauty and order in the universe. Man imitates them, consciously or unconsciously, in the structures he builds, the materials he fabricates and the order in which he places things.

Have you ever thought of patterns, nature's and man's, as subjects for a camera hobby? Some camera artists have made prize pictures of patterns. It's a way to obtain new pleasure from the world about you. It requires, first, skill in seeing patterns. They are so common that only the exceptionally obvious ones, like those in sea sand, are likely to be noticed by a person not looking for them. These we call *curious*, but gaze up through a skyscraper in the course of construction or go down to the waterfront and study the patterns that the masts and rigging of ships make against the sky. Watch for shadow designs made by ordinary objects, such as a picket fence or a cartwheel. These are the kinds that only the purposeful observer is likely to notice. For him, patterns that may be caught with a camera are everywhere. Plump a stone into a pool or spill a box of matches on the table and you have one made to order for you.

Go pattern hunting with your camera. Taking such pictures challenges your photographic skill and you will find that both your album and your mind will be enriched thereby.

140 John van Guilder.

1914—It does not seem so very long ago, most of us remember Marsefield Park and the fed up rumours we used to get about going over, and the supposed landing of the Germans on our coast, and the the field days concentrating on Brighton Downs, to keep the supposed enemy away. And not allowed out of the town of Uckfield except on very special occasions, and then if you wanted a few hours leave, one had to go through all the chain of responsibility. Well, here goes the white lie, it was the last week in April, I got a telegram from my brother who was a Bty. Sgt. Major stationed at Worthing, a small place on the west side of Brighton, saying my nephew was very ill and not expected to live the night out. I immediately started to find my Troop Leader, who said no, I am sorry, but we may go over tonight. I saw my Squadron Commander, who said the same. I am sorry but we may go over tonight, and he smiled and said is it a blonde or brunette. I said it was a baby, well, I did not stop at that. I was a Corporal at the time and promotion looked good, but it was a case of life and death, so I broke all laws and I immediately proceeded to Uckfield Station, and behold two large Red Caps and a Corporal of my own unit at the gate of the Station. This Corporal had five rings on his fingers now you know who it was. I said to myself, Block No. 1. Next I tried a taxi, but we passed the Station and just on the outskirts of Uckfield, two more Garrison Police. I told the driver to turn back, it cost me half a crown, Block No. 2. Well I intended to go and see my nephew at all costs, Stripes, future and glory seemed to fade away. I was sure in the dumps, taking a horse there I would soon get arrested. I commenced to walk up the hill towards camp, when the mail orderly was pushing his bike along the road, with his mail bag over his shoulder. I said you look tired Bill, he said I am, but I have to go back to camp with this push bike. I wanted to stay in town as there is a dance on and it's now 7.30 and I have to meet my Jane, at 8 o'clock. Oh! I said, Bill, I will take your bike and bag and report, he said you don't want to report as there is no mail, there is only a few old envelopes in the bag. He asked me if I could ride a bike, I said just try me, well I took all his equipment and up the hill, but I took the next turning to the right and across the railway tracks and up the hill towards Brighton. I meet the two Garrison Policemen and I immediately put my hand in my bag and pulled out all the empty envelopes, and they gave me the right of way. I arrived at Worthing at 9.45, and I met brother at the house and he told me, that the doctor had just left and that there was no hope for the boy. His wife came and asked me to come in and look at him, which I did, she told me that the doctor had given him another hour, and then the poor little bit of skin and bones would go beyond. I took my brother outside and said, have you any brandy, he said no, and we cannot get any either. I told him I would get some, we went out to the nearest Public House and asked for two beers, I then asked the bar maid if she had any brandy, she said you don't want any, you will have to go without it, as you have had one drink and that is all you are allowed. I told her what I wanted it for, and she laughed, so I told her that I had just ridden 32 miles on a push bike to see my nephew, and that I had come all the way from Canada to help out, she said you show me any thing from Canada. I gave her my Cap Badge and she gave me a pop bottle full of brandy, and I asked her how much, she said that's for coming over to help out, and she gave me a nice kiss, and she said this also to help out. We went home with the brandy and at 1.30 a.m. the boy began to kick, and then I told my brother that I had better be going as it was all up hill towards home. About three miles outside of Brighton, going up the hill I was pushing my bike when a big car pulled up beside me, and behold my General and the Brigade Major. Hello, put your bike in rear of the car and jump in, R.C.D., eh? I said thank you General, but I am so fed up with riding, I would sooner walk. He said no trouble to take you home, I thanked him and and they moved away, I continued my walk to Marsefield Park, I arrived home at 5 a.m. and a little tired and a field day ahead, I just put the bike and bag outside Bill's hut and waited for reveille. A couple of days later, the Colonel asked me if I could ride a bike, I said I only ride horses, he laughed. The boy lived and is now a full recruit in the Air Force, and this is a true white lie.

"PICKLE BOAT"

The above article is printed by permission of Major Aisthorpe, a veteran of the World War, who came to Streetsville two years ago, with his wife and family. They are among our best citizens and we hope they will remain here. They have one son, Bernard, in Public School, and one daughter, Hazel, in High, who is now recovering from an accident, in Western Hospital.

Open-Air Service

On Sunday evening, last the Streetsville Churches cancelled their own services and joined in an open air service in Peel Park. In spite of the threatening weather there was a goodly attendance from the three churches, as well as those in the Park who joined with us. The service was directed by Rev. John Y. Fraser of the Presbyterian Church and Rev. E.S. Ottley, of the Church of England. A brief but helpful address on the Revelation of God in Nature was given by Rev. T.D. Jones of the United Church, who also directed the orchestra which provided the music.

Our thanks are due Mr. Dawson who gave the use of the Park, without charge, and to Mr. H.Q. Burns who provided the service forms, to Mr. Lee, who supplied the chairs, and to the many others whose help and co operation made the service possible.

It is hoped that similar services will be held in and around Streetsville from time to time; and we invite all, of every creed, to join with us on such occasions in the inspiration of worship in the great outdoors

Lawn Bowling

Last Wednesday, July 7th, The Streetsville Bowling Club held a very successful tournament at which the trophy donated by the late Robert Greig, was competed for. The winner this year was a rink from Richmond Hill, skipped by E. T. Stephens.

Brampton Rink, Mr. H. Sproule skip, won 2nd prize, while our own well known skip, I.J. Ardagh, came 3rd

Thursday's Game

Again, on Thursday evening, the green presented a wonderful appearance when 72 joined in a social game. The players came from Oakville, Port Credit, and New Toronto, to join the Streetsville Club. It was one of the best evening's sport the Club has had for a long time.

After the battle was over the following had the highest individual scores

Ladies—Mrs C C Meredith, Mrs Cromshaw

Men—Mr. Walker, Mr. Jones.

These Clubs will meet again for a social evening in Oakville July 22.

Eden W. A.

The Eden Women's Association held their regular meeting at home of Mrs. Stan Hall on Wednesday July 7th.

Rev. T.D. Jones gave an inspiring address on "The Wonder of God and His Great Love for Us."

A very interesting Missionary talk was then given by Mrs. Jones

A dainty lunch was served by Mrs Hall

PERSONALS

Mr. Gordon Graydon, M.P., is to be Chairman at the Garden Party on the Burnhamthorpe Public School grounds Friday evening, July 16th

Judge Jeff Mahaffey of Calgary is visiting his three sisters in Toronto and Brampton. The Judge was a resident of Streetsville and Village Clerk from 1900 to 1907, and also practised law here.

Mr. Cecil Freeman of Port Credit and Miss Ruby Lloyd of Lorne Park were married one day last week

Donald Broadbear of London is visiting with his grandparents, Mr. and Mrs. Frank Broadbear.

Mr. A. E. Buckle, newly appointed Principal of Streetsville High School, and his wife were in town this week. We believe they will take a house on Church St, near the Town Hall

TELEPHONE TALKS IN THE WATSON FAMILY

"Here's Dad, it's his turn now!"

Friday night's a special night with the Watsons. Promptly at eight the telephone bell tinkles and Bob's hearty voice comes booming over the wire — then Muriel's and the youngsters'. "Long Distance keeps us young," say their grandparents. "It's the cheapest pleasure we know of."

Like the Watson family, you too will find Long Distance the ideal way of keeping in touch with out-of-town relatives or friends. The low cost will surprise you!

THE BELL TELEPHONE COMPANY OF CANADA — LONG DISTANCE TELEPHONE

[Low Night Rates begin every evening at seven, and apply ALL DAY SUNDAY!]

Many Common Words Are Records of Past Events

Many words in common use are records of events or personalities of the past. In some cases, states a writer in London Tit-Bits Magazine, the meaning has not changed since it was first introduced, in others the passage of years has altered its form altogether.

When we light a "bonfire," we give no thought to St. John, in whose honor in the Fifteenth century fires made from clean bones (bones-fires) were lit.

The "Jerusalem" artichoke has nothing to do with Palestine; its proper name is the girasole (sunflower) artichoke. Carelessness and popular appeal has given it its more romantic name, and even soup made from artichokes is known as Palestine soup.

"Rotten Row," in Hyde park, London, was originally known as the Route du Roi, being the Plantagenet kings' road from Westminster to the royal forests. "Pall Mall" received its name because a game in which a palle, or iron ball, was struck through an iron ring with a mall or mallet, was played there.

We use the phrase "to the bitter end" as though referring to the harsh dregs of wine or medicine. Originally it was a nautical expression meaning the end of a ship's cable, that part of it which is baft the bitts—two pieces of timber to which the cable was attached when the ship rode at anchor.

Pair of Dog Tongs Held as Welsh Church Relic

The church at Clynnog Fawr, a few miles down the coast from Carnarvon, Wales, preserves as one of its curiosities a pair of dog tongs, used in the old days for seizing fighting dogs and throwing them out of church.

In the past it was a common thing for Welsh sheep dogs to follow their masters to church and curl up in the pew, sleeping through the service. Occasionally, as the Welsh used to say, "the devil would enter into them" and there would be a fight, until the dog tongs, shaped like coal tongs with large teeth, were taken down from the wall and used to eject the fighting animals.

One Welsh parson, it is said, used to take his dog Tango to church, where it would sleep in front of the lectern while its master conducted the worship. One day the dog spied an enemy, a farmer's dog, in the congregation and a terrific fight began.

The dog tongs were useless and the fight became so exciting that the church service was suspended and everyone gathered round to watch. Above the noise of the battle, visitors to this region about Mount Snowden are always told, the parson's voice could be heard shouting, "Three to one on Tango!"

Formerly a pair of dog tongs could be found in most of the churches in this section. They are now quite rare and those at Clynnog Fawr are one of the curiosities to see in Wales.

Oldest Woman's Club in U. S.

The Ladies' Education Society of Jacksonville, Ill., is the oldest woman's club in the United States, says the Chicago Tribune. The Jacksonville society was organized in 1833. The second oldest society was the Maternal association, organized in 1838, consisting of all the white women of the Northwest. The club came to a tragic end with the killing by the Indians of its secretary, Mrs. Narcissie Whitman. The third club was the Alpha Delphian of Alfred, N. Y., started in 1846. The fourth is the Ladies Physiological Society of Boston, organized in 1848. So strong was the opposition to any woman's club in Boston that no woman was brave enough to preside, and for the first two years Professor Bronson of Harvard occupied the chair at its meetings.

Isle of St. Michael

The Island of St. Michael, termed "Lake of Seven Cities," comprises 297 square miles and is 830 miles west of Portugal. Once famous as the first stopping place for Spanish galleons on their return from the West Indies, the harbor city of Ponta Delgada, of nearly 250,000 population, presents a mixture of descendants from Phoenician and Carthaginian traders to an aristocracy descendant from Portuguese navigators.

Operated by Fingers

Puppets are operated by the fingers (marionettes by strings) and sometimes require large staffs of operators for there can be as many as 40 "actors." The operator sits underneath the stage and holds the puppets above his head. The stage sets are often as elaborate and complicated as in a theater and the operator has to be careful to judge his distances correctly. It is also no easy matter to keep the voices and the action consistent.

Selfishness Destroys Happiness

When we avoid our neighbor who is suffering, when we wrap ourselves in the cold blanket of selfishness, we forget the possibilities of real happiness, for true happiness comes only through sympathy and by comparison. The sufferings of others softens our hearts and makes us sensible to our own blessings.

Robert Adam Was Famous as a Furniture Designer

Among the most distinguished furniture designers during the latter part of the Eighteenth century was Robert Adam, favorite of George III, bachelor king of England. Son of an architect, he and his brother James gained fame as architects under the partnership legend of the "Adelphi."

Adam traveled considerable when traveling was fraught with great dangers. Among his many extended trips was the one he undertook to the excavations of Pompeii and Herculaneum. In these ancient ruins he found many decorative and structural motifs which became part and parcel of his exquisite designs.

Most of Adam's furniture shows his architectural leanings. Some of the furniture Adam made was of mahogany with delicate carvings and dainty inlays. He originally introduced the shield back chair, but abandoned it in favor of the wheelback chair.

During his activities in the building of homes for the wealthy and designing fixtures and furniture for the interiors Robert Adam found time to write and illustrate three volumes of his "Works in Architecture" which were dedicated to his patron, King George III. Adam's designs are frequently reproduced in dining-room furniture and occasional living-room pieces.

Young Giraffes Do Bawl Like the Hungry Calves

Most naturalists long have held that giraffes are voiceless animals, unable to make a sound when in agony. A challenge of this occurs in the report of the Kenya game warden, which avers that a young giraffe, separated from its mother, will bawl and low like a hungry calf, according to a writer in the Montreal Herald.

Whether mute or not, the giraffe is one of the world's most peculiar animals. It has at least two other claims to distinction. It is the world's tallest mammal and one of the most expensive animals found in menageries.

A giraffe's neck, long as it is, contains no more vertebrae than does the neck of a man. It is merely elongation of the vertebrae that elevates the giraffe's head among the treetops.

Possessing few means of defense, giraffes are protected by their coloration. Their irregularly marked coats blend so perfectly with the dappled sunlight and shadows of the trees on which they feed that at a distance they are difficult to detect. Thorny acacias do not prove a trial to them for the animals' tough hides protest them from long thorns, and their elastic tongues taper to pluck leaves without including the trees' piercing armor.

The Skin's Heat

Meters that measure the temperatures of stars, used to test the heat of the human skin, show that, contrary to popular belief, colored skin is virtually no better protection against heat than white complexions. Although black paint absorbs heat, it is found that black human skin absorbs no more of it than white. The star meters, which pick up the human heat rays at a distance and thus do not upset the skin's natural response by contact, show that man's skin measures heat changes as sensitively as the most delicate thermometers. A normal person can feel a temperature rise at a rate of less than one thousandth of a degree per second. His subconscious faculties are aware of the change within three seconds and immediately set his skin "heat regulators" to work.

First California Mail Service

On April 19, 1847, the first regular mail service in California was established when the United States military authorities inaugurated a semimonthly "government express." Army despatches, private letters and newspapers were carried, free of charge, between San Francisco and San Diego by two soldiers on horseback, who started from these towns on alternate Mondays. Meeting the following Sunday at Dana's rancho, near San Luis Obispo, they exchanged mails. Each soldier then started back to the point from which he had come, arriving there in time to begin another trip the following Monday. The rush of settlers to California, following the discovery of gold, necessitated the establishment of Post Office department routes, which supplanted this original service.

"Cattle Resemble Masters"

"Cattle resemble their masters" say the Norwegians and we judge a man by the horse he has and how he treats his, asserts a writer in the Montreal Herald. Some horses are nearly human, some men are pretty nearly horses. By ties of sympathy we are bound to the horse. In his drab working life, the horse awaits and expects a word of appreciation now and then. In return he asks no questions. Like a true friend, he loves you because you are you—that is sufficient He does not criticize you; he adjusts himself to your moods and misunderstandings. He does not gossip or slander you. In the bright June days as w... ber da... you ...

TERROR MOUNTAIN

By MADELEINE SHARPS BUCHANAN

Three bandits, known as Ike, Lefty and Stutter, seize a transcontinental bus and force the driver to guide it up a mountainside to a lonely log shack. They are after a secret new explosive formula believed to be in the possession of a passenger, Finley Trump, chemical magnate. Meanwhile, a forest fire, creeping up the mountain, traps the group. The first night, Miss Tulsa Jones, schoolteacher, succeeds in drugging the bandits. While they sleep, Ike is mysteriously strangled. Later, the other two bandits are overpowered and bound. Then, Dr. Nick Strand, who has fallen in love with May Lawrence, pretty trained nurse, goes out on the mountainside to try to find a way through the fire. Suddenly, a boulder crashes down on him, knocking him out. When he comes to, he is blindfolded.

CHAPTER V

Whipping the blindfold from his eyes, Strand saw, to his amazement, that his pockets had been turned out and their contents laid on the ground beside him! Nothing was missing.

His head throbbed from contact with the stone against which the boulder had flung him. He saw that the thing which had been over his eyes was the bandana with which Ike had been strangled. With a sense of revulsion, he thrust it into his pocket.

Ike's body had been placed in the shed. Anyone could have taken his bandana. . . .

Then, something on Strand's wrist drew his attention. It was not ash or cinders—the thin brown powder was snuff! Jenkins! Could he fit this thing to meek little Jenkins? It seemed incredible!

Strand climbed slowly back to the road. The heat was stifling. The house was silent when he reached it, and the gray bus also.

He went around to the rear, stopped in the doorway of the shed, and threw his flashlight on the body of Ike. There was, of course, no bandana now about the dead bandit's throat.

After a moment, he entered the kitchen, where Trump sat grimly on guard over the two living bandits.

"Do you have any idea who could have taken the bandana from Ike's neck?" Strand asked in a low tone.

"Nobody has been out there so far as I know," said Trump, amazed. "Where is the bandana? Around the throat of somebody else?"

"Not—yet," said Strand grimly. "I've got it, and I'll keep it for a while."

The next morning, no one had any appetite for breakfast. Strand took his turn guarding the prisoners in the kitchen, while the other men fared forth to seek vainly for a way out through the fire.

Amelia Bangor did not appear until noon. Then, looking hollow-eyed, she came into the living room, where the other three women sat.

"I want to know which one of you drugged me." She glared. "What's been going on here?"

Miss Jones coughed. "I imagine," she said, "you drugged yourself. What were you doing, having coffee with those depraved bandits after the rest of us had gone to bed?"

"Coffee?" Miss Bangor's eyes widened. She sank into a chair. "Who drugged that coffee?"

"I did," said Miss Jones.

And then, the story tumbled out from Mrs. Jenkins' fat little mouth.

"That's gorgeous!" gasped Amelia Bangor. "Smart of you, Miss Jones!"

But Miss Jones still wanted to know how Miss Bangor had happened to have coffee with the bandits.

"I saw them through the open door, drinking coffee," admitted Miss Bangor. "I got a thermos cup and called Ike and asked him to fill it, which he did."

"This woman knows something," thought Miss Jones. "If she could see the bandits through the open door—of course, the open door!"

When the men returned, Miss Jones noticed little Mr. Jenkins. There seemed to be something furtive about him, a certain slyness. She hadn't thought, before, of distrusting him.

"Gee," said Tommy Archer sadly, "I wish there was a place where a plane could land, but there ain't. Red and me looked."

"I'm glad I didn't leave Kenny home like he wanted," Mrs. Jenkins told May hysterically. After fifteen years, it's only right we should die together."

May walked out in the heated air as she felt Mrs. Jenkins' hysteria laying hold on her. She found Nick Strand, who had been relieved of guard duty, gloomily contemplating the sky. He turned to her gravely.

"I didn't strangle that crook, May, nor do I know who did," he said. "My job is to save life, not to take it."

May flushed faintly. She loved him and—they were probably going to die up here together. Those creeping flames said so. She wondered what it would be like, to see them coming closer, at the last . . .

"You must believe in me, May," said Strand gently. "Everything must be all right between us. The world is a seething furnace below here, and there's no way out, you know. Unless a miracle happens—"

"I am glad I came," said May simply. "I found you. You found me. If only one of those balloons reaches someone!"

Strand shook his head, his lips grim.

"No plane can land anywhere around here," he said. "We ascertained that. They could not get through to aid us."

He looked at her a moment, then suddenly swept her into his arms. His lips met hers in a long kiss.

It was night again. It seemed to Lefty, his eyes on the thin face of Finley Trump as he sat reading, with a gun on the kitchen table beside him, that the house would never quiet.

The palms of Lefty's hands were wet. These people. One of them was as low a killer as any guy he knew. One of them had strangled Ike — someone who was after the thing he and Stutter were after. And that same killer might get him next.

During the day, he had spoken to Stutter. He felt they could make a break if Stutter kept his nerve. Better to take a chance on getting through the fire than to stay here to be strangled.

Along in the afternoon, he had used a few lucky moments when they were alone to hop to the table drawer, back up to it, pull it open, reach with his hands, which were bound behind him, and remove a small paring knife. For two hours now, his and Stutter's legs and arms had been free, although, to glance at the hopes, no one would have guessed it.

Trump was sitting with his back to the outer door, facing them. His gun was at his right, on the table. He was looking at them now. Now was the time.

Lefty flickered his eyes at Stutter, and both men suddenly fixed their attention on the open door. Trump instinctively glanced over his shoulder. At the same instant, Lefty threw the little knife to the floor behind Trump, where it fell with a clatter.

As Trump sprang to his feet and whirled about, Lefty and Stutter were upon him like a flash of lightening.

Why Do City Folks Mar the Country

(W. H. Colclough, in the Stratford Beacon-Herald.)

"Move on, there. You mustn't camp here," bristled a good-looking beetle-browed farmer, appearing unexpectedly in the midst of our stream that gamboled across his meadow lands.

"If you say so, we'll certainly move along," we agreed, realizing that the man had a perfect right to his authority.

We commenced putting the frying-pan into place and folding up the gas stove.

"Well, now," the farmer mellowed, "if you will promise not to destroy anything, I guess you can stay."

"Destroy anything?" we questioned. "Does anybody destroy anything on your property?"

"I'll show you," he agreed, striding away. "Come."

He led us over a bit of a rise down to a pool where the creek had broadened out. Along the bank sardine cans, bottles, broken boxes, paper and black ashes of a recent fire had turned a lawn-like piece of pasture land into a garbage dump. On the trunk of a nearby beech tree, about four feet from the ground, had been cut deeply: "M. R. & D. C., May, 1937." A maple sapling lay prone, denuded of its branches.

Comment seemed out of place. It was the blundering selfish work of some visitors, having a good time on the farmer's property. About the only thing we could do was to apologize for such stupid vandalism.

It is difficult to imagine how people accustomed to the neatness of city homes and lawns will show such an arrogant disregard for the rights and property of their rural hosts. We wonder what would happen if some morning at 7 o'clock they went out on their own lawn and found empty sardine cans, boxes, eggshells, bacon rind, potato peelings, and paper thrown about, and cut on the door of the house these words: "John Farmer and Family, June, 1937."

We are sure that the city man would not like it, and yet that is just what many city folk do with their farmer friend. Is it any wonder he "blows up" once in a while? We admire his patience and generosity.

There is so much to see and enjoy in the country. Every hardwood lot is a cathedral holding a religious enchantment; within its land is a piece of green beige, from which the larks dart with their piping call. Every winding brook runs like rich tracery across a square of gorgeous tapestry. Every sunset throws a lingering caress upon the silent hills. Then, when twilight coaxes out the stars and the dew forms a healing balm across the greening fields, the beauty of a summer night— broken only by the fluty cry of the plover—falls like a benediction upon the visitor's wistful soul.

And it's all yours. Yours. Millionaires cannot purchase it, or kings control it. It's yours. It costs nothing except the kindly courtesy of a gentleman. The average farmer is a prince. He will be glad to see you. BUT please do not cut down his wire fences, carry away his dogwood, or leave boxes of debris on his land. If you will remember these things, he will say: "Come again."

On Learning "What To Read"

Edward Green, F.L.A., Chief Librarian of Halifax Public Libraries, in the Municipal Journal: If the public library is to be the engine of culture and recreation hoped for by its promoters, more attention will have to be given to instructing and helping readers. Most users of these democratic institutions have received but the rudiments of education, have left school at an early age, and have mostly come from bookless homes. They are quite unaware of the rich literary heritage as represented by the numerous classes of books. It is still customary in many libraries to have series of formal lectures, usually bearing on the books in the libraries, but these appeal to, and are attended by, the better educated, and they do not sufficiently reach the average or general reader. Good as they may be, it is not certain that they are as effective as homely, informal talks, given to smaller groups, where discussion is likely to arise. The average reader wants not so much critical estimates, as to know something of the theme or subject-matter of the books. At Halifax we discontinued the formal lecture after the War, and arranged to give book-talks to small groups under the auspices of organizations which ask for them.

BLACKHEADS

Get two ounces of peroxine powder from your druggist. Sprinkle on a hot, wet cloth and rub the face gently. Every blackhead will be dissolved. The one safe, sure and simple way to remove blackheads. Have a Hollywood complexion.

Our Railways Are Active Again

Perhaps one of the most reliable indications of better times is the activity displayed by railroads, comments the Ottawa Journal. Both in Canada and the United States large sums are being spent on new rolling stock. Up till two years ago there was practically nothing being spent, no branch of industry was harder hit by the depression. Even maintenance.

News comes from the Association of American Railroads that little more than a month ago Class One railroads had more new freight cars on order than on any corresponding date since 1926. In all there are 47,290 new cars now on order, as compared with 1,449 only two years ago. Even more impressive are the figures for new locomotives. At the beginning of last month, orders had been placed for 345. This compares with but 52 locomotives built in 1936 and one in 1935.

The C. P. R. and the Canadian National have set aside more than $10,000,000 for new rolling stock. This is now being built and much larger orders are expected.

The happiest feature of this news is that such purchases indicate that railroads in both countries are meeting expenses, in many cases making good profits. "When the railroads make money, the whole continent makes money," said Harriman nearly 40 years ago. The axiom is fortunately just as true today as it was then.

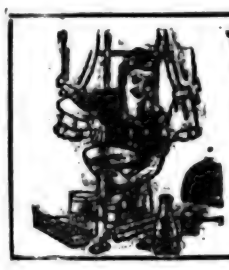
The Path of Progress

Inventions on which patents were granted by the U.S. Patent Office during the past month included the following:

A necktie constructed in telescoping sections so that it can be adjusted to any length.

A golf club with a drill in the top of the shaft for boring a hole in which to insert a wooden tee when the ground is hard.

A salt shaker with a rotatable brush inside the cap for clearing the perforations of caked salt.



A refrigerator tray which freezes ice in spheres instead of cubes.

A streamlined head for golf clubs.

A sandwich bag with a special compartment in the bottom for salt and pepper.

A machine for slicing mushrooms. —Time.

Woman's World

By Mair M. Morgan

Have you ever tried to figure out just what makes one box of candy seem so choice, and another so commonplace? It's more than the goodness of each piece ,important as that is. See how the contrast in color and shape and the dainty wrappings add to the attraction above filled with

Chocolate Carmels

1 cup sugar
3 squares unsweetened chocolate, cut in pieces
3-4 cup light corn syrup
1-4 teaspoon salt
1½ cups heavy cream.

Combine sugar, corn syrup, chocolate, salt, and ½ cup cream. Place over a low flame and stir constantly until sugar is dissolved and mixture boils. Continue cooking until a small amount of mixture forms a soft ball in cold water, stirring constantly. Add ½ cup cream and again cook to 238 Deg. F., stirring constantly. Add remaining ½ cup cream and cook until small amount of mixture forms a firm ball in cold water, stirring constantly. Remove from fire; pour into slightly buttered pan, 8 x 4 inches. Do not scrape pan. Let stand until cold. Mark with knife in 3-4-inch squares, turn out on cold slab, turn right side up, and cut into pieces with full length of long, sharp knife. Let stand two to three hours to dry. Wrap each caramel in waxed paper. Makes 40 caramels.

Coconut Cherry Divinity

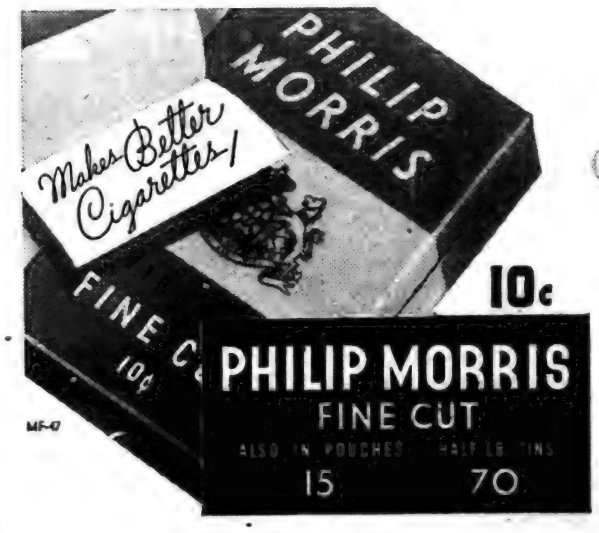
2 cups sugar
2-3 cup water
½ cup corn syrup
2 eggs, stiffly beaten
1 teaspoon vanilla
Dash of salt
½ can coconut, southern style, toasted or crumbled
3-4 cup cherries, thinly sliced.

Cook ½ cup sugar and 1-3 cup water together until a small amount of syrup forms a slightly firm ball in cold water. Cook remaining sugar water and syrup together until a small amount of syrup forms a hard ball in cold water. Remove first syrup from fire, cool slightly, and pour slowly over egg whites, beating constantly until mixture loses its gloss (1½ minutes). Then add second syrup slowly, beating as before. Fold in coconut, vanilla, cherries and salt, and turn immediately into buttered pan, 8 x 8 inches. Roll in additional toasted coconut, if desired. Make 3½ dozen pieces.

Sugared Peaches

½ cup sugar
½ cup maple syrup
1 cup pecan meats.

Cook sugar and syrup together until a small amount forms a soft ball in cold water. Remove from fire; cool to lukewarm. Beat until syrup begins to thicken, then drop in one pecan at a time, coat with syrup, and remove with fork. Drop on a waxed paper. If syrup thickens before all pecans are dipped, thin mixture slightly with a few drops of hot water.



Vegetation which grew millions of years ago on this earth is almost as important to us as is our modern food vegetation. The coal supply of the earth is formed from the ancient plants and trees.

CANADA

Worse Than Disease

The problem which presents itself on Sunday evenings to the news editor of Le Canada is to prepare a complete list of the tragic deaths which have taken place during the week-end. This rather grim census has become a routine in all newspaper offices and excuses journalists for not having more than reasonable pity for the fate of the victims. The reality, however, is none the less sad for the families who are thus afflicted. In the last three weeks the number of automobile victims is seven dead and 19 wounded. Summer has only begun and when autumn has come it will be possible to demonstrate mathematically that motor vehicles in the district of Montreal have claimed more victims than no matter what disease.—Le Canada, Montreal.

Page "Pop-Eye"

Ontario Department of Agriculture reports the 1937 acreage of spinach up 20 per cent west of Toronto, while in the eastern half of the province it is the same as last year. This ought to have a bearing upon outcome of the college rugby series.—Woodstock Sentinel-Review.

Mine Dividends

Ontario gold mines have produced an average of a little over $7,000,000 a month so far this year. Records prepared indicate a production of close to $43,000,000 for the first half of 1937.

Lake Shore will have an output of well over $8,000,000 in gold during the first six months of this year.

Hollinger Consolidated continues to be Canada's second largest gold-producing mine and will report an output of around $7,250,000 during the six months to end June 30.

McIntyre-Porcupine will report an output of over $4,100,000 in gold for the first half of the year, according to the preliminary data now on hand.

Dome Mines, according to preliminary information, will show an output of about $3,900,000 for the first half of 1937.

Wright-Hargreaves is maintaining a high rate, and will be able to report a production of $3,700,000 in gold during the half year, according to data now available.—Toronto Saturday Night.

Speed Problem

"Is speed itself dangerous?" asks a contemporary.

It is difficult to give a direct answer, because so many other things must be taken into consideration.

The danger of speed depends upon the experience and ability of the driver, the character of his temperament and the condition of his mind, and body; the mechanical condition of the car; the condition of traffic; the state of the roads; weather conditions; the mental and physical condition of the other drivers he meets on the road, and the speed at which they are travelling; the visibility — and the many other features of motoring which enter into the cause of accidents.

If all of these conditions are favorable to the driver, therefore, we would venture the opinion that speed itself is not dangerous— providing the motorist stays within the speed limit.—Chatham News.

Wedding Rings

June being the month of weddings, it is interesting to note that half the world's brides are said to be married with wedding rings made in Birmingham, where some of the firms in the trade have been in existence since the 18th century. A hundred years ago wedding rings were made narrow as they are today, and gradually they became wider, until 50 years later no ring was acceptable unless it was broad and heavy. The pendulum has swung back again to the present fashion for abnormally narrow and light rings, although there is a tendency to revert to heavier rings. —Victoria Colonist.

Food Fit For A Man

It is the considered opinion of many a he-man that some strange fads and fancies have been flourishing in our kitchens in recent years. Our forefathers waxed great and strong on solid fodder that would back up against a fellow's chest bones and stay there, letting him know that he had had a meal. But we, their unworthy descendants, are facing a world in which the kitchen has become an experimental laboratory for a ladies' bridge-club, so that a plateful of cream-colored stuff on a wilted lettuce leaf is actually held to be suitable nourishment for a hard-working adult human being.

The he-man, of course, probably knows little about the modern discovery of vitamins. So he cannot be expected to enter into the spirit of cookery of the "chiffon school"—as one iconoclast has aptly described it. The he-man may be all wrong, but being a he-man he likes to know when a meal is over by the feeling of fulness inside him rather than by the emptiness of his plate.

Dietary ideas of the past could not have been wholly wrong. We might try re-discovering some of the old-fashioned recipes for old-fashioned foods, and give the can-opening wrist a chance to relax.—Winnipeg Tribune.

Canadians in The War

The total Canadian enlistments in the Great War numbered 590,572. There were 317,705 Canadian-born, 221,495 natives of the British Isles, 7,256 born in other British possessions and 37,391 born in the United States among the enlisted members. The division of non-native British was as follows: English, 150,468; Scottish, 46,850; Irish, 19,452; Welsh, 4,780. The Canadian-born racial division was: English-speaking, 259,872; French-speaking, 57,833; U. S. born, 37,391; other nations, 6,725. By Ontario, 245,677; Quebec, 82,793; New Brunswick, 25,864; Nova Scotia (includes P.E.I.) 33, 342; Manitoba, 66,319; Saskatchewan, 37,666; Alberta, 45,146; British Columbia, 51,438; Yukon, 3,327. According to racial origin the decennial census of Canada computes the poulation of British origin at 56.40 per cent of the total, and that of French origin at 27.91.—St. John Telegraph-Journal.

Horn Blowers

The Toronto Telegram carries an editorial on the motorist horn-blower. In Hong Kong in the past year there have been 60 foreign drivers and 1,035 Chinese drivers penalized for blowing the old horn when they should not have. And 69 "chronics" had their licenses cancelled. Our contemporary suggests that Toronto authorities take some energetic steps to stop this nuisance.

And what a nuisance it is? There is the taxi-driver who never gets out of his car, but honks for his charge. There is the worst pest of all, the woman driver who commands right of way, and scares the daylight out of the average pedestrian. Why should anyone get this way at the wheel? And what about the pest who honks and honks because the green light does not come on after the red speedily enough to suit him?

There is a whole lot of bad manners in traffic, but try and tell some of them about it?—St. Catharines Standard.

Concerning "Canacans"

The Peace Bridge at Fort Erie is justified.

A "war" of some years duration along the Niagara international border has been settled.

It was a "fly" war — though aeronautics had no part in its cause or cure.

The annually recurring trouble centred upon sand flies—millions of which are wont to invade both sides of the Ningara River each Summer.

Canadians called them "Buffalo flies." Americans dubbed them "Canada flies."

Both wrong—or only half-right. They're "Canacan" flies. To wit, Canadian and American.

Who says so? Professor William Wild, entomology associate of the Buffalo Museum of Science.

The learned professor seems to have good grounds—or rather good waters—for his findings in the fly war. Says he: "The two countries share alike in their ownership of these flies, which breed in the middle of the swift-running Niagara."—Stratford Beacon-Herald.

THE EMPIRE

New Zealand's Defence

Observers were uneasy two years ago when the British naval personnel fell below the 100,000 mark. The Japanese has been rising and now stands at 90,000, while that of the United States is 127,000. The First Lord has made provision in his estimates to increase the British personnel by 11,000 from its present figure of 101,000. Whether that is sufficient, in view of the long, specialized training required to supply effizient naval ratings, may be considered an open question. At least it represents a substantial increase. Viewing all these defensive preparations, New Zealand would do well to consider whether she is doing her part. She is as dependent on naval protection as Britain. Her Government is providing for the maintenance of two large cruisers on the New Zealand station, but that increased contribution is far from being proportionate with Britain's mighty expansion. — Auckland News.

Relief From Relief

Loan money is spent every year on so-called unemployment relief. Taxation is imposed also, and this double burden is a serious handicap on economic recovery. Money which remains in private enterprises is available for the expansion of industry and for the real relief of unemployment. Apart from its debiliating influence on individuals, taxation for unemployment relief militates against the relief of unemployment. It aggravates that which it is imposed to cure. Farmers cannot obtain seasonal labour, but they are taxed to maintain men who will not work. Besides having become a huge department of State in which more than £400,000 has been spent on administration, it has developed into a branch of high finance. The funds have been debited with loan flotation expenses (£94,000) and with interest and sinking fund (£400,000). These items cover the whole period over which loans have been floated for unemployment relief; but it is a scandal that taxation for benevolent purposes should be charged with the interest, sinking fund and flotation expenses on loans floated for purposes of benevolence so-called. What is sorely needed is relief from this kind of relief.—Melbourne Argus.

Urges Scientific Feeding of People

Prof. James Luck Stresses Importance of Study of Nutritive Requirements

VANCOUVER — Taking mother out of the kitchen and replacing her with expert dieticians in community feeding centres was suggested by Professor James Luck of Stanford University as a possible means of remedying the "appreciable degree" of malnutrition in the western world.

The former University of Toronto graduate, now associate professor of biochemistry at the California College, told delegates to the annual convention of the Canadian Chemical Association that "more is known and put in practice in the nutritive requirements of chickens, cows and hogs than about the nutrition of humans in respect to rearing of infants and maintenance of health.

His address was an outline of biochemical investigations aimed toward betterment of human feeding practices. He urged wider study of "optimum" or best nutritive requirements rather than the study of minimum needs which has obtained most attention so far.

He said that "at a price—largely psychological — progress along that line could be made by sacrificing the family kitchen and submitting to community feeding by public authorities under the intelligent direction of experts in nutrition."

He suggested co-operative societies might organize satisfactory "community restaurants" with similar expert guidance.

Decline of Farm Population

WASHINGTON.—Agriculture Department economists noted today a traditional sign of prosperity — a decline in the United States farm population. They said persons living on farms at the start of this year totaled 31,729,000, a decrease of 80,000 from January 1, 1936. It was the first decline since 1929.

Isolate Germ Of Paralysis

California Report — Bacteriologist Said to Have Made Discovery

GLENDALE, Calif. — The Glendale News-Press said last week that Dr. Edward Carl Rosenow, bacteriologist connected with the Mayo Foundation, had succeeded in isolating the germ causing infantile paralysis.

Dr. Rosenow first came to Los Angeles in 1934 during the infantile paralysis epidemic.

Many of his experiments, the newspaper said, were confined at Los Angeles County Hospital and he was assisted by Drs. E. T. Remmen and O. J. Sloan.

The newspaper said that it is reasonable to assume that in the near future a serum or anti-toxin to combat infantile paralysis will be developed.

News In Review

Office of the Department of Highways here confirmed building of the road and bridge. Estimate of the cost of the project which will get under way shortly could not be obtained.

P. Goldie, head of the construction firm which received the contract, visited the island during the week end and made an examination of the proposed road. The work, it is expected, will require three months.

The project will reduce the ferry crossing from three-quarters of a mile to 500 yards. At present traffic congestion has been experienced, motorists often waiting two hours to cross from the mainland to Manitoulin.

Big Lake Trout

WIARTON.—What is likely to be the champion fish for Bruce Peninsula this year was caught this week by Arnott Smith, Willard, Ohio, at Barrow Bay. The fish, a lake trout, weighed 27 pounds and measured 44 inches. He was caught on a 700-ft. copper line, with an Otter Trail troll. Considerable difficulty was experienced in landing the trout, as Mr. Smith had no gaff in the boat. He had to bring the fish close to the boat and grab him by the gills.

$27,000 Saved

ST. THOMAS.—St. Thomas Hydro users will benefit in the amount of approximately 27,000 a year with the new rates reductions that the Public Utilities Commission has sent to the Ontario Power Commission for approval.

The latest reduction in domestic, commercial and industrial power rates are made possible by the $2 per horsepower decrease in the cost of power to municipalities, announced by the Ontario Commission to take effect on August 1. The new reductions will be the second cut this year, as the present rates were only put into effect on Jan. 1 last, being made possible by the $2.50 per horseoower reduction of last fall.

General Manager P. W. Peart, of the local commission, stated that the reductions on Jan. 1 represented a saving of $13,500 to local power users while the proposed new rates will mean an equal amount. The local commission is also seeking permission to reduce the cost to local consumers of flat rate water heaters by 10 per cent from Aug. 12.

New Economic Accord

LONDON, Eng.—Prime Minister Neville Chamberlain told the House of Commons this week that Premier Paul Van Zeeland, of Belgium, fresh from talks with President Roosevelt, is further pursuing the possibility of a broad international economic agreement.

The prime minister tartly refused, however, to disclose any details of negotiations thus far.

Van Zeeland, he said, is proceeding with inquiries "to endeavor to ascertain how far it is possible to obtain agreements on certain general principles of economic policy among a number of states, including the signatories of the tripartite currency agreement."

France, Great Britain and the United States, using huge gold-purchase funds, have co-operated under the tripartite agreement in working toward currency stabilization.

Chamberlain returned an abrupt "no" to Laborite Emanuel Shinwell's question whether Van Zeeland is "the only vehicle of the United Kingdom's expression."

(The Belgium premier was delegated by France and Great Britain to sound out world opinion on a possible international economic agreement that would spur world trade through the elimination of trade barriers.

(He had long talks with President Roosevelt in late June and early this week reported to the British Prime Minister on the results of his visit.)

Bridge to Manitoulin

SUDBURY.—Dream of a decade will be fulfilled this summer when all-year traffic communication will be established to Manitoulin Island by road and bridge connecting the mainland and Gosy Island, part of Manitoulin Island.

The remaining 500 yards from Goat Island to Manitoulin will be covered by ferry. Fast water in the channel prevents ice forming and permits operation of the ferry in winter.

NEWS PARADE

Commentary on the HIGHLIGHTS OF THE WEEKS NEWS ---

By Peter Randal

Control of the Press

Twenty years ago a great war swept away the hampering bonds of tradition. Men dreamed of a golden age in which peace and good will were to take the place of the old phrase concerning might and right. Those men are either dead or gone from the seats of the mighty. Freedom has given place to a new slavery. One of the traditions to go in the war ruins was the world conception of democracy. Today democracy is facing an unequal struggle against the forces of dictatorship as vested in Fascism and Bolshevism. By dictatorship is not not meant the placing of political power alone in the hands of one man, but the very lives and thoughts of his people. In many sections of the world civilized people no longer possess the right to think or to speak other than as they are commanded so to do. Their right to self government has gone, and gone with it the right to a free press. That something of the same order may well come to pass in our own world is not beyond the powers of imagination. Last week, eleven large newspaper associations met in Chicago to protest the attempts of the American Newspaper Guild to obtain closed shop conditions for editorial workers. Such attempts, if successful, would mean a virtual control of the voice of the people. Of particular significance is the fact that the American Newspaper Guild is an affiliation of the C.I.O. and thus bound in many respects to support its cause and its dictates in opposition to all others. In other words, America is entering upon the first stages of a dictatorship.

C. I. O. Battle

At the present time, no one is able to predict the future of the C.I.O. A recent straw vote taken by the magazine, "Fortune" would seem to indicate a growing sympathy for the American Federation of Labor among a great many people who are beginning to look upon it as a bulwark in time of dire need. The threat of press control is only one indication of just how severe the battle is likely to be. John L. Lewis has determined to take his organization beyond the ranks of industrial workers into the realm of the white collar people. Only the other day, we received a copy of a handbill being distributed to workers in American publishing houses. The handbill clearly stated the affiliation of its sponsors with the C.I.O.

Workers' Dictatorship

There is more than one way to the powers of dictatorship. Lewis has stated his intention of enlisting 5,000,000 workers in his organization. The power that such an organization would be able to give if his plans are ever completed holds possibilities above and beyond any government.

Government to "Marriage"

Last week, we commented on the change of governments in France. Ex-Premier Blum is again in the headlines though for quite a different cause than the downfall of a government. Back in the days before he thought of governments, the ex-premier wrote a book on marriage. The book is to be published in New York soon and is predicted as one of the coming best sellers.

Canada In The News

Canada made world news last week in several connections. For the hungry and the speculator, there was the news that Canada's huge wheat surplus has finally been liquidated. For the hungry, the news meant higher wheat prices when coupled with rumours of light crops. For the speculator, it meant business, better Canadian business all round. Canada's wheat carry over amounted to 211 million bushels in 1934, so the task accomplished by the Wheat Board may be considered as something of an achievement especially in view of the fact that it was done with no loss to the government.

Then there was the story of Prime Minister Mackenzie King's visit to the Chancellor of Germany. Officially it was designated as a purely personal affair but men in a position to know of Mr. King's influence in Empire affairs are wondering if the seemingly innocent visit may not have decided effect on British policy. As the most influential of the Dominions, Canada's statesmen are taking an increasingly important part in Empire decisions.

Prolonged Rainfall Needed

EDMONTON. — With Edson district blazes reported definitely under control, battle against forest fires in Alberta centred on six persistent outbreaks in the McMurray district, 300 miles north of Edmonton, Provincial forestry officials stated.

Raging since June 30 in the Edson area, 150 miles west of here, scattered conflagrations yielded to efforts of more than 200 fire-fighters. Gasoline engine pumps and back-firing methods turned the tide of battle in favor of the weary crews. The fires were placed under control before they destroyed valuable timber.

Despite valiant efforts of the men fighting them, the McMurray blazes probably will be extinguished only after a prolonged rainfall, J. A. Hutchison, Provincial forestry official said.

Youths Ride Bicycles From Saskatchewan to Kitchener

KITCHENER. — Two Saskatchewan youths are resting here with friends on a bicycle trip that will take them from Wadena, Sask., to Boston, and return, a distance of 4,000 miles.

The lads, Tom Ellis, 20, and Harold Enderud, 20, expected to make the entire journey on less than $100 each. They have already travelled 1,600 miles in Canada and the United States without a puncture.

"You have to be careful on the highways. Nobody pays any attention to you. So far we have escaped accidents but we had a near brush in Minnesota. The traffic in that State is terrible. There is no highway patrol at all and the motorists drive as they please," they declared.

The boys, who travel seventy-five miles a day, cook all their meals and carry a "pup" tent to use when the weather is bad. Otherwise they sleep under the stars.

Four Lads Watch Companion Drown

HALIFAX.—Powerless to lend aid because they could not swim, four companions watched Ronald Power, 15, drown in Halifax Harbor. Power stepped off a ledge into deep water and was unable to return to shore.

Headed For Games

The South American soccer team, representing Chile, Argentine, Uruguay, Peru and Brazil, pictured as they arrived in New York City en route to the Pan American Exposition in Dallas, Texas.

A Real Saving

FOR READERS OF THIS PAPER

FRIENDS! We are combining our newspaper with these two great magazine offers, so that you can realize a remarkable cash saving on this year's reading. Either offer permits a choice of top-notch magazines with our paper, and, regardless of your selection, you will say it's a bargain.

YOU GET THIS NEWSPAPER FOR 1 FULL YEAR

Semi-Lustre

THE MARVELLOUS NEW GUARANTEED WASHABLE SATIN ENAMEL FOR WOODWORK, FURNITURE—WALLS

Attractive new rooms can be created overnight with Semi-Lustre, the amazing new *washable* satin-enamel. Semi-Lustre gives you the soft, light-reflecting, non-glare surface so much in vogue, and makes redecorating as fascinating as choosing a costume. The 13 lovely pastel shades give you unlimited scope for individual color schemes.

Think of the immense practical advantage of a *washable* finish! Unsightly finger marks and stains can be removed instantly with soap and water—without injury to the delicate satin finish.

Semi-Lustre is easily applied, dries quickly, and is DEODORIZED. Try this amazing new finish—the 10-day introductory offer enables you to do so at a great saving in cash!

37-9

FOR 10 DAYS ONLY

So that you may try out Semi-Lustre—in your kitchen . . . your bathroom . . . on furniture or woodwork—we are making this sensational introductory offer. Fill in your name and address on the above Cash Savings Certificate. Tear it out and take it to your paint store. It entitles you to any quantity of Semi-Lustre you want at the above special prices. But only during the 10-day period from April 28 to May 8 inclusive. After May 8 the regular prices on Semi-Lustre will prevail. We suggest, therefore, that you use your Cash Savings Certificate at once.

OBITUARY

Mrs. J. M. Dolson

Mrs. J. M. Dolson, who had been, prior to her marriage, home demonstrator under the Department of Agriculture in Peel County for twelve years, died after a lengthy illness. Daughter of Mr. and Mrs. Angus McIntosh, she was born north of Saskatoon, at a trading post conducted by her father, who stuck to his store throughout the Northwest Rebellion, trading with soldiers and Indians.

In 1893 she came with her parents to Parkhill, Ont., and later entered the Ontario Agricultural College, where she trained for the post of home demonstrator. Following her marriage she took an active interest in the Women's Institutes of Peel County and was president of the county branch for several years. She was a member of the United Church. Surviving are her husband, her parents and one brother, Lawrence, Parkhill.

The funeral took place Saturday afternoon to Cheltenham cemetery and was very largely attended.

JUVENILE LACROSSE

I told you last week to watch for results on the 13th. Well, we got them. The lads slipped into a high-flying Brampton team, and in spite of the jinx on the day, beat them at their home arena 10-8. It was a close, hard game and very good to watch. The play was clean, but rough and fast and the home team showed lots of the same old spunk that brought them through last year.

As regards individual playing, everyone played an excellent game. Longworth got four goals, a result of clever stick handling and headwork. The old stand-bys, Schnurr and Redick, got two each, Herrin accounted for one, and Rice, who is a marked man since the first game, tallied the other, in spite of the close guard Brampton kept on him. Bill Evans, in goal, played a good light game all through.

Don't forget the next home game, Friday, July 16th, when we meet East York. With the lads back from their hay-pitching (or whatever they do in the army) we promise a good game, and, we hope, another win.

A. GRABB.

Flame-Ignited Explosive for Engines Is Very Old

The history of the internal combustion engine goes back hundreds of years. The Encyclopedia Britannica records the earliest proposal to utilize explosions (of gunpowder) to obtain continuous motive power as having probably been made by Christian Huygens in 1680 and by Papin and the Abbe Hautefeuille later. Street in 1794 proposed an engine driven by a flame-ignited explosive mixture of vaporized spirits of turpentine and air, this being regarded by Sir Dugald Clerk as the first real gas engine described in Britain. In 1820 W. Cecil described his actually working hydrogen-air gas engine.

Other early inventors of similar engines, states a writer in the Detroit News, were Samuel Brown, William Barnett, Lebon, Barsanti and Matteuci. Barnett suggested the principle of compression; Lebon in 1799 had used an electric spark to ignite the gas and had also referred to the principle of compression. Etienne Lenoir in 1860 patented a gas engine and two years later built and drove the first gasoline-driven vehicle. Dr. N. A. Otto of Cologne, Germany, in 1876 invented an engine in which the gas was compressed before being exploded; this improvement so increased the efficiency of the internal combustion engine that it began to be considered as a competitor of the steam engine. His four-cycle engine was further improved and adapted to motor cars by Gottlieb Daimler of Wurttemburg and Carl Benz of Mannheim in 1885 and 1886.

Court Jesters Employed Back in the Middle Ages

Jesters, court-fools or professed sayers of witty things and makers of amusement, were maintained by princes or nobles in courts of the middle ages and later. The dress of the jester was usually showy, or even gaudy, and toward the end of the time when jesters were employed it was always typically many-colored or motley; but as jesters in some early courts were men of considerable intellectual ability, and in some cases of good family, their dress was not always conspicuously distinguished from that of those with whom they mingled.

The bauble, sometimes very small and of rich materials, was the only certain badge of the jester's employment.

The fools of Shakespeare's plays indicate a certain lowering of the rank of the jester in the Sixteenth and Seventeenth centuries. As far as is known, the last one employed in England was Archie Armstrong (died in 1672), the court of James I, and afterward of Charles I.

Inventive Genius Dangerous

The mechanical clock, the ancestor of our modern clocks and watches, originated in the Middle ages; and, like everything which started in that period, its beginnings are concealed by a haze of romance and fable. Tradition says that the first clock was invented by a French monk named Gerbert, one of the most accomplished scholars of his age. About 990 A. D. he is supposed to have produced some kind of mechanical time-telling contrivance which caused a sensation—so much so that he was promptly accused of being a sorcerer. The accusation did not "take," and Gerbert lived to enter the Vatican as Pope Sylvester II, but his experience shows that inventive genius was a risky thing to have in those days.

Early Transportation

The mode of transportation for the sick and injured in the pioneer days—when a vehicle was not at hand—was a long stretcher between two horses. Two long poles were fastened from the packsaddle of one horse to the packsaddle of another horse, and a network of bark was strung between the poles. On this the sick or injured person was laid to be carried to a place where medical attention could be obtained.

Oldest College Cheer

The oldest college cheer is claimed to be the Princeton locomotive cheer: "Tiger, tiger, tiger! Sis, sis, sis! Boom, boom, boom, Ahh!" Invented by an unknown soldier of New York's Seventh regiment on April 30, 1861, the cheer caught the fancy of Princeton undergraduates who heard it that night as the Seventh passed through the college town on its way to war.

Raffiesias, Parasitic Plants

Raffiesias are remarkable parasitic plants of the East Indies which attack various vines of the grape family. The only visible part of the plant consists of a large flower. A species native to Sumatra bears a flower three feet in diameter which has the appearance of decomposing flesh and exhales a carrion-like odor which attracts carrion insects.

Trinidad Long Under British

Southernmost of the chain of British and French islands that form the eastern boundary of the Caribbean sea, Trinidad has been under the English flag since 1797, when British troops landed there during a British war with Spain. Earlier, in 1595, an expedition under Sir Walter Raleigh invaded the island and burned the capital.

Island of Malta Really Made Up of Five Islands

The Island of Malta, forming as it does the most strategic naval base in the Mediterranean and Britain's most formidable station on the short route to India, in reality consists of five islands, four of which could be contained in the largest, which gives the group its name and which has an area of slightly less than 100 square miles. Two are mere rocky pinnacles which are used for target practice by the British fleet. The others are inhabited and have been likened to the Three Bears with Malta on one side, Gozo, the middle-sized Bear on the other and Comino, the Little Bear in between.

Archealogically the islands present a pageant of western civilization from the dolmens of the Stone age to the most modern of naval bases; and the patois of the native Maltese is said to be the only remnant of the language of the Phoenicians, albeit it contains admixtures from the tongues of the Greeks, Romans, Saracens, Normans, Spaniards, French and English, who at various times have been the overlords. The remains of three temples built of great stone slabs attest the existence of pre-historic races, as do parallel tracks which have never been satisfactorily explained, but in solid rock and extending down into the sea. Gozo has been identified as the scene of Homer's legend of Ulysses and Calypso.

From tombs and other structures built by them it is estimated that the Phoenicians settled in Malta about 1000 B. C., supplanting a civilization comparable in some respects to the Minoan of ancient Crete, and later the islands were used as one of their bases by the Carthagenians in their disastrous wars with Rome.

"Commodity Dollar" Was Invented Many Years Ago

The "commodity dollar" was actually in use in Hingham a century ago, states a writer in the Boston Globe.

Manuscripts uncovered in the Watertown Public Library by the Federal Historical Sources Survey show that Hingham paid its minister on a commodity dollar basis in 1803. The minister was Rev. Henry Ware, afterward the first Hollis professor of divinity at Harvard.

Rev. Henry Ware went to Hingham in 1787 and the inference is that his salary was $500 a year, enough and plenty in a period of low prices. But during the late seventeen-nineties there had been a "very great demand and high prices for all the necessaries of life" and the minister was at his wits' end to make both ends meet, for his salary remained stationary.

The remedy adopted by the parish was to adjust his pay on the basis of the average prices of the great staples between 1787 and 1803, and this settlement of the problem was accepted by the minister.

Florence Nightingale Pledge

The wording of the Florence Nightingale pledge follows: "I solemnly pledge myself before God and in the presence of this assembly, to pass my life in purity, and to practice my profession faithfully. I will abstain from whatever is deleterious and mischievous, and will not take or knowingly administer any harmful drugs. I will do all in my power to elevate the standard of my profession, and I will hold in confidence all personal matters committed to my keeping, and all family affairs coming to my knowledge in the practice of my calling. With loyalty will I endeavor to aid the physician in his work and devote myself to the welfare of those committed to my care."

Happiness

The happiness of today is as important as the happiness of tomorrow. You cannot postpone your enjoyments and lump them in one mass to take them after you have gained a certain position or won a fortune. You must take them, if you take them at all, as you go along. The capacity to enjoy is not a constant element in human life. There comes a time when desire fails. A man may deliberately sacrifice his enjoyments and reap thereby great moral advantage, but he cannot postpone them.

Lavender Favorite Perfume

Lavender is one of the favorite perfumes the world over and enormous quantities of the dried flowers are used annually to make the perfume and other lavender products. The yield of oil varies from year to year depending on the weather and the age of the bushes. The plants are very tender to any frost. The oil has to be stored from three to five years before it is sufficiently matured for use in the perfumery and other trades.

Wasting Time

To learn never to waste your time is perhaps one of the most difficult virtues to acquire. A well-spent day, is a source of pleasure. To be constantly employed and never asking, "What shall I do?" is the secret of much goodness and happiness. Begin, then, with promptitude, act decisively, persevere; if interrupted, be unruffled, finish it carefully, —these will be the signs of a virtuous soul.

Lacrosse

Juvenile Box Lacrosse

Streetsville Defeats East York 16—1

They Won Again In Toronto Last Night

By Alex Grabb

Last Friday night, in Streetsville Streetsville beat East York 16—1.

The game provided the locals with a chance to get in some real practice at goal scoring. (Judging by the turnout at the practices, it's about the second they've had) Anyone on the team who had enough ambition merely tip toed up the field and laid the ball in the net, very quietly so as not to waken the goalie, while the scoremarkers threatened a sit-down strike for less work

Streetsville won on the 21st at St Vincent's 12—1. The play in this game was clean and fast and the Streetsville lads were cheered by the spectators for their clever passing attack and close back check.

On the 24th, that's next Saturday, Brampton will be coming down to get revenge for the beating we gave them on the 13th. Judging by that game, this should be a humdinger. We hope there'll be a good crowd because all the team needs is support to bring it to the top of the league.

TRINITY CHURCH NOTES

Sunday School Picnic

On Wednesday, July 21st, the annual Sunday School picnic was held at Miles' Park. Fine weather added to the enjoyment of the occasion. During the afternoon a baseball game was played and the races run off. The children found a good deal of amusement with the elephant, donkey rides etc.

We are indeed grateful to Mr. Miles for the use of his Park, and to those who helped to make the picnic a success

Garden Party

The annual garden party of Trinity Church, Streetsville, was held on the Church Lawn Wednesday evening July 14th. In spite of threatening weather there was a most gratifying attendance, some 200 being present. The programme, which was secured through the Canadian Vaudeville Exchange, Toronto, presented an exceptionally varied entertainment which seemed very acceptable to the audience. During the inter mission refreshments were sold at the various booths.

The thanks of those in charge are due to all whose help and cooperation made the evening such a success.

The Open Column

Citizens, go sharpen a pencil. There is an election in the immediate offing. This Fall, so we are told, and all the signs point to it. Most noteworthy of the straws blowing in that direction with the election wind is the hospital or sanitarium recently obtained for Brampton by Hon. D. Marshall.

And, while on the subject of Brampton, let us remark that there is a better spirit prevalent in the count y town than for many a long year. The depression probably knocked a lot of the morale out of the Bramptonians, but, with a snappy, business-like council holding the reins and chairs of office, the town is stepping right up to the front. First a lacrosse box, then a swimming pool, then a $400 advance for the band to buy new uniforms. All in one summer, too.

One illustration of the community spirit that failed to jell, however, was the request of one of the town purveyors of malt beverages (if rumor doesn't lie about him) that reporters keep a report of the trial of a Brampton gentleman out of the paper. The defendant was convicted of having, and the aforementioned purveyor wanted it all hushed "or the brewery won't pay him what it owes him." The scribes were hard-hearted, and the report went in.

An acquaintance of ours described the community spirit of three chief centres, including Streetsville, the other day, in somewhat the following way: "In Bolton, everybody in Bolton is swell, and nobody else is worth a hoot; in Brampton, everybody's swell, and in Streetsville, none of the residents like any of the other residents."

Considering the fact that the bowling club has plenty of action every week, and that there are four churches carrying on as usual, the latter promise would appear to be all wet. Maybe the gentleman who suggested it was all wet, also. But it might well be worth the while of the villagers to give themselves the once over and see if they are really producing anything in the way of community spirit.

And about that, too: We don't get paid for writing this column, we may as well admit, and so we can say what we darned well feel like saying without reference to the editor, so let's discuss, momentarily, the erection of a new school, as proposed by the High and Public School Boards. First, however, let it be plainly understood that we are not being influenced by the editor, who is a member of the High School Board.

Streetsville, in our opinion, will within a few years, ten to fifteen, we reckon, become the centre of an expensive residential suburb of Toronto. Building in that direction has already begun, if you will look at the Streetsville-Erindale road. The city is expanding, as witness the Malton airport, and the projected sanitarium. There will be need of first-class educational facilities, and, although it is evident enough that the Streetsville residents will bear the brunt of paying for the proposed school at first, the day will come, we predict with the greatest of confidence, when the school will be crowded, and Streetsville will be a much busier centre than it is now, with the result that the burden of taxation will be greatly lightened for the present taxpayers.

But, let the new school fall through, and Streetsville will be passed over as the nucleus of another Forest Hill village. There must be some encouragement to prospective purchasers to buy land in the district. A good school would be a leading enticement.

Eventually, if our visualization of development in the south of Peel is worth a hoot, Streetsville must be prepared to provide public utilities equal to those of the city of Toronto. We would advise the town fathers to get an early hold on plans and specifications for a water supply system to replace the present one. It has been suggested that a shallow well installation on the Credit would be good enough, but we advise Streetsville to hunt for a good spring bed. Prosperity is coming b a c k, whether we like it or not, and Streetsville had better buy a tub to catch the golden rain, rather than an umbrella to keep it off.

Of course, we admit, gratuitous advice is worth just what it costs.

LET US SMILE

The business magnate surveyed his son, who had just left college, with anger and disgust.

"You grow more and more like a conceited, hair-brained, helpless idiot," he growled.

Just then a business friend of the old gentleman entered the office and greeted the youth.

"Hello, Charlie! Back again, eh?" exclaimed the visitor. "You're looking more and more like your father every time I see you."

Mr. and Mrs. William Couse returned last week after their trip to England for the Coronation. They also visited other countries and had a most delightful time.

District News

Milton Barbers have raised the price of haircuts from 25c to 35c. But please don't tell the local barbers.

A number of Streetsville Overseas Veterans attended the church parade of Zone 13 at Oakville on Sunday. Many branches from the surrounding district were present.

St. James Church Sunday School held picnic at Peel Park on Saturday. Kenwood Football Club also visited the Park over the week-end.

Mr. and Mrs. D. Dixon of New Toronto were injured on Sunday when their car and another one were in an accident at the Boyne, near Milton.

Mr. and Mrs. Cameron Deforest, Milton, newlyweds, lost all their furniture when fire destroyed their home last week.

Joseph Dickson, Brampton, was fined $100.00 and costs on a charge of illegal possession of liquor. Chief Herkes laid the charge and Magistrate Bull tried the case.

Lakeview Women's Association held a picnic at Huttonville Park last Saturday.

Business was brisk in the village Saturday night and the front street was packed with cars. Everybody says business is getting better every day in every way.

A religious sect of men held a meeting on our main street, Saturday night, and had a handful of people for an audience. They may be doing some good in this way, but the public are very skeptical.

The funeral of Jessie McGregor, widow of the late Rev. A. R. Linton of Port Credit, took place to Dixie cemetery, July 17th.

The Independent Foresters of Brampton are putting on a big benefit concert in Rose Bowl Park, Brampton, Wednesday, Aug. 11th, in aid of the Town Band. There will be over 100 entertainers. The admission is only 25c and there will be a lucky ticket prize, when a beautiful solid walnut table will be drawn.

Monday, Aug. 2nd will be Civic Holiday for Toronto, Streetsville and a few less important places.

Mrs. Morrison and family of Toronto visited with her sister-in-law, Mrs. D. Lindsay last week-end.

UNITED CHURCH NOTES

The Rev. Geo. H. Purchase, B.A., of Elmvale, has commenced his vacation and is taking a boat trip to St. Johns, Newfoundland, and the first of August will attend the summer school for clergymen at the Macdonald College, St. Anne de Bellevue, Quebec.

The services on Sunday evening in the United Church, Streetsville, will be discontinued after next Sunday's service until September.

In his discourse next Sunday night Mr. Jones will discuss the alternatives to belief in God and the inwardness of belief, what belief involves, etc., and will show that belief in God is far more than an intellectual assent, that it is action, adventure and trust. Everyone is invited.

The Young People's Class, "Nulli Secundus", is taking studies in the construction of the book of Genesis and some of the problems of the book will be discussed during the next two weeks. As a preparation for next Sunday read the first two chapters of Genesis. Why are there two stories of Creation? In what points do these stories agree and differ. Notice the manner of speech. Compare carefully Genesis, Chapter 1, verse 27 with Chapter 2, verse 7. Compare Chapter 1, verse 21, with Chapter 2, verse 19. Notice especially such words as create, formed, and made, caused, etc. This alert class of young people invites you to join with them next Sunday at 10 a.m. in the basement of the United Church.

Last Sunday solos were sung in the United Church by Mrs. J. H. Hare and Miss Beatrice M. Jones.

MALTON

Palestine Primitive Methodist church and Wm. Perkins Bull, K.C., local preacher in the old Methodist Church of Canada, will celebrate their birthday together on Sunday, 25th July, at 11 a.m. Daylight Saving Time.

Mr. Bull will outline the history of Primitive Methodism in Peel, and how it built the county town and the county.

Services at Harrison's and Grahamsville are being withdrawn to permit a general circuit rally. Out-of-town visitors will include His Worship the Mayor of Toronto and Mrs. Robbins, the latter born on the Snead farm within sight of Palestine church, and daughter of one of the most interesting local preachers on the venerable Etobicoke circuit.

New Minister Picked on First Ballot

Rev. J. Y. Fraser Goes to Victoria Church, Toronto. in September
